COMPUTER SCIENCE, MS

The University of Alabama’s Computer Science Department offers interdisciplinary graduate programs leading to master’s and doctoral degrees.

Students in the master’s degree program may pursue either a thesis or non-thesis option.

Research activity in the department includes active investigations in software engineering, cyber security, big data analytics, distributed autonomy and human-computer interaction, autonomous vehicles, networking and its applications, and computer science education.

Admissions

In addition to meeting the admission requirements established by the Graduate School, students applying for graduate study in the department must also meet the following general requirements:

• Demonstrated competence in programming
• Completion of the equivalent of the department’s undergraduate core computer science curriculum
• Applicants who present most but not all of these qualifications may be considered for Admission with Permission to Continue.
• It is strongly recommended that students who wish to be considered for funding opportunities submit a score from the GRE general exam.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Master of Science

Departmental degree requirements for the MS degree, which are in addition to those established by the College and by the Graduate School, are as follows for Plan I and Plan II students:

• Each Plan I candidate must earn a minimum of 24 semester hours of credit for coursework, plus a six-hour thesis under the direction of a faculty member.
• Each Plan II candidate must earn a minimum of 30 semester hours of credit for coursework, which may include a three-hour non-thesis project under the direction of a faculty member.
• Unlike the general College of Engineering requirements, graduate credit may not be obtained for courses at the 400-level.

Master of Science - Thesis Option (Plan I)

Code and Title

Core Course Requirements

Select One Course from each of the Three Areas

Software Courses:

CS 503 Programming Languages
CS 507 Software Interface Design
CS 516 Testing and Quality Assurance
CS 520 Software Evolution
CS 544 Software Security
CS 545 Software Reverse Engineering
CS 630 Empirical Software Engineering

Systems Courses:

CS 538 Computer Comm & Networks

Elective Courses

Any graduate-level CS course. No more than 12 hours total can come from:

CS 591 Special Topics In CS
CS 692 Independent Study

Total Hours 30

Master of Science - Non-Thesis Option (Plan II)

Code and Title

Core Course Requirements

Select One Course from each of the Three Areas

Software Courses:

CS 503 Programming Languages
CS 507 Software Interface Design
CS 516 Testing and Quality Assurance
CS 520 Software Evolution
CS 544 Software Security
CS 545 Software Reverse Engineering
CS 630 Empirical Software Engineering

Systems Courses:

CS 538 Computer Comm & Networks
CS 548 Network Security
CS 557 Computer Systems Architecture
CS 581 High Performance Computing
CS 606 Analyz Operating Systems
CS 613 Adv Computer Comm & Networks
CS 618 Wireless Mibile Ntwrkwk Protol

Elective Courses

Any graduate-level CS course. No more than 12 hours total can come from:

CS 591 Special Topics In CS

Courses taken outside of CS are subject to the approval of the student's advisor and the Graduate Program Director.

### Total Hours

30

### Transfer Credit

Information on transfer credit can be found here.

### Accelerated Master's Program

Computer Science and Cyber Security students in the AMP program are allowed to count a maximum of 12 hours towards both the bachelor's and graduate degrees. Students are required to have a GPA of at least 3.75 for admission.

The Graduate School AMP Program page can be accessed here.

### Comprehensive Exam

The student will complete a comprehensive exam. This exam is scheduled with the Graduate Program Director in the semester in which the student intends to graduate.

### Plan I - Thesis Process Requirements

- The student must select a thesis advisor and a thesis committee. The committee must contain at least four members, including the thesis advisor. At least two members are faculty of the Computer Science department, and at least one member must be from outside the Department of Computer Science.
- The student must develop a written research proposal that contains an introduction to the research area, a review of relevant literature in the area, a description of problems to be investigated, an identification of basic goals and objectives of the research, a methodology and timetable for approaching the research, and an extensive bibliography.
- The student must deliver an oral presentation of the research proposal, which is followed by a question-and-answer session that is open to all faculty members and which covers topics related directly or indirectly to the research area. The student's committee will determine whether the proposal is acceptable based upon both the written and oral presentations.
- The student must develop a written thesis that demonstrates that the student has performed original research that makes a definite contribution to current knowledge. Its format and content must be acceptable to both the student's committee and the Graduate School.
- The student must defend the written thesis. The defense includes an oral presentation of the thesis research, followed by a question-and-answer session. The student's committee will determine whether the defense is acceptable.

### Plan II - Non-Thesis Process Requirements

- The student may elect to replace 3 hours of course work with 3 hours of CS 598 Non-Thesis Research.
- The non-thesis research should be proposed in writing in advance, approved by the instructor, and a copy placed in the student's file.

### Time Limits for Degree Completion Requirements

Information on time limits for degree completion can be found here.

### Student Progress Requirement

Student progress requirements are located here.

### Academic Misconduct Information

Academic Misconduct information can be found here.

### Withdrawals and Leave of Absence Information

Information regarding withdrawals and leave of absences is located here.

### Academic Grievances Information
