METALLURGICAL ENGINEERING, MS

The MTE department is one of only eight accredited metallurgical degree granting institutions in the United States. Its core emphasis in metallurgy and materials provides students depth in structure-processing-property relationships.

Admissions

Prospective students will need to provide a statement of purpose, official academic transcript and references. International applicants (non-native English speakers) will also be required to complete a provisional language exam (TOEFL or IELTS or PTE.) Regular admission requirements are >3.0 GPA and >=79iBT TOEFL, >=6.5 IELTS, >=59 PTE. Competitive MTE entering graduate applications have scores exceeding these minimums.

See the Admission Criteria section of this catalog for more information.

Curricular Requirements

Plan I (thesis) is the standard MS degree plan. However, in exceptional cases, a student who has the approval of his or her supervisory committee may follow Plan II (non-thesis). A student who believes there are valid reasons for using Plan II must submit a written request detailing these reasons to the department head no later than midterm of the first semester in residence.

Plan I - Thesis
