The Master of Science in Human Environmental Sciences is designed for graduate students who seek to improve the lives of individuals, families and communities. Students complete 30 semester hours of coursework designed to prepare them for advancement in their professional discipline. A capstone project is required during the final term of enrollment. Areas of focus within this degree program include:

- Clothing and Textiles
- Conflict Resolution (stand-alone graduate certificate is also available)
- Consumer Quality Management
- Human Environmental Sciences

Admissions
See the Admission Criteria section of this catalog for more information.

Curricular Requirements
Students in the MSHES degree program complete 30 semester hours of coursework in disciplines offered by the College of Human Environmental Sciences. This includes HES 509, Research Methods; and HES 590, Special Problems in Human Environmental Sciences; CSM 590, Special Problems in Consumer Affairs; or CTD 590, Special Problems in Clothing. The remaining 21-24 hours (7-8 classes) are drawn from graduate offerings in the area of focus. Within the Human Environmental Sciences area of focus, these may include courses from any discipline within the college which support the student’s professional development goals and for which the student has completed the appropriate prerequisites.

Student will complete degree requirements following Plan II (non-thesis process). Each student must earn a cumulative GPA of 3.0 or better for all graduate work. Grades below a ‘C’ are computed in the GPA, but they do not carry credit toward a degree.

Comprehensive Exam/Capstone Project
Students in the MSHES degree program complete a Capstone Project during their final term through enrollment in the Special Topics class that aligns with their area of focus: HES 590 for Human Environmental Sciences, CSM for Conflict Resolution or Consumer Quality Management, or CTD 590 for Clothing and Textiles.

As part of the Special Topics class, the student will work with their faculty mentor to identify an issue, topic or problem in their discipline and then develop a comprehensive document that addresses that specific focus. The final product will draw on the coursework included in the student’s specific plan of study and represent a synthesis of the major concepts from each one as they relate to the issue, topic or problem. It will include references using the citation style most often associated with the student’s discipline.
