COURSES FOR NURSING

Nursing Courses

NURS00 Population Health
Hours 3
The purpose of this required core MSN course is to prepare students to evaluate health care needs at the population level with a particular focus on rural and medically underserved populations. An epidemiological approach will be utilized to explore relevant population based topics.

NURS03 Nursing Informatics in Healthcare
Hours 3
This required course focuses on the ethical management of data, information, knowledge, and technology to communicate and deliver safe quality healthcare within and across various healthcare settings. This course incorporates the concepts of nursing science, computer science and information science with information technology tools commonly found in practice. Students are introduced to the nursing informatics specialty and the use of technology to augment nursing care delivery and patient safety.

NURS05 Advanced Health Assessment
Hours 3
This course will assist the graduate nursing student to further develop health assessment skills for obtaining and recording a systematic health history as well as advanced holistic health assessment of individuals across the life span.

NURS07 Organizational & Systems Leadership
W
Hours 3
The purpose of this required core MSN course is to prepare future nurse leaders for organizational and systems leadership in healthcare as it relates to producing quality patient outcomes in a safe and efficient manner. Writing proficiency is required for a passing grade in this course. A student who does not write with the skill normally required of a BSN student will not earn a passing grade, no matter how well the student performs in other areas of the course.

NURS10 Basic Concepts of Teaching Diabetes Self-Management Techniques
Hours 3
This online elective course is open to any graduate student in the health or social sciences. The course focuses on: Diabetes Self-Management Techniques (DSMT) and instructs the provider in what manner to impart information that has immediate application for people living with diabetes. The course focuses on application of clinical guidelines for exercise and fitness, nutrition and diet, and the techniques, products, and strategies that help patients learn diabetes self-management techniques that empower them to take charge of their well-being and live healthier lives.

Prerequisite(s): Premission by Instructor

NURS13 Special Topics
SP
Hours 1-4
This course focuses on selected MSN topics under the sponsorship of a nursing faculty member with relevant expertise.

NURS14 Research and Evidence-Based Practice
Hours 3
The purpose of this required core MSN course is to prepare students to evaluate research methods, designs, instruments, research ethics, and statistics used in health research. The course will also provide students with models for evidence-based practice design and translation and quality improvement. Students will formulate clinical questions, identify, evaluate and critically appraise evidence, and translate the evidence into practice environments for safe, quality care.

NURS16 Advanced Diabetes Management: An Interdisciplinary Approach Across the Lifespan
Hours 3
This online elective course is open to any graduate student in the health or social sciences. The course focuses on the primary, secondary, and tertiary prevention and management of diabetes mellitus offering expanded content suitable to students pursing graduate study in nursing, medicine, nutrition, and other social sciences. Building on the basic and advanced science and clinical management courses a multi-disciplinary approach is offered for the prevention of pre-diabetes, metabolic syndrome, type 2 diabetes, management of both types 1 and 2 diabetes mellitus across the lifespan. Special emphasis is placed on the prevention and management of the complications and co-morbid conditions potentially resulting from diabetes mellitus.

NURS17 Graduate Independent Study
SP
Hours 1-4
No description available

NURS19 Health Policy & Finance
Hours 3
The purpose of this required core MSN course is to introduce the student to relevant health care and governmental policies, regulatory standards, and financial management concepts to develop an understanding of how healthcare delivery systems are organized, financed, and most importantly, influence the delivery of patient care.

NURS21 Advanced Pharmacology
Hours 3
This course will assist the graduate nursing student to further develop knowledge of evidence-based clinical pharmacology. Course content will include basic principles of pharmacology as they apply to drug therapy across the lifespan. A prototype approach will be used to present content covering selected drugs affecting the peripheral nervous system, central nervous system, cardiovascular system, renal system, endocrine system, immune system, musculoskeletal system, respiratory system, gastrointestinal system, and chemotherapy for infection and cancer.
NUR528 Sleep: How Much is Enough
Hours 3
Sleep is a basic physiologic requirement of all beings. Therefore, we can all benefit from learning about what sleep is, why it is important in our lives, and how it can be influenced (positively and negatively). This elective course will challenge students to explore the impact sleep patterns have on human physical and emotional health, behaviors, and performance abilities.

NUR529 Advanced Pathophysiology
Hours 3
This course will explore the biologic basis of disease at the cellular, organ and system level with an emphasis on applications for health professionals. It is a required course in the MSN curriculum of the Capstone College of Nursing and may be taken as an elective by graduate biology majors with an interest in health professions based on space available.

NUR531 Nursing Faculty Roles and Responsibilities
Hours 3
This online course will provide an introduction to the roles and responsibilities of nursing faculty. This course will prepare students to participate in the processes of designing, implementing, and evaluating a nursing curriculum. This course will include roles and responsibilities of faculty in teaching, scholarship, service, and practice.

NUR532 Instructional Media for Nursing Education
Hours 3
This course will provide students with an overview of instructional technology and media that can be used in undergraduate and graduate level instruction in nursing education programs. This course will provide students with skills to begin on site and online instruction. It will explore the use of computers, software, models, simulators, and other instructional media.
Prerequisite(s): AIL 600 and AIL 602
Prerequisite(s) with concurrency: AIL 600 and AIL 602

NUR549 Roles & Leadership in Nursing Administration
Hours 3
The purpose of this course is to provide the student with the tools and resources to embrace the role of the Nurse Administrator and successfully balance leadership and management cohesively. This course will comprehensively cover leadership concepts to include working collaboratively in interdisciplinary teams, professional roles and scopes of practice, human resource management, staffing, conflict resolution, sustainable change, and decision-making practices.
Prerequisite(s): Co-requisite: NUR 550

NUR550 Roles & Leadership in Nursing Administration Practicum
Hours 3
The purpose of this course is to provide the student with the opportunity to apply concepts and theory from NUR 549 in an authentic clinical environment to narrow the theory practice gap through application and experiential learning. The focus is on application of leadership concepts to include working collaboratively in interdisciplinary teams, professional roles and scopes of practice, human resource management, staffing, conflict resolution, sustainable change, and decision-making practices.
Prerequisite(s): Co-requisite: NUR 549

NUR551 US Healthcare Systems and Quality & Safety
Hours 3
The purpose of this course is to prepare future nurse administrators for the complexities of healthcare management by giving them the tools and resources to understand and critically appraise the unique dynamics of the U.S. healthcare system. This course will include information related to healthcare delivery, quality improvement, public policy, laws, accrediting bodies, and regulatory statutes.
Prerequisite(s): Co-Requisites: NUR 552

NUR552 US Health Care Systems and Quality & Safety Practicum
Hours 3
The purpose of this clinical course is to provide the nursing administrator student with the opportunity to apply concepts and theory from NUR 551 in an authentic clinical environment to narrow the theory practice gap through application and experiential learning. The focus is on the application of public policy, laws, accrediting bodies, and regulatory statutes as they relate to the delivery of health care in the U.S.
Prerequisite(s): Co-Requisites: NUR 551

NUR553 Advanced Financing and Strategic Planning in Health Care
Hours 3
The purpose of this course is to prepare future nurse administrators to be highly effective and influential strategic planners and financial leaders within the organization. This course addresses principles of strategic planning and fiscal resource management to include SWOT analyses, business plans, reimbursement models, cost analysis, budgeting, contract development, financial aspects of program development and evaluation, and cost accounting and tracking.
Prerequisite(s): Co-Requisites: NUR 554

NUR554 Advanced Financing and Strategic Planning in Health Care Practicum
Hours 3
The purpose of this clinical course is to provide the student with the opportunity to apply concepts and theory from NUR 553 in an authentic clinical environment narrowing the theory practice gap through application and experiential learning. The focus is on the application of the principles of strategic planning and fiscal resource management to include SWOT analyses, business plans, reimbursement models, cost analysis, budgeting, contract development, financial aspects of program development and evaluation, and cost accounting and tracking.
Prerequisite(s): Co-Requisites: NUR 553

NUR557 Family Nurse Practitioner Role & Issues
Hours 3
This course includes the professional role of the Family Nurse Practitioner (FNP) serving diverse populations across the lifespan. Emphasis is on the influence of nurse practitioners on outcomes at the systems level. Students will assess complex demands; plan coordinated, multidisciplinary, evidence-based collaborative approaches to care; and appraise strategies for evaluation of outcomes.
Prerequisite(s): NUR 505, NUR 529 - with a grade of B or better
NUR569 Family Nurse Practitioner I
Hours 3
This course provides a theoretical and evidenced based foundation for advanced practice as a Family Nurse Practitioner (FNP). The focus is on identifying and managing common acute, episodic and multiple chronic conditions in the adult client. Health promotion and disease prevention strategies for the adult population are emphasized.
Prerequisite(s): NUR 505, NUR 529, NUR 521, NUR 567; Corequisite: NUR 570 With grade of B or better

NUR570 Family Nurse Practitioner Clinical I
Hours 3
This course provides an initial clinical experience for advanced practice as a Family Nurse Practitioner (FNP). The focus is on identifying and managing common acute, episodic and multiple chronic conditions based on current evidence. Health promotion and disease prevention strategies for the adult population are emphasized. FNP role responsibilities are demonstrated, within primary care settings, in order to meet the health care needs for diverse adult populations. Students must complete 180 clinical hours working with adults.
Prerequisite(s): NUR 567 Corequisite: NUR 569 with a grade of B or better

NUR571 Family Nurse Practitioner II
Hours 3
This course provides a theoretical and evidence-based foundation for advanced practice as a Family Nurse Practitioner (FNP). The focus is on identifying and managing common acute, episodic and multiple chronic conditions in both the Pediatric and Women's Health populations. Health promotion and disease prevention strategies for the Pediatric and Women's Health populations are emphasized.
Prerequisite(s): NUR 569, NUR 570; Corequisite: NUR 572

NUR572 Family Nurse Practitioner Clinical II
Hours 3
This course provides evidence-based clinical experiences for advanced practice as a Family Nurse Practitioner (FNP). The course focuses on identifying and managing common acute, episodic and multiple chronic conditions in both the Pediatric and Women's Health populations. Health promotion and disease prevention strategies for the specific populations are emphasized. FNP role responsibilities are demonstrated, within primary care settings, in order to meet the health care needs for diverse patient populations. Students must complete 180 clinical hours working with Pediatrics and Women's Health clients.
Prerequisite(s): NUR 569, NUR 570; Corequisite: NUR 571

NUR573 Family Nurse Practitioner III
Hours 3
This course provides a culmination of common health conditions and strategies for incorporating evidence-based practice for advanced practice as a Family Nurse Practitioner (FNP). The course focus is on identifying and managing common acute, episodic and chronic conditions across the lifespan and within a variety of vulnerable populations. As with the prior FNP courses, there will be a continued emphasis on health promotion and disease prevention in primary care populations. Strategies for FNP certification preparedness and extended role responsibilities will be explored.
Prerequisite(s): NUR 571, NUR 572; Corequisite: NUR 574

NUR574 Family Nurse Practitioner Clinical III
Hours 3
This course will provide the Family Nurse Practitioner (FNP) student with the opportunity to completely immerse in an autonomous advanced practice nursing role. Students will diagnose, manage, and treat common acute, episodic and chronic conditions across the lifespan, while maintaining an emphasis on health promotion and disease prevention. FNP students will engage in interdisciplinary collaboration for providing competent and evidence-based care for all patients, including vulnerable populations, seeking care in primary care settings. There are 180 clinical hours needed for course completion.
Prerequisite(s): NUR 571, NUR 572 Corequisite: NUR 573

NUR591 Psychiatric Mental Health Nurse Practitioner Roles and Issues
Hours 3
The purpose of this course is to focus on concepts, theories and research underlying advanced practice psychiatric mental health nursing. The focus is on the study of Psychiatric Mental Health Nurse Practitioner (PMHNP) conceptual frameworks, theories, and research findings related to common psychiatric disorders among children and adolescent (birth to 17) patients in urban, suburban, and rural settings. Biological and pharmacologic theories, developmental issues of children and adolescent (birth to 17) patients, psychotherapeutic modalities, primary prevention, and evaluation of treatment will be emphasized.
Prerequisite(s): NUR 505, NUR 521 with a grade of B or better

NUR593 Psychiatric Mental Health Nurse Practitioner I
Hours 3
The purpose of this course is to focus on the study of Psychiatric Mental Health Nurse Practitioner (PMHNP) conceptual frameworks, theories, and research findings related to common psychiatric disorders among children and adolescent (birth to 17) patients in urban, suburban, and rural settings. Biological and pharmacologic theories, developmental issues of children and adolescent (birth to 17) patients, psychotherapeutic modalities, primary prevention, and evaluation of treatment will be emphasized.
Prerequisite(s): NUR 591; Corequisite: NUR 594

NUR594 Psychiatric Mental Health Nurse Practitioner Clinical I
Hours 3
The purpose of this clinical course is to provide the student with the ability to apply treatment of psychopathology. The role of the Psychiatric Mental Health Nurse Practitioner (PMHNP) in the assessment, diagnosis, and treatment of children, adolescents, young adults, and families in urban, suburban, and rural settings will be explored. This course will also provide students the opportunity to apply psychobiological information in conjunction with the use of psychopharmacological and psychotherapeutic interventions with patients. Students must complete 180 clinical hours working with children and adolescents from birth to 17.
Prerequisite(s): NUR 591 Corequisite: NUR 593
NUR595 Psychiatric Mental Health Nurse Practitioner II
Hours 3
The purpose of this course is for Psychiatric Mental Health Nurse Practitioner (PMHNP) students to learn how to critically appraise theoretical approaches for psychotherapeutic interventions with adult and elderly patients and families in urban, suburban, and rural areas. This course provides a theoretical basis for advanced practice of Psychiatric Mental Health Nursing. This course will also provide the student with an understanding of the dynamics, epidemiology, and treatment of selected psychopathology, specifically focused on adult and elderly patients. In addition, the role of the PMHNP in the assessment, diagnosis, and treatment of adult and elderly patients with mental disorders will be explored.
Prerequisite(s): NUR 593, NUR 594; Corequisite: NUR 596

NUR596 Psychiatric Mental Health Nurse Practitioner Clinical II
Hours 3
The purpose of this clinical course is for Psychiatric Mental Health Nurse Practitioner (PMHNP) students to critically appraise and apply theoretical approaches for psychotherapeutic interventions with adult and elderly patients and families in urban, suburban, and rural areas. This course will also provide the student with an opportunity to apply the dynamics, epidemiology, and treatment of selected psychopathology, specifically focused on adult and elderly patients. In addition, the role of the PMHNP in the assessment, diagnosis, and treatment of adult and elderly patients with mental disorders will be applied. Students must complete 180 clinical hours providing psychopharmacotherapeutic and psychotherapeutic interventions to adults, elderly and their families.
Prerequisite(s): NUR 593, NUR 594; Corequisite: NUR 596

NUR597 Psychiatric Mental Health Nurse Practitioner III
Hours 3
The purpose of this course is for Psychiatric Mental Health Nurse Practitioner (PMHNP) students to demonstrate comprehension of multiple theoretical approaches for psychotherapeutic interventions across the lifespan in urban, suburban, and rural areas. This course also covers the dynamics, epidemiology, assessment, diagnosis, and treatment of selected psychopathologies. Appropriate evidence-based psychopharmacological and psychotherapeutic (individual, family and group) interventions are examined.
Prerequisite(s): NUR 595, NUR 596; Corequisite: NUR 598

NUR598 Psychiatric Mental Health Nurse Practitioner Clinical III
Hours 3
The purpose of this clinical course is for Psychiatric Mental Health Nurse Practitioner (PMHNP) students to demonstrate application of multiple theoretical approaches for psychotherapeutic interventions across the lifespan in urban, suburban, and rural areas. This course provides PMHNP students an opportunity to apply clinical skills in the assessment, diagnosis, and treatment of selected psychopathologies. Students will apply appropriate evidence-based psychopharmacological and psychotherapeutic (individual, family and group) interventions in a wide range of clinical settings. Students must complete 180 clinical hours treating patients across the lifespan (with a minimum of 40 child and adolescent).
Prerequisite(s): NUR 595, NUR 596 Corequisite: NUR 597

NUR599 Master’s Thesis
Hours 3-6
This course is designed to assist the student in selecting a foundational area of inquiry or phenomenon of interest, and creating original scholarship written under the direction of the faculty advisor. It is expected that the project will culminate in the production of a research product (thesis) that evidences originality, appropriate organization, clarity of purpose, critical analysis, and accuracy and completeness of documentation. The work shall involve an analysis or study related to a professional nursing phenomenon of interest such as, but not limited to: direct patient care concerns, systems level quality improvement, healthcare policy, or nursing administration.

NUR620 Curriculum Theory & Practice
Hours 3
This is primarily an online, web-based course. It critically examines historical and contemporary discourses necessary to understand curriculum as a synergetic field of study and an area of professional practice. Factors related to organizing curriculum will be considered based on analysis, interpretation and synthesis of contextual data. Students will determine directions, outcomes, and goals for curriculum and course design. Methods for curriculum evaluation and a dashboard for successful implementation will be emphasized. Students will demonstrate their ability to develop and critique curriculum in the context of instruction through reflection, observation, documentation, and descriptive analysis and to relate ethical, moral, and social justice concerns to curriculum practice.
Prerequisite(s): NUR 531

NUR621 Nurse Educator Practicum
Hours 4
This is an elective course for nurse educator students who have limited teaching experience or graduate nursing students who desire additional direct experience. The two didactic credits and two clinical credits (120 contact/clock hours) in this practicum provide opportunities to become embedded as a faculty member for one semester. Students implement classroom and clinical teaching and evaluation strategies grounded in education theory and evidence-based practice, and are devised for differing learner needs to produce desired learning outcomes. Students explore the scholarship of education and develop or refine a research trajectory. Then relate that trajectory to life-long professional development and targeted faculty, community, and professional service.
Prerequisite(s): NUR 531, NUR 532

NUR696 Doctoral Seminar in Research
Hours 3
Students are expected to utilize knowledge from quantitative methodology and statistics in this course. The seminar will provide students with opportunities to synthesize knowledge gained in this and other courses in order to address topics of for research in nursing education.
NUR700 Clinical Data Management and Analysis
Hours 3
This required course provides students with the knowledge base to understand, collect, manage, and measure clinical data. Students will explore data collection and management processes, levels of measurement, basic statistics, and measurement for improvement in order to effectively use clinical data. Data entry exercises employed through analytical tools and statistical software packages will allow the students practice and apply the basic data management and analysis skills needed for the evaluation of clinical data and evidence-based practice.

NUR701 Writing for Publication
Hours 3
This course concerns the development of skills in writing, editing, and preparing manuscripts for publication from initial idea to submission of a publishable manuscript. The course emphasizes a writing process that encourages productivity and collegial peer review. Legal and ethical aspects of authorship prepare students for responsible practices expected of scholars. Students should have mastered basic writing skills, e.g., grammar, syntax, and computer skills, prior to enrolling in this course.

NUR713 Special Topics
SP
Hours 1-4
This course focuses on selected DNP topics under the sponsorship of a graduate nursing faculty member with relevant expertise.

NUR717 DNP Independent Study - Special Topics
SP
Hours 1-4
The independent study option provides an opportunity for students to identify, structure, implement and evaluate learning experiences consistent with personal learning needs and career plans that are in addition to the current curriculum.

NUR729 Evidence-Based Practice Design and Translation
Hours 3
The purpose of this course is to provide students with models for evidence-based practice (EBP) design and improvement translation. Students learn to formulate clinical questions in answerable format, and search for and identify best research evidence. The focus of the course is to evaluate and critically appraise evidence for rigor and applicability to the clinical problem and is designed to improve clinical outcomes. Students will translate the evidence into practice environments for safe, quality care. Students will gain access to information that will support optimal clinical decision-making. Improvement translation sciences will also be introduced.

Prerequisite(s) with concurrency: NUR 701

NUR731 Philosophical, Theoretical, and Conceptual Foundations for Advanced Practice Nursing
Hours 3
This required core course for the Doctor of Nursing Practice program provides an understanding of the use of theory and conceptual foundations to guide the complexity of specialty nursing practice at the doctoral level. The content is derived from the philosophical and scientific underpinnings of nursing, natural, and psycho-social sciences.

NUR733 Informatics for Advanced Practice Nursing
Hours 3
This required course focuses on the collection, organization, analysis, and dissemination of information in nursing and health care. Students are introduced to the specialty of nursing informatics, the information system life-cycle, telemedicine, and the use of technology to enhance nursing care delivery and patient safety. Also, students learn how to design, use, and manipulate large and small patient databases for the analysis of patient outcomes.

Prerequisite(s): NUR 700
Prerequisite(s) with concurrency: NUR 700

NUR734 Advanced Experiential Clinical Course
Hours 1-7
This course is designed to validate Master’s level competencies in clinical and organizational leadership. The course is required for post-master’s DNP students who are graduates of programs in nursing with less than 500 clinical hours.

NUR735 Population Health in Advanced Practice Nursing
Hours 3
This required course for the Doctor of Nursing Practice program prepares the student to implement specialty population-based disease prevention and health promotion activities to achieve national and international goals of improving worldwide health status. The course focuses on a spectrum of issues affecting health, which include emerging infectious diseases, emergency preparedness, disparities in health and healthcare services, and the impact of behavior and lifestyle choices on health.

NUR737 Interdisciplinary Leadership and Role Development for Practice Excellence
Hours 3
This required course in the Doctor of Nursing Practice program prepares students for organizational and systems leadership and knowledge and skills critical to role development in independent and inter and intra-disciplinary practice. Content includes communication, conflict resolution, collaboration and negotiation, leadership, and team functioning to maximize success in the establishment of safe, effective patient-centered care in complex environments.
NUR739 Scholarly Practice Project
Hours 1-7
This required course is the capstone clinical course in all advanced practice tracks. The student presents evidence of achievements and competencies in a professional portfolio. The practice residency is completed in a specialty area of the student’s choice. One credit hour of each semester of the residency is devoted to classroom seminar. The seminar focuses on the aspects of the final practice project and interventions that promote health, prevent illness and disability, and alleviate health disparities. Small group sessions are formed for students who are at similar stages of completion of the course requirements. The final project is selected and planned by the student and the advisor and is implemented during this course. The student completes the project, evaluates the outcomes, disseminates the findings, and makes a formal scholarly presentation to faculty and peers.

NUR740 Health Policy & Politics: Implications in Health Care
Hours 3
This required course in the Doctor of Nursing Practice program focuses on the basic principles of health policy and the influence of the political process as a systematic approach to health care in the United States and internationally. The course prepares students to assume complex leadership roles in order to advance specialty practice and health. This course focuses on the unique challenges of engaging and influencing health care policy in the U.S. and internationally. It is designed to develop skills, techniques, and approaches to the critical analysis of health policy proposals, health policies, and related issues from the perspective of consumers, nursing, other health professions, and other stakeholders in policy and public forums. The health policy framework is analyzed from a governmental, institutional, and organizational perspective.

NUR742 Project Evaluation and Methods
Hours 3
The purpose of this course is to synthesize knowledge related to translational/implementation science models and strategies to improve health outcomes. The emphasis in the course is the use of project evaluation as a strategic planning tool to achieve positive changes in health status, to initiate quality improvement, to engage in risk anticipation, management and to facilitate organizational and system level changes.
Prerequisite(s): NUR 729

NUR743 Evidence Based Practice Strategies
Hours 3
NUR 743 is a required core Doctor of Nursing Practice Program course, which expands on foundational evidence-based practice concepts to refine a problem statement and derive a searchable and answerable clinical question. Content includes identification and selection of methods, strategies, tools and metrics needed to complete a successful scholarly project. The course also addresses targeted strategies for disseminating evidence associated with scholarly projects.
Prerequisite(s): NUR 701 NUR 729
Prerequisite(s) with concurrency: NUR 742

NUR744 Curriculum and Evaluation Concepts
Hours 3
This course focuses on concepts important to nursing program curriculum development and evaluation. The course will introduce the learner to various curriculum-related concepts including higher education organizational structure, published curriculum guidelines, policy development and adoption, and accreditation. This course will also focus on evidence-based methods for program, course, and student evaluation.
Prerequisite(s): Students must be participants in the Nurse Faculty Loan Program

NUR745 Teaching Strategies for Clinical Learning
Hours 3
This course will assist the graduate nursing student to examine teaching theory and strategies which may be applied to clinical instruction and problem solving. Course content will include basic principles of adult learning, and learning preferences as applied to teaching multigenerational learners. Strategies useful for clinical supervision and the importance of development of clinical learning sites are identified. The necessity of crafting clinical assignments in order to promote optimal learner outcomes is presented. Illustration of multiple uses of clinical simulation in order to improve team building, interdisciplinary collaboration, and clinical reasoning are depicted. The use of debriefing models to enhance clinical judgement in both simulation and clinical practice will be examined. Resources and technology for clinical teaching will be evaluated.
Prerequisite(s): Students must be participants in the Nurse Faculty Loan Program

NUR795 DNP Project Seminar
Hours 1
This required course is designed to assist the student to develop professional competencies related to the DNP project. Students participating in the seminar will obtain guidance, be involved in discussion, and receive peer suggestions about the DNP project. Funding opportunities will be explored, presentation preparation will be initiated, and project dissemination will be reviewed. The student will start the development and design of the professional portfolio with current professional information and achievements.
Prerequisite(s): NUR 701, NUR 729, NUR 742, NUR 743

NUR796 DNP Project Immersion I
Hours 3
This required course is the first clinical course in the Doctor of Nursing Practice course of study. The practice residency is conducted in a specialty area of the student’s choice and guided by the DNP Essentials. Students will participate in weekly online group discussions regarding their progress providing peer feedback. An organizational needs assessment is conducted while the final project is selected and planned by the student and the Faculty Advisor. IRB training and preparation is completed. The final project proposal is completed and approved by the Faculty Advisor in this course.
Prerequisite(s): NUR 701, NUR 729, NUR 742, NUR 743 A clinical facility contract and clinical advisor must be approved and in place prior to enrollment in this course.
NUR797 DNP Project Immersion II
Hours 3

This required course is the continuation of the clinical courses in the Doctor of Nursing Practice course of study. The practice residency is conducted in a specialty area of the student's choice and guided by the DNP Essentials. Students will participate in weekly online group discussions regarding their progress providing peer feedback. The DNP Project will be submitted for IRB review and revised until accepted by all required IRB entities. The DNP project will be implemented and evaluated by the student, with guidance from the Faculty Advisor.

Prerequisite(s): NUR 700, NUR 701, NUR 729, NUR 731, NUR 742, NUR 743, NUR 795, NUR 796 A clinical facility contract and clinical advisor must be approved and in place prior to enrollment in this course.

Prerequisite(s) with concurrency: NUR 795

NUR798 DNP Project Immersion III
Hours 3

This required course is the culmination of the clinical courses in the Doctor of Nursing Practice course of study. The practice residency is conducted in a specialty area of the student's choice and guided by the DNP Essentials. Students will participate in weekly online group discussions regarding their progress providing peer feedback. The final project is evaluated, analyzed, and disseminated by the student with Faculty and Clinical Advisor guidance in the form of a professional presentation. The final DNP Project report is completed and approved by the Faculty Advisor. Students are strongly encouraged to submit a completed manuscript for publication based on the DNP Project in collaboration with the Faculty Advisor when deemed ready by the Faculty Advisor.

Prerequisite(s): NUR 701, NUR 729, NUR 742, NUR 743, NUR 795, NUR 796, NUR 797

Nursing Science Courses

NUS713 Special Topics
SP

Hours 3

This course is designed to offer Joint PhD program students a range of nursing-science focused special topic courses.

Special Topics Course

NUS741 BSN-PhD Research Seminar I
UAH

Hours 1

The purpose of this course is to prepare BSN-PHD students with the foundational skills of deep reading, comprehensive literature review and critique, critical thinking, and writing skills necessary for successful advancement in a doctoral program. This course will further help students by providing more individualized support and structure to facilitate successful progression through the PhD program.

Prerequisite(s): Admission to the Graduate Program

UA-Huntsville Course

NUS742 BSN-PhD Research Seminar II

Hours 1

The purpose of this course is to aid BSN-PHD students in developing skills to assess scientific rigor, develop an argument, critique published research, professionally present (verbally and written) critique findings, develop a manuscript for publication, and will provide an opportunity to obtain hands on research experience. This course will further help students by providing more individualized support and structure to facilitate successful progression through the PhD program.

Prerequisite(s): Admission to the Graduate Program

NUS743 BSN-PhD Research Seminar III
UAH

Hours 1

The purpose of this course is to prepare BSN-PHD students with the foundational skills of systematically appraising the literature to develop an appropriate and comprehensive significance section, analyzing health policy that directly relates to the students' research areas of interest, and evaluating research methodology and accompanying statistical analyses. These are important for successful advancement in a doctoral program. This course will further help students by providing more individualized support and structure to facilitate successful progression through the PhD program.

Prerequisite(s): Admission to the Graduate Program

UA-Huntsville Course

NUS750 Philosophy of Science
UAH

Hours 3

The purpose of this course is to explore the evolution of philosophy and science. Epistemology, knowledge generation, knowledge acquisition, and ways of knowing will be examined. Scientific inquiry will include reasoning, logic, and persuasive argument development.

Prerequisite(s): Admission to the Program

UA-Huntsville Course

NUS752 Informatics

Hours 3

The purpose of this course is to prepare nurse scientists to use informatics, electronic tools, and healthcare technologies for the purposes of nursing research. The course will focus on the use of informatics in the data management of individuals, groups, and organizations as the nurse scientist plans and executes a program of research.

Prerequisite(s): Admission in the Joint Nursing Science PhD Program

UA-Huntsville Course
NUS754 Ethical Conduct and Legal Issues in Research  
Hours 3  
The purpose of this course is to introduce the student to doctoral scholarship in support of beginning a program of responsible conduct of research. This course explores current ethical and legal issues in the science of nursing research. The course will delve into best practices in research design with regard to ethics, authorship, data management and record keeping, intellectual property and ownership of data, and human subjects research. In addition, the course will cover conflicts of interest, mentoring, collaborations, peer review, research misconduct, and current ethical issues in research.  
Prerequisite(s): Admission to the Joint Nursing Science PhD Program

NUS756 Application of Theoretical Models  
UAH  
Hours 3  
The purpose of this course is to provide students a foundation for contributing to theory development processes, analyzing and critiquing theoretical foundations of research, and applying theoretical models to nursing research. This course addresses the relationship between theory and research and provides an understanding of the use of theoretical models and conceptual foundations to guide nursing research and practice.  
Prerequisite(s): NUS 750

UA-Huntsville Course

NUS758 Quantitative Research Methods and Designs  
Hours 3  
The purpose of this course is to provide students with foundational knowledge related to quantitative research design and methods, and the skills to develop research proposals using these designs and methods. Students will progress from learning quantitative research approaches, to understanding the process and components of quantitative research. Students will end the course by integrating these new principles into a written, defensible, National Institutes of Health-style Research Strategy. Additional content will focus on the evolving role of nurses in quantitative research, the renewed focus on research rigor and reproducibility, and being a nurse scientist on interdisciplinary research teams. Special emphasis will be placed on clinical nursing designs including observational studies, quasi-experimental studies, and repeated-measures intervention studies.  
Prerequisite(s): NUS 750

UA-Huntsville Course

NUS760 Statistics I  
UAH  
Hours 3  
The purpose of this course is to provide the student with the skills to conduct and interpret statistical data. Emphasis will be placed on describing types of variables, testing hypotheses, selecting appropriate parametric and nonparametric statistical tests, analyzing data, and interpreting results.  
Prerequisite(s): NUS 750

UA-Huntsville Course

NUS762 Healthcare Policy for Rural and Medically Underserved Populations  
Hours 3  
The purpose of this course is to explore the policy environment that influences and shapes public health and health care service delivery, including rural and medically underserved communities. Students will develop skills, techniques, and approaches to identify gaps, critically analyze and research health related issues. Utilization and delivery of data to promote and impact healthcare policy changes will be an important measure of outcome. Students will develop the ability and confidence to critically assess current health policy issues in a thoughtful, comprehensive and rigorous manner and to engage in the policy process.  
Prerequisite(s): Admission in the Joint Nursing Science PhD Program

NUS764 Scientific Writing  
UAH  
Hours 3  
The purpose of this course is to develop writing skills to produce scientific writing that is clear, concise and logical. This course will also explore the publication to include abstract and manuscript development and the submission process. Additional pathways to dissemination of nursing content will be explored as well.  
Prerequisite(s): Admission to the Joint Nursing Science PhD program

UA-Huntsville Course

NUS766 Epidemiology  
Hours 3  
The purpose of this course is to introduce epidemiological methods for measuring population health, designing and implementing observational and experimental studies, critically reading the public health literature, and applying research findings to global and community health.  
Prerequisite(s): NUS 760

NUS768 Statistics II  
Hours 3  
The purpose of this course is to provide advanced coursework in applied statistical approaches to data management and analysis with an emphasis on multivariate statistical approaches. Students will develop improved skills in conceptualizing, executing, analyzing, and interpreting advanced analytic strategies and to enhance their ability to propose strong, tailored analytic approaches for specific study designs and research aims. Students will gain proficiency in using statistical software to enhance their understanding of regression, ANCOVA, MANOVA/MANCOVA, discriminant analysis, exploratory and confirmatory factor analysis, structural equation modeling, multilevel modeling, and advanced categorical approaches. Emphasis will be placed on the understanding of the mathematics, logic, and application of these techniques.  
Prerequisite(s): NUS 760
**NUS770 Grant Writing**  
Hours 3  
The purpose of this course is to prepare students in the foundations of writing grants for federal external funding. This course will help students identify a step-wise process to develop a grant proposal through federal funding sources. Strategies for successful grant writing include identifying funding sources for the topic, writing a competitive grant application, developing a collaborative team of researchers for the project, and understanding the review process.  
Prerequisite(s): NUS 764

**NUS772 Qualitative Research Methods**  
UAH  
Hours 3  
The purpose of this course is to assist the student in using selected qualitative research methods. Learning modules will explore qualitative approaches, sampling, data collection, data analysis and dissemination. The course will review and explore the use of technology to assist the qualitative researcher.  
Prerequisite(s): NUS 750, NUS 756, NUS 758  
UA-Huntsville Course

**NUS776 Advanced Research Methods**  
UAH  
Hours 3  
The purpose of this course is to assist students in developing the knowledge and skills to design a mixed methods research (MMR) study. MMR is an advanced method for collecting, analyzing, and “mixing” both quantitative and qualitative data within a single study, to understand a research problem more completely.  
Prerequisite(s): NUS 752, NUS 758, NUS 760, NUS 768, NUS 772  
UA-Huntsville Course

**NUS780 Introduction to Omics**  
UAH  
Hours 3  
The purpose of this course is to introduce the revolution of omics and discuss the role nurse scientists can play in precision health development. Nurse scientists are in a position to provide a unique contribution to person-centered health approaches by broadening their understanding of molecular advances to improve health outcomes. A variety of different omics will be explored and the practical advantages, limitations, and challenges in individualized health promotion will be discussed.  
Prerequisite(s): Admission in the Joint Nursing Science PhD program  
UA-Huntsville Course

**NUS781 Omics in Nursing Research**  
Hours 3  
The purpose of this course is to provide an overview of advanced concepts of omics research by utilizing a biobehavioral systems approach in nursing science. The National Institute of Nursing Research's strategic plan for Genomic Nursing Science is used as the framework for integrating omics and nursing research. Practical application in omics theories, methodologies, technology, bioinformatics, and responsible conduct of research is discussed. Additionally, resources in building capacity for the next generation of omics scientists are reviewed.  
Prerequisite(s): NUS 780

**NUS782 Curriculum Development and Program Evaluation for Nurse Educators**  
UAH  
Hours 3  
The purpose of this course is to examine the procedures for designing, implementing, and evaluating nursing education curriculum. The process will be examined beginning with the program mission. Educational theories, philosophy, concepts, and program evaluation will be explored. The nurse educator's role in curriculum design and program evaluation is assessed.  
Prerequisite(s): Admission in the PhD program  
UA-Huntsville Course

**NUS783 Instructional Methods and Assessments in Nursing Education**  
Hours 3  
The purpose of this course is to discover teaching styles and implement instructional technologies to promote learning in diverse populations of students. Throughout the semester, students will explore didactic and clinical learning activities and evaluation strategies to demonstrate transfer of learning.  
Prerequisite(s): NUS 782

**NUS784 Applied Technology in Healthcare Research**  
Hours 3  
The purpose of this course is to apply emerging technologies within the healthcare environment. The course prepares the nurse scientist to engage with other researchers in the areas of data analytics, simulation, telehealth, robotics, and other technologies to translate science from the bench to the bedside. Translation of technology to the healthcare setting will be emphasized with the goal of improving patient outcomes.  
Prerequisite(s): NUS 784 or permission from professor  
UA-Huntsville Course

**NUS785 Research and Development (R&D) of Innovative Health Care Technology**  
UAH  
Hours 3  
The purpose of this course is to develop the scientific skills to move an innovation from concept to implementation following a research and development (R&D) process. The course prepares the scientist to engage with researchers inside and outside health care fields, solicit input from end-users early and often, create patentable intellectual property, and fund the development of products with federal grants or investors.  
Prerequisite(s): NUS 784 or permission from professor  
UA-Huntsville Course
NUS799 Dissertation Hours
Hours 1-12

The purpose of this course is initiation, continuation, or completion of the dissertation for the Doctor of Philosophy (PhD) in Nursing Science degree. This course must be repeated each semester consecutively up to 24 credit hours until successful defense of the dissertation.

Prerequisite(s): Successful completion of 45 hours of NUS courses
