Admission Requirements
In order to qualify for regular admission to the doctoral program, a student must have satisfied the following minimum requirements common to all three universities:

- A bachelor’s degree (or its equivalent) from an accredited college or university in engineering or one of the physical sciences
- "B"-level scholarship, either overall or for the last 60 semester hours of undergraduate and graduate credit
- A minimum score of 1000 on the Graduate Record Examination general test
- A TOEFL score greater than 550 (or the equivalent on other acceptable language examinations), for international students
- Letters of reference

An applicant whose scholastic record reveals a deficiency in one of the first three categories above may, upon recommendation of the Campus Materials Science Program Committee chairperson (on the campus to which the student has applied) and with approval of the respective graduate dean, be admitted on a provisional basis, as provided in graduate school regulations at each campus. However, that student must follow the appropriate graduate school’s policies in achieving regularly admitted status prior to taking Program Examination I (the examination on core material).

Additional information is in the Admission Criteria section of this catalog. See the Admission Criteria section of this catalog for more information.

Advisement
Prior to a student’s admission to the program, the student will usually discuss (perhaps via email) possible research areas with one or more faculty members. If the student is admitted to the program, the letter of admission will designate a faculty member as the tentative dissertation advisor. The advisor and/or research area can be changed during the course of study if it appears beneficial to the student, with the approval of the Campus Materials Science Program Committee.

The advisor will assist the student in program planning and other academic matters. The letter of admission will also designate one of the participating departments as the tentative home department (normally the department of the tentative advisor), and state whether the student will be financially supported by a Materials Science Program assistantship (some students have support from outside the program instead.)

A graduate supervisory committee will be appointed for the PhD student as soon as he or she passes Program Examination I and a research project is selected. The student and the advisor are responsible for recommending supervisory committee members, which must then be approved by the Campus Coordinator. Members of the committee will normally be selected from participating faculty in the Materials Science Program from the three campuses involved. Exceptions must be approved by the Campus Coordinator. The graduate committee normally includes the research advisor (as chairperson) and at least four other members. The graduate committee members are selected based on the student’s academic interests and area of research. At least one of the committee members is from the student’s research area at one of the other UA campuses, and another is from a department other than the home department on the home campus. The graduate committee is charged with supervision and approval of the student’s research and course of study toward the completion of all requirements leading to the degree.

Campus Materials Science Program Committee
This committee administers the program on each campus. Coordination encompasses some functions that are usually handled by a single-discipline department. The Campus Materials Science Program Committee is chaired by the campus program coordinator, who acts as director or chairperson for the program.

Degree Requirements
Qualifying, Comprehensive, and Other Program Examinations
Program Examination I covers the program’s core material. The core is divided into three topic areas:

1. structure and properties;
2. characterization and testing; and
3. thermodynamics and processing.

Program Examination I qualifies the student to enter the advanced program. It is administered simultaneously system-wide by the Tricampus Coordinating Committee, at pre-announced dates, at least once per year (sometimes once per semester). The individual campus program committees will solicit input from the faculty and assist in preparing and grading the system-wide examination. The student may choose to take two or all three parts of Program Examination I at a sitting (unless only one part remains to be taken). It is expected that a student must make at least one attempt to pass the exam during the first two years of study. All parts of the examination must be completed within a total of three years, or by the fourth administration of the exam if this occurs later than three years after admission. Failure to pass all parts of the examination after this time disqualifies a student from the PhD program.

Program Examination II includes a comprehensive examination covering material in the student’s specialization, as well as a dissertation proposal defense. This examination is normally taken near the end of formal coursework and is prepared, administered, and graded by the student’s graduate supervisory committee. The last exam is an oral exam, the dissertation defense, which also is administered by the graduate supervisory committee.

A Student Handbook describing the details of Program Examinations and other aspects of the Program is on the Program’s UA Campus website.

Candidacy and Dissertation Requirements
Admission to candidacy for the doctoral degree is contingent upon the successful completion of Program Examinations I and II (which includes the successful presentation of a dissertation research proposal.) Normally, a student is considered eligible to take Program Examination II when all of the required coursework has been completed. A department-approved Admission to Candidacy for the Doctoral Degree is submitted to the Graduate School as soon as possible after passing the program exams. See the Degree Requirements section of this
higher-level research focus, and there is a greater number of dissertation
course credits, is the essential consideration in awarding the PhD degree.

Residency Requirement
The minimum period in which the doctoral degree can be earned is three
full academic years of graduate study. The student must spend the final
or penultimate academic year in continuous residence as a full-time
graduate student at one of the campuses.

Time Limits
All requirements for the doctoral degree must be completed within a
period of seven years of the date of admission.

For additional residence, time limits and degree requirements
information, see the Degree Requirements section of this catalog.

Doctoral Degrees
The University offers several types of doctorates, each of which is
described below.

The minimum period in which a doctoral degree can be earned is
three full academic years of graduate study after completion of a
baccalaureate degree, although in most disciplines the period is longer.
Graduate teaching assistants (GTA) or graduate research assistants
(GRA) whose work assignments are 10 hours per week (i.e. the equivalent
of 3 semester hours) or more should expect to take more than the
minimum period of 3 academic years to earn a doctoral degree. The only
exception to the three-year minimum is the practice-focused DNP.

Doctor of Philosophy Degree
The Doctor of Philosophy (PhD) degree is regarded as the researcher's
degree. Program requirements include the acquisition of special skills
for conducting independent, scholarly research of publishable quality.
Requirements traditionally include a working knowledge of one or
more foreign languages, but currently a number of foreign-language
alternatives have been approved by departments. Through acquisition
of these skills, PhD candidates demonstrate their potential for careers as
independent, publishing scholars. Refer to departmental sections of this
Catalog for details on foreign-language requirements or alternatives.

The Doctor of Philosophy (PhD) degree is granted on the basis of
scholarly proficiency, distinctive achievement in a special field, and
capacity for independent, original investigation. The first two criteria
are tested in coursework and a comprehensive examination, the
last in a dissertation in which the student must present clearly and
effectively the results of substantial research. A combination of these
accomplishments, rather than the mere accumulation of residence and
course credits, is the essential consideration in awarding the PhD degree.
The PhD differs from the EdD in a number of ways, including the fact that
the PhD Plan of Study and comprehensive examination demonstrate a
higher-level research focus, and there is a greater number of dissertation
hours and higher level of complexity and independent thought in a PhD-
level dissertation.

Field of Specialization - A defined field of specialization as outlined in
the student’s Plan of Study is required of all candidates for the Doctor of
Philosophy degree. A minimum of 36 semester hours of non-dissertation
course credit is required. Departments or programs may require more
than this minimum. Candidates should consult their departments or
the appropriate section of this Catalog for additional requirements.
The doctoral course as a whole must be unified, and all its parts must
contribute to an organized program of study and research. In addition, a
student must complete a minimum of 18 hours of dissertation research.

Research skill/language requirements - There is no university wide
foreign language/research skill requirement for doctoral students;
each college or department offering the PhD degree may set its own
requirements. This policy reaffirms the importance of research skills and
foreign languages in the highest academic degree granted by American
universities, but it also recognizes that the departments offering the
degrees are in the best position to determine the number and nature
of such requirements in the interests of their students. For further
information about PhD foreign language/research skill requirements,
students may contact their departments.

Interdisciplinary Studies
There is a PhD degree program in interdisciplinary studies, and it
is administered by the Graduate School. In addition to the general
requirements for the PhD degree, the program of study and the
supervisory committee for the prospective interdisciplinary studies
degree candidate must be approved by the dean of the Graduate School
before the student is admitted to the program. See Interdisciplinary
Studies (IDS) at the Graduate School's website for information on
prerequisites, admission procedures, course of study, and other aspects
of IDS programs.

Doctor of Education Degree
The Doctor of Education (EdD) requires a minimum of two years of
graduate study beyond the master's degree for the completion of the
EdD program. The student is required to complete 60 semester hours
in approved graduate coursework research beyond the master's degree,
or 90 semester hours of approved graduate courses, and to defend a
dissertation. The student must complete a minimum of 12 hours of
dissertation research. In the College of Education section of the Graduate
Catalog, there are specific regulations governing the EdD program.

Doctor of Musical Arts Degree
The Doctor of Musical Arts (DMA) degree requires a minimum of 48
semester hours beyond the Master of Music degree, plus recitals and
other examinations as determined by faculty of the School of Music.
Specific requirements for each major area are outlined in the School of
Music section of the Graduate Catalog.

Doctor of Nursing Practice
The Doctor of Nursing Practice (DNP) is a practice-focused degree that is
detailed in the Nursing section of this Catalog.

Doctor of Social Work
A Doctor of Social Work (DSW) degree is a practice doctorate degree
in social work. It provides coursework on theory and skills in social
work practice that are more advanced than what one would typically
experience in an MSW program for social work.
Admission to Doctoral Degree Programs

Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study. Admission to the Graduate School and the earning of a master’s degree from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student’s doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.

Residency Requirements

The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student’s doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog’s Transfer of Credit policies). Additionally, 100 percent of dissertation credit must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a “B” grade or better may be transferred. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.

2. PhD Programs Only: A student holding an earned, in-field master’s degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a “B” overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. When exercising this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School. The requested transfer credit hours must be listed on the PhD Plan of Study as MSC501 under the transfer credit section. If the in-field master’s degree was awarded more than six years prior to admission to the current doctoral degree program, the graduate program director or department head/chair must also submit to the Graduate School for evaluation, a Field-Related Employment Since Earning Master’s Degree form with the student’s CV must be submitted by the department through the UA DocuSign system in myBama. In addition, the department is asked to provide the following, attached to the approved Plan of Study:
   a. An annotated work history form from the student. This history should include job titles and major duties for all positions since earning a master’s degree.
   b. A brief paragraph from the corresponding faculty member, attesting that he/she has reviewed the work history and how that work applies to the current Ph.D. degree program.

The Graduate School will make the final determination about whether up to 24 prior master’s hours can be applied to the Ph.D. requirements. PhD awarding departments that want to participate in offering Option 2 to their doctoral students, need to “opt in” by informing the graduate dean in writing that they wish to be among the approved departments.

Consideration of transfer of credit or the acceptance of an earned master’s degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department’s graduate coordinator regarding your department’s transfer policy. Dissertation Research (699) may not be transferred in from an outside institution.

Time Limits

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master’s, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period prior to admission to the
Doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree.

**Revalidation of Expired Credits**

There may be particular and limited instances where a student is re-admitted to a graduate program, and revalidation of expired credits is justified. In such cases, where the department and Graduate School feel it is appropriate to do so, the student may work with the graduate program director to petition for such revalidation, on a course-by-course basis. For each course for which revalidation is requested, the student must demonstrate, to the department’s satisfaction, that the knowledge and skills gained in that course are still current. Currency will be evaluated by a committee of faculty, composed of at least three graduate faculty members within the degree program to which the student is requesting re-admission, and two from a separate department.

The committee will then issue a recommendation to the dean of the Graduate School, who will rule on the petition.

Some methods for demonstrating currency may include but are not limited to 1) a professional portfolio; 2) an exam or essay linked to each course and demonstrating up-to-date knowledge; 3) a re-take of the comprehensive exams under current program guidelines, and/or 4) other methods deemed appropriate by the committee.

Students may request revalidation of up to 50% of the required minimum coursework for their degree. Credits earned from an institution other than The University of Alabama may not be revalidated.

Consideration of revalidation, and a plan of study based on the demonstration-of-currency and other remaining requirements, must be completed as part of the student’s re-admission to the Graduate School. Revalidation of credits is not guaranteed. From the time of re-admission, students must complete the degree within the standard time limit, as specified in the Graduate Catalog at the time of the student’s re-admission.

The Continuous Dissertation or Document Registration requirement for 699 and 799 enrollment will be waived for the intervening years between the student’s cessation of doctoral work and re-admission.

**Plan of Study**

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School by the time the student has completed 30 coursework hours.

The PhD, DMA, and DSW Plans of Study are submitted by the department through the UA DocuSign system in myBama. The Plan of Study for other doctoral programs (Ed.D., DNP) are available from the student’s department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a “hold” may be placed on future registrations.

A copy of the approved Plan of Study must be submitted to the Graduate School when the department submits the Admission to Candidacy for Doctoral Degree form through the UA DocuSign system in myBama.

**Preliminary or Comprehensive Examination**

A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after

- any foreign language/research skill requirements are met (PhD students only);
- two full years of graduate study are completed; and
- the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student’s supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student’s research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

**Admission to Candidacy**

The designation of candidacy reflects the student’s demonstration of foundational knowledge and readiness to conduct independent research, in the discipline. The requirement for advancing to candidacy is determined by the faculty of the degree program and delineated in the program’s section of the Graduate School Catalog and the program’s Graduate Student Handbook.

Advancement to candidacy should involve either:

- passing the qualifying (major or preliminary) examination
- completing of all required coursework as listed on the approved program of study
- presenting or defending a dissertation prospectus or proposal
- or some combination of these milestones.

Students are not eligible to register for 699 or 799 credit hours until they have been advanced to candidacy. The Department Chair or Department Director of Graduate Studies, or their designee, shall submit the Admission to Candidacy for the Doctoral Degree form to the Graduate School during the semester that the student meets the program’s candidacy requirements.

**Continuous Doctoral Research Hours Registration**

Once a student meets their program’s requirement for admission to candidacy and the designated Department administrator submits the Application for Admission to Candidacy form to the Graduate School, the student may enroll in 699 (dissertation/document research) or 799 (document/project research).

Once initiated, the student must pursue completion of the dissertation/document/project research within 18 hours of dissertation research credits (699). Ph.D. students must register for a minimum of 3 dissertation research credits each semester until reaching their program’s minimum. Thereafter, they must register for a minimum of 1 dissertation hour each semester, maintaining continuous enrollment in 699 until degree completion.
Dissertation Proposal
The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction that provides an overview and states the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal's format with respect to specifics such as the length of the introduction and level of detail of the literature review. Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

Dissertation
A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. The dissertation must be based upon research completed while the student is enrolled at The University of Alabama.

The subject of the dissertation must be approved by the student's dissertation committee and by the dean of the Graduate School. The final dissertation may take the form of a traditional, chapter-based document or a series of full-length publication-ready manuscripts which are part of a larger, cohesive body of work. The format (traditional vs. article-style) must be approved by the committee in accordance with the standards for the program and the discipline.

For article-style dissertations, the document must contain a minimum of three articles, in addition to introductory and concluding materials. A single abstract must accompany the document. In addition to an introduction presenting the unifying framework that supports the research, the document must include a concluding section that summarizes the importance of the work, integrates the major findings, and discusses the implications for the overall body of work.

Individual departments may have policies or guidelines related to whether sections of the dissertation may be included if they have been previously published elsewhere. Copyright issues also may arise if sections of the dissertation have been previously published. Therefore, students who are considering the submission of dissertation chapters/articles for publication prior to their dissertation defense should consult with their advisor, and also with potential publication outlets, before submitting any dissertation-related manuscript for publication.

All parts of the dissertation must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline's style manual require deviation. Students should email gradschool@ua.edu before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

The Dean of the Graduate School must approve the dissertation before the student can be cleared for graduation. See “Final Dissertation Submission and Approval” for details.

Virtual Participation in Committee-Based Exams/ Defenses
All members of a student's graduate committee are expected to attend and participate, usually in person, in any oral examination as part of the student's graduate (Master's or Doctoral) degree program. Traditionally, oral examinations are conducted with the student meeting their committee while gathered in one physical location on campus. However, the need occasionally arises for virtual participation in the oral examination.

If a department or program chooses to allow virtual participation in oral examinations, they must ensure adherence to the following technical requirements. Departments or programs may enforce stricter guidelines than those outlined, including an on-campus-only policy if deemed necessary and appropriate.
In cases where departments or programs allow any level of virtual participation, from one virtual member to a fully virtual event, they must adhere to the following requirements:

1. Prior to any oral exam, the student and Committee Chair coordinate with other committee members regarding the protocol for the exam.
2. All participants must join using university-adopted videoconferencing tools that allow for fully interactive audio and video communications along with screen-sharing capabilities, which must be maintained throughout the examination and any related discussion.
3. The use of audio-only communications is not permitted.
4. Participation merely by viewing a recording of the oral examination is specifically prohibited.
5. All members of the committee, on- or off-site, must participate in the final evaluation of the examination or defense; provisions must be made to record their votes and collect their signatures as necessary using the digital signature system approved by the Graduate School.
6. The Committee Chair, or another non-student designee, shall be the host of the virtual meeting. A co-host may be assigned so that the event will not be interrupted by technical difficulties. The host should mute all participants (or ask participants to mute themselves) and ask the student to share their screen, if a presentation is involved, in order to make the presentation visible to all attendees. The host must also ensure that appropriate security precautions are taken to prevent the interruption of the event.
7. Following the public portion of the defense, the host shall ask all non-committee members to leave the meeting, or the host may manually remove them. In programs where the defense has both a public and a private portion, the committee may then continue the event as outlined in their program protocols.
8. Once the committee has completed the examination of the student, the host shall place the student into the waiting room (or have the committee members use a breakout room) so the committee can conduct their deliberations in private.

The committee chair must have a secondary videoconferencing system available as a back-up in the case of technical difficulties. Cancellation of the examination should only occur in the case where both the primary and secondary back-up systems fail. If an examination must be rescheduled, it will be done without prejudice to the student. Since committee deliberations are an essential aspect of the examination, completing the examination and final discussion via email or other non-audiovisual means is not an option. If the student or any committee member(s) have a disability that will be impacted by virtual participation, accommodations for participation must be provided.

The dissertation defense is comprised of four parts. The dissertation defense is the culminating experience in the doctoral program. The Dissertation Chair and the student will coordinate with all committee members to choose a time, date, and location for the dissertation defense. All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the defense date. The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations.

The dissertation defense is comprised of four parts.

1. **Public Advance Notice.** A minimum of two weeks prior to the scheduled defense date, the candidate must submit the Public Notice of a Dissertation Defense form. This form includes the name of the candidate, the department or program, the title of the dissertation, an abstract of 200 words or less, and the date, time, and location of the dissertation defense. The candidate should consult with the Dissertation Chair prior to
initiating this form. The form will be initiated by the candidate and signed by the Dissertation Chair, Graduate Program Director, and the Graduate School. Upon receipt of the completed form, the Graduate Program Director will ensure the scheduled defense is disseminated within the department. The Graduate School will post the scheduled defense on the Graduate School website.

2. **Oral Presentation.** An oral presentation of the dissertation is required and shall be public. The content and duration of the oral presentation are at the discretion of the Dissertation Chair, in consultation with the Committee, based on departmental norms, disciplinary standards, and traditions.

3. **Oral Defense.** This examination phase of the dissertation defense is required and may be public or private. Each department or program shall establish a policy for whether the oral defense is public, private, or both (i.e., has a public portion and a private portion).

4. **Committee Deliberation.** Committee deliberation is required and shall be private. Upon completion of the oral defense, everyone other than the committee members shall leave the defense location while the committee discusses, deliberates, and votes. For a defense to be successful, the majority of the committee must approve the dissertation and the defense.

The results of the dissertation defense must be reported to the Office of the Graduate School by submitting the Committee Acceptance Form at least six weeks before the Fall/Spring commencement, or five weeks before the Summer commencement, at which the degree is to be conferred. The Committee Acceptance Form, submitted by the department through the UA DocuSign system and found in myBama, confirms that a majority of the dissertation committee has approved the written dissertation and oral defense.

Any changes made to the manuscript after the defense must be approved by the Dissertation Chair. The student must submit the final dissertation to the Graduate School, and the Dean of the Graduate School must approve the dissertation, before the student can be cleared for graduation. See “Final Dissertation Submission and Approval” for details.

**Final Dissertation Submission and Approval**

Following a successful dissertation defense (see “Dissertation Defense” for details), any edits agreed upon during the defense must be incorporated into the manuscript, and the Dissertation Chair must approve the final manuscript. After a careful review to ensure that the manuscript adheres to the Graduate School’s formatting guidelines, the candidate must submit the approved manuscript to the Graduate School for final approval, address any remaining edits, and initiate the upload process for archiving the manuscript in the national dissertation repository, ProQuest.

The dissertation, in its final form, must be received in the Graduate School within 60 days of the dissertation defense. If this deadline is not met, the Dissertation Chair may require the candidate to schedule a second dissertation defense. Note that this 60-day deadline is separate from the deadlines for degree conferral and participation in Commencement ceremonies.

Graduate School deadlines for each semester, including deadlines for submitting the final manuscript to the Graduate School to graduate at the end of the semester, are available on the Graduate School’s homepage. Consult the Graduate School’s dissertation site for additional details of the electronic submission process, including information on exactly what needs to be submitted to the Graduate School. At the stage of the Graduate School review of the manuscript, additional revisions may be required, to ensure that the final manuscript conforms to all formatting and editing standards. The graduate dean must approve the dissertation before the student can be cleared for graduation.

**Application for Graduation**

Each candidate for a doctoral degree must submit an Application for Degree via myBama no later than the last day to register or add a course for the semester (or first term of the summer semester) in which requirements for the degree are to be completed. That specific date is published each semester at the Graduate School’s website under Current Students/Deadlines for Graduate Students.

**Withholding or Withdrawing an Advanced Degree**

The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.
