APPLIED MATHEMATICS, PhD

The Applied Mathematics PhD program is a joint program with The University of Alabama in Birmingham and The University of Alabama in Huntsville.

Admissions

In addition to the minimum Graduate School admission requirements, to be considered for regular admission an application must include:

- A resume/CV
- 3 letters of recommendation.

Scores on the general test of the GRE are optional. We encourage applicants to submit GRE scores if they think doing so will boost their chance of getting admitted. However, applications with and without GRE scores will both get full consideration.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Students must complete 54 coursework hours and 24 dissertation research hours in order to qualify for the PhD in Applied Mathematics. The grade of each course has to be at least a B. The student's supervisory committee and the Joint Program Committee must approve the selection of all these courses. At least 18 hours must be in a major area of concentration, selected so that the student will be prepared to conduct research in an area of applied mathematics, while at least 12 hours have to be in a minor area of study, which is a subject outside mathematics.

These 18 credit hours can come from any of the following courses. This is not an exhaustive list courses options. Other options may include from The University of Alabama in Huntsville and The University of Alabama in Birmingham may be selected with advisor approval.

- MATH 510 Numerical Linear Algebra
- MATH 511 Numerical Analysis I
- MATH 512 Numerical Analysis II
- MATH 520 Linear Optimization Theory
- MATH 521 Non-Linear Optimization Theory
- MATH 541 Boundary Value Problems
- MATH 554 Math Statistics I
- MATH 555 Math Statistics II
- MATH 557 Stochastic Processes I
- MATH 559 Stochastic Processes II
- MATH 610 Iterative Meth Linear Sys
- MATH 611 Numerical PDEs
- MATH 642 Partial Differential Equations
- MATH 644 Singular Perturbations

A minor area of study

These 12 credit hours can come from graduate level courses offered by the Departments of Physics, Computer Science, Aerospace Engineering and Mechanics, Chemical and Biological Engineering, Economics, or Applied Statistics.

Additional Courses

These 24 credit hours can come from graduate level courses offered by the Departments of Physics, Computer Science, Aerospace Engineering and Mechanics, Chemical and Biological Engineering, Economics, or Applied Statistics.

Dissertation

Transfer Credit

See the Graduate School policy.

Doctoral Plan of Study Requirement

The programs of study require prior approval by the Joint Program Committee. See also the Graduate School Policy on the Doctoral plan of study.

Joint Program Examinations

Every student planning to earn the PhD in Applied Mathematics must pass the two Joint Program Examinations. One exam covers real analysis. The other exam covers linear algebra and numerical linear algebra.

The exams are administered twice a year. During each administration, a student may take one or both of the exams. A single exam may be attempted at most twice, with a maximum of three attempts allowed for passing both exams; those who do not will be dropped from the program.

Comprehensive Exam

Students will take the Comprehensive Qualifying Examination after three years of graduate studies. The examination will cover the program of study, with a written and an oral component, and will be jointly prepared and graded by the student’s Graduate Study Supervisory Committee. This will consist of six faculty members: the student’s advisor serves as Committee Chair; two others from the student’s home department; one faculty member from each of the Mathematics departments at UAB and UAH; and one from outside the department in the student’s minor area. The written component will consist of three parts; two parts will be devoted to the student’s major area, and one part will be devoted to his minor area. Three hours will be allowed for each part. The oral portion will cover the entire program of study. Copies of old exams are available on the department’s website.

If the judgment of the Supervisory Committee is that the student’s performance on the test is not satisfactory, then they may, at their discretion, and without obligation, elect to give the test at most one additional time. The second test, if given, will conform to the above policies for the first test. Students must pass both the written and oral component by the end of their fourth year of full-time graduate studies; those who do not will be dropped from the program.
Admission to Candidacy Requirements
Advancing to candidacy requires the passing of the joint program examinations, the language requirement, the comprehensive exam, the completion of all the course work as listed on the approved plan of study, and the approval of the dissertation subject by the supervisory dissertation committee.

Continuous Enrollment Policy
See the Graduate School policy.

Dissertation Requirements
See the Graduate School policy.

Time Limits for Degree Completion Requirements
See the Graduate School policy.

Student Progress Requirements
Coursework may be finished within two years after the Qualifying Exam. Research should be started while coursework is still underway. Typically, work on the thesis itself takes 12-18 months. Therefore, depending on your background, it can take four to six years to obtain both the M.S. and the Ph.D. degree.

Additional Requirements
Language Requirement
The language requirement for each student will be set by the Joint Program Committee with the approval of the appropriate Graduate Dean.
