Applicants are admitted into the program only for the Fall semester. Students cannot begin the program in the Spring or Summer semesters. Admission to graduate work in advertising and public relations requires
a 3.0 or higher undergraduate grade point average (GPA) (on a 4.0 scale). Successful applicants must also earn a combined score of at least 300 on the verbal and quantitative portions of the Graduate Record Examination (GRE) general test, or at least 600 on the Graduate Management Admissions Test (GMAT). International students are required to obtain a score of 90 or better on the Test of English as a Foreign Language (TOEFL) iBT test. Required supporting materials include a statement of purpose explaining how a master’s in advertising and public relations would help you reach your career goals and three letters of reference (at least one from an academic source and one from a professional source).

Applications are reviewed starting November 15 on a rolling basis. The deadline for applicants to receive priority for departmental assistantships is March 15. Applications will be considered after the March 15 deadline, but they will not be considered for assistantships. No applications will be considered after June 15. The department offers a few competitive assistantships that provide a partial tuition waiver and a monthly stipend for support roles within the department.

Students that fall below the minimum grade point average or test score requirements may be admitted, but will require permission to continue. Students that require permission to continue must earn at least a 3.0 GPA after the first full semester in the program (minimum nine hours). Students that are transferring from another master’s program can have up to 12 hours accepted from their prior institution for the M.A. degree, pending a curriculum review by the graduate coordinator. In addition, non-degree seeking students can enroll in M.A. classes, pending a review by the graduate coordinator.

Accelerated Master’s Program

Through the Accelerated Master’s Program (AMP), talented seniors will be able to take courses that count simultaneously towards their undergraduate and graduate programs. Once admitted, an AMP student is approved to take up to 12 hours of graduate courses that can count towards both the B.A. and M.A. degrees, while also reducing the time it takes to earn his/her master’s degree by one year. Interested students will apply for the AMP program their junior year and will work with the graduate coordinator to create their plan of study for their final two years. Applicants must have earned 90 or more credit hours by the Fall semester that they start the AMP program and have a minimum GPA of 3.3. Students must also score a 300 or more on the GRE for admission; however, students that have a GPA of 3.75 or higher in major classes may receive a GRE waiver, pending a resume and portfolio review by the graduate coordinator.

Expedited Admission Track into the CIS Doctoral Program

The Expedited Admission Track into the CIS doctoral program allows highly qualified students that completed an undergraduate degree to be admitted into the doctoral program. Such students will begin graduate coursework in the A+PR M.A. program and complete their graduate degree as College-wide doctoral candidates, without having to reapply for admission or to transfer credit hours from the M.A. program into the Ph.D. program. In short, if admitted on the expedited track, candidates will be able to count 24 hours of M.A. coursework, rather than the maximum of 12 hours, toward their doctoral degree.

Requirements

• At least five years of professional experience in advertising, public relations or a related field
• Admission into the A+PR M.A. program and the CIS Ph.D. program

• Submit a statement of purpose indicating interest and commitment to graduate work through the doctoral level
• Upon completing 24 hours of graduate coursework at the master’s level (18 hours of core classes, a strategy class and a media class), students must pass a comprehensive, qualifying exam to continue towards the doctoral degree

Degree Requirements

Plan I, The Individualized Program

The individualized M.A. in advertising and public relations is a 33-hour program designed to provide students with knowledge of industry trends, proficiency in research-driven critical thinking and problem solving, and exposure to scholars and professionals who are well-connected to an evolving communication landscape in order to build a unique expertise in managing persuasive communication.

Students will work with a faculty advisor to create their own career emphasis from a wide range of electives within A+PR and other departments that will help them gain in-depth knowledge for their future career. These electives, along with a core specifically designed to provide students with a true blend of academic and industry knowledge, will help guide their capstone project. Students will choose from two options: a strategic plan for aspiring industry professionals or a thesis for aspiring scholars. In addition to coursework, students will be required to receive professional experience during the summer after their first year in order to enhance the training they receive in the classroom.

Each student’s progress will be guided by their faculty advisor. Students in each program must maintain a minimum GPA of 3.0 during their tenure in the program. Students that receive more than two “C” grades will undergo a faculty review to determine if they should proceed in the program.

Total Hours 33

Professional Experience Requirement

Students enrolled in the M.A. program will be required to complete an internship or some type of professional experience during the summer of their first year. This requirement is designed to encourage students to use the skills learned in the classroom in a professional setting.
Students will be required to submit a job description to the graduate coordinator for approval prior to completing the internship. Internships will be approved on a case-by-case basis, but typical internships that are approved would require at least 10 hours a week and/or 80 hours during the summer semester in an advertising, public relations or a related role in a professional setting. After completing the internship, students will submit a short (1-2 page) description of what they experienced and learned during the internship, as well as a form signed by their immediate supervisor, in order to satisfy the requirement. International students that must receive course credit for the internship requirement will enroll for one hour in APR 596 Independent Study Resrch.

Capstone Project

The capstone project will be an individual demonstration of your knowledge of the skills, theories and concepts that you learned in your coursework during the program. Students will work with an advisor to determine the best course of action from two options:

Strategic Plan

Students will work with their advisor to identify a problem or opportunity facing an organization of their choice. The student will conduct secondary and primary research in order to assess the problem/opportunity and create a strategic plan that will address the problem/opportunity. Completing an integrated communication strategic plan will be suggested to students that are looking to pursue a career in the advertising and public relations industry. The student will submit a proposal to a three-member standing committee, and upon completion, the student will present his/her plan to the faculty for evaluation. Students will enroll for six hours in APR 598 Non-Thesis Project during the spring semester.

Thesis

Students will work with their advisor to identify a gap in the scholarly research devoted to a topic in advertising and/or public relations. The student will conduct a review of related literature, and propose and execute original research that will answer the student’s overarching research inquiry. Completing a thesis will be suggested to students that are looking to pursue a doctorate. The student, along with their advisor, will form a committee that will evaluate the thesis upon completion. Students will enroll for six hours in APR 599 Thesis Research during the spring semester.

Plan II, The One-Year General Program

The one-year M.A. in advertising and public relations is designed to provide a general understanding and mastery of advertising and public relations. The one-year program requires:

a. completion of a specific 33-hour program of graduate courses,

b. demonstration of proficiency in research skills,

c. passing of a comprehensive written examination, and

d. completion of a master’s project in the course APR 598 Non-Thesis Project

Interim session

APR 590 Special Topics | 3 |

First summer session

APR 597 Research for Project | 3 |

Second summer session

APR 598 Non-Thesis Project | 3 |

Total Hours 33

Research proficiency can be demonstrated by completion of APR 550 Analysis and Insights I and APR 583 Analysis and Insights II with grades of ”B” or better, or by successful application of research methods appropriate to the student’s project.

The comprehensive examination will be conducted during the first week of the first summer term and may be attempted only twice. Each year, two faculty members serve on the project committee for the Plan II master’s degree program. Those faculty members read each of the project reports submitted by students at the conclusion of APR 597 Research for Project/APR 598 Non-Thesis Project, and other faculty members may also attend the project presentations given by students at the end of this course.

Master’s Degrees

The primary purpose of master’s degree programs is to provide students with subject matter at an advanced level in their fields of study. Master’s degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master’s programs also help students become familiar with methods of independent investigation.

Program Requirements

Two plans are offered for the master’s degree:

Plan I. Candidates for the master’s degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

Plan II. Candidates for the master’s degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or “capstone experience” as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject. With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field. In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Residency Requirements

A student’s program at the master’s level must provide sufficient association with the resident faculty to permit individual evaluation of the student’s capabilities and achievements.
Graduate Credit
A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences
All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit
Courses of full graduate-level credit earned in a regionally accredited institution where a student was enrolled in the graduate school may be submitted for review for inclusion in a master's degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student's advisory committee and the dean of the Graduate School. Credit will not be accepted for transfer from any institution at which the student failed to achieve a "B" average on all graduate work attempted. Only courses in which a student earned a "B" grade or better may be transferred.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

A student initiates at the Graduate School's website a Request for Transfer of Graduate Credit earned at another institution. It is also the student's responsibility to assure that the Graduate School receives an official transcript of the credit requested for transfer, well in advance of the final semester.

With the approval of the student's department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master's degree may be transferred from another institution. All credit toward the master's degree, including transfer credit, must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the master's degree is to be awarded. Revalidation (recertification) of graduate credits that will be more than 18 semesters old at the time of UA master's program completion is not an option.

Please note that some departments allow fewer than 12 hours of graduate transfer credit. Be sure to check with your department's graduate coordinator regarding your department's transfer policy.

400-Level Courses
A maximum of 6 semester hours of 400-level course credit may be accepted for a master's degree program, but only if a form for Approval of 400-Level Course Work for Master's Credit is approved by the Graduate School prior to the semester in which the 400-level coursework will be taken.

Time Limit
All requirements for the master's degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. There is no provision for an extension of the time limit beyond six years for master's students.

Admission to Candidacy
During the 2013-2014 academic year, the Graduate Council eliminated the master's candidacy requirement. Departments may monitor master's candidacy if they wish, but the Graduate School does not monitor it and will not accept master's candidacy forms. Doctoral candidacy is not affected and remains an important doctoral program requirement.

Thesis
A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student's major department or division.

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

Article Style vs. Journal Format

Article Style.
At the doctoral level, "article-style dissertations" are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an "article-style thesis" to be presented for a master's degree.

Journal Format.
A "journal-format thesis" is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal's "information for authors" or similarly titled guidelines in conjunction with the Graduate School's Student Guide to Preparing Electronic Theses and Dissertations.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. A form for Appointment or Change of Master's Thesis Committee is used to request that the graduate dean appoint a thesis committee. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student's major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student's thesis committee. Unless there are extraordinary circumstances meritig approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. A final oral examination is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral examination unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting.
As of August 15, 2009, all theses are submitted electronically rather than on paper. See the Graduate School’s homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School’s website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student’s major department.

**Protection of Human Subjects for Research**

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University’s Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research. In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

**Comprehensive Examinations**

In addition to the regular course examinations, a final comprehensive examination representing a “culminating” or “capstone” experience for a degree is required of all candidates for the master’s degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a “policy and practice” paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School. The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. A final report, on the Master’s/EdS Examination Form is on the Graduate School website. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

**Application for Graduation**

Each candidate for a master’s degree must apply for graduation through myBama no later than the registration period for the semester or the first session of the summer term in which requirements for the degree are to be completed.

**Second Master’s Degree**

Six (6) semester hours of eligible credit from one master’s degree at The University of Alabama may be applied to the requirements for a second master’s degree, but only if the department of the second master’s agrees to the courses in the plan of study. Any hours from the previous master’s degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. ***Please note that if a student double counts six hours between two master’s degrees, no hours may double count toward any additional master’s degrees.

**Department of Communication Studies**

- Major
  - Communication Studies (MA) (p. 354)

[object Object]

**COM500 Intro Graduate Studies**

Hours 1

The primary goal is to orient new graduate students to the expectations and procedures of graduate study in the department. Topics covered include developing the plan of study, thesis prospectus, comprehensive examination, and choosing advisors and committees.

**COM501 Intro Tchng Public Speak**

Hours 1

The primary goal of this course is to facilitate the instruction of COM 123 Public Speaking. Students enrolled in this course will provide lesson plans for their classes and discuss options for improving classroom learning.

**COM513 Communication And Diversity**

Hours 3

Study and analysis of issues of diversity as they relate to groups in society and in communication fields. Emphasis is on the media’s treatment of various groups in society. Approved as a communication and cultural diversity elective.

**COM515 African American Rhetoric**

Hours 3

A historical-critical investigation of African American public discourse from the Revolutionary era to the present, exploring rhetorical strategies for social change and building community.

**COM521 Political Communication**

Hours 3

An exploration of rhetorical, media, and cross-disciplinary theories and literature related to political communication as expressed in campaigns and institutional governance.
COM525 Gender & Political Comm
Hours 3
Study of the impact of gender on political communication activities. Topics include gender differences in political messages and voter orientation, masculine ideals of leadership, women's roles and advancement in the political sphere, and media representations.

COM536 Independent Study
Hours 1-3
Students who want to count this course toward their Plans of Study must complete the official request form and submit it for the approval of their faculty advisor and the Graduate Program Director.

COM541 Contemp Rhetoric Theory
Hours 3
A survey of major contributions to rhetorical theory from the 20th century up to the present.

COM545 Classicl Rhetorcl Theory
Hours 3
A systematic inquiry into the development of Greek and Roman rhetorical theory during the classical period (ca. 480 B.C.E. - 400 C.E.).

COM548 Sem Rhetorical Criticism
Hours 3
An examination of various methodological perspectives of rhetorical criticism. Specifically, the course aims to familiarize students with both traditional and alternative critical methods and to encourage students to perceive the rhetorical dimensions of all manner of public discourse, ranging from speeches, advertising, film, popular music to discursive forms in new media and the Internet.

COM550 Qualitative Research Methods in Communication
Hours 3
An introduction to qualitative research methods in communication, including data collection and analysis. The goals of the course are to provide exposure to a broad array of qualitative methods, help students learn to use some of these methods, and to help them to understand the role of research in our field. The course is designed to help student actually conduct research, resulting in two conference-worthy papers.

COM551 Instructional Communication: Theories & Practice
Hours 3
This course explores the theories, research, and practice that identify communication skills and competencies in the educational setting.

COM555 Conflict and Negotiation
Hours 3
Negotiation is fundamentally a communicative activity. The main objective of this course is to understand processes of formal conflict management in mixed motive settings. Students will apply negotiation theory and skills to simulated negotiation cases that include buyer-seller transactions, negotiating through an agent or mediator, salary negotiations, deal making, resolution of workplace disputes, multiparty negotiations, international and intercultural negotiations, and ethical decision making and communication in negotiation. The skills and theory introduced in this course will help students manage integrative and distributive aspects of the negotiation process to achieve individual and collective goals.

COM556 Group Leadership
Hours 3
An advanced study of small-group behavior, examining in detail theories of leadership as they relate to problem solving in group situations.

COM561 Human Communication Theory
Hours 3
A detailed review of selected theories of speech communication with a focus on the critical examination of the foundation of social scientific theories.

COM562 Theories Of Persuasion
Hours 3
A critical review of social-influence theories in the area of persuasion and human action.

COM563 Relational Communication
Hours 3
Focused investigation of communication in close personal relationships, with primary emphasis on contemporary concepts and theories of romantic relationships and friendships.

COM565 Intercultural Communication
Hours 3
Survey and analysis of major concepts, theories, and research dealing with communication between people of different cultural backgrounds in multicultural and international settings.

COM567 Seminar Public Address
Hours 3
A topical consideration of individual case studies from public discourse, designed to probe problems of the nature of the audience, the ethics of persuasion, and the power of public advocacy in mass society. Topics may vary.

COM569 Communication & Gender
Hours 3
Explores the role of communication in the construction of gender. Covers feminist theoretical approaches in communication and other disciplines, the intersections of gender with other marginalities, and the role of gender in various communication contexts. Approved as a communication and cultural diversity elective.

COM571 Sem Organizatn Communctn
Hours 3
An introductory examination of historical and contemporary issues in organizational communication scholarship from a variety of theoretical and methodological perspectives.

COM572 Org Assessment/Intervent
Hours 3
Examines the theoretical issues inherent in the study of organizational communication, the primary factors requiring assessment and intervention, the impact of on-going changes and new information techniques, current challenges facing the organizational consultant, and the practical application of communication processes for improving organizations.
COM575 Technology, Culture, and Human Communication
Hours 3
Study of the complexity of technologically-mediated communication across cultures. This course combines literature and concepts from intercultural communication with human communication and technology and addresses the challenges of interacting with others via technology, working in global virtual teams and organizations, and participating as a citizen and consumer in the technology age.

COM590 Internship
Hours 1-3
Proposal for supervised field experience in communication studies must be submitted and approved.

COM595 Special Topics
Hours 3
Topics vary by instructor.

COM598 Professional or Creative Project
Hours 3
MA students in Communication Studies who elect the Professional Plan II Option may earn 3 hours credit for completing a research or creative project.

COM599 Thesis Research
Hours 1-6
No description available.

Communication Studies, MA
Master of Arts in Communication Studies
The master of arts degree program in communication studies is designed to promote understanding of the functions of human communication in its various forms and venues and emphasizes three substantive research areas: rhetoric and political discourse, interpersonal and organizational communication, and communication and culture.

Students can pursue one of three different options:

- **Academic** – Comprehensive Exam Option: for students who wish to fulfill teaching requirements in communication studies or who want to pursue advanced degree work. It requires a comprehensive written examination to demonstrate proficient knowledge in the selected area of study.

- **Research** – Thesis Option: for students who plan to continue their careers in academia and pursue advanced research opportunities. It requires an original thesis project in a specific research area of interest.

- **Professional** – Capstone Portfolio Option: for students who plan to pursue professional careers. It requires an internship or professional project and submission of a final Capstone Portfolio that provides a comprehensive overview of the work completed.

For distance learning students, this degree program can be completed entirely online, with a 12-hour elective emphasis in Organizational Leadership, designed for working professionals with either the academic or the professional option.

Admission Requirements
The department reviews applications for fall, spring, and summer admission into the program. Applications submitted to the Graduate School by May 1 will be reviewed by the department for fall admission, or by November 1 for spring admission, to the main campus program. Admission decisions regarding distance learning applications for the program are made on a rolling basis. To apply for departmental graduate assistantships, which are awarded only in the spring for the following year, applicants must have been accepted for admission into the program, by the department, no later than March 1.

Applicants must submit one of the following examination scores in support of their applications: the Graduate Record Examination (GRE) or the Miller Analogies Test (MAT). Subject to the approval of the department chairperson and the dean of the Graduate School, a
maximize the number of 12 semester hours of graduate courses may be transferred from another institution. These hours must be in communication studies or in a closely allied subject and must contribute to the educational objectives of the student.

Graduate students in communication studies may choose elective courses to complete their plans of study, with approval of their academic advisors. A minimum of 24 graduate hours must be completed in communication studies.

See the Admission Criteria section of this catalog for more information.

Requirements for the MA Degree

The Department of Communication Studies uses a form of contract advising. Graduate students are required to plan contractual programs of study with their assigned advisors during the first semester of coursework. These contractual programs must be approved by the academic advisor and filed with the graduate program coordinator by the end of the first semester of coursework. Each plan of study must meet the minimum program requirements established by the Department of Communication Studies and the Graduate School.

Degree Requirements

A master of arts degree in communication studies requires a minimum of 30 hours, based on the following component areas of study:

<table>

Plan I: Thesis option, which includes 6 hours of thesis research COM 599 Thesis Research. In addition to completing the courses specified above and electives stipulated by their plans of study, students who choose Plan I must successfully complete a master’s thesis, orally defend that thesis, and have the thesis accepted by the Graduate School.

Plan II: Non-thesis Options, which include minimally six hours of electives in the department. All students who choose Plan II must complete a minimum of 30 hours of graduate coursework, including the courses specified above and others stipulated by their approved plans of study. Students following the Plan II option have a choice of two plans:

- **Academic Plan:** Students who choose this plan must pass a comprehensive examination, to be taken no later than the semester in which the course requirements for the master’s degree are to be completed. The examination is designed to reveal the knowledge gained by the candidate through both the theory courses and the electives taken in the program, as well as the candidate’s ability to express that knowledge in acceptable form. The questions will be formulated and evaluated by the comprehensive examination committee.
  - Professional Plan: Students who are primarily pursuing professional interests may choose this alternative plan. It provides students with an opportunity to include in their plans of study some type of practical application of their academic work. Students who choose to pursue this plan must secure permission to do so by submitting a formal proposal to their academic advisor, no later than upon completion of 12 hours of graduate coursework. To complete this plan of study, students are required to submit, at the end of their coursework, a Capstone Portfolio for their advisor’s approval.

Master’s Degrees

The primary purpose of master’s degree programs is to provide students with subject matter at an advanced level in their fields of study. Master’s degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master’s programs also help students become familiar with methods of independent investigation.

Program Requirements

Two plans are offered for the master’s degree:

**Plan I.** Candidates for the master’s degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

**Plan II.** Candidates for the master’s degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or “capstone experience” as described under the Comprehensive Examinations section below.
Both plans require a minimum of 18 semester hours in the major subject. With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Residency Requirements

A student’s program at the master’s level must provide sufficient association with the resident faculty to permit individual evaluation of the student’s capabilities and achievements.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Courses of full graduate-level credit earned in a regionally accredited institution where a student was enrolled in the graduate school may be submitted for review for inclusion in a master’s degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student’s advisory committee and the dean of the Graduate School. Credit will not be accepted for transfer from any institution at which the student failed to achieve a “B” average on all graduate work attempted. Only courses in which a student earned a “B” grade or better may be transferred.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

A student initiates at the Graduate School’s website a Request for Transfer of Graduate Credit earned at another institution. It is also the student’s responsibility to assure that the Graduate School receives an official transcript of the credit requested for transfer, well in advance of the final semester.

With the approval of the student’s department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master’s degree may be transferred from another institution. All credit toward the master’s degree, including transfer credit, must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the master’s degree is to be awarded. Revalidation (recertification) of graduate credits that will be more than 18 semesters old at the time of UA master’s program completion is not an option.

Please note that some departments allow fewer than 12 hours of graduate transfer credit. Be sure to check with your department’s graduate coordinator regarding your department’s transfer policy.

400-Level Courses

A maximum of 6 semester hours of 400-level course credit may be accepted for a master’s degree program, but only if a form for Approval of 400-Level Course Work for Master’s Credit is approved by the Graduate School prior to the semester in which the 400-level coursework will be taken.

Time Limit

All requirements for the master’s degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. There is no provision for an extension of the time limit beyond six years for master’s students.

Admission to Candidacy

During the 2013-2014 academic year, the Graduate Council eliminated the master’s candidacy requirement. Departments may monitor master’s candidacy if they wish, but the Graduate School does not monitor it and will not accept master’s candidacy forms. Doctoral candidacy is not affected and remains an important doctoral program requirement.

Thesis

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master’s degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student’s major department or division.

The final oral thesis defense is the culminating experience in the master’s program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

Article Style vs. Journal Format

Article Style.

At the doctoral level, "article-style dissertations" are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an "article-style thesis" to be presented for a master’s degree.

Journal Format.

A "journal-format thesis" is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal’s “information for authors” or similarly titled guidelines in conjunction with the Graduate School’s Student Guide to Preparing Electronic Theses and Dissertations.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. A form for Appointment or Change of Master’s Thesis Committee is used to request that the graduate dean appoint a thesis committee. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student’s major
department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student’s thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. A final oral examination is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral examination unless there are extraordinary circumstances warranting the graduate dean’s approval of the absence prior to the defense meeting.

As of August 15, 2009, all theses are submitted electronically rather than on paper. See the Graduate School’s homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School’s website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student’s major department.

**Protection of Human Subjects for Research**

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University’s Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research. In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

**Comprehensive Examinations**

In addition to the regular course examinations, a final comprehensive examination representing a “culminating” or “capstone” experience for a degree is required of all candidates for the master’s degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;  
- a research paper, a “policy and practice” paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School. The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. A final report, on the Master’s/EdS Examination Form is on the Graduate School website. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

**Application for Graduation**

Each candidate for a master’s degree must apply for graduation through myBama no later than the registration period for the semester or the first session of the summer term in which requirements for the degree are to be completed.

**Second Master’s Degree**

Six (6) semester hours of eligible credit from one master’s degree at The University of Alabama may be applied to the requirements for a second master’s degree, but only if the department of the second master’s agrees to the courses in the plan of study. Any hours from the previous master’s degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. ***Please note that if a student double counts six hours between two master’s degrees, no hours may double count toward any additional master’s degrees.

JCM500 Orientation to Graduate Studies
Hours 1
This course introduces students to graduate study and sets the stage for the remainder of their coursework. Students learn about research in journalism and mass communication, and they become familiar with the department faculty’s interests and expertise. The course is also be a place to share questions and concerns about the program.

JCM501 Media Production Tools
Hours 3
Instruction in and critical analysis of communication technologies used in the production of community journalism.

JCM502 Producing Community Journalism
Hours 3
This course focuses on gathering, writing, editing, and presenting of news and information across media platforms.

JCM511 Depth Reporting
Hours 3
This course entails reporting and writing in-depth news and feature stories for publication in print and online. Students learn advanced techniques in information gathering and non-fiction writing. Deadline reporting and writing skills are addressed, as well.

JCM512 Seminar in American Cinema
Hours 3
The analysis of American cinema—focusing on three critical methods: genre study, authorship (the auteur theory), and the star system.

JCM517 Advanced Sports Writing & Reporting
Hours 3
Advanced techniques in reporting and writing for sports media, as well as ethical and societal implications of sports journalism.
Prerequisite(s): None – graduate student standing.
Prerequisite(s) with concurrency: None

JCM520 Media Effects
Hours 3
Theoretical study of individual and societal effects of media, including the impact and influence on attitudes and cultural beliefs.

JCM528 Editorial Analysis and Opinion
Hours 3
The art and practice of writing editorials, columns and other persuasive forms for print and online.

JCM533 Journalism and Emergent Media
Hours 3
This course examines how emerging media have and are evolving the relationship between journalism/mass media and society. From primarily a social scientific perspective, this course addresses key theories and issues relevant to journalism’s ongoing shift to the digital world.

JCM536 Teaching of Journalism
Hours 3
This service learning course provides an overview of journalism and the process of producing school publications. The course focuses on hands-on journalism projects that acquaint students with the software applications used to generate news products. Students also spend time in classrooms learning about school publications.

JCM542 Advanced Magazine Writing
Hours 3
This course focuses on writing and editing of long-form articles for publication in print and online depth magazines. Students learn advanced narrative non-fiction writing techniques and how to gather information for longer feature stories.

JCM545 Feature Writing in the Digital Age
Hours 3
Advanced techniques in writing and editing feature articles for publication across media outlets. Students will learn nonfiction writing techniques and apply them to a variety of feature article forms, with an emphasis on storytelling for digital audiences. Students will study top-notch published work to observe these techniques in action, and then sharpen their own skills through several short and lengthier, in-depth feature articles.

JCM548 News Analysis
Hours 3
Historical and critical study of electronic-media news in the United States.

JCM552 Journalism Theory and Research
Hours 3
Exploration of theory and an overview of research approaches as they relate to the study of news media and their role in communities.

JCM553 Making Media Innovation
Hours 3
Covers the methods by which journalists and marketing professionals monitor the interests and activities of readers, viewers, and users of content.

JCM555 Entrepreneurial Journalism
Hours 3
Practices, ethics and theory of entrepreneurship in the journalism field.
JCM561 JCM Special Topics  
Hours 1-3  
Course content varies to explore current topics relevant to journalism and creative media. Repeatable for up to 6 credits if the topics are different.

JCM562 Contemporary Issues in Journalism  
Hours 3  
Examines current issues facing the news media, ranging from professional problems to the human, social, and other consequences of news, news practices, and news technology.

JCM563 History of Journalism  
Hours 3  
This course focuses on the study of the origin and development of journalism, its major practices (e.g., news reporting), important ideas (e.g., objectivity), and the individuals who made notable contributions to the field. The history and philosophy of freedom of the press and the First Amendment receives particular attention.

JCM571 Practice of Community Journalism  
Hours 1  
An immersion in a community and in the news organization that covers it, and an introduction to the daily practice of professional journalism at the community level.

JCM572 Seminar in Professional Journalism  
Hours 3  
Studies in selected aspects of the practice of journalism. May be repeated.

JCM573 Documenting Justice I  
Hours 3  
Documenting Justice I is an interdisciplinary course in documentary filmmaking. Harnessing a variety of perspectives drawn from disciplines across the humanities, students use film to document and analyze the many dimensions of culture and social experience at issue when focusing on a story of justice or injustice in Alabama. The course involves study of documentary history and theory as well as the ethics of cinematic non-fiction.

JCM574 Documenting Justice II  
Hours 3  
Documenting Justice II is an interdisciplinary course in documentary filmmaking. Harnessing a variety of perspectives drawn from disciplines across the humanities, students use film to document and analyze the many dimensions of culture and social experience at issue when focusing on a story of justice or injustice in Alabama. The course involves study of documentary history and theory as well as the ethics of cinematic non-fiction.

JCM575 Anatomy of a Trial I  
Hours 3  
Anatomy of a Trial is an interdisciplinary service-learning course in narrative nonfiction, focusing on audio storytelling. Students learn to develop their own personal voice and style while also learning practical skills about the emerging podcast landscape. Students are introduced to professional audio techniques, including recording, editing and sound design. The course involves study of radio journalism history and theory as well as the ethics of narrative nonfiction.

JCM576 Anatomy of a Trial II  
Hours 3  
This is an interdisciplinary service-learning course in narrative nonfiction, focusing on audio storytelling. Students learn to develop their own personal voice and style while also learning practical skills about the emerging podcast landscape. Students are introduced to professional audio techniques, including recording, editing and sound design. The course involves study of radio journalism history and theory as well as the ethics of narrative nonfiction.

JCM590 Directed Research in JCM  
Hours 1-3  
Independent study as arranged.

JCM597 Master’s Project  
Hours 1-3  
Students produce a professional-level project or complete comprehensive exams.

JCM599 Thesis Research  
Hours 1-6  
Students develop and complete independent research project under faculty supervision.

Journalism, M.A.

The Department of Journalism and Creative Media offers the Master of Arts degree with a major in journalism. Students work closely with a faculty dedicated to the principles and practices of sound journalism and scholarly inquiry. The program offers three options for study:

- Individuals who seek in-depth knowledge and mastery of one or more of the subfields and methodologies of journalism — for example, communication history, communication law, communication theory and methods. These individuals typically follow Plan I (see below) and go on to pursue doctorates. Those with significant experience in the journalism field may teach without the PhD degree.
- Individuals who seek to work professionally in writing, editing, visual journalism and/or digital journalism, and who wish to develop conceptual knowledge of the field, as well as critical-thinking and problem-solving skills. These students typically follow Plan II (see below).
- Individuals who wish to earn graduate credit through distance education can enroll in our online journalism program. This program is ideal for journalists eager to expand their knowledge base, individuals looking to start a career in journalism, and those interested in teaching in the field of journalism.

The program serves both recent BA recipients, whether in journalism/mass communication or other fields, and professionals seeking to deepen their knowledge.

Admission Requirements

Admission to graduate work in the Program of Journalism requires a 3.0 or higher undergraduate GPA (on a 4.0 scale). Applicants not meeting this criterion may be admitted under permission to continue status if the program’s faculty agrees the student is likely to succeed in the program.

In addition to the online application, applicants must submit other documents to the UA Graduate School, including undergraduate transcripts and a statement of purpose addressing how the degree will advance the applicant’s professional and educational goals. Applicants should also solicit three letters of recommendation, which may be submitted online to the UA Graduate School or sent as hard copies to the Journalism program's graduate coordinator. Applicants should send a resume to the program’s graduate coordinator, and they may also submit examples of journalistic work to the coordinator – e.g., stories, photos or multimedia – via hard copy, disk, or website link.

The program faculty may require up to nine hours of additional coursework for applicants lacking undergraduate classes related to the professional values and competencies that are central to the master’s program.

The application deadline is March 31, but applicants are encouraged to apply by the end of January in order to be considered fully for University funding (assistantships or fellowships).

See the Admission Criteria section of this catalog for more information.

Degree Requirements

Each student entering the graduate program in journalism must complete 31 semester hours of credit, under either programs of study. Requirements for each plan are as follows:

### Plan I, Master’s Thesis

<table>

</tbody>
</table>

All students must enroll in JCM 500 Grad Studies Orientation their first semester.

Initially, the program’s graduate coordinator will serve as the student's advisor. The coordinator will assess students’ undergraduate transcripts and will help the student establish a plan for cognate or elective courses that will provide students with core values and competencies for the program.

At the completion of 12 credit hours, the student should select a committee chair. The chair will serve as the student’s academic advisor and will help the student select members for the thesis or project committee. The thesis committee must comprise two faculty members from the Department of Journalism and Creative Media program and at least one member from outside the program. The project committee must comprise at least two faculty members from the program — no outside member is required. An Appointment or Change of Master’s Thesis Committee form must be submitted to the Graduate School for the dean’s approval of the committee members.

The student is required to pass a comprehensive examination in conjunction with an oral defense of the thesis or master’s project. Students are questioned on their thesis or project topic, and on core areas of their course of study. For the student to pass the examination, committee members must be satisfied the student has gained sufficient knowledge in core areas of the curriculum and has mastered a specific area of knowledge.

The following applies to students pursuing a master’s degree under Plan II

Plan II students produce a project rather than a thesis. The successful master’s project demonstrates mastery of a knowledge area as well the ability to apply this knowledge through the practice of journalism. The typical project will include:

1. an academic component in which the student systematically analyzes some aspect of journalism or its consequences and
2. a rigorous, thorough journalistic work, such as an in-depth multimedia story

The academic analysis should shape the decisions the student makes about the journalistic work. For example, a student may analyze past news coverage of a particular topic, noting shortcomings in the reporting, and then use findings from this analysis to shape the reporting for the student’s own in-depth news story.

Prior to the final semester, the student should propose the project in writing to the committee chair, describing how the project will be accomplished and laying out a specific time table. The approved plan will be shared with the other committee member(s).

Students present the project to fellow students, committee faculty and news professionals as part of a comprehensive oral examination. In conjunction with this exam, each student under Plans II will present a portfolio of the student’s best work while enrolled in the program. The final project report should be the first item in the portfolio.

At the time of the student’s comprehensive exam, each student under Plan II will present a portfolio of the student’s best work while enrolled in the program. The master’s project, which includes the academic study and the journalistic work, should be the first item in the portfolio.

Plan II also includes a one-year option involving a professional immersion experience in a newsroom. In recent years this option has been administered in conjunction with the Anniston (Ala.) Star newspaper. Admission criteria and core curriculum requirements are identical to the traditional Plan II option.

**Master’s Degrees**

The primary purpose of master’s degree programs is to provide students with subject matter at an advanced level in their fields of study. Master’s degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master’s programs also help students become familiar with methods of independent investigation.

**Program Requirements**

Two plans are offered for the master’s degree:

**Plan I.** Candidates for the master’s degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

**Plan II.** Candidates for the master’s degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or “capstone experience” as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject. With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

**Residency Requirements**

A student’s program at the master’s level must provide sufficient association with the resident faculty to permit individual evaluation of the student’s capabilities and achievements.

**Graduate Credit**

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

**Graduate Credit for Noncredit Experiences**

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

**Transfer of Credit**

Courses of full graduate-level credit earned in a regionally accredited institution where a student was enrolled in the graduate school may be submitted for review for inclusion in a master’s degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student’s advisory committee and the dean of the Graduate School. Credit will not be accepted for transfer from any institution at which the student failed to achieve a “B” average on all graduate work attempted. Only courses in which a student earned a “B” grade or better may be transferred.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

A student initiates at the Graduate School’s website a Request for Transfer of Graduate Credit earned at another institution. It is also the student’s responsibility to assure that the Graduate School receives an official transcript of the credit requested for transfer, well in advance of the final semester.

With the approval of the student’s department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master’s degree may be transferred from another institution. All credit toward the master’s degree, including transfer credit, must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the master’s degree is to be awarded. Revalidation (recertification) of graduate credits that will be more than 18 semesters old at the time of UA master’s program completion is not an option.

Please note that some departments allow fewer than 12 hours of graduate transfer credit. Be sure to check with your department’s graduate coordinator regarding your department’s transfer policy.

**400-Level Courses**

A maximum of 6 semester hours of 400-level course credit may be accepted for a master’s degree program, but only if a form for Approval of 400-Level Course Work for Master’s Credit is approved by the Graduate
School prior to the semester in which the 400-level coursework will be taken.

**Time Limit**

All requirements for the master’s degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. There is no provision for an extension of the time limit beyond six years for master’s students.

**Admission to Candidacy**

During the 2013-2014 academic year, the Graduate Council eliminated the master’s candidacy requirement. Departments may monitor master’s candidacy if they wish, but the Graduate School does not monitor it and will not accept master’s candidacy forms. Doctoral candidacy is not affected and remains an important doctoral program requirement.

**Thesis**

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master’s degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student’s major department or division.

The final oral thesis defense is the culminating experience in the master’s program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

**Article Style vs. Journal Format**

**Article Style.**

At the doctoral level, “article-style dissertations” are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an “article-style thesis” to be presented for a master’s degree.

**Journal Format.**

A “journal-format thesis” is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal’s “information for authors” or similarly titled guidelines in conjunction with the Graduate School’s Student Guide to Preparing Electronic Theses and Dissertations.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. A form for Appointment or Change of Master’s Thesis Committee is used to request that the graduate dean appoint a thesis committee. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student’s major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student’s thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. A final oral examination is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral examination unless there are extraordinary circumstances warranting the graduate dean’s approval of the absence prior to the defense meeting.

As of August 15, 2009, all theses are submitted electronically rather than on paper. See the Graduate School’s homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School’s website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student’s major department.

**Protection of Human Subjects for Research**

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University’s Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research. In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

**Comprehensive Examinations**

In addition to the regular course examinations, a final comprehensive examination representing a “culminating” or “capstone” experience for a degree is required of all candidates for the master’s degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a "policy and practice" paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School. The examination must be given at least six weeks before the date of
graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. A final report, on the Master’s/EdS Examination Form is on the Graduate School website. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Application for Graduation
Each candidate for a master's degree must apply for graduation through myBama no later than the registration period for the semester or the first session of the summer term in which requirements for the degree are to be completed.

Second Master's Degree
Six (6) semester hours of eligible credit from one master's degree at The University of Alabama may be applied to the requirements for a second master's degree, but only if the department of the second master's agrees to the courses in the plan of study. Any hours from the previous master's degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. ***Please note that if a student double counts six hours between two master's degrees, no hours may double count toward any additional master's degrees.

School of Library and Information Studies
• Majors
  • Book Arts (MFA) (p. 368)
  • Library and Information Studies (MLIS) (p. 371)

Vision
Through excellence in teaching, research, and service, SLIS is committed to educate socially responsible information professionals prepared to empower diverse populations in a multitude of contexts, communities, and cultures.

Mission
To advance the theory, art, and practice of professions specializing in the use and creation of information in traditional and emergent forms.

Values
Since its beginnings more than 40 years ago, SLIS has developed a unique interdisciplinary personality that blends the arts, humanities, and social sciences. We support a mutual belief in and respect for those we serve. This is evident in our strong support of intellectual freedom, access to all, and the tenets of social justice.

Educational Objectives
The educational objectives of these graduate programs are as follows:

Teaching
Provide students with the knowledge, skills, understanding, and diverse technologies to meet the changing informational and cultural needs of diverse populations and organizations. Foster leadership skills and abilities in all students, provide opportunities within the program for students with leadership potential to exercise their abilities, and encourage students as graduates to seek out and assume leadership roles. Improve and develop students' critical and conceptual thinking skills.

Research and creative activity.
Augment and advance knowledge through basic research and improve professional practice through systematic inquiry into its nature, standards, and principles.

Service
Apply the insights and knowledge gained through research and instruction in service to public- and private-sector organizations.

Facilities
SLIS classrooms, faculty offices, and shared spaces are housed on the fifth floor of the Gorgas Library in the heart of the campus. Student spaces provide desktop computing, printing, laptop workstations, individual and group work spaces, professional resources, and a collection of children and youth literature. A student lounge is conveniently located for relaxation and refreshment.

Academic Common Market (ACM)
The School of Library and Information Studies participates in the ACM, an agreement among selected Southern states to share academic programs at in-state tuition rates. Residents of the states of Arkansas, Delaware, Virginia, and West Virginia may make an ACM application to attend the MLIS program. If accepted, The University of Alabama will pay the out-of-state portion of the student’s tuition. Residents of Georgia, Kentucky, Louisiana, Mississippi, South Carolina, and Tennessee may apply to the ACM to attend the MFA in book arts program, also with UA’s paying the out-of-state portion of tuition. Background information on the ACM, a list with the contact information for each state’s ACM coordinator, and an online application to the UA Academic Common Market.

A number of departmental assistantships, which not only pay a stipend but also cover some out-of-state fees, as well as a number of scholarships are available each academic year. For information, contact the director of the School of Library and Information Studies.
BA522 Printing III Print/Publ
Hours 3-6
Students initiate and produce an edition of a relatively extensive book. Emphasis is on production, with manuscript selection and editing being critical aspects. Photopolymer platemaking processes are introduced in a desktop publishing environment adapted to historic tools and media. Such subjects as marketing and distribution of limited-edition books are covered. For those students taking the 6-hour option, a Parallel Editions book may be produced.

BA523 Printing IV: Print Publ
Hours 3-6

BA530 Bookbinding I: Elements Of Bookbinding
Hours 3
Drawing upon both the historic and contemporary Western bookbinding traditions, this course is an initiation into fundamental binding forms, techniques, materials, and design. Through the construction of a series of cloth and paper structures, students will gain an understanding of the properties inherent to the materials and how they work in the context of bookbinding. In addition to the development of good hand skills and proper use of materials, aesthetic and design issues concerning book construction will be addressed.

BA531 Bookbinding II: Fundamentals of Case Bookbinding
Hours 3
An introduction to the materials and techniques of case bookbinding. Students will continue to refine the fundamental binding skills acquired in BA 530, while being introduced to more advanced materials techniques. Case bookbinding and custom built enclosures will be constructed using paper, cloth, and leather. Students will gain a comprehensive understanding of these skills necessary for completing both one-of-a-kind and edition work.

BA532 Bookbinding III: Intermediate Bookbinding
Hours 3-6
An introduction to the materials and techniques of leather bookbinding along with the principles of conservation treatments as they relate to the processes of rebinding. Students will study the methods of production of animal skins for book making, the qualities of these skins, and their identification. Instruction in the use of leather-working tools, advanced case binding techniques, and in-board binding construction will be introduced. A strong emphasis will be placed on paper mending, forwarding techniques and leather preparation.

BA533 Bookbinding IV: Advanced Bookbinding
Hours 3-6
An advanced study of bookbinding and finishing techniques. Students will refine leather-working and binding skills while exploring methods for fine and design work. Readings and discussions will focus on sound binding practices with an emphasis on the art and practice of covering in leather. An advanced final binding project will allow students to demonstrate their mastery of the materials and techniques presented in the binding I-IV course sequence.

BA534 Boxmaking
Hours 3
An exploration of traditional and experimental forms of boxes and other protective enclosures for books. Boxes serve both aesthetic and functional purposes: they house, protect, and present their contents. Students will learn box making techniques such as measuring, fitting, covering, and casing; these will be considered also in connection with more complex components like partitioning and layering. We will discuss aesthetics in the context of overall design as well as selection of materials and structures appropriate for specific applications.

BA541 Papermaking
Hours 3
Provides hands-on experience in the fundamentals of making traditional Western-style handmade papers using a variety of fibers. The objective is to produce reference samples of various kinds of sheets, as well as edition sheets of papers for book or art-making purposes.

BA592 Graduate Symposium
Hours 3
Discusses professional standards, professional presentation and portfolio building, creative project research, exhibition design, management of a small business, marketing, and other topics. Six meetings during the course of the semester.

BA593 Workshops In Book Arts
Hours 1-12
Workshops covering all subjects in the book arts, held both on and off campus.

BA594 Pract Teaching Book Arts
Hours 3-6
Practical experience teaching introductory courses in printing, binding, and other appropriate book arts.

BA595 Independent Project
Hours 1-6
Provides an opportunity for the student to pursue independently a project in the book arts.

BA596 Dir Research Book Arts
Hours 1-6
Provides an opportunity for an intensive investigation of both historical and technical studies of a book-arts craft.

BA597 Internship
Hours 1-6
A direct learning experience in a studio of a professional book artist.
BA599 Creative Project Production  
Hours 1-12  
The capping experience of the MFA in the book arts program is the creative project, thesis, and exhibition. Working with a faculty advisor, the candidate develops a project that demonstrates a deep understanding of the craft and the aesthetic, historic, and critical contexts of the book; to establish technical expertise; and to work independently. The thesis paper provides the student a formal means in which to articulate the aesthetic, historic, and critical contexts of his or her work as well as the scope and merits of the creative project. The exhibit, which is publicly presented in the Book Arts Gallery, provides the student with an opportunity to showcase both artistic and technical skills and to contextualize the body of work produced during the course of the program. A public defense with a slide presentation is also required.

LS500 Organization Of Information  
Hours 3  
Required course introducing the principles of organizing bibliographies, library catalogs, and collections. Examines the content of bibliographic records in printed and machine-readable form, choice and form of access points, authority control, verbal and classified systems of subject access, and the impact of new technologies. An introduction to OCLC searching is included. The course objective is to enable the student to understand and use catalogs and bibliographies. Students interested in becoming catalogers should follow LS 500 with LS 506 Cataloging and Classification.

LS501 Intro Library Info Study  
Hours 3  
Required course designed to provide the student with a broad background in library and information studies. Must be taken during the first 12 hours of a student's program. Through a variety of instructional methods, this course examines three interrelated themes: the nature of the library and information profession; issues of intellectual freedom and access to information; and the impact of technology upon society and the profession.

LS502 Research Methods  
Hours 3  
Required course introducing research design and statistical techniques used in library, media, and information science. At the conclusion of the course, the student should be able to comprehend and utilize research reports in these fields and to design and carry out basic research projects.

LS503 Systems Analysis  
Hours 3  
Investigation of the concepts of systems analysis; investigation and use of the techniques of systems analysis; and study of applications of systems analysis in library and information systems.

LS504 Media Prod & Utilization  
Hours 3  
Instructional modules that introduce the student to basic skills in the preparation and utilization of educational media.

LS505 Collection Development  
Hours 3  
Explores principles and issues involved in developing library collections. Aspects such as community analysis, policy development, selection and acquisitions, resource sharing, evaluation, weeding, and preservation are examined.

LS506 Cataloging & Classification  
Hours 3  
Explores problems of descriptive cataloging of print and non-print materials; subject access using Library of Congress subject headings, LC classification, and Dewey decimal classification; OCLC searching, record modification, and inputting; and contemporary issues in bibliographic control.

LS507 User Centered Information Services  
Hours 3  
Required course introducing printed and digital reference sources and reference services.

LS508 Management Theory and Practice  
Hours 3  
Designed to introduce students to the theory and practice of modern management by studying the management aspects of authority, communications, decision making, delegation, leadership, personnel, planning, budgeting, and motivation. Use is made of case studies and simulations.

LS509 Distance Learn Lib Info Stdy  
Hours 1  
An intensive course that provides an orientation to distance learning in the School of Library and Information Studies. Technical issues related to distance learning, resource issues such as access to library and electronic collections, and socialization to librarianship are addressed. Particular emphasis is on the online MLIS program in which the student has enrolled.

LS510 Info Resrcs Humanities  
Hours 3  
Surveys and evaluates the major informational and bibliographical resources in literature, mythology, religion, philosophy, history, and the visual and performing arts. Stephens, Aversa.

LS511 Info Resources Soc Sci  
Hours 3  
Surveys scholarly communication and the use of information in the social sciences. The use of reference sources in psychology, sociology, economics, anthropology and political science is taught.

LS512 Info Resources:Science  
Hours 3  
Surveys scientific and technical communication, the bibliographic structure of science and technology, and information services for scientists and technologists. In-depth study of the major information sources in biology, chemistry, physics, mathematics, engineering, and geology is included.

LS514 Sources of Business Information  
Hours 3  
Surveys and evaluates the major informational and bibliographical resources in business librarianship.
LS520 Early Childhood Literacy Materials & Story Programs
Hours 3
Introduces a wide variety of print and non-print early literacy materials for young children ages birth to seven with an emphasis on selecting materials and developing literature-based story programs to meet their educational, cultural, and recreational needs. Among the types of story programming techniques to be explored are storytelling, flannel boards, drama, puppetry, and finger rhymes. Emphasis will be placed on investigating the principals involved in designing, implementing, promoting and evaluating early literacy story programs for young children.

LS521 Matl & Services Childrn
Hours 3
Explores materials (print and non-print) and programs appropriate for children ages 3 to 12.

LS522 Matl Serv Young Adults
Hours 3
Explores materials (print and non-print) and programs appropriate for teenagers.

LS523 Matl Services Adults
Hours 3
Examines services, programming, and popular materials provided to adult users of public libraries.

LS524 Project Management
Hours 3
Introduces graduate level concepts and skills associated with project management in information rich environments. Includes teamwork, team development, and collaboration.

LS527 Information Literacy Instruction
Hours 3
This course is intended to provide students with an introduction to the concepts, theories, and practice of library user instruction through reading, discussion, class speakers, and practice. The focus of the course will be on instruction for adult users in public and academic library settings.

Prerequisite(s): LS 501 and LS 507

LS530 Public Libraries
Hours 3
Examination of public library development, purpose, governance, and services and exploration of issues and concepts involved in managing public libraries.

LS531 Academic Libraries
Hours 3
Study of the role of library service in higher education.

LS532 School Media Centers
Hours 3
Develops a philosophical and functional background of the school-media program as an integral part of the teaching-learning process.

LS533 Spec Libr & Info Centrs
Hours 3
Philosophy, environment, and unique aspects of the services, operation, and management of special libraries and information centers are covered. Provides considerable opportunity for study of topics of interest to individual students.

LS534 Medical Librarianship
Hours 3
Introduction to medical librarianship and the environment in which it operates. Orientation to the health care field, operation and administration of health sciences libraries, and basic information sources and services for the health sciences is included.

LS535 Records Management
Hours 3
Introduces the fundamentals of information and records management. Content includes (a) inventory, scheduling and auditing records; (b) active and inactive information maintenance; (c) organizing and administering a records center; and (d) applications for information systems (computer, microform and paper).

LS536 Archives
Hours 3
Survey of archival resources and special collections, with attention to their organization, administration, and service problems.

LS537 Law Library Legal Resources
Hours 3
Introduces the concepts of law library management and the techniques and materials of legal research.

LS541 Youth Programming
Hours 3
Explores various types of literacy programs and outreach services for youth (children, tweens, and teens) as well as the development and management of library environments that facilitate life-long learning and reading adventures.

LS542 Instruct Design & Dev
Hours 3
Comprises a series of modules that cover the basic skills required to undertake instructional development. Materials needed to plan and prepare instruction, as well as exercises designed to upgrade interpersonal skills, are included. Designed for library-media specialists, supervisors, administrators, and others who assist teachers in the development of instruction.

LS543 Traditional & Digital Storytelling
Hours 3
Introduces a wide variety of storytelling techniques both traditional and digital (technology-based) and explores how these strategies can be used in library programs and services for children and young adults. Emphasis is placed on developing personal storytelling skills via technology and traditional resources. A web-cam is required for this course.

LS544 Cultural Diversity Programming
Hours 3
Explores the development and implementation of various types of library programs and outreach services for children and young adults that promote cultural diversity.
LS555 Introduction to Archival Studies  
Hours 3  
Three hours. This course offers an introduction to archival theory and practice. Emphasis is placed on investigating the nature and character of archival forms, the role of the archivist in society, the ethics of archival practice, and the social function of records and archives. (formerly LS 536 Archives).  
Prerequisite(s): This course has no pre-requisites.

LS556 Intellectual Foundations of Archival Theory & Practice  
Hours 3  
Archives are made by ideas. Archivists have defined, and described, archives as functioning as memory, evidence, and information. In addition, archives have been ascribed cultural, historical, and artifactual values. This course is a critical examination of archival thought and its influence on how archives are conceived, constructed, and ultimately used.  
Prerequisite(s): There are no prerequisites for this course.  
Prerequisite(s) with concurrency: There are no prerequisites for this course.

LS557 Archival Appraisal  
Hours 3  
This course explores topics in the selection and appraisal of archival materials. In this course you will gain exposure to the principles and approaches, which influence how records are selected for long-term retention and preservation, as well as practical performing this archival practice.  
Prerequisite(s): There are no prerequisites for this course.  
Prerequisite(s) with concurrency: There are no prerequisites for this course.

LS558 Archival Representation, Access & Use  
Hours 3  
This course explores topics in the organization of archival materials. Specifically, the topics addressed include the description, arrangement, and representation of archival objects and collections. In studying these topics, students will obtain an understanding of the theoretical underpinnings of these practices as well as practical experience in creating usable collections through archival arrangement and description.  
Prerequisite(s): The prerequisite for this course is LS 500 Organization of Information. Please contact the instructor if you have not fulfilled this requirement.  
Prerequisite(s) with concurrency: The prerequisite for this course is LS 500 Organization of Information. Please contact the instructor if you have not fulfilled this requirement.

LS560 Information Technologies  
Hours 3  
Required course. This course provides future information professionals with a solid foundation of basic information technologies at the skill, conceptual, and analytical levels. Acquaints students with the role of technology in information organizations. Students gain hands-on experience in web application production from a user-centered perspective, including: hypertext, usability analysis, database application, and technology instruction. Foundations of change management are addressed. IT Fluency is used as a model to explore the topics of this course.

LS561 Fundament Info Science  
Hours 3  
Includes selected topics centered on the study of information needs, uses, and access. Covers methods for identifying the information needs of diverse populations, how people seek and use information, and methods for evaluating the effectiveness of traditional and computerized systems in helping people deal with their information-related problems. Explores the changing roles of traditional information sciences methods and tools (e.g. indexing, user studies, cognitive studies) in these matters.

LS562 Digital Libraries  
Hours 3  
Prepares students to develop digital libraries, exploring the issues associated with creating, operating, and maintaining digital libraries; analyzing electronic library programs in the U.S. and assessing their impact on education, scholarship and research.  
Prerequisite(s): LS 560

LS564 Programming for Digital Libraries  
Hours 3  
The main focus of this course is to learn basic programming concepts and skills for managing different types of content and developing interactive systems. Java is the programming language used in this course to explore the development of digital libraries. We will start out at a beginner’s level with Java, and students will gain understanding of basic programming syntax, data structures, and logic. Students will then learn how to develop applications for more applied tasks, including data parsing and processing, and extending specialized Java packages for implementing further functionality of system components found in digital libraries.

LS566 Metadata  
Hours 3  
Surveys metadata issues in library and information environments and includes hands-on work with metadata schemas and digital libraries of networked resources.  
Prerequisite(s): LS 500

LS567 Digital Reference  
Hours 3  
Explores societal problems and professional developments that relate to digital reference services in public, academic and special libraries. Explores the impact of digital reference on users and libraries.  
Prerequisite(s): LS 507
LS569 Information Management
Hours 3
This course will survey information management tools and techniques applied for maintaining, processing, and disseminating digital information. Specific topics will include physical database structures, database design, database-driven web applications, user interface, and representation for retrieval. Course exercises cover fundamental techniques for data modeling, implementing and querying databases, and information visualization.

LS570 Internship
Hours 1-3
Internship.

LS572 Intern Sch Media Cntrs
Hours 3
Intern Sch Media Cntrs.

LS580 Outreach to Diverse Populations
Hours 3
Explores diverse cultural groups and the ways that all types of libraries can effectively serve the informational and recreational needs of these populations.

LS581 Universal Design for Information Technologies
Hours 3
Examines the place of information and communication technologies, online resources, and social networking tools in the current practice of information and communication interactions for persons with mild to severe physical access challenges.
Prerequisite(s): LS 560 - Information Technology

LS582 Race, Gender, and Sexuality in Library & Information Studies
Hours 3
This course explores how race, gender, and sexuality shape (and are shaped by) LIS as a profession and practice. Socially constructed theories of race, gender and sexual identity will be critically examined in different contexts as they intersect, overlap and impact LIS institutions, information use, technology practices, and the design of information resources and services in the processes of creation, organization, and dissemination of information in library and information professions.

LS583 Social Aspects of Information
Hours 3
This course covers a range of social, political, and economic issues related to how people interact with information and communication technologies. The class explores the effects of different social contexts on the creation, use, and meaning of information technologies. Subject matter will range from examining online interactions, mobile technologies, information and work, digital labor practices, and laws and policies related to information technologies.

LS590 Issues In Librarianship
Hours 3
Explores societal problems and professional developments that have, or are likely to have, an impact on the practice of librarianship. May be taken more than once.

LS598 Directed Research
Hours 1-6
Provides the opportunity for an intensive investigation of a special aspect of library and information studies, under the supervision of an appropriate faculty member.

LS599 Thesis Research
Hours 1-6
Thesis Research. Maximum of 6 hours may be earned.

Faculty
Director
Dr. Jim Elmborg

Professors
Prof. Anna Embree
Dr. Jamie Naidoo

Associate professors
Dr. Laurie Bonnici
Dr. Steven MacCall
Dr. Jeff Weddle

Assistant professors
Dr. John Burgess

Dr. Steven Yates

Instructor
Prof. Sarah Bryant

Intern coordinator & adjunct professor
Prof. Sybil Bullock

Dean and professor emeritus
Dr. Charles Osburn

Book Arts, MFA
The program leading to the MFA in the book arts degree is a 60-credit-hour program of study comprised of four areas: printing and publishing, bookbinding, papermaking, and the history of the book, with a program emphasis on the book as an integrated unit. Students may pursue one of three concentrations: printing and publishing; bookbinding; or a fusion of the two, focusing on the whole book. Emphasis is placed on developing craft skills based on historical principles and techniques, as well as artistic expression. The MFA in the book arts program develops professional-level book artists who have well-honed technical knowledge of the various facets of contemporary bookmaking, an intimate personal involvement with their specific areas of interest, and an understanding of the role of the book in society.

Admission Requirements
Applicants may submit a score for either the general portion of the Graduate Record Examination or the Miller Analogies Test in support of the application for admission. Admission requirements for the MFA program in the book arts are consistent with those for the MLIS degree program. A portfolio is not required; however, students are encouraged to submit one.
Degree Requirements
Candidates for the MFA degree in the book arts must earn a minimum of 60 semester hours of credit, including at least six hours in the history of the book and three hours in a historical/theoretical course appropriate to the goals of the individual student; at least 33 hours in the book arts studio; and 12–18 hours of electives within or outside the book arts program. All coursework must be completed with a grade average of "B" or better. All students enter the program in the fall and spend four semesters in residence.

All MFA students must complete, as part of the 60 hours, the following required courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BA 520</td>
<td>Print I Elements Printing</td>
<td>3</td>
</tr>
<tr>
<td>BA 521</td>
<td>Print II Typograph Printing</td>
<td>3</td>
</tr>
<tr>
<td>BA 530</td>
<td>Binding I: Elements Of Binding</td>
<td>3</td>
</tr>
<tr>
<td>BA 531</td>
<td>Binding II Fund of Case Bndng</td>
<td>3</td>
</tr>
<tr>
<td>CIS 655</td>
<td>Book Artifact Materialty Text</td>
<td>3</td>
</tr>
<tr>
<td>CIS 654</td>
<td>Print Culture And Society</td>
<td>3</td>
</tr>
<tr>
<td>BA 592</td>
<td>Graduate Symposium</td>
<td>3</td>
</tr>
<tr>
<td>BA 599</td>
<td>Creative Thesis Project</td>
<td>9-12</td>
</tr>
</tbody>
</table>

Total Hours: 30-33

NOTE: No more than 20 percent of courses required for a degree may be taken on a pass/fail basis, and as with all graduate programs at the University, at least 75% of courses must be completed with a letter grade of either A or B.

Those students concentrating in printing and publishing also must complete the following:

Printing and Publishing Concentration

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BA 522</td>
<td>Printing III Print/Publ</td>
<td>3-6</td>
</tr>
<tr>
<td>BA 523</td>
<td>Printing IV: Print Publ</td>
<td>3-6</td>
</tr>
</tbody>
</table>

Those students concentrating in bookbinding must also complete the following:

Bookbinding Concentration

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BA 532</td>
<td>Binding III: Intrmd Bndng</td>
<td>3-6</td>
</tr>
<tr>
<td>BA 533</td>
<td>Binding IV: Adv Binding</td>
<td>3-6</td>
</tr>
</tbody>
</table>

Those students concentrating on the whole book must also complete advanced coursework in both printing and binding. The configurations of advanced courses will be determined through discussion with the book arts faculty. Students who are not enrolled in the MFA program and who wish to take book arts classes must obtain permission from the instructor before enrolling.

Master’s Degrees
The primary purpose of master’s degree programs is to provide students with subject matter at an advanced level in their fields of study. Master’s degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master’s programs also help students become familiar with methods of independent investigation.

Program Requirements
Two plans are offered for the master’s degree:

Plan I. Candidates for the master’s degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

Plan II. Candidates for the master’s degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or “capstone experience” as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject. With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Residency Requirements
A student’s program at the master’s level must provide sufficient association with the resident faculty to permit individual evaluation of the student’s capabilities and achievements.

Graduate Credit
A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences
All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit
Courses of full graduate-level credit earned in a regionally accredited institution where a student was enrolled in the graduate school may be submitted for review for inclusion in a master’s degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student’s advisory committee and the dean of the Graduate School. Credit will not be accepted for transfer from any institution at which the student failed to achieve a “B” average on all graduate work attempted. Only courses in which a student earned a “B” grade or better may be transferred.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

A student initiates at the Graduate School’s website a Request for Transfer of Graduate Credit earned at another institution. It is also the student’s responsibility to assure that the Graduate School receives an
A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student's major department or division.

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

Article Style vs. Journal Format

Article Style.

At the doctoral level, "article-style dissertations" are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an "article-style thesis" to be presented for a master's degree.

Journal Format.

A "journal-format thesis" is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal's "information for authors" or similarly titled guidelines in conjunction with the Graduate School's Student Guide to Preparing Electronic Theses and Dissertations.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. A form for Appointment or Change of Master's Thesis Committee is used to request that the graduate dean appoint a thesis committee. The request normally is made as soon as the successful defense of the thesis proposal has been completed.

All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student's major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student's thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. A final oral examination is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral examination unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting.

As of August 15, 2009, all theses are submitted electronically rather than on paper. See the Graduate School's homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School's website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student's major department.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research. In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

Comprehensive Examinations

In addition to the regular course examinations, a final comprehensive examination representing a "culminating" or "capstone" experience for a degree is required of all candidates for the master's degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with
The program leading to the Master of Library and Information Studies (MLIS) degree is a 36-credit-hour program, one of approximately 55 programs in the United States and Canada accredited by the American Library Association and the only ALA-accredited program in the state of Alabama. The degree prepares graduates to work in any type of library—public, K–12, academic, or special—and information center and in entrepreneurial and research environments, especially those using advanced information technologies.

See the Admission Criteria section of this catalog for more information.

**Admission Requirements**

Students may be admitted to the School of Library and Information Studies without condition (regular admission) or with academic conditions imposed. The MLIS program is selective, and does not admit every applicant. Applications are considered holistically, so no single factor determines acceptance to the program.

**Regular Admission Requirements**

An applicant whose credentials meet the following minimum requirements may be considered for regular admission:

- A grade point average of at least 3.0 overall for the last 60 semester hours in a degree program, based on a 4.0 system AND
- an acceptable score on one entrance examination (minimum test scores: 300 on the revised GRE test, or 1000 on the GRE general test, or a score at the 50th percentile on the MAT) OR
- a prior graduate degree completed within the last five years OR
- five years of demonstrated experience in the field

Information about the GRE is available from the Educational Testing Service, Princeton, NJ 08540. The MAT is given by the testing service of most colleges and universities and may be taken by appointment. Applicants should plan well in advance so that examination results are available when needed to support an application for admission.

An application consists of the following items:

- Application Form
- Statement of Purpose
- Application Fee
- Transcripts
- Admissions Test Scores
- Three (3) letters of recommendation; for applicants who have been in school in the last 5 years, at least two (2) letters must be academic references.

Braille editions of the GRE and the MAT can be obtained from:
The University of Alabama Test Service
Box 870108
Tuscaloosa, AL 35487-0108.

For further information and to submit an application, go to the Graduate Application Center online.

**Exceptions to Admissions Policy**

Under exceptional circumstances, an applicant may be considered for admission if he or she meets either the GPA requirement for regular admission (GPA of 3.0) or the entrance exam score requirement as outlined above. If such an applicant is admitted, he or she will need to obtain permission to continue in the program, after the first 12 semester hours of graduate-level work have been completed. Permission to continue is earned by achieving a GPA of “B” or better (3.0) in the first 12 semester hours. If the 12 hours are completed in a term in which the total credits exceed 12, the evaluation is made on the basis of all graduate-level work completed at the end of that term of enrollment. Students admitted under this circumstance who do not meet the 3.0 requirement after their first 12 hours of graduate-level work will not receive permission to continue in their graduate program, and will be dropped from the program.

**Nondegree Admission Requirements**

A student may be admitted as a non-degree student if that person has either a 3.0 undergraduate GPA or an acceptable test score: 50th percentile on the MAT or 300 on the GRE general test. No more than 12 hours may be taken as a non-degree student and applied to a degree.
Degree Requirements

Candidates for the MLIS degree must earn a minimum of 36 semester hours of credit, completing all work with a grade average of "B" or better. A thesis is not required. All MLIS students must complete, as part of the minimum 36 hours, the following 18 hours of required courses:

Total Hours: 18

Thesis and Coursework Plans

Two plans are offered for the master’s degree:

Plan I: Thesis

Candidates for the master’s degree under the thesis plan must earn a minimum of thirty-six hours of credit, including fifteen hours of required courses, a three-hour required management and administration course, and six hours of thesis credit (LS 599); no more than six hours of thesis credit may be counted toward the degree.

Intent to elect the thesis option must be formally declared within the first nine hours of enrollment in graduate LIS courses. The declaration of intent must indicate the subject area of the research and the faculty member who has agreed to direct the thesis.

The student must identify a three-person thesis committee, to consist of at least two full-time SLIS faculty members, at least one of whom must be a full member of the graduate faculty; a third committee member may be a faculty member from another department of the University, a faculty member from another institution, or a well-qualified practitioner. All committee members must hold appropriate Graduate Faculty status.

The student must obtain committee approval for a prospectus for the thesis project prior to enrolling in thesis credit; a formal defense of the prospectus will constitute the final examination for the MLIS degree.

The student must complete and successfully defend a thesis that meets the requirements established by the Graduate School. The thesis defense shall be made orally before the student’s thesis committee and will be open to the public.

Plan II: Coursework

Candidates for the master’s degree under the coursework plan must earn a minimum of 36 hours of credit, including 15 hours of required courses and a three-hour required management and administration course.

Transfer of Credit and Credit for Non-Letter Graded Courses

Graduate credit may be transferred from another regionally accredited university or may be elected from the offerings of other departments.

Thesis credit cannot be transferred from another university. No more than nine hours of credit can be applied toward the MLIS for any combination of graduate courses taken outside SLIS, directed research courses, internships, and thesis credit. These hours may be combined as follows:

Plan I: Thesis

Six hours of thesis credit and three hours of credit for directed research course or internship; or:

Six hours of thesis credit and three hours of approved credit for graduate work taken outside SLIS.

Plan II: Coursework

Six hours of approved credit for graduate work taken outside SLIS and three hours of credit for a directed research course or internship; or:

Six hours of credit for any combination of directed research courses and internships and three hours of approved credit for graduate work taken outside SLIS.

Time Limit

All requirements for the master’s degree must be completed during the six years (18 consecutive semesters) immediately preceding the date on which the degree is to be awarded.

Thesis

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master’s degree candidates who pursue Plan I: Thesis. The subject chosen must be related to library and information studies and must be approved by the student’s thesis director, the student’s thesis committee, and the SLIS Director.

The thesis committee must include three individuals, including at least two full-time SLIS faculty members, at least one of whom must be a full member of the graduate faculty; a third committee member may be a faculty member from another department of the University, a faculty member from another institution, or a well-qualified practitioner. All committee members must hold appropriate Graduate Faculty status.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. A final oral examination is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral examination unless there are extraordinary circumstances warranting the graduate dean’s approval of the absence prior to the defense meeting.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School’s website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student’s major department.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also has posed troubling ethical questions. The
mission of the University's Institutional Review Board for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research. In the case of thesis research that involves the use of human subjects, the principal investigator — normally the student — is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. Both the student and the thesis chair are responsible for completing Institutional Review Board training; guidelines for training can be found at http://ovpred.ua.edu/research-compliance/institutional-review-board-irb/.

The request forms for IRB approval can be accessed from http://ovpred.ua.edu/research-compliance/institutional-review-board-irb/.

### Application for Graduation

Each candidate for a master’s degree must apply for graduation through the Office of the Graduate School during the first week of the term in which requirements for the degree are to be completed. The form “Application for Degree” is required for this purpose, and must be completed online.

### Student Learning Outcomes for the MLIS

#### Teaching

Upon completing the SLIS MLIS program, all students should:

- have acquired a basic core of knowledge in the field: the creation and production, organization and access, selection and evaluation, preservation, dissemination and use of information
- understand the nature of professional ethics, display a committed professional attitude, value the role of professional associations, and be committed to individual professional development
- understand the opportunities and challenges of a variety of information settings, their functions and the users they serve and be able to approach the design and management of services and systems
- value teaching and service as ways to advance the field
- have knowledge of current research, an understanding of research processes and methods and an ability to analyze and critically evaluate research and apply it to professional duties
- understand the significance of concepts and contributions of other disciplines to library and information studies and the importance of library and information studies theories, principles, and concepts to other disciplines
- be aware of and sensitive to the impact of information practices, services, and programs on diverse, underserved and multicultural communities
- understand the appropriate technologies and their applications within particular contexts for the organization, retrieval, management, and dissemination of information
- be able to communicate cogently, clearly, and persuasively
- support the development and improvement of library and information services in general with special focus on the people of Alabama and the southeastern United States

#### Research and Creative Activities

SLIS faculty will:

- present the results of research, inquiry, and creative endeavors to peers at professional meetings and exhibitions
- undertake applied research projects including consulting assignments that augment and advance knowledge

### Service

To provide advice and assistance to libraries and information centers that help them enhance the services they provide, SLIS faculty and staff:

- undertake consulting assignments
- provide opportunities for faculty, staff, and students to participate in professional associations, to promote the profession and to assume leadership and policy-making roles
- along with students, participate in the work of the University and the School through service on committees and working groups

### Class A School Library-Media Certification

For admission to the Class A School Library-Media program, a candidate must have a valid bachelor's level or valid master's level professional educator certificate in a teaching field or a valid master’s level professional educator certificate in another area of instructional support. Effective June 1, 2017, two full years of full-time professional educational work experience in P-12 school system(s) is also required for admission.

Applicants with out-of-state licensure who are employed or seeking employment in another state are responsible for knowledge about professional licensure requirements in the prospective states. An applicant with out-of-state licensure who intends to apply for Alabama certification must first apply for the prerequisite certification in Alabama before applying for Class A School Library-Media certification in Alabama.

All applicants must have a criminal history background check as required by the Alabama Department of Education.

Students pursuing Library Media certification should refer to the State-approved program checklist to ensure that requirements are met. In addition to completing an approved program of study, the candidate is required to earn a satisfactory score on a comprehensive examination administered by the School of Library and Information Studies and earn a passing score on the Praxis for Library Media Specialist.

The approved program of studies for certification is as follows:

Total semester hours 36-39

If courses equivalent to any of these required courses have been taken previously, substitutions may be made, with the approval of a faculty adviser.

For candidates admitted to the Class A Library Media program July 1, 2017, and thereafter, a minimum GPA of 3.25 on all courses in the Alabama State Board of Education approved library media program is required for certification.

Communication & Information Sciences (CIS), Ph.D.

The collegewide doctor of philosophy degree in the College of Communication and Information Sciences is designed to:

- prepare communication scholars for positions of leadership in education, public service, the media, libraries, information-management positions, and other communication-related fields
- add to a student’s usable body of knowledge in a chosen area of specialization within the field of communication and information sciences
- develop each student’s research, teaching, and professional capabilities
- promote scholarly achievement and advancement of knowledge in the communication and information science disciplines, through basic and applied research

Requirements for the Ph.D. Degree in Communication and Information Sciences

Admission Criteria
Applicants to the doctoral program in communication and information sciences must meet the admission criteria of the Graduate School of The University of Alabama and those stated below.

An applicant whose credentials meet the following minimum criteria may be considered for regular admission to the doctoral program in communication and information sciences:

- An undergraduate grade point average (GPA) of 3.0 overall, 3.0 for the last 60 semester hours in a degree program, or 3.0 for a completed graduate degree program.
- A combined score of 300 on the verbal and quantitative portions of the Graduate Record Examination (GRE).

International applicants must score at least 90 on the TOEFL iBT language proficiency exam and also score at least 24 on the speaking and writing sections of the iBT exam. International applicants who meet these criteria may also be invited to participate in a videoconference with the college application review committee.

Applicants may be considered for admission on a permission-to-continue basis if they meet either the GPA criterion for regular admission or the GRE score criterion for regular admission.

Coursework
Number of semester hours required in the program: Forty-eight to 60 hours, as determined by a student’s program advisory committee. An additional 24 hours of dissertation research will be taken, usually following admission to candidacy.

The student’s program advisory committee determines, in consultation with the student, the specific courses the student must take to satisfy program and research requirements.

Core requirement: Foundations. CIS 610 Foundations Doctoral Study CIS, is required of all students.

Core requirement: Theory. Students must complete two of the following four courses:

- CIS 604 Mass Communication Theory
- CIS 605 Cultural Critic Rhetoric Theory
- CIS 606 Knowledge & Information Theory
- CIS 607 Theory Construct & Epistemology

The specific courses from among these four are to be selected by the student in consultation with the student’s program advisory committee. It is strongly recommended that students aim to have at least one of their two required theory courses be the single most appropriate theory course in the context of the student’s area of focus (see below for details about focused areas of study).

Core requirement: Research methods. Students must complete six hours of research methods coursework. The specific courses are to be selected by the student in consultation with the student’s program advisory committee. The College offers three research methods courses, at least one of which is likely to be among the student’s most appropriate options for fulfilling the research methods requirements. These courses are:

- CIS 603 Quantitative Research Methods
- CIS 608 Qualitative Research Methods
- CIS 609 Humanistic Research Methods

However, if the student’s program advisory committee recommends or stipulates the student complete research methods courses other than CIS 603, CIS 608, and CIS 609, the student need not complete any of these three courses.

Focused Areas of Study. Students will consult with their program advisory committee to identify a focused area of study. A minimum of 18 non-dissertation credits must be designated by the program advisory committee as appropriate for the student’s focused area of study.

Cognate. Students will consult with their program advisory committee to identify a cognate area. Students may fulfill their cognate requirement through courses completed within or outside the College of Communication and Information Sciences. A course must be in an area outside the focused area of study to count toward fulfilling the cognate requirement. A minimum of nine non-dissertation credits must be designated by the program advisory committee as appropriate for the student’s cognate area.

Additional/elective credits. Many students will find they have room in their program of study for one or more additional/elective courses
after they have met the minimum core, focused area of study, and cognate requirements. Students will consult with their program advisory committee to identify appropriate additional/elective courses.

**Dissertation.** The University of Alabama Graduate School requires that students complete 24 hours of dissertation credit. In the College of Communication and Information Sciences, dissertation credits are completed by enrolling in CIS 699: Dissertation Research.

**Summary of required credits.** In sum, students allocate credit hours as follows:

- Core: 15 hours
- Focused area of study: 18-30 hours
- Cognate: 9-15 hours
- Additional/elective: 0-18 hours
- Dissertation: 24 hours

**Other requirements.** In addition to the credit hour and coursework requirements specified above, the following policies apply:

- A minimum of 36 hours of coursework must be completed after enrollment in the CIS doctoral program.
- Up to 12 of these 36 hours may be transferred from a student’s masters program if approved by the student’s program advisory committee. Credits so approved must have been earned within a period of no more than six years prior to admission.
- A minimum of 24 hours of coursework must be at the 600 level. The remainder of hours of approved graduate course credit must be at the 500 or 600 level. No cross-listed 400/500-level course may be taken in the doctoral degree program. A maximum of six hours of 400- or 400/500-level credit may be transferred if completed as part of a master’s degree program.
- Each student must complete a minimum of three CIS doctoral seminar courses, which include all courses numbered CIS 650 through CIS 672. No doctoral seminar class that may be deemed by the student’s program advisory committee to count toward fulfilling the research methods requirement may be counted toward this minimum number of three doctoral seminar courses. In other words, if a program advisory committee approves a doctoral seminar course as a research methods course, this course cannot also be counted toward meeting the requirements for three doctoral seminar courses.

**Required Plan of Study**

By the time each doctoral student has completed 30 graduate semester hours of UA and/or transfer work toward the degree, the student must have a doctoral Plan of Study approved by the dean of the University of Alabama Graduate School. Failure to obtain approval of the Plan of Study by the completion of 30 hours may result in the student’s having a hold placed on future registrations.

Students admitted to the doctoral program may be required to complete additional coursework to be prepared for doctoral-level (600-level) study and research in communication and information sciences, at the discretion of the student’s program advisory committee or the CIS associate dean for graduate studies.

Doctoral students who begin the program with incomplete master’s theses must complete the master’s thesis during the first year of doctoral study. Students must provide official transcripts of their master’s degree work as evidence that their master’s degree has been awarded. If a student fails to provide the transcript, the College may refuse to administer the PhD preliminary examination and/or may withdraw financial support. The Graduate School may nullify the doctoral program admission.

**Scholastic requirements**

A student must maintain cumulative grade point average of at least 3.00 on a 4.00 scale for graduate courses undertaken following admission to the doctoral program. A doctoral student whose grade point average falls below 3.00 at any time after 6 semester hours have been completed will be placed on academic warning by the Graduate School and the College of Communication and Information Sciences.

- A student on academic warning will not be permitted to apply for admission to candidacy and may not hold an assistantship.
- A student who earns a grade below “B” in more than two courses or who remains on academic warning for more than one semester is subject to removal from the program at the discretion of the college’s associate dean for graduate studies.

Students who are dropped from the program may petition the college for readmission. The college may in turn make a request to the dean of the university Graduate School for approval of the student’s readmission.

**Preliminary examination**

A preliminary examination is required of all doctoral candidates. The examination is given after all required course work and other work prescribed by the student’s Program Advisory Committee has been completed. The examination must be completed at least three months before the degree is awarded.

The student demonstrates, through written and oral examinations, a capacity to understand, synthesize, and apply communication theory and research techniques, as well as demonstrate knowledge of the pertinent literature, issues, and recent advances in the student’s area of focus and cognate area of study. In other words, the examination must cover: (1) theory, (2) research methods, (3) the student’s area of focus, and (4) the student’s cognate area.

The preliminary examination is a written examination administered by the student’s program advisory committee, which may call on other faculty members associated with the student's coursework for assistance in preparing the examination. Sixteen hours are set aside for the examination—four hours for each division (theory, methods, focused area of study, and cognate). The examination is to be completed within a two-week period.

The oral portion of the examination is required of all students and will be scheduled as soon as possible following the completion of the written examination. Immediately following the oral examination, the examination committee will determine whether the student has passed, must perform additional work to demonstrate competency in one or more areas of the examination, or has failed the examination. When additional work is required, the examining committee may choose to administer another oral examination. In the case of a clear failure, re-examination must take place after six months and before twelve months have elapsed. Each of the four portions of the preliminary examination may be taken only twice. The examining committees will rule either pass or fail on the second examination.

**Admission to candidacy**

A student is certified by the dean of the UA Graduate School for admission to candidacy for the PhD in Communication & Information Sciences after meeting the following requirements:

- completion of the program of coursework and other requirements prescribed by the student’s program advisory committee, approved
by the CIS associate dean for graduate studies, and approved by the dean of the UA Graduate School on the Plan of Study and Admission to Candidacy forms
• demonstration, by passing the preliminary examination, of competence in the theory, research methods, the focused area of study, and the cognate
• a successful defense of a dissertation proposal
• approval by the UA Graduate School of the Admission to Candidacy for the Doctoral Degree

A department-approved Admission to Candidacy for the Doctoral Degree is submitted to the UA Graduate School as soon as possible after passing the comprehensive (preliminary) examination.

Dissertation committee
Following a successful completion of preliminary examinations, the candidate for the PhD in Communication and Information Sciences must form a dissertation committee.

The dissertation committee is composed of at least five members. The Graduate Faculty of the College of Communication and Information Sciences must be represented by at least three members. A fourth member may be from CIS or from a college or school outside the College of Communication and Information Sciences, but he or she must have graduate faculty status. A fifth member, to be appointed by the Graduate School of the University, must be a member of the Graduate Faculty in a division other than the College of Communication and Information Sciences; this so-called “Outside Member” represents the UA Graduate Faculty at large. Only full members of the Graduate Faculty may chair doctoral dissertations.

At least one committee member other than the chair must have full membership in the Graduate Faculty of the College of Communication and Information Sciences. All other members may be associate members. However, no more than one temporary member of the Graduate Faculty may serve on any given committee.

The UA graduate dean’s approval of the proposed dissertation committee must be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the form for Appointment/Change of a Doctoral Dissertation Committee.

Dissertation
After successful completion of the preliminary examination, degree candidates must submit a written proposal to their dissertation committee.

The proposal describes the importance of the proposed topic, outlines the hypotheses to be evaluated, provides and overview of relevant literature, specifies the methodology to be used, and lays includes a timetable for completion of the project. The dissertation must make a significant original contribution to the field of communication and information sciences and must demonstrate the candidate’s ability to report that research in writing in a clear, comprehensive, and scholarly manner.

The student must submit the proposal, and later the dissertation, to the committee at least 14 days prior to the defense. After the proposal has been circulated among the members, the student’s dissertation committee meets for the student’s oral defense of the proposal. The candidate must complete the dissertation and all other degree requirements within seven years of the date of admission to the doctoral program.

Final examination
The candidate must present a copy of the final draft of the dissertation to each committee member at least two weeks before the scheduled date of the final examination. After the dissertation has been completed and accepted by the candidate’s dissertation committee for purposes of the examination, the candidate will be given a final oral examination by the dissertation committee.

The final examination is concerned primarily with the research embodied in the dissertation and with the field in which the dissertation lies, but it may extend over the student’s entire primary field of study. The final oral examination is governed by the rules of the Graduate School of the University of Alabama.

The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations. Graduate School deadlines, including each semester’s dissertation deadline, are available at the Graduate School’s homepage.

Electronic submission of theses and dissertations (ETD) is required. Consult the ETD website for details of ETD submission.

Expedited Admission Track into the CIS Doctoral Program
The Expedited Admission Track into the CIS doctoral program allows highly qualified students to be admitted into the doctoral program after they complete an undergraduate degree. Such students will begin graduate coursework in a specific master’s degree program of the College and complete their graduate degree as College-wide doctoral candidates, without having to reapply for admission or apply to transfer credit hours from the master’s program into the doctoral program. In short, if admitted on the expedited track, candidates will be able to count as many as 24 hours completed in their master’s program of study—rather than the college-stipulated maximum of 12 hours—toward their doctoral degree.

Students admitted on the expedited track would be required, upon completion of 24 hours of graduate coursework, to take a comprehensive, qualifying examination administered by their academic advisor, program committee, and two representatives of the doctoral program selected by the CIS associate dean for graduate studies. The doctoral program representatives will lead the committee’s determination of the overall quality of the comprehensive exam answers. If the candidate passes the qualifying examination, the candidate will be approved to continue in the CIS doctoral program. The completed 24 credit hours then also will apply toward the minimum of 48 hours of graduate course work required for the PhD. Upon completion of graduate work, such candidates will receive the master’s degree, along with the PhD. Students deemed not to have demonstrated sufficient mastery to qualify for continuing in the doctoral program will be permitted to complete the remaining requirements for their designated MA program and receive that degree from the College upon its completion.

Criteria for Expedited Admission Track
Students who wish to apply for the expedited admission track must meet the following criteria:
• Hold regular admission status for a specific College master’s program and for admission into the PhD program
• Submit a statement of purpose indicating interest and commitment to graduate work through the doctoral level
• Upon completing 24 hours of graduate coursework, passing a comprehensive, qualifying exam for continuing toward the doctoral degree
Earn a certificate of completion, or equivalent, for the master’s program, whereupon official admission into the doctoral program would be recognized.

The UA Graduate School stipulates that the doctoral degree requires a minimum of 48 hours of graduate coursework and 24 hours of dissertation. The expedited track meets this requirement. It is recommended that during their master’s program matriculation students complete 600-level CIS classes likely meet the theory and research methods requirements for the doctoral degree. See the Coursework section above for details about theory and research methods requirements in the CIS doctoral degree program. Also, please note in the Coursework section above the policy that doctoral students must complete at least 24 hours in 600-level classes. This is very feasible for expedited track students so long as they plan their master’s program of study with this in mind.

College of Community Health Sciences

Population Health Sciences, MS (p. 379)
The courses listed below are open to qualified graduate students. Medical school and family practice residency curricula are published separately from this catalog.

CHS500 Rural Envir/Occup Health
Hours 3
The goal of the course is to help the student recognize environmental and occupational health hazards in the rural setting, the effects of exposure to these hazards, and preventive measures that should be taken to avoid them.

CHS510 Health Economics
Hours 3
A course designed for graduate students interested in understanding the importance of health economics on public policy. Topics include the supply and demand of health care, health insurance, consequences of information asymmetry, health technology assessment, comparison of national health care systems, and behavioral economics.

CHS520 Basic Epidemiology
Hours 3
A course for students in health-related fields. The basic epidemiologic approach is developed; principles and methods are learned through readings (text and published studies), lectures, discussions, and the preparation of a research design by each student.

CHS521 Introduction to Clinical Epidemiology
Hours 3
The purpose of this course is to teach the principles and practice of epidemiology as a science discipline. Objectives: 1. Understand the basic principles of epidemiology. 2. Conduct a critical appraisal of epidemiologic studies. 3. Be knowledgeable about the various types of study design. 4. Describe how epidemiology relates to public health and medical practice.

CHS522 Community Clinical Proc
Hours 3
A combination of scheduled sessions and fieldwork activities. The fieldwork will consist of visiting with an assigned rural advisor, completing a rural community assessment, and assisting with community health screenings and education programs.

CHS523 Indep Stdy Community Med
Hours 1-6
No description available

CHS524 Essentials of Population Health
Hours 3
An introductory graduate level course designed to teach learners to examine health issues from a population health perspective.

CHS525 Biostatistics
Hours 3
A course in statistical methods and concepts particularly appropriate for biomedical research and health-related subjects. Topics include descriptive statistics, probability, parametric and nonparametric procedures for one-group and two-group problems, contingency tables, and computer applications.

CHS527 Health Policy & Planning
Hours 3
Designed to assist the student in understanding the planning process and factors that influence and determine policy decisions.

CHS530 Principles of Stress Management
Hours 3
The purpose of this course is to help Rural Community Health and Agricultural Safety & Health graduate students, learn to identify, understand, and manage the stressors that most affect their lives. Students will be exposed to the latest research findings on the physical, psychological, sociological, and spiritual aspects of stress. In addition, students will be presented with an in-depth array of coping skills, including relaxation techniques, behavior change interventions, and strategies for defusing physiological arousal. Students will be introduced to the tools they need to cope with stress in an increasingly stressful world. Special emphasis will be placed on clinical concerns (e.g., methods for alleviating stress) for rural populations.

CHS532 Comm Clinical Process II
Hours 3
A continuation of studies from CHS 522 that will include an introduction to basic physical assessment techniques and continuation of a community project.

CHS534 Interprofessional Health Communication
Hours 3
This interprofessional course focuses on understanding roles, how to work in a team using a common language; presenting information that other team members can understand, contributing to safe and effective systems. Identify basic concepts of effective teamwork among professions with an emphasis on communication and teamwork.

Prerequisite(s): • 3.0 undergraduate GPA (minimum) for undergraduate degree or last 60 hours • Bachelor’s degree from a regionally accredited college or university • Acceptance into the certificate program

CHS540 Rural Community Interaction I
Hours 3
The purpose of this course is to introduce participants to real life and practical application and topics related to rural medicine, with an emphasis on minority populations. The course is divided into two parts: a shadowing experience with a primary care provider working in a rural or underserved setting, and a seminar series. Additionally the course will include a special service learning project in order to further expose students to practical application of issues and topics in rural or underserved communities.

CHS541 Rural Community Interaction II
Hours 3
The purpose of this course is a continuation of Rural Community Interaction I and introduces participants to additional real life and practical applications and topics related to rural medicine, with an emphasis on minority populations. The course is composed of two class projects of planning, implementation, and evaluation of a community screening event to be selected by the class. Each student will also complete a final paper (5 double-spaced typed pages) describing their cumulative experiences including lessons learned.

Prerequisite(s): CHS 540
CHS590 Clinical Correlations Biochem  
Hours 3  
The purpose is to study biochemical principles in a clinical context and to observe the process of medical information assembly and reasoning in clinical care.  
Prerequisite(s): BSC 550

CHS620 Ind Study In Prev Med  
Hours 1-5  
Research or directed reading in community medicine topics, including health care delivery, preventive medicine, and health policy aspects of other related topics.

CHS622 Directed Research in Community Health  
Hours 3  
An advanced applied-research course designed to develop skills in the analysis and evaluation of health problems of community interest.  
Prerequisite(s): CHS 520 and CHS 525

CHS625 Advanced Epidemiology  
Hours 3  
No description available

CHS627 Multivar Meth Hlt Stats  
Hours 3  
Emphasis is on application and interpretation of statistical software that performs techniques such as multivariate analysis of variance, discriminant analysis, logistic regression, log-linear modeling, and factor analysis.

CHS637 Adv Multivariate Meth Biostat  
Hours 3  
Topics will include exploratory and confirmatory factor analysis, path analysis, structural equation models and other topics of interest to students.  
Prerequisite(s): CHS 627

CHS650 Outcomes Research in Population Health  
Hours 3  
This course examines the methods utilized in the design, implementation, and evaluation of research studies implemented in a healthcare setting. In this course, you will explore various research designs that can be used to evaluate studies with outcomes at the individual and organizational level. Both naturalistic (or observational) and experimental designed will be covered throughout the course. Various analytic approaches that are appropriate to examine the design, implementation, and evaluation of studies in the medical setting will be applied. Furthermore, students will be expected to develop a research protocol that demonstrates the mastery of core competencies obtained throughout the semester.

CHS701 Clinical Clerkship  
Hours 18  
No description available

CHS702 Clinical Clerkship  
Hours 18  
No description available

CHS801 Clinical Clerkship  
Hours 18

CHS802 Clinical Clerkship  
Hours 18  
No description available

CHS900 Residency  
Hours 12  
No description available

Population Health Sciences, MS

Population health is an interdisciplinary field that integrates clinical care and public health practices to prevent, reduce, and manage human disease. Population health achieves these goals by using patient-centered approaches to understand the needs of a diverse clientele and by incorporating a value-based care system.

The changing landscape of health care will require intellectual investments in the future of health. Those interested in acquiring a degree in population health from The University of Alabama will benefit from a value-based culture that embraces diversity, interdisciplinary collaboration, and innovative thinking. The Master of Science in population health sciences at UA is designed to suit the educational needs of professionals from diverse backgrounds:

- Social and behavioral scientists interested in health outcomes research
- Providers who would like additional training in the structure and delivery of health care in an evolving system
- Hospital administrators and office managers looking to expand current roles and responsibilities in clinical settings
- Anyone in the health care field interested in identifying best practices to adhere to value-based payment systems in an effort to increase reimbursement rates and improve health outcomes

Unique attributes of our program:

- We offer convenient online classes and flexibility for students who wish to pursue a degree while working.
- Our program is specifically designed to prepare graduates to succeed in a value-based healthcare system.
- We have a diverse faculty with backgrounds in medicine, nursing, public health, psychology, business, exercise, health education, and health policy.
- A variety of electives and two program focus areas allows tailoring of the program to your individual interests.
- Our courses will provide hands-on training in classes that range from qualitative research methods to data mining
Masters Degree Programs in Education

The College of Education offers graduate work for the master of arts degree in counselor education (school counseling, clinical mental health counseling and rehabilitation counseling); educational leadership; higher education administration; educational psychology; general educational psychology; educational psychology: school psychometry; elementary education; human performance; secondary education (music education is available as a specialization within secondary education); and special education.

The rules of The University of Alabama Graduate School pertaining to transfer of credit, academic progress, graduation requirements, admission to candidacy and time limits apply to all students in College of Education masters degree programs and are found in the Degree Requirements section of this catalog.

Masters Programs Prerequisites

The prerequisites for programs leading to the master of arts degree in education include:

- the completion of an appropriate baccalaureate curriculum, and in most programs
- professional teacher certification.

For a student in music education, audition, ensemble performance or teaching sample and music history and music theory testing are required prior to or during the first 12 hours of graduate study.

For the Class A Reading Specialist program, two full years of full-time classroom teaching experience are required. Additionally, the Praxis for Teaching Reading is required for those with prerequisite certification in a teaching field other than Elementary, Early Childhood or Collaborative (K-6).

Effective July 1, 2017, two full years of full-time, acceptable professional educational work experience will be required for admission to Class A instructional support programs (School Counseling, School Psychometry and Sport Management—also includes Library Media in the College of Communication and Information Sciences).

For a student in educational leadership, a valid Alabama Class B Professional Certificate in a teaching field or a valid Alabama Class A Professional Certificate in a teaching field or instructional support area and three full years of full-time, acceptable professional educational experience in a P-12 setting, which must include at least one full year of full-time P–12 teaching experience, are required. In addition, students preparing for positions in educational leadership are required to complete screening procedures, including special tests, interviews and portfolios.

Masters Degree Requirements

There are two study plans available to students pursuing the master of arts degree. Candidates for the masters degree under Plan I must earn a minimum of 24 semester hours of credit in coursework and must write a thesis. Candidates for the masters degree under Plan II must earn a minimum of 30 semester hours of credit; a thesis is not required.

Masters degree programs leading to professional certification normally require a minimum of 30 semester hours. Nontraditional, alternative certification programs requirements vary; however, they normally require 39–45 graduate hours in addition to any of the applicant’s undergraduate deficiencies. Courses that are taken for undergraduate credit may not be repeated for graduate credit. In compliance with regulations established by the Alabama Department of Education and outlined in
the Alabama Administrative Code, coursework used to meet Class B certification requirements may not be used to meet requirements for Class A certification in any teaching field or area of instructional support.

A student completing requirements for a masters degree during a semester or summer session who does not need a full class load to meet those requirements may, with approval of the advisor and department head, register for additional courses toward a Class AA Professional Certificate, not to exceed the maximum prescribed class load.

Additional details on all other degree requirements are in the Degree Requirements section of this catalog and may be outlined in the individual program descriptions in this catalog. Under each plan (including the nontraditional, alternative program) the student must pass a comprehensive assessment in the field(s) of study at an appropriate time toward the close of the student’s work. The assessment may include, but may not be limited to, an oral exam.

Nontraditional, Alternative Initial Teacher Certification
The College of Education has been approved by the state board of education to offer special programs of study leading to the masters degree for degree holders who have not previously completed a teacher-education program. Admission to these programs requires an acceptable score on an entrance examination—the GRE General Test or the Miller Analogies Test (MAT)—and a minimum 3.0 grade point average for all previous college-level work attempted. Individuals may be considered for admittance if the graduate admission test score or GPA does not meet the above criteria. For admission to an Alternative Class A program, effective July 1, 2017, and thereafter, one must have earned a bachelor’s degree with a minimum, overall GPA of 2.75 or a master’s degree (or higher) with a minimum GPA of at least 3.0.

Also for admission, effective September 1, 2017, applicants to alternative certification programs must earn passing scores on the Praxis Core Academic Skills for Educators Tests of mathematics, reading, and writing. Information about the Praxis Core Tests is available online at https://www.ets.org/praxis/register//centers_dates or in Student Services, 104 Carmichael Hall. [NOTE: Individuals who earned passing scores on all three components of the previously allowed Basic Skills tests prior to September 1, 2017, may use those scores prior to September 1, 2022, in partial fulfillment of requirements for admission to an Alternative Class A program.]

Individuals applying to alternative initial teacher certification programs must also meet the minimum qualifications that are expected of candidates entering and completing undergraduate (Class B) certification in the same discipline. This usually means minimum GPA requirements in the core curriculum as well as minimum GPA requirements within the disciplines in which the applicant is seeking certification. Other requirements, such as completion of writing tests, passing scores on the Praxis Core Tests, and other screening associated with undergraduate certification, must be completed before formal admission to the alternative teacher education program. Some additional undergraduate work may also be required for admission. In addition to admission to the Graduate School, each prospective student must secure an appropriate transcript evaluation letter from personnel in the Office of Student Services and Certification, 104 Carmichael Hall. Students may not complete more than five approved program courses prior to unconditional admission.

Nontraditional, alternative certification programs are available in elementary, English for speakers of other languages (ESOL), foreign languages, music education, physical education, secondary education (most fields), and special education (collaborative, early childhood special education, gifted, and multiple abilities).

To graduate, students in these programs must complete the required semester hours in specific graduate courses. Upon completion of an Alternative Class A (master’s level) program, the student is eligible to be recommended for an Alabama Class A Professional Educator Certificate. For most programs, no more than 12 semester hours of graduate courses may be completed in a nontraditional, alternative program before the removal of all admission deficiencies, unless special permission is granted by department heads in conjunction with personnel in the Office of Student Services and Certification, 104 Carmichael Hall. A student with a master’s or higher degree in a secondary teaching field (or K–12 in music) generally may apply up to 12 semester hours from that degree to the fulfillment of teaching field requirements.

Clinical Placements
All Class A and Alternative Class A programs require extensive field experiences in diverse settings. The majority of field experiences must occur in P-12 schools, and at least half of the field experiences shall be in the candidate’s teaching field or area of instructional support. These placements are in the greater Tuscaloosa area (with the exception of music education and distance learning) in order to facilitate supervision of students. For Early Childhood Special Education and Early Childhood programs, field experiences shall include placements in at least two of the three main types of early education settings: P-3 classrooms, child care centers and homes, and Office of School Readiness programs. With approval, individuals who are employed in positions appropriate to the area of their current program may complete field experiences on the job, but those experiences must be planned with specific purposes and assessment.

All clinical placements in the College of Education relating to teacher certification are coordinated through the Office of Clinical Experiences. For students in the Class A Instructional Leader program, internships are coordinated through the Department of Educational Leadership, Policy, and Technology Studies.

Professional Liability
Students enrolled in College of Education courses that require a clinical placement are required to provide proof of professional liability insurance before being allowed to participate in a clinical placement. Professional liability insurance may be purchased through an independent insurer or is available to students who are members of the Student Alabama Education Association (SAEA), the Council for Exceptional Children (CEC), or Collegiate Music Educators National Conference (CMENC). Further information and membership applications may be obtained from the Office of Clinical Experiences.

Teaching Internship Requirements
The teaching internship (formerly called student teaching) is one of the most important experiences College of Education students have. It is generally regarded as the culminating activity of one’s preparation to become a teacher.

At The University of Alabama, the internship is a full-semester, full-time assignment and must be taken in residence.

Both alternative (nontraditional, fifth-year) and graduate students must file internship applications with the Office of Clinical Experiences in 105 Graves Hall during the semester preceding the semester of the planned internship. The application process begins by attending a mandatory application session, which is held the first Wednesday in October for spring-semester interns and the first Wednesday in March for fall-semester interns. The time, date, and place of the application session
are announced at the beginning of each semester. The deadline for filing applications for a spring-semester internship is October 31; for a fall-semester internship the deadline is March 31.

Students may apply to enroll for an internship if they meet the following criteria:

- The student must have completed all courses in the major or majors, or must secure written permission to enroll for an internship from the appropriate department head.
- The alternative master’s student must show proof of a passing score on the appropriate Praxis assessments.
- The traditional master’s student must show proof of a passing score on the appropriate Praxis subject assessment(s) if seeking certification in an area which differs from current certificate.
- The student must have achieved a minimum grade point average of 3.0, both for all University of Alabama courses attempted and for all University of Alabama courses and transfer courses combined.
- The student must have achieved a minimum grade point average of 2.75 in each major, both for University of Alabama courses in each major and for combined University of Alabama courses and transfer courses in each major.
- The student must have achieved a minimum grade point average of 2.75 for professional education coursework.
- The student must have completed all methods courses and appropriate professional coursework with grades of "C" or better.
- The student must have removed from the transcript any grade of incomplete ("I") recorded in required courses; grades of incomplete are treated as grades of "F."

**Registration for Internship Credit Hours**

Graduate students are required to register for the number of internship credit hours specified by their program. In some programs, graduate students may be allowed to choose a 6-hour registration or a 9-hour registration; course requirements are the same whether 6 hours or 9 hours are taken. Graduate students whose program requires two internship placements should register for two sections of internship (3 hours per section or 4.5 hours per section). Students enrolled for internship must not expect to be enrolled in other courses while interning.

**Policy on Internship Placements**

All internship placements are coordinated by the College of Education Office of Clinical Experiences. Placement sites are selected to ensure the quality of the internship experience and of the supervision provided by the cooperating teacher. All internship placements are in the greater Tuscaloosa area (with the exception of music education) in order to facilitate supervision of students by University of Alabama faculty or other designees of the department heads. Placements outside the greater Tuscaloosa area are made only if the director of clinical experiences and/or the department head determines that an appropriate local placement is unavailable.

With approval, a candidate admitted to a traditional Class A or an Alternative Class A program who is employed in an Alabama school may complete the internship in the candidate’s classroom if the candidate holds a valid Interim Employment Certificate (IEC or SAC) for the appropriate teaching field and assignment.

Students may apply for overseas internships if they meet certain criteria and if appropriate placements can be coordinated by the Consortium for Overseas Student Teaching (COST) and/or The University of Alabama. Applications for overseas internships are taken during January for placements for the next fall semester, and in May for placements the succeeding spring semester. Contact the Office of Clinical Experiences in 105 Graves Hall for additional information.

**Internship Assignments**

- Elementary education (K–6) interns will receive a placement in lower elementary (grades K-3) and upper elementary (grades 4-6) unless substantial field experiences are required and completed at both levels.
- Secondary education (6–12) interns with a comprehensive major may receive one or two internship assignments. If a candidate is seeking certification in two or more distinct teaching fields, an additional internship(s) will be required (unless the internship is defined according to the State-approved program.) If a candidate is seeking certification in two or more related fields, the internship may be divided between the two teaching fields.
- Special education-Collaborative (K–6 or 6–12) interns will receive a split internship assignment: half in a severe and profound setting and half in a mild to moderate setting. The placements will be divided according to their certification grade levels. For candidates seeking certification in BOTH Collaborative K-6 and Collaborative (6-12), the internship shall be divided between early childhood/elementary and middle/secondary grades.
- Special education-early childhood (P-3) interns will receive split placements in pre-K and K-3 in both general education and special education.
- MAP (P–6) interns will receive a minimum of four placements covering two semesters: The placements will be P-3 and upper elementary (4-6), and at least two of the following age groups: pre-K through age 3, age 3-5, and age 5-8. Placements will include children with and without identified disabilities.
- P–12 programs in physical education, foreign language, or music education interns should expect to have a split internship assignment with an elementary and a secondary school.
- English for Speakers of Other Languages (ESOL) interns should expect to have a split internship assignment between an elementary and a secondary school or if ESOL interns are employed full-time as an ESOL teacher in a public school setting, they may complete one semester of internship in their own classroom under the supervision of their building principal and a first-term summer semester of internship in an ESOL summer program coordinated by the Office of Clinical Experiences under the supervision of a University of Alabama ESOL faculty member.

**Summer Internship**

Summer internships are rarely available and then only to persons who hold an undergraduate degree and certification and have one or two years of successful teaching experience at the level and in the subject for which they are seeking certification (with approval from the department head). In addition, summer internship assignments are allowed only if an appropriate placement can be secured in the Tuscaloosa area and appropriate supervision can be provided. These conditions also apply to those seeking to update or renew their certification or add an additional endorsement to a current certificate. To apply for a summer internship, file an appropriate application with the Office of Clinical Experiences in 105 Graves Hall by March 31 of that year.
Educational Specialist Degree Requirements

The College of Education offers graduate work for the educational specialist (EdS) degree in counselor education; educational leadership; educational psychology; general educational psychology, educational psychology, educational research, and school psychology; elementary education, secondary education (music education is available as a specialization within secondary education); and special education.

The College of Education conducts its EdS programs in accordance with The University of Alabama Graduate School policies outlined in this catalog. The EdS degree requires a minimum of 30 semester hours of study beyond the master’s degree. (Students completing an EdS program and also expecting to receive an Alabama Class AA certificate for service in the public schools must complete a minimum of 30 semester hours and achieve a minimum 3.25 grade point average on all work attempted.) Effective for candidates admitted July 1, 2017, and thereafter, a cumulative grade point average of not less than 3.50 is required for all courses in a Class AA teaching field or area of instructional support.

Additionally, for admission to Class AA instructional support programs (School Counseling or School Psychology), at least two full years of full-time acceptable professional work experience is required. For admission to Class AA Teacher Leader, a minimum of three full years of full-time teaching experience in a P-12 setting is required.

Admission to the Graduate School does not mean that the EdS student is admitted to candidacy for the degree. Requirements for admission to candidacy for the EdS degree are the same as those for the master’s degree in the same area. A student should note any foreign language requirement. Each EdS student completes the Admission to Candidacy for the EdS Degree form that is on the Graduate School’s website and submits it to the Graduate School. The Graduate School must approve the student’s EdS plan of study prior to admission to candidacy for the degree.

A standard form for an EdS plan of study is not available at the Graduate School’s website, because each department or program participating in the EdS degree has established a framework of requirements for the degree that indicates the general structure of its program.

Additional information concerning the plan of study, admission to candidacy, admission and degree requirements may be outlined in the individual program descriptions, College of Education Admission requirements (p. 387) and the Graduate School’s Admission Criteria and Degree Requirements sections of this catalog.

See the Admission Criteria section of this catalog for more information.

Class AA Certification Programs

Graduate students seeking Class AA certification must enroll in and complete the EdS (or doctoral) State-approved program in that certification area in order to obtain University of Alabama recommendation for Class AA certification. A student who takes a course for credit in a master’s level program may not take the same course for credit in a sixth-year program. In compliance with regulations established by the Alabama Department of Education and outlined in the Alabama Administrative Code, coursework used to meet Class B or Class A certification requirements may not be used to meet certification requirements for Class AA certification in any teaching field or area of instructional support.

The College of Education conducts its EdS programs in accordance with The University of Alabama Graduate School policies outlined in the Degree Requirements (p. 20) section of this catalog. The EdS degree requires a minimum of 30 semester hours of study beyond the master’s degree. (Students completing an EdS program and also expecting to receive an Alabama Class AA certificate for service in the public schools must complete a minimum of 30 semester hours and achieve a minimum 3.50 grade point average on all work attempted.)

Clinical Placements

All Class AA programs require extensive field experiences in diverse settings. The majority of field experiences must occur in P-12 schools, and at least half of these shall be in the candidate’s teaching field or area of instructional support. These placements are in the greater Tuscaloosa area (with the exception of music education and distance learning) in order to facilitate supervision of students. For Early Childhood Special Education and Early Childhood programs, field experiences shall include placements in at least two of the three main types of early education settings: P-3 classrooms, child care centers and homes, and Head Start programs. Placements for students in the Class AA Instructional Leader program are coordinated through the Department of Educational Leadership, Policy, and Technology Studies.

All clinical placements in the College of Education relating to teacher certification are coordinated through the Office of Clinical Experiences.

Professional Liability

Students enrolled in College of Education courses that require a clinical placement should have professional liability insurance. Professional liability insurance may be purchased through an independent insurer or is available to students who are members of the Student Alabama Education Association (SAEA), the Council for Exceptional Children (CEC), or Collegiate Music Educators National Conference (CMENC). Further information and membership applications may be obtained from the Office of Clinical Experiences.

Doctoral Programs in Education

Programs leading to the doctor of philosophy (PhD) degree are offered in counselor education, educational administration, higher education administration, educational psychology, educational research, elementary education, human performance, instructional leadership, school psychology, secondary education (music education is available as a specialization within secondary education), and special education. Programs leading to the doctor of education (EdD) degree are offered in counselor education, educational administration, higher education administration, educational psychology, elementary education, instructional leadership, school psychology, secondary education (music education is available as a specialization within secondary education), and special education. The doctoral programs are designed for school personnel and others engaged in educational service and leadership.

A masters degree from an accredited institution is required for admission into most of the EdD or PhD program in the College of Education. Some program areas, however, will consider applicants with only a bachelor’s degree for admission into a 90 hour doctoral degree program. Other objective and subjective criteria are employed to select students whose success can be reasonably predicted. Some doctoral programs have further prerequisites for admission such as a professional teaching certificate and/or certain experience in teaching or a related activity. Those who wish to pursue doctoral study in the College of Education should communicate directly with the head of the department to ensure they meet the prerequisites for the area in which they wish to study.

In planning a program, doctoral students should follow these steps:
Declaration of Intent
If applicable, before establishing a doctoral committee, students must successfully complete a screening process in the department in which they wish to study. The applicant initiates the screening process by filing a declaration of intent form with the appropriate department head. The forms are available in the departmental offices.

Preliminary Conference
As part of the screening process in some departments, appropriate faculty members review information the applicant has supplied and interview the applicant. In this preliminary conference, consideration is given to factors such as the applicant's academic and professional background, test scores, personal traits, professional goals and aspirations, and other factors that pertain to the ability to complete the program successfully and continue a productive career. The applicant is notified of the decision of the screening committee by the department head within a few days following the preliminary conference. The department head notifies the College of Education Office of Student Services of the decision by returning the appropriately marked declaration of intent form.

Appointment of Advisor and Doctoral Program Advisory Committee
Students accepted for doctoral study will be asked to confer with the appropriate department head regarding the appointment of advisors and program advisory committees. Nominations for appointment to these committees are made by the program chairperson through the department head to the dean of the College.

EdD program advisory committees usually consist of a minimum of three members of the graduate faculty: a chairperson who represents the student's major area of study and who will be the major advisor for the student in program planning and research, and two members (one from outside the department of the College in which the student is majoring) who can also be of assistance in their areas of expertise.

PhD program advisory committees must have at least five members: a chairperson, who is drawn from the graduate faculty and who represents the student's major area of study (the chairperson serves as the major advisor in program planning and research) and four members, one of whom must be from outside the department of the student's major.

Program Planning
As soon as possible after the appointment of the doctoral program advisory committee, but no later than the end of the first semester of doctoral study, the student and the major advisor should convene a meeting of the program advisory committee. At this program-planning meeting, the student provides each member with a formal written summary of graduate study to date. The student and the committee then plan a program of study to meet the academic and professional needs of the student and fulfill all requirements of the program, the College, and the Graduate School. Plan of Study forms for both doctoral degrees may be obtained in the departmental offices.

Official copies of the Plan of Study agreed upon by the student and the committee shall be dated, signed by the committee members and the department head, and distributed to the Office of the Graduate School, to the student's program office for inclusion in the student's program file, to the dean, and to the committee members. Any deviation from the Plan of Study must be approved by the committee and noted by the chairperson on the student's official record. An amended Plan of Study (if needed) must be submitted to the Graduate School when the student submits the form for Admission to Candidacy for Doctoral Degree.

All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit for the doctoral degree. Otherwise, a "hold" may be placed on future registrations.

The program advisory committee continues to assist the student in program planning and advisement until the student satisfactorily completes all major and minor comprehensive examinations.

Degree Requirements
The PhD requires a minimum of 72 hours of graduate study beyond the master's degree, comprising at least 48 hours of coursework and 24 hours of dissertation research. The course of study must include no fewer than 24 semester hours in a major field, a minimum of 12 semester hours in foundational coursework, and a minimum of 12 semester hours in research methods. Although there is no longer a college-wide requirement, individual departments may stipulate additional hours for a minor requirement or research methods.

The EdD degree requires a minimum of 72 hours of graduate study beyond the master's degree, including at least 60 hours of coursework and 12 hours of dissertation research. The course of study must include no fewer than 24 hours in a major field, a minimum of 12 semester hours in foundational coursework, and a minimum of 12 semester hours in research methods. With the approval of the Student's program advisory committee, some departments permit up to 6 semester hours of dissertation research credit to be included in the 60 hours of required coursework. In such cases the minimum number of hours is 66.

Students pursuing PhD and EdD degrees in the College of Education must satisfy the following foundations requirement: 12 hours of graduate coursework comprising (1) any BEF or BEP classes or (2) any non-research methods courses outside the student's department. Foundations courses cannot come from the student's major program. Approved by the program study committee, these classes should introduce the student to theoretical discourses and bodies of knowledge that provide a depth and breadth of understanding necessary for fluency with the research, theory, and scholarship foundational to the student's field of inquiry and dissertation research. A 12–15 semester hour research/statistics competency is also required in all PhD and EdD programs.

Additional information is in the Degree Requirements section of this catalog.

Major and Minor Examinations
Each PhD candidate must demonstrate competence in his or her major fields (and minor fields, if required by the department). Each EdD student must demonstrate competence in the broad area of knowledge and any areas of specialization specified in his or her program of study. Written comprehensive examinations are required to determine competence in the student's major (PhD) or broad area of knowledge (EdD); an oral defense of the written examination may be requested. A student who fails a major or minor examination may repeat it only once.

A student may apply to take the comprehensive examination in the major after filing a Plan of Study, completing at least one semester in residence, and obtaining approval of the department head (or the department head's
designee) to take the examination. An examination application should be filed with the appropriate department head at least four weeks in advance of the scheduled testing date.

Comprehensive examinations in minor fields or areas of specialization can be taken after the student has completed all coursework in the minor field. The chairperson of the program or department offering the minor or area of specialization may establish evaluating procedures other than a written comprehensive examination.

Dissertation Committee
The dissertation committee, with the director of the dissertation as its chairperson, is responsible for assisting the doctoral student in developing and conducting dissertation research. Once the dissertation committee is formed, the student's program planning committee is disbanded. To form the dissertation committee, the student meets with the chairperson of the program advisory committee to discuss a potential dissertation topic and identify faculty with relevant expertise who by virtue of full membership in the graduate education faculty may chair the dissertation committee. The student then requests such a faculty member to chair the dissertation committee, and together they recommend at least four additional members of the committee, at least one of whom is from outside the department that includes the student's major field of study.

The graduate dean's approval of the proposed dissertation committee is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the form for Appointment/Change of a Doctoral Dissertation Committee.

Selection of the committee chairperson and members should be based on the relationship between the expertise and scholarly interests of the faculty members and the student's proposed dissertation topic. The student and committee chairperson recommend the committee to the program chairperson who recommends the committee to the department head, who in turn recommends the committee to the dean of the College of Education.

The dissertation committee chairperson provides intense counsel in selecting the dissertation problem, developing the proposal, coordinating input from committee members, chairing committee meetings, guiding the student's dissertation research, guiding the writing of the dissertation, and chairing the oral defense of the dissertation. The dissertation committee assists the student in developing the proposal, conducting dissertation research and writing the dissertation, and judges the adequacy of the student's dissertation defense. Close cooperation and involvement of all committee members are expected at all stages of the dissertation process, from the development of the proposal to successful oral defense of the dissertation. The student, in consultation with the chairperson of the committee, is responsible for scheduling committee meetings.

Dissertation Proposal
The dissertation is a contribution to research and literature in a field. It represents the student's ability to identify a problem; develop an understanding of the relevant literature and previous research in an area of inquiry; formulate cogent research questions or hypotheses; report and discuss results of investigation; and derive conclusions, implications, and recommendations from results. The dissertation proposal is the first major step in this process.

The topic of the dissertation should evolve from the student's academic and professional interests. The topic will not be accepted until the dissertation committee formally meets and approves a comprehensive dissertation proposal. While a student may present a brief prospectus to the committee informally, the acceptance of the complete dissertation proposal is necessary before the student has approval from the committee to pursue the dissertation, and before the student is admitted to candidacy for the doctoral degree.

The dissertation proposal will include an introduction to the problem, a statement of the problem, research questions or hypotheses, a comprehensive review of literature and related research, a description of the methods of inquiry or research methods to be employed in the investigation, and the results of pilot studies (where appropriate). It is expected that the information presented in the proposal will be comprehensive and will include discussion of the areas just mentioned in a form that is essentially the same as the final dissertation. Some departments require a formal prospectus prior to the dissertation proposal.

Prior to the formal proposal meeting of the dissertation committee, the student should confer with all committee members. The written dissertation proposal must be provided to members of the committee at least 10 working days prior to the proposal meeting. The Graduate School policy on article-style dissertations may be found in the Degree Requirement section of this catalog.

Upon acceptance of the dissertation proposal, including completion of any changes recommended by the committee, each committee member will sign the acceptance page of the dissertation proposal. One copy of the signed proposal will be filed with the chairperson of the dissertation committee and one copy will be forwarded to the program chairperson and department head for the student's permanent file. The student is then eligible for admission to candidacy for the degree; the application for admission to candidacy for degree must be completed. The dissertation proposal will be maintained in the program and departmental office until the student completes and successfully defends the dissertation.

Typically, the student's major advisor (chairperson of the dissertation committee) will serve as the chief advisor for the dissertation research and preparation of the dissertation. However, another advisor may be selected if the choice of topic warrants such action. Such a change must be approved by the program chairperson and department head, in consultation with the student. In addition, more than five faculty members may serve on the dissertation committee. Students are encouraged to seek advice and assistance with their research from any member of the dissertation committee and from staff members in the College of Education Research Assistance Laboratory.

The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations. Graduate School deadlines, including each semester's dissertation deadlines, are available at the Graduate School's homepage.

Additional information is in the Degree Requirements section of this catalog. The length of work on dissertation research will vary. In no case shall the student be allowed to take an oral examination on the dissertation before having been admitted to candidacy.
Admission to Candidacy

After approval of the dissertation proposal, and completion of all major and minor examinations, the student is eligible for admission to candidacy for the degree. The Admission to Candidacy for the Doctoral Degree form for the PhD or EdD degree is provided by the Graduate School. The student completes the form; obtains the signatures of the dissertation committee, department head, and other appropriate officials; and has the form forwarded to the dean of the College of Education for signature. The completed candidacy form is submitted to the Graduate School for final approval. The department head reports the results of all comprehensive examinations to the College's Office of Student Services and Certification and to the Graduate School.

No student may be admitted to candidacy in a program requiring teaching experience before completing the minimum number of years of appropriate teaching or other experience acceptable to the dissertation committee. A statement of experience from previous employers may be required.

Once a student has met the requirements for admission to candidacy for a doctoral degree, doctoral students (except those in the DMA program) must pursue completion of the dissertation without interruption by enrolling each semester for at least 3 hours of dissertation research; DMA students must enroll each semester for at least 1 hour of document research. This is true whether or not the student has submitted an application for Admission to Candidacy for the Doctoral Degree. Each PhD student must have completed a minimum of 24 hours of such dissertation work upon completion of the degree. Additional information is in the Degree Requirements section of this catalog.

Oral Examination

Since the dissertation research results from the acceptance of the proposal, a minimum of two semesters normally is anticipated prior to oral defense of the dissertation. This time frame ensures adequate attention to discussion of results, their implications for the field, and recommendations for future scholarship.

When all requirements have been met and the dissertation is completed, the student shall arrange a meeting of the dissertation advisory committee; the student shall distribute copies of the dissertation to the members at least 10 working days prior to this meeting.

At least 10 working days prior to defending the dissertation, the student must send an abstract of the dissertation to all faculty in the College of Education along with an invitation to attend the defense that indicates time and place of the defense. The student must defend the dissertation satisfactorily in that meeting and must pass any other examinations considered appropriate. The record of the student’s performance on the final defense of the dissertation will be noted on the proper forms, in accordance with requirements of the Graduate School. These forms will be signed by committee members.

It is the responsibility of the student to submit to the Office of the Graduate School, six weeks prior to graduation, two copies of the dissertation and the abstract in the final, approved form. Further changes or corrections may be suggested by the Graduate School at this time, and these must be completed or reconciled before graduation.

Time Limits for Doctoral Study

All degree requirements must be completed within seven years (21 fall, spring, and summer semesters) following admission to the doctoral program. For example, a student being admitted to and enrolled in the 2009 fall semester may utilize appropriate coursework earned during the 2003 fall semester and may also utilize appropriate coursework earned through the 2016 summer semester.

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period prior to admission to the doctoral program. Such credit must be identified clearly on the Plan of Study and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previous graduate credit to the doctoral degree if the credit was earned during the six-year period prior to admission to the doctoral program.

Time Limits Extension Request

Only under well-documented, extraordinary circumstances beyond the student’s control, a student may petition for a one-semester extension to the seven-year time limit that, if recommended by the department head and approved by the college dean and finally the graduate dean or his designee, will not require the student to validate any out-of-date courses. Validation of out-of-date courses is not an option in the College of Education. If a student fails to complete all degree requirements within seven years of his or her admission to the doctoral program or within a Graduate School approved one-semester extension, the student will be officially suspended from the doctoral program and must reapply for admission.

Repeating Courses When Given an Extension

When requests are made for extension of Graduate School deadlines, and it is deemed that an out-of-date course is integral to the degree program, the dean of the College of Education may request permission that the Graduate School for the course to be repeated. In such instances, both grades shall be used in calculation of the GPA.

Residence Requirements for Doctoral Study

A minimum of two academic years of graduate study beyond the masters degree is required for completion of EdD and PhD programs in the College of Education. At least one academic year of doctoral study (or its equivalent, as noted below) must be spent in continuous residence as a full-time student on the campus of The University of Alabama.

Doctoral program advisory committees may approve either of the following alternatives for meeting residence requirements:

- one full summer term and the following fall semester engaged in coursework on a full-time basis on the campus
- a spring semester and the following full summer term engaged in coursework on a full-time basis on the campus

Students pursuing alternative doctoral residency in the Instructional Technology concentration of the Instructional Leadership Ph.D. degree will enroll in 18 hours of approved graduate level coursework across three consecutive semesters. The 18 hours of coursework must include at least nine hours of approved coursework at the Tuscaloosa campus, three hours of coursework in AIL 691 Doctoral Seminar: Instructional Technology, and no more than six hours of advisor approved online/distance education/Gadsden coursework.

Students in the secondary education and educational leadership EdD (not PhD) programs have the option to meet the doctoral residency requirement by following an alternative policy that is on file with the Graduate School. Contact the Graduate School for details.

Students at the Gadsden Center may fulfill EdD residency by completing 24 graduate hours while continuously enrolled for a period of 24 months.
Transfer Credit

Appropriate graduate credit beyond the master's degree that was earned in other accredited institutions may be transferred (with departmental and Graduate School approval) and applied to doctoral requirements, but in no case can the amount of transferred credit exceed one-half of the hours required for the degree. In calculating the number of transferable hours, dissertation-research credit hours are subtracted from the total degree requirements. A student completes a Request for Transfer of Graduate Credit and submits it to the Graduate School. The student also must ensure that the Graduate School has an official (not faxed or copied) transcript of the credit involved. It is best to apply for official transfer of credit in the student’s first semester of doctoral enrollment; otherwise, the student and advisor will be unsure about the number of course hours needed when submitting the required Plan of Study. Plan of Study forms for both doctoral degrees may be obtained in the departmental offices.

Additional information concerning admission and degree requirements may be outlined in the individual program descriptions in this catalog. Admissions and degree requirements for the Graduate School (Admission Criteria and Degree Requirements) and the College of Education (General Admission, EdS, PhD) are detailed below.

See the Admission Criteria section of this catalog for more information.

General Admission Requirements

To be considered for regular admission to a graduate program in the College of Education, a student must satisfy both of the following admission requirements, unless otherwise specified:

- An entrance examination* score of at least 300 on the GRE General Test or a score no lower than the 50th percentile on the Miller Analogies Test (MAT) if the MAT is accepted by the department
- An undergraduate GPA of 3.0 on a 4.0 scale, a 3.0 average for the last 60 semester hours in a degree program, or a 3.0 or higher in a completed graduate degree program

An applicant whose credentials do not meet the above requirements may be considered in some programs for admission if one of the following minimum requirements is satisfied:

- an overall GPA of 2.75
- an entrance examination score no lower than the 40th percentile on the entrance examination required by the department

*Entrance examination: The GRE is REQUIRED for all degree programs, except as indicated below:

The following programs will accept the GRE or MAT:

- Counselor Education, MA/EdS/PhD
- Elementary Education, MA/EdS
- Educational Leadership, MA/EdS (Class AA Instructional Leader)/EdD
- Educational Psychology (General), MA
- Higher Education Administration, MA/EdD
- Instructional Leadership, PhD (Technology)
- Secondary Education (including Music Education), MA/EdS
- Secondary Education (Music Education only), EdD/PhD
- Special Education, MA/EdS

The following programs do not require an entrance exam:

- Educational Leadership/EDS (Class AA Teacher Leader)
- Instructional Leadership, PhD (Social and Cultural Foundations)
- Instructional Leadership, EdD (Nurse Educator)

Admission to graduate programs is competitive. Meeting minimum requirements does not guarantee admission, only that students will be reviewed for admission. Applications are reviewed by departmental screening committees with consideration given to such factors as academic and professional backgrounds, test scores, personal traits, professional goals and aspirations, and other factors that pertain to the ability to complete the program successfully and continue a productive career. The Graduate School makes final admissions decisions based on departmental recommendations and the Graduate School’s review of applications.

With approval, a student may enroll for one semester only as a non-degree student in the College of Education and is subject to the conditions outlined in this catalog for non-degree students. Responsibility rests with the student to observe the limitations imposed on credit hours, coursework, and transfer of credit.

An applicant to a College of Education program that leads to professional certification must submit references from current and former professors and supervisory personnel knowledgeable of the applicant’s academic and professional capabilities.

Admission to the Graduate School is not equivalent to "unconditional admission" to a state-approved educator preparation program. Candidates admitted to the institution to enroll in courses in a Class A, Alternative Class A, or Class AA program (other than Instructional Leader) may complete no more than five approved program courses prior to meeting ALSDE requirements for "unconditional admission." For Class A and Class AA Instructional Leadership programs, individuals must meet ALSDE requirements for "unconditional admission" before enrolling in ANY instructional leadership courses in the program, as prescribed in the Alabama Administrative Code.

LiveText Requirement

Live Text, a web-based student support system, is required of all students in programs leading to professional educator certification.

Fingerprinting Requirement

Applicants to a state-approved teacher education program shall be required to be fingerprinted for a criminal history background check through the Alabama State Department of Education to the Alabama Bureau of Investigation (ABI) and the Federal Bureau of Investigation (FBI) pursuant to ACT 2002-457. This includes all students (traditional, alternative, out-of-state, and distance learners) enrolled in MA and EDS programs that lead to Alabama certification, regardless of whether or not they are pursuing Alabama certification. The background check is completed at the student’s expense, and suitability must be documented in the Office of Student Services & Certification before the student is assigned placement in a clinical setting. [Alabama Administrative Code]

A candidate whose suitability determination precludes admission to a state-approved teacher education program has the right to due process procedures in accordance with the current Educator Certification Chapter of the Alabama Administrative Code (Revocation and Suspension of Certificates and Unsuitability Determinations).

Policies for Out-of-State Students at the Master's Level (Class A) and Educational Specialist Level (Class AA) for Any Area Except Educational Administration

Admission requirements for master's level (Class A) programs for teachers include "eligibility for Class B certification in the teaching field(s) in which Class A certification is sought," except in a few specified fields.
Admission requirements for educational specialist level (Class AA) programs for teachers include “eligibility for Class A certification in the teaching field(s) in which Class AA certification is sought,” except in a few specified fields.

**Foreign Credentials**
Coursework and/or a degree accepted from institutions outside the United States shall be substantiated by an evaluation of the foreign credentials from a state, federal, or private foreign credential evaluation service recognized by the Teacher Education and Certification Office. Contact the College’s **Office of Student Services & Certification** for more information.

See the Admission Criteria section of this catalog for more information.

**Professional Licensure (Certification)**
The curricula offered by the College of Education are designed to prepare teachers and school administrative and supervisory officials for the appropriate certificates. Certification programs are available for the Alabama Class A and Class AA professional certificates. The College of Education, in accordance with the regulations of the Alabama State Board of Education, also provides assistance to individuals who need courses for the renewal of a certificate.

The associate dean for student services in the College of Education has been designated the teacher certification officer for the University. Students who need information about or assistance with certification should consult the associate dean for student services.

**Application for Certification**
All students must complete the proper application form for Alabama certification. Forms are available online through the Alabama Department of Education. Applications should be submitted to Student Services in 104 Carmichael Hall at least one semester in advance of graduation. A student who does not apply for professional licensure within 60 months after completing the state-approved program will be required to meet the current program. Students who plan to teach in other states must secure the proper professional licensure application forms from those states’ departments of education.

**Alabama Class A Professional Certificate**
Class A teacher education programs are designed to help teachers more effectively serve the purposes defined for the same teaching field at the Class B level, provided such programs exist. The intent of the fifth-year program is to help the teacher develop higher levels of competence than is possible in the Class B program.

Effective for candidates admitted July 1, 2017, and thereafter, a cumulative GPA of not less than 3.25 is required for all courses used to meet the requirements on the approved program checklist for a Class A teaching field or area of instructional support, and a final comprehensive examination is required.

A survey of special education course is required. An individual who completed a survey of special education course prior to meeting requirements for unconditional admission to a Class A program on July 1, 2017, and thereafter, must take an approved course focused primarily on one of the following categories: methods of accommodating instruction to meet the needs of students with exceptionalities in inclusive settings, multicultural education, teaching English language learners, rural education, or urban education. A course used to meet this requirement for one level of certification may not be used to meet the requirement for a higher level of certification.

Following a review by the Alabama State Board of Education, the Class A Professional Certificate is granted to the student who (a) has applied for and has been recommended for certification by the College of Education, and (b) has completed a pre-planned graduate program, approved by the state board of education, that includes a master’s degree. It is important to remember that the awarding of a master’s or higher degree does not necessarily imply that the student is eligible for Class A certification.

If applicable, applicants for the certificate must also present to the Alabama Department of Education evidence of successful and appropriate educational experience, as follows: for certification as a library/media specialist, two years; as a school counselor or psychometrist, two years; sport management, two years; as an instructional leader, three years. [Effective July 1, 2017, two full years of full-time, acceptable professional educational work experience will be required for admission to instructional support programs (Library Media, School Counseling, School Psychometry, and Sport Management).]

Applicants for initial certification in a teaching field or area of instructional support must meet the requirements of the Alabama Educator Certification Assessment Program (AECAP). Information about Praxis assessments is available at https://www.ets.org/praxis/al or in the Office of Student Services & Certification (104 Carmichael Hall).

An individual who completes an Alabama State-approved program must submit an application for Alabama certification within 60 calendar months of the program completion date. The Class A certificate is valid for five years and may be renewed according to regulations of the **Alabama State Board of Education**. Individuals are responsible for meeting renewal requirements and submitting the application for renewal.

**Alabama Class AA Professional Certificate**
The essential objective of the sixth-year program is to extend upward the level of competence of the teacher. Following a review by the Alabama State Board of Education, the Class AA Professional Certificate is granted to students who (a) have applied for and are recommended for certification by the College of Education, and (b) have completed a pre-planned graduate program, approved by the state board of education. Students seeking Class AA professional certification must enroll in and complete the EdS (or doctoral) degree program in the desired certification area in order to obtain the University’s recommendation for Class AA professional certification. Courses used to qualify for a lower-level supporting certificate may not be used again as part of a higher-level certification program.

Effective for candidates admitted July 1, 2017, and thereafter, a cumulative GPA of not less than 3.50 is required for all courses used to meet the requirements on the approved program checklist for a Class AA teaching field or area of instructional support, and a final comprehensive examination is required.

A survey of special education course is required. An individual who completed a survey of special education course prior to meeting requirements for unconditional admission to a Class AA program on July 1, 2017, and thereafter, must take a course focused primarily on one of the following categories: methods of accommodating instruction to meet the needs of students with exceptionalities in inclusive settings, multicultural education, teaching English language learners, rural education, or urban education. A course used to meet this requirement for one level of certification may not be used to meet the requirement for a higher level of certification.
Applicants for initial certification in a teaching field or area of instructional support must meet the requirements of the Alabama Educator Certification Assessment Program (AECAP). Information about Praxis assessments is available at https://www.ets.org/praxis/al or in the Office of Student Services & Certification (104 Carmichael Hall).

A maximum of 15 semester hours of appropriate post-master's-degree credit earned through an institution approved to offer graduate programs beyond the master's level in the field of study in which the credits were earned may, with approval by the department head or his or her designee, be applied toward the Class AA Professional Certificate. It is important to remember that the awarding of a graduate degree does not necessarily imply that the student is eligible for Alabama certification.

An individual who completes an Alabama State-approved program must submit an application for Alabama certification within 60 calendar months of the program completion date. The Class AA certificate is valid for five years and may be renewed according to regulations of the Alabama State Board of Education. Individuals are responsible for meeting renewal requirements and submitting the application for renewal.

Alternative Approaches to Certification

In addition to "regular" certification programs, the Alabama State Board of Education offers alternative approaches to certification. Some of these include: (a) Alternative Class A approach (see information in this catalog); (b) provisional certificate in a teaching field, formerly ABC approach; (c) provisional certificate in Library Media or School Counseling; (d) CACREP-accredited School Counseling Program approach; (e) Nationally Certified School Psychologist approach; and (f) National Board for Professional Teaching Standards approach. Information regarding these approaches is available via the Alabama Department of Education.

Policies for Out-of-State Students at Fifth-year (Class A) and Sixth-year (Class AA) Levels for Any Area Except Educational Administration

Students planning to teach outside the state of Alabama are held personally responsible for knowledge of professional licensure requirements in those states.

Admission requirements for fifth-year (Class A) programs for teachers include "eligibility for Class B certification in the teaching field(s) in which Class A certification is sought," except in a few specified fields.

Admission requirements for sixth-year (Class AA) programs for teachers include "eligibility for Class A certification in the teaching field(s) in which Class A certification is sought," except in a few specified fields.

Out-of-state students who do not meet the above admission requirements to enroll in courses at the respective levels may be recommended to other state departments of education based on completion of coursework, not completion of approved programs. Thus, these students will not be eligible for Alabama certification and, if and when the students wish to receive Alabama certification and teach in Alabama, they must present verification of eligibility for an appropriate prerequisite Alabama certificate before being recommended for Alabama certification.

Foreign Credentials

Coursework and/or a degree accepted from institutions outside the United States shall be substantiated by an evaluation of the foreign credentials from a state, federal, or private foreign credential evaluation service recognized by the Teacher Education and Certification Office.

Contact the College’s Office of Student Services and Certification for more information.

Changes in Certification Requirements

The programs listed in this catalog that lead to Alabama Class A and Class AA professional certificates for service in the public schools may be altered to meet certification standards adopted by the Alabama State Board of Education. Check with the appropriate department head for information.

Elementary Education Programs

CEE501 Managing Effective Classrooms
Hours 1-6

This course is designed to teach students the principles of classroom management, theory, methods, and techniques.

CEE515 Science In Elementary School
Hours 3

Designed to expand knowledge and competencies of elementary teachers of science with specific focus on current standards, research, and inquiry models of instruction.

CEE516 Social Sci In Elem Sch
Hours 3

The focus is on current trends in elementary social studies, with particular attention to innovative instructional modes and to relating learning to the learners’ social environment.

CEE517 Lang Arts In Elemy Sch
Hours 3

Designed to extend and strengthen the knowledge and competencies of experienced teachers of communication arts and skills in the elementary school.

CEE525 Issues Trends Elem Sch Science
Hours 3

Focus on current research and trends in elementary science with respect to historical, political, and socio-cultural contexts.

CEE526 Implementing Social Studies
Hours 3

The focus is on considering and applying the research base of investigating social studies curricula and instruction to one’s own classroom.
CEE530 Modern Elementary School Progr
Hours 3
No description available

CEE532 Elementary Sch Curric
Hours 3
The evolving elementary school curriculum, from historical, current trends, and projective perspectives.

CEE550 Intro Teach Elem School Scienc
Hours 3
Introduction to the teaching of science. Current research is emphasized supporting best instructional practices in science.

CEE560 Intro Teaching Social Studies
Hours 3
Teaching elementary social studies using research-based instructional strategies and curriculum.

CEE565 Classics & Modern Lit
Hours 3
Deals with major developments in literature for children; the areas of children's literature; and effective methods of helping children enjoy and use literature.

CEE570 Teach Reading Elementary Schoo
Hours 3
A foundation for the teaching of reading in the elementary grades (K-6) with an emphasis on development, assessment, and instruction for individual students. Intensive field experience is required.

CEE574 Guiding Pupil Learning
Hours 3
Focuses on understanding how children learn, what factors influence learning, and how teachers can facilitate learning using brain based learning. Application of these principles of learning to classroom situations.

CEE578 Teach Lang Arts In Elem School
Hours 3
Deepening understanding of teaching reading/language arts with emphasis on planning a balanced literacy program. Intensive field experience is required.

CEE580 Concepts Elem School Math
Hours 3
Focuses on the current research in mathematics education concerning how children learn mathematics.

CEE581 Math Curriculum Design
Hours 3
Designing mathematics curricula using current research from mathematics education.

CEE582 Teach Math Elem Altern Student
Hours 3
This course prepares students to effectively teach mathematics in grades K-6. Emphasis is on the current research in mathematics education.
Prerequisite(s): None. Corequisites: CEE 570 and CEE 595

CEE594 Problems
Hours 1-6
Opportunities to study or work independently on topics or projects of individual concern. Credit is based on the nature and degree of student involvement.

CEE595 Practicum
Hours 1-12
Supervised opportunities to apply knowledge and skills in a professional setting. Credit is based on the nature and degree of student involvement. Admission to TEP Program is required.
Prerequisite(s) with concurrency: CEE 570, CEE 365, CEE 582, KIN 364

CEE596 Advanced Practicum
Hours 3
A field-based course providing graduate students with opportunities to practice authentic classroom application of various content areas in elementary education. Admission to TEP Program is required.
Prerequisite(s): None. Corequisites: CEE 550, CEE 560, and CEE 578

CEE597 Internship Elem Educ
Hours 3-12
Observation, participation, and teaching experiences supervised by selected cooperating teachers in public elementary schools. Additional supervision is provided by College of Education personnel.
Prerequisite(s): CEE 560, CEE 550, CEE 582, CEE 596, CEE 595 with a minimum passing grade of C- Corequisite: CEE 501

CEE598 Non-Thesis Research
Hours 1-3
No description available

CEE616 Adv Soc Studies Elem Sch
Hours 3
The focus is on current trends and research in elementary social studies with particular attention to innovative instructional modes and relating learning to the learner's social environment.

CEE687 Topical Research Review
Hours 3
Supervised opportunities to apply knowledge and skills in a professional setting. Credit is based on the nature and degree of student involvement.

CEE690 Advanced Seminar
Hours 1-3
In-class opportunities to analyze and discuss current topics, problems, and/or projects of collective concern. Topics vary.

CEE694 Problems
Hours 1-6
Opportunities to study or work independently on topics or projects of individual concern. Credit is based on the nature and degree of student involvement.

CEE695 Practicum
Hours 1-12
Supervised opportunities to apply knowledge and skills in a professional setting. Credit is based on the nature and degree of student involvement.
**CEE697 Specialist Degree Res**  
Hours 1-6  
Systematic classroom inquiry is used to engage students in a teacher action research project.  
Prerequisite(s): CEE 687  

**CEE698 Non-Thesis Research**  
Hours 1-3  
No description available  

**CEE699 Dissertation Research**  
Hours 1-12  
No description available  

## Curriculum and Instruction Courses

**CIE562 Tesol: Basic Methods**  
Hours 3  
Theories, methods, and strategies for English as a second language that focus on communicative competence and cross-cultural understanding. Admission to TEP Program is required.  
Prerequisite(s) with concurrency: CSE 592  

**CIE567 Improv Foreign Lang Instruct**  
Hours 3  
Critical examination of theoretical perspectives, methods, major issues, and controversies pertinent to teaching foreign language; use of technology in language instruction is a critical component.  

**CIE576 Linguistics Classroom Teachers**  
Hours 3  
This linguistic course enables teachers to understand the basics of how the English language functions. Provides information essential for dealing with students whose native language is not English. Offers useful information about various English dialects as well.  

**CIE577 Second Language Acquisition**  
Hours 3  
Introduction to and analysis of the main issues and theories in second language acquisition (SLA); students deduce and demonstrate instructional implications.  

**CIE578 Second Lang Test Assess Evaln**  
Hours 3  
Preparation in the background and skills necessary to construct classroom-based tests, appropriately use published tests, and understand second or foreign language program evaluation.  

**CIE579 Tch English For Lang Prog/Pol**  
Hours 3  
Theories of language learning, acquiring a second language, and current linguistic theories; emphasis is on programs, policies, and instructional methods of ESL education.  

**CIE580 Teaching Foreign Languages**  
Hours 3  
Theories, methods, and strategies for foreign language teaching that focus on communicative competence and cross-cultural understanding; use of technology in language education is a critical component. Admission to the TEP Program is required.  
Prerequisite(s) with concurrency: CSE 592  

**CIE582 Dev Util Instr Matrials**  
Hours 3  
No description available  

**CIE592 Field Work**  
Hours 1-3  
A clinical experience taken concurrently with the methods course and designed to facilitate students' development of pedagogical skills, effective thinking, and professional problem solving.  

**CIE597 Elementary/Secondary Internsh**  
Hours 3-9  
Elementary/Secondary Internship.  

**CIE599 Special Topics in Early Childhood, Elementary, and/or Secondary Education**  
Hours 1-6  
This course, offered on campus or abroad, provides opportunities to engage with topics or projects of collective concern in early childhood, elementary, and/or secondary education. Topics vary. May be repeated. Offered according to demand.  
Prerequisite(s): Permission of instructor  

**CIE605 Teachers and Teaching Practices in Classrooms across the World**  
Hours 3  
The focus of this course is research on teachers and their teaching practice in real classrooms.  

**CIE606 New Literacies**  
Hours 3  
This course explores and applies theories of new literacies communication, learning, and research.  

**CIE609 Discourse & Pedagogy**  
Hours 3  
This seminar will provide foundational training for doing discourse analytic work within research of teaching and learning, with a focus on the integration of theory and methodology. Participants will be asked to conduct an analysis of classroom discourse for final evaluation.  

**CIE610 Effective Teaching**  
Hours 3  
Examination of the knowledge base in effective teaching practice through in-depth study of the research literature on classroom instructional practices and conditions, and on the classroom teacher. Designed specifically for doctoral-level students.
CIE620 Design Res Classrm Teach  
Hours 3  
The practice and use of reflection and action research with emphasis on developing professional skills in performing and applying research on classroom teaching and learning leading to teacher empowerment and school reform. Designed specifically for doctoral-level students.

CIE625 Res Sem Science Curriculum  
Hours 3  
Designed to enable students to understand and synthesize current research and to develop a theoretical framework in the science curriculum for K-12.

CIE626 Res Sem Social Studies Curricul  
Hours 3  
Designed to enable students to understand and synthesize current research and to develop a theoretical framework in social studies education for K-12.

CIE627 Second Language Literacy  
Hours 3  
This course is designed to provide the student with an introduction to the major issues in research and instruction in second language (L2) literacy (reading and writing). An emphasis in this course is on literacy as a cognitive skill. The psycholinguistic processes of reading and writing in a second language will be addressed.

CIE630 Curric Classroom Teacher  
Hours 3  
This course discusses the major issues in curriculum design and implementation for the classroom teacher. Designed specifically for doctoral-level students.

CIE640 Sem Teachr Educ Program  
Hours 3  
The course focuses on issues, problems, trends, and research associated with undergraduate and graduate teacher education and certification programs in Alabama, the U.S., and the world. Designed specifically for doctoral-level students.

CIE644 Student Teach Supervision  
Hours 3  
Organization and administration of student-teaching programs and methods of supervising student-teaching in schools. Designed specifically for doctoral-level students.

CIE645 Prof Cont: Tching & Lrning Com  
Hours 3  
Research-based focus using theoretical frameworks to examine and analyze the professional development continuum.

CIE650 Indiv/Context Variables  
Hours 3  
This course deals with learning styles, personality factors, and social-environmental issues that affect curriculum and instruction. Theoretical and practical aspects are covered. Designed specifically for doctoral-level students.

CIE656 Sem For Language Eductn Resear  
Hours 3  
Examination and critical analysis of a wide range of perspectives from the professional literature on teaching and learning a foreign language.

CIE660 Cognitive Perspectives  
Hours 3  
The course focuses on systematic descriptions and analysis of major learning theories for classroom application. The intent is to contribute education insight toward more effective teaching through cognitive processes.

CIE670 Critical Inquiry Curric Pedago  
Hours 3  
Examinations of different conceptualizations of curriculum and pedagogy in K-12, emphasis on critical theory and postmodern theory and critique.

CIE676 Linguistics Classroom Teachers  
Hours 3  
This course involves advanced investigation within general areas of applied linguistic studies such as phonology, morphology, syntax, semantics, discourse, pragmatics, writing systems, etc., and their impact on second language acquisition.

CIE680 Sem In Math Educ Research  
Hours 3  
Designed to enable students to understand and synthesize current research and to develop a theoretical framework in mathematics education.

CIE692 Field Work  
Hours 1-3  
Field-based opportunities to study or work on topics or projects of collective concern.

CIE693 Workshop  
Hours 1-6  
In-class opportunities to study or work on topics or projects of collective concern. Topics vary. May be repeated. Offered according to demand.

Reading Education

CRD500 Teaching Reading to Diverse Learners  
Hours 3  
A foundation in the materials and methods for teaching reading and the language arts K-12, with emphasis on intervention programs, assessment, and instruction for individual and small groups of students. Intensive field experience is required.

Prerequisite(s): CRD 369

CRD510 Expanding Reading  
Hours 3  
A comprehensive study of the major factors involved in teaching reading at the intermediate grade levels. Techniques for teaching word recognition and comprehension skills are studied extensively.

CRD511 Beginning Reading  
Hours 3  
Attends to the theory and practice of beginning reading; key areas of study include diagnostic and evaluative procedures and the organization and implementation of appropriate instruction. A field component is required.
CRD512 Impr Read Second Schools
Hours 3
A comprehensive study of the major components involved in literacy instruction at the secondary level. A field component is required. This course should be taken concurrently with the content methods course and CSE 592.

CRD553 Foundations Reading Pk-12
Hours 3
A comprehensive study of the theoretical foundations and history of literacy development and instruction in PK-12 settings.

CRD569 Introduction to Literacy Education
Hours 3
This course provides an overview to the foundations of literacy development and instruction grades PK-12.

CRD590 Seminar In Literacy Coaching
Hours 3
A comprehensive study of the major theories of and components involved in providing professional development in literacy to teachers and schools.

CRD593 Practicum in Literacy Coaching
Hours 3
This course provides students with the ability to implement the knowledge base of current research in coaching teachers' literacy instruction by conducting literacy coaching and literacy professional development in P-12 schools.

CRD595 Practicum In Reading
Hours 1-12
Provides graduate students supervised opportunities to apply knowledge and skills in primary grade settings (preschool-2nd).
Prerequisite(s): Corequisites: CRD 510, CRD 511, and CRD 512

CRD654 At Risk Readers
Hours 3
Provides advanced study of theoretical perspectives of diagnostic methods and materials for P-12 students at risk of reading failure.

CRD690 Advanced Seminar Crd
Hours 1-3
Provides students with a knowledge base of the relationship between theory, research and practice in regard to K-12 literacy education.

CRD693 Advanced Workshop
Hours 1-3
In-class opportunities to study or work on topics or projects of collective concern. Topics vary. May be repeated.

CRD695 Adv Practicum Readg Education
Hours 3
Provides graduate students supervised opportunities to apply knowledge and skills in intermediate grade settings (3rd-6th).
Prerequisite(s) with concurrency: CRD 510, and Corequisite: CRD 654

CRD696 Adv Reading Specialist Practic
Hours 3
Provides reading specialist graduate students supervised opportunities to apply knowledge and skills in middle school and high school settings (7th-12th).
Prerequisite(s) with concurrency: CRD 654

Secondary Education Courses

CSE530 Mod Sec School Program
Hours 3
The evolving secondary school and its program, with emphasis on analysis of current trends that directly affect modern school practices in a societal context.

CSE532 Secondary Sch Curric
Hours 3
The evolving secondary school curriculum, from historical, current trends, and projective perspectives.

CSE555 Adolescent Literature
Hours 3
An introduction to literature appropriate for the adolescent reader; reading patterns and major concerns of adolescents.

CSE563 Imprvg English Instr
Hours 3
Principles of learning applied to concepts, skills, attitudes, and problem solving in English and speech; diagnosis, enrichment, remedial teaching, and evaluation.

CSE564 Imprvg Soc Sci Instr
Hours 3
Exploration and examination of methods and materials for improving social studies instruction. Focuses on teaching for diverse learners, constructivist methods, critical thinking, interdisciplinary teaching, and various technologies as they apply to secondary social studies classrooms.

CSE565 Improvg Science Instr
Hours 3
Principles of learning applied to concepts, skills, attitudes, and problem solving in science; diagnosis, enrichment, remedial teaching, and classroom evaluation, and application and evaluation of technologies.

CSE566 Improvg Math Instr
Hours 3
Principles of learning applied to concepts, skills, attitudes, and problem solving; proper use and evaluation of teaching aids; construction and utilization of teaching instruments; and examination and exploration of alternative assessment strategies and technologies for use in secondary mathematics classrooms.

CSE569 Pedagogical Grammar
Hours 3
Exploration of structural, transformational, and traditional approaches to teaching grammar.
CSE570 Teaching Writing 6-12
Hours 3
This course is designed to prepare prospective and current English teachers to successfully teach and evaluate writing in grades 6-12.

CSE574 Guiding Pupil Learning
Hours 3
Understanding ways children and youth learn, factors influencing learning, and ways in which teachers can facilitate learning through brain based research. Application of principles of learning to classroom situations. Usually offered during summer school.

CSE575 Devlpn Math Teaching w/Tech
Hours 3
Focuses on the development of teaching secondary mathematics with new and emerging technologies. Explores the appropriate use of technologies to enhance conceptual understanding and problem solving in mathematics. Development of advanced classroom lessons and assessments in a technology classroom.

CSE576 Improving Science Teaching
Hours 3
Examination and evaluation of appropriate technologies for the secondary science curriculum.

CSE579 Teach Sec School English
Hours 3
Methods and media essential to effective instruction in English in the secondary school.
Prerequisite(s) with concurrency: CSE 592, CRD 512, BER 550

CSE580 Teach Sec Sch For Lang
Hours 3
Theories, methods, techniques, and essential media for teaching foreign languages effectively in the secondary school. Admission to TEP Program is required.
Prerequisite(s) with concurrency: CSE 592 OR CRD 512

CSE583 Teach Sec School Math
Hours 3
Methods, media, and techniques of teaching mathematics in the secondary school, including selected topics in mathematics and exploration and examination of various technologies for use in secondary mathematics classrooms, including, but not limited to, calculators and various computer software.
Prerequisite(s): CSE 406 with a minimum passing grade of C-
Prerequisite(s) with concurrency: CSE 592, CRD 512

CSE585 Advanced Teaching Inquiry in Secondary Social Studies
Hours 3
This course is designed to assist students' understanding of and application of powerful, inquiry-based strategies to the design of meaningful 21st century social studies instruction and assessment.
Prerequisite(s): TEP

CSE586 Teach Sec School Science
Hours 3
Methods and technologies essential to effective instruction in science in the secondary school.

CSE587 Teach Sec School Soc Sci
Hours 3
Theories and methods of teaching social studies in secondary schools, including examination and exploration of instructional materials, various technologies, constructivist methods, and assessments.

CSE592 Field Work
Hours 1-3
A clinical experience taken concurrently with the methods course and designed to facilitate students' development of pedagogical skills, effective thinking, and professional problem solving.

CSE593 Workshop
Hours 1-3
In-class opportunities to study or work on topics or projects of collective concern. Topics vary. May be repeated.

CSE594 Problems
Hours 1-6
Opportunities to study or work independently on topics or projects of individual concern. Credit is based on the nature and degree of student involvement.

CSE595 Practicum
Hours 3-6
Focuses on analysis and performance of teaching strategies and the evaluation of teaching-learning problems.

CSE597 Internship
Hours 3-12
Full-time internship as a teacher in the major teaching field.
Prerequisite(s): CSE 579 or CSE 583 with a minimum passing grade of C

CSE598 Non-Thesis Research
Hours 1-6
No description available

CSE663 Sec School English
Hours 3
Literature, research, and content in English and speech; current trends; experimental programs; gradation or sequence of subject matter; criteria for program evaluation; and basic issues.

CSE664 Sec Sch Social Science
Hours 3
Focuses on curriculum and research in social studies education, including materials development and current issues in the field.

CSE665 Sec School Science
Hours 3
Literature, research, and content in science; current trends; experimental programs; gradation of subject matter; criteria for program evaluation; and basic issues.
CSE666 Sec School Mathematics
Hours 3
Principles of learning applied to concepts, skills, attitudes, and problem solving; proper use and evaluation of teaching aids; construction and utilization of teaching instruments; and examination and exploration of alternative assessment strategies and technologies for use in secondary mathematics classrooms.

CSE670 Res & Theory In Sec Ed
Hours 3
An examination of the relationship between theory and research. Students learn to search and evaluate the research literature and develop a proposal for research.

CSE675 Imprvg Math Teaching w/Tech
Hours 3
Focuses on the implementation, refinement, and assessment of mathematics teaching using advanced and new technologies including advancing critical thinking and cognitive task levels of classroom mathematics instructions.

CSE690 Advanced Seminar
Hours 1-3
In-class opportunities to analyze and discuss current topics, problems, and projects of collective concern. Topics vary.

CSE693 Advanced Workshop
Hours 1-9
In-class opportunities to study or work on topics or projects of collective concern. Topics vary. May be repeated.
Prerequisite(s): CSE 670

CSE694 Advanced Problems
Hours 1-6
Opportunities to study or work independently on topics or projects of individual concern. Credit is based on the nature and degree of student involvement.

CSE695 Practicum
Hours 1-12
Supervised opportunities to apply knowledge and skills in a professional setting. Credit is based on the nature and degree of student involvement.

CSE697 Specialist Degree Res
Hours 1-6
Systematic classroom inquiry is used to engage students in a teacher action research project. Advisor recommendation required.
Prerequisite(s): CSE 670

CSE698 Non-Thesis Research
Hours 1-3
No description available

CSE699 Dissertation Research
Hours 1-15
No description available

Elementary Education, Ed.D.
The doctoral degree program is the highest professional degree and is designed primarily for top-level education practitioners and university researchers. Programs at the doctoral level are designed to prepare advanced practitioners for school positions or for professorships in institutions of higher education. The Doctor of Education (EdD) is for students who intend to become highly skilled practitioners and school leaders. Normally, three years of teaching are required to enter the EdD program. The EdD degree includes a focus on facilitating the development of action researchers and experienced practitioners.

Admission Requirements:
To be considered for regular admission, applicants must present a GPA of 3.0 on a 4.0 scale and a GRE score of 300 or higher. Three years of teaching are also required.
Degree Requirements:
- major coursework (CEE/CIE/CRD), 36 hours
- doctoral core coursework, 12 hours
- doctoral seminar course (CIE 693 Workshop), 3 hours
- research coursework as specified, 18 hours (minimum)
- humanistic/behavioral courses, 12 hours (minimum)
- dissertation research (CEE 699 Dissertation Research*), 12 hours (minimum)

*Students must be continuously enrolled in CEE 699 Dissertation Research once they begin work on the dissertation.

A list of courses that fulfill these requirements may be obtained from the departmental office in Graves Hall.

The Graduate Catalog is published annually. Students should obtain the most recent program requirements from their program advisors.

Elementary Education, Ed.S.

The educational specialist program in Elementary Education leads to Class AA Elementary certification.

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to-date information about requirements. A current program checklist may be obtained from the program office in 204 Graves Hall.

Students should consult their advisors each semester before registering.

Admission Requirements

Admission requires master’s level certification in Elementary Education. An applicant who holds both Class B Elementary certification AND Class A Reading is also eligible.

An entrance exam score (at least 300 on the GRE or the 50th percentile or above on the MAT) is needed for regular admission.

Admission requirements for the Graduate School (Admission Criteria) and the College of Education (General Admission (p. 387)) are detailed in earlier sections of this catalog.

See the Admission Criteria section of this catalog for more information.

Degree Requirements

This course listing applies to those who begin this program June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. A minimum of 30 hrs of appropriate work beyond the MA degree and the completion of a comprehensive exam are required for the educational specialist degree. Candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C.

Total Hours 30-33

1. BER 500 Intro Educatn Research or the equivalent is required before beginning the research courses.
2. The research courses must be taken before CEE 687 Topical Research Review.

A current program checklist may be obtained from the departmental office in 204 Graves Hall. A maximum of 6 hrs of approved transfer credit (maximum of nine hours from UAB/UAH) may be applied toward the degree.

Certification

The Alabama State Board of Education grants Class AA professional educator certification in Elementary (K-6). To be eligible, candidates must hold appropriate, prerequisite Class A certification and must complete all requirements for the EDS degree as described in this catalog, including a comprehensive exam. According to Alabama regulations, individuals admitted to a Class AA program based on a professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class AA (specialist level) certification.

Elementary Education, MA

Traditional Class A Program

The department offers a traditional Class A program for those with appropriate prerequisite certification in Elementary Education (or
an approved equivalent). This program leads to Alabama Class A certification in Elementary Education (K-6).

**Alternative Class A Program (Nontraditional, Initial Teacher Certification)**

The department offers an Alternative Class A program that does not require prior certification in a teaching field. This program leads to Alabama Class A certification in Elementary Education (K-6) with dual certification in Early Childhood (P-3) and is designed to allow individuals with undergraduate degrees in non-teaching fields to enter the field of education.

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to-date information about requirements. A current program checklist may be obtained from the program office in 204 Graves Hall. Students should consult their advisors each semester before registering.

**Traditional Class A Elementary (K-6) Certification**

**Admission Requirements**

In addition to meeting admission requirements for the Graduate School and the College of Education, applicants must hold appropriate prior certification in Elementary Education (or the approved equivalent). An entrance exam score (at least 300 on the GRE or the 50th percentile or above on the MAT) is needed for regular admission. Admission requirements for the Graduate School (Admission Criteria (p. 11)) and the College of Education (General Admission (p. 387)) are detailed in earlier sections of this catalog.

**Degree Requirements**

This course listing applies to those who begin this program June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. A minimum of 30 hrs of course credit must be earned, and a comprehensive exam must be successfully completed. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C.

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to-date information about requirements. Students should consult their advisors each semester before registering. A current program checklist should be obtained from the program office in 204 Graves Hall. Students may not count more than six hours in certain seminar/workshop/problems courses toward the completion of the degree. A maximum of 12 hours of transfer credit, if approved by the student’s advisor, may be applied toward the degree. Students should see their advisors regarding which courses are appropriate for transfer credit.

Additional requirements of the Graduate School and the College of Education are detailed in other sections of this catalog.

**Certification**

The Alabama State Board of Education grants Class A professional educator certification in Elementary Education (K-6). To be eligible, candidates must hold appropriate prerequisite certification and must complete all requirements for the MA degree in the chosen program as described in this catalog, including a comprehensive exam, state assessments (if applicable), and the Praxis subject assessment(s). According to Alabama regulations, individuals admitted to a Class A program based on a professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class A (master’s level) certification.

**Alternative Class A Elementary (K-6) with dual certification in Early Childhood (P-3) (Nontraditional, Initial Teacher Certification Program)**

**Admission Requirements**

An entrance exam score (at least 300 on the GRE or the 50th percentile or above on the MAT) is needed for regular admission.

Admission requirements for the Graduate School (Admission Criteria (p. 11)) and the College of Education (General Admission (p. 387)) are detailed in earlier sections of this catalog.

For admission to the Alternative Class A (non-traditional) program in elementary education, applicants must meet the following requirements:
• Transcript evaluation: Applicants should contact the Office of Student Services & Certification for a transcript evaluation to determine prerequisite courses.

• Degree requirement: An appropriate bachelor’s degree from a regionally accredited institution with a minimum overall GPA of 2.75 or a master’s degree with a GPA of at least 3.0 is required.

• Assessment of basic skills: Applicants must meet current basic skills requirements of the Alabama Educator Certification Assessment Program (AECAP). Effective September 1, 2017, passing scores on the Praxis Core Academic Skills for Educators Tests of mathematics, reading and writing are required (or passing scores on all components of the previously accepted Basic Skills assessment before 9/1/17). Information about the Praxis Core tests is available online at https://www.ets.org/praxis/al/al_teacher_ed or in the Office of Student Services & Certification (104 Carmichael Hall).

• General Studies and Teaching Field: For Alternative Class A in Elementary, applicants must have completed 12 hours of coursework in each of four areas: humanities, social science, science and mathematics. (This is called the 4 x 12 requirement.) The transcript evaluation will determine if an applicant meets the 4 x 12 requirement.

• Fingerprinting/background clearance

Degree Requirements
This course listing applies to those who begin this program June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. A minimum of 39 semester hours of specific graduate credit plus some undergraduate prerequisites are required for certification. The program of study must be planned with an advisor. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C, and a passing score on a comprehensive exam is required.

Total Hours: 39-42

* Approved diversity course

1 The early childhood placement will include at least two of the following age groups: birth-age 3, age 3-5, and age 5-8. The elementary placement(s) will include upper and lower grades unless substantial field experiences are completed at both levels.

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to-date information about requirements. Students should consult their advisors each semester before registering.

**Certification**

The Alabama State Board of Education grants Class A professional educator certification in Elementary Education (K-6) and Early Childhood (P-3). To be eligible, candidates must complete all requirements of the Alternative Class A program, including a comprehensive exam, state assessments (if applicable), and the Praxis subject assessment(s).

**Elementary Education, Ph.D.**

The doctoral degree program is the highest professional degree and is designed primarily for top-level education practitioners and university researchers. Programs at the doctoral level are designed to prepare advanced practitioners for school positions or for professorships in institutions of higher education. The Doctor of Philosophy (PhD) is for students who intend to become researchers in a given field. Normally, three years of teaching are required to enter the PhD program. Program requirements include the acquisition of special skills that would be useful in conducting scholarly investigation and traditional research.

**Admission Requirements:**

To be considered for regular admission, applicants must present a GPA of 3.0 on a 4.0 scale and a GRE score of 300 or higher. Three years of teaching are also required.

**Degree Requirements:**

- major coursework (CEE/CIE/CRD), 24 hours
- doctoral core coursework, 12 hours
- doctoral seminar course (CIE 693 Workshop), 3 hours
- research coursework as specified, 18 hours (minimum)
- humanistic/behavioral courses, 12 hours (minimum)
- dissertation research (CEE 699 Dissertation Research*), 24 hours (minimum)

*Students must be continuously enrolled in CEE 699 Dissertation Research once they begin work on the dissertation.

A list of courses that fulfill these requirements may be obtained from the departmental office in Graves Hall.

The Graduate Catalog is published annually. Students should obtain the most recent program requirements from their program advisors.

**Secondary Education, Ed.D.**

The doctoral degree program is the highest professional degree and is designed primarily for top-level education practitioners and university researchers. Programs at the doctoral level are designed to prepare advanced practitioners for school positions or for professorships in institutions of higher education. The Doctor of Education (EdD) is for students who intend to become highly skilled practitioners and school leaders. Normally, three years of teaching are required to enter the EdD program. The EdD degree includes a focus on facilitating the development of action researchers and experienced practitioners.
Admission Requirements:
To be considered for regular admission, applicants must present a GPA of 3.0 on a 4.0 scale and a GRE score of 300 or higher. Three years of teaching are also required.

Degree Requirements:
- major field coursework (CSE/CIE/CRD), 27 hours
- subject field coursework, 24 hours
- research coursework, 12 hours (minimum)
- foundations of professional studies, 12 hours
- dissertation research, 12 hours (minimum)

A list of courses that fulfill these requirements may be obtained from the departmental office in Graves Hall.

The Graduate Catalog is published annually. Students should obtain the most recent program requirements from their program advisors.

Secondary Education, Ed.S.
Programs leading to Class AA certification in Secondary Education (6-12) are available in
- Biology
- Chemistry
- English for Speakers of Other Languages
- English Language Arts (comprehensive)
- Foreign Language (French or Spanish)
- General Science (comprehensive)
- Geography
- History
- Mathematics
- Physics
- Social Science (comprehensive)

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to-date information about requirements. A current program checklist may be obtained from the program office in 204 Graves Hall. Students should consult their advisors each semester before registering.

Admission Requirements
Admission requires appropriate, prerequisite master’s level certification.
An entrance exam score (at least 300 on the GRE or the 50th percentile or above on the MAT) is needed for regular admission.

Admission requirements for the Graduate School (Admission Criteria) and the College of Education (General Admission (p. 387)) are detailed in earlier sections of this catalog. See the Admission Criteria section of this catalog for more information.

Class AA Certification
The Alabama State Board of Education grants Class AA professional educator certification in Secondary Education (6-12) teaching fields and P-12 teaching fields. To be eligible, candidates must hold appropriate prerequisite certification and must complete all requirements of the State-approved program, including a comprehensive exam. According to Alabama regulations, individuals admitted to a Class AA program based on a professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class AA (specialist level) certification.

Degree Requirements
A minimum of 30 hours of appropriate work beyond the MA degree and the completion of a research project are required for the educational specialist degree.

Students must be certain that their planned programs meet all certification requirements according to programs approved by the state department of education. Approved program checklists are available from the program office.

NOTE: The comprehensive fields of general science, general social science, and English language arts require at least one course in two areas within the broader field as follows:
- English language arts must include courses from at least two of the following areas: EN, JN, COM or TH
- General science must include courses from at least two of the following areas: BSC, CH, PH or GEO.
- General social science must include courses from at least two of the following areas: HY, SOC, PY, PSC, GY or EC

Candidates moving from the comprehensive fields of general science or general social science to a single teaching field must earn passing scores on the appropriate Praxis subject assessment for certification in the single teaching field. For example, a student admitted with Class A general science certification who completes teaching field coursework only in physics must earn a passing score on the Praxis for physics to earn Class AA physics certification.

These course listings apply to candidates having appropriate prior certification who begin this program at UA on June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.50 on all courses in the program below, with no grade below a C.

### Postsecondary Instruction

Graduate students in the EdS program who have an interest in teaching in postsecondary institutions may take advantage of the program’s flexibility to acquire a maximum of 18 hours in cognate field courses.
Students who have this option in mind should coordinate the program of study carefully with their advisors.

Secondary Education, MA

Traditional Class A and Alternative Class A certification programs in Secondary Education (6-12) are available in

- Biology
- Chemistry
- English for Speakers of Other Languages
- English Language Arts (comprehensive)
- Foreign Language (French, German, Latin, or Spanish)
- General Science (comprehensive)
- Geography
- History
- Mathematics
- Physics
- Social Science (comprehensive)

Also offered is a master’s degree program leading to Class A certification as a Reading Specialist (P-12).

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to-date information about requirements. A current program checklist may be obtained from the program office in 204 Graves Hall. Students should consult their advisors each semester before registering.

Requirements for Secondary Education Teaching Fields

Traditional Class A Programs

Admission Requirements

In addition to meeting admission requirements for the Graduate School and the College of Education, applicants must hold appropriate prior certification (or the approved equivalent). An entrance exam score (at least 300 on the GRE or the 50th percentile or above on the MAT) is needed for regular admission.

Admission requirements for the Graduate School (Admission Criteria) and the College of Education (General Admission (p. 387)) are detailed in earlier sections of this catalog.

See the Admission Criteria section of this catalog for more information.

Class A Certification

The Alabama State Board of Education grants Class A professional educator certification in Secondary Education (6-12) teaching fields and P-12 teaching fields. To be eligible, candidates must hold appropriate prerequisite certification and must complete all requirements for the MA degree in the chosen program as described in this catalog, including a comprehensive exam, state assessments (if applicable), and the Praxis subject assessment(s). According to Alabama regulations, individuals admitted to a Class A program based on a professional educator certificate from another state must earn the prerequisite Alabama certification before applying for Alabama Class A (master’s level) certification.

Degree Requirements

A minimum of 30 hours of course credit must be earned; see specific program checklist. The program of study must be planned with an advisor.

NOTE: The comprehensive fields of General Science, General Social Science, and English Language Arts require at least one course in two areas within the broader field as follows:

- English Language Arts must include courses from at least two of the following areas: EN, JN, COM, or TH
- General Science must include courses from at least two of the following areas: BSC, CH, PH, or GEO.
- General Social Science must include courses from at least two of the following areas: HY, SOC, PY, PSC, GY, or EC

Candidates moving from the comprehensive fields of general science or general social science to a single teaching field must earn passing scores on the appropriate Praxis subject assessment for certification in the single teaching field. For example, a student admitted with Class B General Science certification who completes teaching field coursework only in biology must earn a passing score on the Praxis for biology to earn Class A Biology certification. Individuals who intend to earn Class AA certification in a secondary education field must hold valid Class A certification in the same teaching field as the Class AA program.

These course listings apply to candidates having appropriate prior certification who begin this program at UA on June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.25 on all courses in the graduate program.

**Educational Research:**
- BER 500 or Intro Educatn Research 3
- BER 550: Eval Classroom Learning
Admission to an Alternative Class A program requires admission to the Graduate School and the completion of specified undergraduate requirements. See the Admission Criteria section of this catalog for more information.

Admission to Reading Specialist (P-12) requires two full years of full-time teaching experience. The Praxis for Teaching Reading is also required for applicants who hold the prerequisite certification in an area other than Early Childhood, Elementary, or Collaborative (K-6).

Alternative Class A (Master’s-Level), Nontraditional, Initial Teacher Certification Program

The department of Curriculum & Instruction offers Alternative Class A programs that do not require prior certification in a teaching field. These programs lead to Alabama Class A certification in Secondary Education (6-12) and are designed to allow individuals with undergraduate degrees in non-teaching fields to enter the field of education.

Admission

An entrance exam score (at least 300 on the GRE or the 50th percentile or above on the MAT) is needed for regular admission.

Admission requirements for the Graduate School (Admission Criteria) and the College of Education (General Admission (p. 387)) are detailed in earlier sections of this catalog.

See the Admission Criteria section of this catalog for more information.

Admission to an Alternative Class A program requires admission to the Graduate School and the completion of specified undergraduate prerequisite courses. For admission to the Alternative Class A (non-traditional) program in secondary education, applicants must meet the following requirements:

- **Transcript evaluation:** Applicants should contact the Office of Student Services & Certification for a transcript evaluation to determine prerequisite courses and other requirements.
- **Degree requirement:** An appropriate bachelor’s degree from a regionally accredited institution with a minimum overall GPA of 2.75 OR a master’s degree with a GPA of at least 3.0 is required.
- **Assessment of basic skills:** Applicants must meet current basic skills requirements of the Alabama Educator Certification Assessment Program (AECAP). Effective September 1, 2017, passing scores on the Praxis Core Academic Skills for Educators Tests of mathematics, reading and writing are required (or passing scores on all components of the previously accepted Basic Skills assessment before 9/1/17). Information about the Praxis Core tests is available online at https://www.ets.org/praxis/al/al_teacher_ed or in the Office of Student Services & Certification (104 Carmichael Hall).
- **Teaching Field:** For single teaching fields at the secondary level (6-12), applicants must have an academic content major (or the equivalent) in the teaching field OR passing scores on the appropriate Praxis subject assessment. For comprehensive teaching fields at the secondary level (English Language Arts, General Science, or General Social Science), applicants must have an academic content major (or the equivalent) in the teaching field plus one course in each of the four areas of the teaching field OR passing scores on the appropriate Praxis subject assessment. For English for Speakers of Other Languages (P-12), applicants must have an academic content major (or the equivalent) in English or a foreign language OR passing scores on the appropriate Praxis subject assessment. The transcript evaluation will determine if an applicant meets the teaching field requirement.

- **Fingerprinting/background clearance**

### Alternative Class A Certification

The Alabama State Board of Education grants Class A professional educator certification in Secondary Education (6-12) teaching fields and P-12 teaching fields. To be eligible, candidates must complete all requirements of the Alternative Class A program, including a comprehensive exam, state assessments (if applicable), and the Praxis subject assessment(s).

### Alternative Class A Requirements

A minimum of 42 semester hours of specific graduate credit plus some undergraduate prerequisites are required for the certificate. The program of study must be planned with an advisor.

These course listings apply to candidates having completed a baccalaureate degree at a regionally accredited college or university who begin the program June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.25 on all courses in the program below, with no grade below a C.

Professional Studies:
BEF 510  Phil Hist Socl Founds Ed  3

Evaluation of Teaching and Learning:
BER 550  Eval Classroom Learning  3

Literacy:
CRD 512  Impr Read Second Schools  3

Special Education coursework:
SPE 500 is required if SPE 300 was not completed prior to unconditional admission.

Full-time Internship:
CSE 597  Internship  6

Total Hours 39-42

*  SDE approved diversity course
Postsecondary Instruction

Graduate students in the MA program who have an interest in teaching in postsecondary institutions may take advantage of the program’s flexibility to acquire a maximum of 18 hours in cognate field courses. Students who have this option in mind should coordinate the program of study carefully with their advisors.

Secondary Education, Ph.D.

The doctoral degree program is the highest professional degree and is designed primarily for top-level education practitioners and university researchers. Programs at the doctoral level are designed to prepare advanced practitioners for school positions or for professorships in institutions of higher education. The Doctor of Philosophy (PhD) is for students who intend to become researchers in a given field. Normally, three years of teaching are required to enter the PhD program. Program requirements include the acquisition of special skills that would be useful in conducting scholarly investigation and traditional research.

Admission Requirements:

To be considered for regular admission, applicants must present a GPA of 3.0 on a 4.0 scale and a GRE score of 300 or higher. Three years of teaching are also required.

Degree Requirements:

- major field coursework (CSE/CIE/CRD), 24 hours
- minor field coursework (relevant to content/discipline/subject specific/teaching field), 24 hours
- research coursework, 15 hours (minimum)
- foundations of professional studies, 12 hours
- dissertation research, 24 hours (minimum)

A list of courses that fulfill these requirements may be obtained from the departmental office in Graves Hall.

The Graduate Catalog is published annually. Students should obtain the most recent program requirements from their program advisors.

See the Admission Criteria section of this catalog for more information.

Department of Educational Leadership, Policy, and Technology Studies (AEL, AHE, AIL, BEF, CAT)

The department offers Class A and Class AA certification programs in educational leadership, master’s degrees in educational leadership and higher education administration, EdS degrees in educational leadership, and EdD and PhD degrees in educational leadership, higher education administration, and instructional leadership. Within the Instructional Leadership doctorate, students may also pursue concentrations in Instructional Technology or Social and Cultural Studies in Education. The department provides learning opportunities for educators who hold or aspire to leadership responsibilities in educational settings. Courses are designed to provide students with technical, interpersonal, and conceptual skills essential to theory and practice.

- Majors
  - Educational Leadership (MA) (p. 423)
  - Educational Leadership (EdS) (p. 422)
  - Educational Leadership (EdD) (p. 418)
  - Higher Education Administration (MA) (p. 425)
Education Programs

- Higher Education Administration (EdD) (p. 425)
- Higher Education Administration (PhD) (p. 425)
- Instructional Leadership (EdD) (p. 426)
- Instructional Leadership (PhD) (p. 427)
- Instructional Technology (MA) (p. 429)
- College Teaching (Graduate Certificate) (p. 418)
- Instructional Technology (Graduate Certificate) (p. 428)

Educational Leadership

Degrees offered by the Educational Leadership Program include the MA, EdS, EdD, and PhD. In addition, study options are available to provide eligibility for both Class A and Class AA certification. Admission and degree requirements for the Graduate School, the College of Education, and the ELPTS department are detailed in earlier sections of this catalog.

Instructional Leadership

The Instructional Leadership Program is dedicated to the advancement of knowledge, the improvement of professional practice, and service to learning communities. We develop future scholars, researchers, and instructional leaders for schools, colleges, and other learning institutions. Our work is guided by the principles of reflective practice, professional growth, individual responsibility, the pursuit of social justice, an ethic of caring, and a commitment to the communities we serve. The program differs from the one in educational administration in that it focuses primarily on the development of leaders with expertise in fields such as curriculum, instruction, technology, and the social and cultural factors influencing learning. We also focus on training for distributive and shared leadership teams.

Higher Education Administration

The Higher Education Administration Program is exclusively graduate-level. Through its varied course offerings and structured learning experiences, it meaningfully serves a broad clientele, especially current and future administrators of two- and four-year colleges and universities. Course offerings are designed primarily to train, sensitize, and broaden the information base of administrators and personnel already affiliated with institutions of higher learning, and to prepare others for employment with institutions of higher learning in Alabama, the Southeast, and the nation. The program offerings also complement other courses of study undertaken by graduate students pursuing other majors within the area, the College, and the University. The program in higher education administration offers the following degrees: the MA, EdD, and PhD.

Computers and Applied Technology

The Computers and Applied Technology Program provides supporting coursework in computer technology for students throughout the College.

Educational Leadership

AEL521 Leadership for Improvement
Hours 3
Prepares prospective educational administrators for grade P-12 to provide the instructional leadership for continuous improvement of schools. Focuses on knowledge and understanding about learning methods and strategies for program planning, design, implementation and evaluation.
Prerequisite(s): SPE 300 or SPE 500

AEL522 Teaching and Learning
Hours 3
Places emphasis on developing the school leader’s knowledge of teaching and learning and her/his abilities to lead, coach, participate in and enhance teacher dialogue about student learning.
Prerequisite(s): SPE 300 or SPE 500

AEL523 Human Resource Development
Hours 3
Basic concepts of effective supervision, including supervisory roles and functions, communicative interaction and formative and summative strategies for improving instruction.
Prerequisite(s): SPE 300 or SPE 500

AEL524 Ethics and Law
Hours 3
A study of ethics and law as it relates to the educational leader’s role as the first citizen of the school/district community.
Prerequisite(s): SPE 300 or SPE 500

AEL525 Management
Hours 3
A study of theories, principles and practices of managing an educational organization. Emphasis will be on the practical management of the local school.
Prerequisite(s): SPE 300 or SPE 500

AEL526 Data Informed Decision Making
Hours 3
Uses school based data as a vehicle to illustrate the applicability of decision making models in the resolution of school problems.
Prerequisite(s): SPE 300 or SPE 500

AEL527 Internship in Educ Leadership
Hours 1.5
Applies theory, knowledge and skills in meaningful and practical experiences in actual school settings. Students are required to complete two semesters of internship for a total of 3 hours credit.
Prerequisite(s): SPE 300 or SPE 500

AEL528 Edu Fin Theory/Pract
Hours 3
A study of litigation, legislation, and implementation of public-school finance programs in the 50 states. Concentrates on four aspects of equity: resource equity, input equity, output equity, and tax equity.
AEL612 Instruc Supv Mentor Trng
Hours 3
A comprehensive critical examination of advanced philosophy, theory, and research of instructional supervision, including an interdisciplinary focus on forces impinging upon instruction. Implications of these findings for individual and group development and the improvement of instruction and the instructional environment are emphasized.

AEL618 Adv Educational Law
Hours 3
Emphasizes original legal research by the student. After reviewing general principles of educational law, each student selects a topic for intense research. With the instructor's assistance, each student will prepare a publishable article on some area of educational law. Proper use of legal notations, forms, and research methods is stressed.

AEL619 Politics Of Education
Hours 3
Study of politics as it relates to educational decision making, with emphasis on political theory, history of politics in education, and the legislative process. Offered once during the academic year.

AEL630 School Partnerships
Hours 3
This advanced course examines basic principles, strategies, and components of school and community partnerships and the obstacles to forging effective and successful partnerships from a solid theoretical foundation in community sociology and its relationship to school reform. In addition, it analyzes how social and cultural differences impact the ways in which business, schools, families/parents, and communities interact, relate, and conflict.

AEL631 Strategic Leadership
Hours 3
Application of Leadership theories to district level leadership practice, with an emphasis on strategies and tactics for planning. Includes field experience.

AEL632 Leading Learning Through the Curriculum
Hours 3
Knowledge, skills and understandings about curriculum discourses and assumptions underlying historical, social and contemporary thought, practice and research applying to curriculum leadership.
Prerequisite(s): AEL 521

AEL633 Leading, Developing, and Mentoring for Adult Learners
Hours 3
Emphasis is on advanced study of leading learning communities, developing adult learners and strategies for teachers to ensure all students learn.
Prerequisite(s): AEL 522 and AEL 631

AEL634 Development and Supervision of Human Resources
Hours 3
Analysis of personnel functions, emphasizing philosophy, theory, skills and research on professional development for adult learners in professional learning communities.
Prerequisite(s): AEL 523

AEL635 Ethical, Legal, and Policy Issues in Schools
Hours 3
Advanced ethics and law for school administrators with emphasis on relationships between these and policy for school leaders.

AEL636 School Finance and Financial Management
Hours 3
An introduction to school and school systems business management and related technologies, fund accounting; GAAP; budgets; asset stewardship and internal control; purchasing and contracts; local school revenues, reporting and relationships to school support organizations and student activities.

AEL637 Leadership and Social Systems
Hours 3
A study of the interplay between leader behavior and schools from social systems theory and practical implications for improving instruction.

AEL638 Solving Problems of Practice
Hours 3
Directed opportunities to use educational leadership knowledge and skills to design field-based projects and evaluate solutions.

AEL645 Int Comm & Collaboration
Hours 3
Study of research, literature, theory and skills involved in interpersonal communications, conflict resolution and collaboration within school settings. Prepares leaders to work in collaborative teams.

AEL649 Advanced Research
Hours 1-6
Directed research activities related to educational leadership topics. Enrollment is subject to program regulations and permission of the student's program committee. Credit is based on the nature and degree of student involvement.

AEL650 Organizational Theory
Hours 3
An exploration of the relationship among concepts, generalizations, and theoretical models found in the behavioral and social sciences. The application of these to administrative practice in educational settings is addressed.

AEL664 Dynamics Of Change
Hours 3
Components of change will be identified and theories of social and personal dynamics will be adapted and applied to planned programs of change in education.

AEL667 Multicult Soc Ed Leadshp
Hours 3
An advanced inquiry into contemporary social and cultural dimensions of education and their relationships to leadership. Includes issues of diversity, gender, ethnicity, pluralism, and equality.

AEL669 Curriculum Study Schoolg
Hours 3
An inquiry into the curriculum of schooling. Critical analysis of the relationship of curricular decision making to social and political systems and other school context variables is emphasized. Application is made to contemporary issues and problems in school leadership and restructuring.
A critical examination, interpretation, and evaluation of significant current and classical writings in the field of instructional supervision with particular emphasis on research findings, the emergence of instructional trends and issues across the literature, and applications for effective leadership of instructional supervision.

Hours 3
AEL 675 is a course in organizational theory that continues the work begun in AEL 650. The course presents current theoretical perspectives and develops skills in reading research literature and framing dissertation problems.

AEL681 Ethics and Education
Hours 3
An exploration and examination of traditional and contemporary ethical issues confronting educational leaders, managers, and teachers at all levels of the educational process. Emphasis on an interdisciplinary approach to foundations in ethical theory and establishing a conceptual framework for the resolution of moral and ethical questions prevalent across the educational spectrum.

AEL682 Lead & Org/Theory & Appl
Hours 3
An examination of historical and contemporary theories, models, concepts, and practices for effective and efficient approaches to leadership within organizations and how these apply to educational settings.

AHE500 Perspect High Educ Admin
Hours 3
How higher education has been shaped by the major trends in American society, how it has contributed to the development of this country, and what may be expected of higher education in the future. Higher education is also viewed in institutional and conceptual forms from the perspective of students, faculty, and administrators.

AHE507 Student Development Theory I
Hours 3
Introduction to the theoretical basis for the delivery of services through organizational student development, and a study of the research basis for student development.

AHE510 The Community College
Hours 3
An overview of the development, format, issues, and purposes of the contemporary community and junior college.

AHE520 Student In Higher Educ.
Hours 3
A survey of the needs, characteristics, and cultures of the American college student within various types of higher education institutions.

AHE521 Student Affairs
Hours 3
An overview of the organization, personnel, and practices of student affairs and related higher education functions in U.S. colleges and universities. The course is designed to increase student understanding of how student services, student activities, and student development tasks are organized, administered, and assessed. Students will explore the main issues, roles, constituencies and expectations affecting individual professionals as well as the profession as a whole.

AHE530 Law & Higher Education
Hours 3
Investigates and explicates the structure and background of law and equity in higher education, with emphasis on how statutory law, administrative law, and case law respond to and affect faculty, students, administrators, and trustees. Constitutional law, contracts, torts, the law of private associations, civil rights statutes, executive orders, injunctions, specific performance, corporate and partnership law, law of agency, and laws on liability are studied as they apply to higher education.

AHE540 Org and Governance
Hours 3
Overview of the organization, administrative roles and positions, administrative process, and administrator relationships within various institutions of higher learning.

AHE548 Leadership in Higher Education
Hours 3
Overview of theory, practice and issues related to leadership in American Higher Education.

AHE550 Financing Higher Educ.
Hours 3
An overview of the budgeting processes, sources of revenue, types of expenditures, and issues and innovations in financing various types of contemporary institutions of higher education. Also a survey of the various business and planning operations vital to the operation of colleges and universities.

AHE560 Comparatv Higher Educ.
Hours 3
This course is designed to provide a cross-cultural perspective on issues related to higher education throughout the world. The course will focus on topics such as reform, students and student activism, internal and external governance of universities, unions, and the academic profession in key world regions.
AHE561 Case Studies in Higher Ed.  
Hours 3  
This course is designed to enhance an understanding of decision making in higher education. Based on case studies, students will analyze, propose policies, generate action plans and implementation procedures, and assess the potential consequences of their administrative decisions.

AHE590 Ind Study In Higher Ed  
Hours 3-6  
Directed independent study in the literature of higher education, designed for the student seeking a minor or pursuing master's work in the program in higher education (AHE).

AHE591 Seminar Higher Education  
Hours 3  
A topical seminar on a current issue or problem in higher or postsecondary education. On occasion, the seminar involves travel or on-site visitations to institutions or oversight bodies.

AHE592 Internship in Higher Education  
Hours 3  
The application of theory, knowledge, and skills in authentic educational settings. Students are required to complete one semester of internship for a total of three hours credit.

AHE593 Student Affairs Capstone Seminar  
Hours 3  
The Student Affairs Capstone Seminar will be the final course for students in the Higher Education Master's Program. The course focuses on leadership and organizational change in student affairs in postsecondary education.  
Prerequisite(s): Instructor permission

AHE599 Thesis Research  
Hours 1-6  
Directed thesis research.

AHE601 Professional Sem High Ed  
Hours 3  
This course is designed for students newly admitted to the doctoral program in higher education administration. As such, the seminar concentrates on issues and concerns that arise as part of the doctoral experience. Course activities and experiences may vary according to the professional experience and academic background of course participants.

AHE602 Problems In Higher Education  
Hours 3  
Seminar studying the current issues and trends related to higher education.

AHE603 College & University Teaching  
Hours 3  
An intensive graduate seminar that provides an overview of the issues, principles, and practices associated with effective college teaching. Topics include learning and diversity; teaching models and strategies; teacher and student behaviors and learning outcomes; and instructional improvement strategies.

AHE607 Student Development Theory II  
Hours 3  
This course provides a comprehensive study of student growth and development during the college years. The course is designed to address professionals in student affairs and higher education administration.  
Prerequisite(s): AHE 507 Student Development Theory I

AHE610 Academic Culture & Learn  
Hours 3  
An intensive examination of the student, faculty, and administrative cultures in higher education environments. The impact of various internal and external factors on institutional culture and behavior will also be studied, particularly as they relate to teaching, learning, research, and service.

AHE621 Power Politics Change  
Hours 3  
No description available

AHE625 Community College Leadership  
Hours 3  
This course provides an overview of issues pertaining to leadership in American community colleges.

AHE640 Organizational Change  
Hours 3  
Colleges and universities face tremendous challenges; the need for change, and for change agents, has never been greater. This course examines organizational change both theoretically and practically in higher education.

AHE642 Sem Inst Resrch & Assesm  
Hours 3  
An overview of the institutional research and analysis techniques utilized in contemporary higher education. The course is configured for those with an interest in conducting institutional research and/or working in offices of institutional research on the campus, system, and/or state level.

AHE644 Sem Acad Progm Dev Eval  
Hours 3  
Design and management of academic programs; study of institutional structures for academic affairs; practice in program review for instructional improvement; and overview of graduate programs (general and liberal education, as well as occupational and professional education).

AHE645 Higher Education and Student Affairs Assessment  
Hours 3  
This course will explore assessment in higher education and student affairs, including the history and significance of assessment, perspectives from associations, fundamental perspectives, ethics, practical considerations, and future directions. We will also study specific processes for creating assessment initiatives, including developing outcomes, instrumentation, data collection, sampling, data analysis, dissemination, and utilizing results.  
Prerequisite(s): AHE 645 has no prerequisites.
AHE670 Higher Education Policy
Hours 3
This course will introduce students to the essential elements of higher education policy and finance. Students will examine the main financing options of colleges and universities; college costs and pricing; financial aid policy, and emerging policy issues.

AHE680 Readings in HE
Hours 3
The purpose of this course is to provide students with skills that enable them to understand and synthesize current research in higher education.

AHE688 Mentored Teaching
Hours 3
This course provides students with a mentored experiential learning opportunity to develop competency and mastery in course construction and delivery in the higher education environment.

AHE689 Mentored Research
Hours 3
This course provides students with mentored experiential learning opportunity to develop competency and mastery in research and analytical skills. To be taken at or near end of students research requirements.

AHE690 Direct Doctoral Study
Hours 1-6
Directed individual study and analysis of a problem confronting higher education. Note: Frequently, special one-time-only seminars focusing on a particular aspect of higher education are offered by program faculty under this course number.

AHE699 Dissertation Research
Hours 1-15
Directed dissertation research in the field of higher education. Enrollment is subject to program regulations and permission of the student’s dissertation committee chairperson. Also offered in summer school.

Instructional Leadership

AIL600 Interg Tech Educ & Train
Hours 3
An examination of advanced applications of current and emerging instructional technological applications in a variety of settings and in the context of various fields of study and job environments. Technologies and applications addressed in current course include computers, the Internet, presentation media, and multimedia. Cognitive, product, and skill competencies are included. Cognitive competencies are integrated into product and skills evaluations. Products are required to reflect some competencies, while skills competencies are either observed directly or inferred from the products.

AIL601 Prin Instruct Technology
Hours 3
Advanced theory and applications of educational technology. Including the effects of technology on thinking and learning, and the effects of technology in problem solving and other higher-level thinking skills, the course examines current research on computerized learning (CAI, simulation, and tutorials) and other relevant topics such as virtual reality, games and gaming theory, hypertext (design and comprehension), presentation software, groupware for cooperative learning, and telecommunications (distant and/or distributed learning).

AIL602 Electron Instruct Design
Hours 3
Designed to develop basic knowledge and skills for electronic instructional design - analysis, design, production, evaluation, and revision - for specific electronic projects.

AIL603 Telecomm & Networks
Hours 3
Designed to explore design, layout, and installation of local and wide area networks. Addresses topologies, ethernet standards, physical layer, network operating software, data-link layer, file server, network cards, hubs, peripherals, routers, and other network operations.

AIL604 Distance Technologies
Hours 3
Prepares students with knowledge and skills in methods of distance education, which incorporates telecommunications and computer technology to instruct students at remote locations or to serve as an adjunct to classroom instruction. The technology used includes telephony, cable television, satellite communications, videocassettes, videoconferencing, computer-mediated instruction, and/or online computer communication via the Internet.

AIL605 Interact Multimedia Proc
Hours 3
Prepares students with knowledge and skills in modeling, simulation, testing, or analysis or training in real-world contexts using interactive multimedia processes.

AIL606 Software Technology
Hours 3
Intended for students who have had some prior programming experience; otherwise, students will need to develop competencies prior to taking this course. Issues include matching the capabilities of the medium to the intellectual structure of the subject, who directs the interaction between human and computer; the size of the intellectual field; and pedagogical concerns in choosing the operations of a software environment. Students are expected to design and complete a project at the end of the course.

AIL607 Readings in Instructional Technology
Hours 3
This course is designed to aid students in understanding and synthesizing research and developing theoretical approaches to the study of instructional technology.

AIL630 Technology Management
Hours 3
This course introduces learners to theories and models for managing technology as an instrument of change and performance improvement in schools and organizations.

AIL631 Administrative Technology
Hours 3
This course introduces learners to the primary administrative technologies available for administrators and the critical technology issues educational and organizational leaders face.

AIL689 Practicum in Instructional Technology
Hours 3-6
Students pursue research in the Instructional Technology program. They are required to develop, implement, and analyze research; and report findings in APA format.
AIL690 Sem Instructional Technology
Hours 3
No description available.

AIL691 Doctoral Seminar: Instructional Technology
Hours 1
This doctoral seminar presents opportunities to study or work independently on topics or projects of collective concern in the IT doctoral program.

AIL699 Dissertation Research
Hours 1-12
Twelve semester hours (EdD) or 24 semester hours (PhD) required. Directed dissertation research in the area of instructional leadership. Students must maintain continuous enrollment for a minimum of 3 semester hours per semester each fall and spring semester until the dissertation is completed. Enrollment is subject to program regulations and permission of the student's dissertation committee.

Educational Foundations

BEF503 History Of Amer Educn
Hours 3
An interpretive history of the educational and social movements and conflicts leading to understanding contemporary issues of educational aims, curriculum, teaching methodology, administrative policy, and the professionalization of teaching. Offered in alternate semesters and in summer school.

BEF504 Philosophy Of Educ
Hours 3
An examination into the meaning and purpose of education in light of major philosophical problems of knowledge, value, and reality. Offered in alternate semesters and in summer school.

BEF507 Sociology Of Education
Hours 3
A sociological emphasis on cultural factors (such as ethnic background; socioeconomic status; family, peers, and community; and sex-role stereotyping) that influence education in a pluralistic society.

BEF510 Phil Hist Socl Founds Ed
Hours 3
Drawing on interdisciplinary study in philosophy, history, and sociology, this course examines the purposes and development of schools in relation to the social, cultural, political, and intellectual makeup of society.

BEF512 Church State & School
Hours 3
A critical interpretation of the First Amendment and the separation of church and state in American education.

BEF534 Multicultural Education
Hours 3
Studies in selected aspects of the social, cultural, and political foundations of society, with a critical evaluation of their relevance for understanding diversity in educational institutions and in creating pedagogies that meet the diverse needs of students.

BEF538 Values and Ethics in Interprofessional Education
Hours 3
Online course. An examination of how psychological, sociological, and philosophical research on the nature of ethical judgment, social norms, and moral knowledge informs interprofessional practice. Online course.

BEF553 History of US Higher Education
Hours 3
No description available.

BEF575 Found Educn Through Film
Hours 3
One of the most powerful media for awakening and reflecting on ideas is film. This course uses various films with educational themes to examine social and philosophical issues in education.

BEF577 Readings in Critical Sociology of Education
Hours 3
Readings in Critical Sociology of Education will provide graduate students with post introduction type of readings into significant theories and theorists of the sociology of education from a critical perspective. This perspective will give students a conceptual tool to interpret important theoretical frameworks necessary for research into educational issues. Prerequisite - Admission into Graduate School.

BEF585 Language Politics & Education
Hours 3
This course provides students a broad overview of language policy and planning. Drawing on international case studies, students will identify different foci of language planning, including status, corpus, and acquisition planning, as well as the different linguistic and political views that inform policy.

BEF607 Readings In Soc Of Ed
Hours 3
Individualized readings in the sociology of education, with a focus on the educator as reflective practitioner and facilitator of learning.

BEF639 Educ Theory And Policy
Hours 3
A critique of educational theory (learning, curricular, instructional, administrative) and its implications for policy making.

BEF640 Studies History Of Education
Hours 3
A critical examination of significant events, movements, or individuals in the history of education.

BEF641 Studies Social Foundatn Eductn
Hours 3
A special topics course providing an in-depth analysis of important individuals, theories, and contemporary issues in the social foundations of education.

BEF642 Studies Philosophy Education
Hours 3
This course provides in-depth analyses of important individuals, ideas, or concepts that have helped to develop, expand, or shed light on our philosophical understandings of the myriad and contested purposes, policies, and practices of schooling.
BEF644 Phil Science Rel Ed Res
Hours 3
An inquiry into the basic assumptions and principles underlying scientific research in education. Offered spring semester.

BEF650 Critical Race Theory In Educ
Hours 3
This seminar explores the history, theory, and educational implications of critical race theory in the areas of pedagogy, curriculum, and educational policy.

BEF653 Studies in Higher Ed History
Hours 3
A critical examination of significant events, movements, or individuals in the history of higher education.

BEF654 Phil & Amer Higher Ed
Hours 3
An analysis of the language, concepts, and value judgments embedded in higher-education policy issues.

BEF667 Multicult Soc Ed Leadership
Hours 3
An advanced inquiry into contemporary social and cultural dimensions of education and their relationships to leadership. Includes issues of diversity, gender, ethnicity, pluralism, and equality.

BEF681 Ethics And Education
Hours 3
An exploration and examination of traditional and contemporary ethical issues confronting educational leaders, managers, and teachers at all levels of the educational process. Emphasis on an interdisciplinary approach to foundations in ethical theory and establishing a conceptual framework for the resolution of moral and ethical questions prevalent across the educational spectrum.

BEF698 Non-Dissertation Research
Hours 1
Individual research in history, philosophy, or sociology of education.

Computers and Applied Technology

CAT531 Computer Based Instruction
Hours 3
This is an introductory course in the fundamentals of computer applications for educational use. The course explores current and emerging tools and trends for online learning strategies, communication, productivity, presentation, research, and classroom administration.

CAT532 Curric Emerg Instruct Technol
Hours 3
The course focuses on the educational applications of emerging chronologies, including Internet, fax, bulletin boards, voice mail, and networks. Students will use electronic mail and transfer files through Internet. Production skills are required in desktop publishing and use of graphics, including draw and paint programs and animation. A significant part of the course concerns production in hypermedia software. Also, students will engage in the uses of telecommunications other than computer, such as one-way interactive satellite class, two-way video phone course sequence transmission, and two-way IITS instructional event.

CAT589 Pract Res Educ Comptr Tech
Hours 3
Students pursue individual research in educational computer technology; they are required to implement, analyze, and report findings in APA format.

Instructional Technology

INTE532 Instructional Technology Design
Hours 3
This course provides an introduction to the elements of instructional design and their application to the design of technology-mediated instruction, with a primary focus on blended and online learning.

INTE533 Online Teaching and Learning
Hours 3
This course provides students with knowledge and skills in the methods of online teaching and learning, including the creation of effective online learning environments.

INTE534 Issues and Trends in Instructional Technology
Hours 3
Study of current issues and trends affecting the use of technology in training, instruction, and implementation. Includes an examination of emerging technologies: legal, social, cultural, cyber ethics and security, and ethical issues affecting technology: technology funding, technology planning and professional development.

INTE535 Analysis, Implementation, and Evaluation of Assistive Technology
Hours 3
Study of hardware and software applications designed to meet the needs of those with developmentally and physical abilities. Topics include: adaptive/assistive technologies and services to improve learning environments; accessibility standards for traditional classrooms and online learning environments; selecting and using adaptive and/or assistive hardware and software applications; evaluation and selection of adaptive and assistive technology.

INTE536 Assessment and Evaluation of Instructional Technology
Hours 3
Procedures for evaluating educational programs, training systems, emerging learning technologies, and new technology applications. Topics include the evaluations of instructional or performance improvement programs; models for formative and summative evaluations.

INTE537 Game-Based Learning
Hours 3
Study of current issues and trends related to the use of games (both analog and digital) for pedagogical purposes. Includes an examination of theoretical and empirical support for game-based learning; educational game design theory; game development; game-based learning pedagogical models; integration of games in the formal classroom.

INTE538 mLearning
Hours 3
This course provides introduction to mobile learning (mLearning) in higher education, K-12 and business environments. During the course, students will design and evaluate a mobile app for use in higher education, K-12 or business learning environments.
INTE539 Special Topics in Instructional Technology  
Hours 3  
The course will include an in-depth study of a particular topic, contemporary issue or concern. Investigation of unique problems and new developments in instructional technology will occur. Specific topics will be announced in the Schedule of Classes each time the course is offered or students will select individual topics to study in-depth.

INTE540 Planning and Managing Technology Projects  
Hours 3  
This course introduces learners to theories, models, tools and processes for planning and managing technology projects as mechanisms of change and performance improvement in schools and organizations.

INTE541 IT Leadership and Administrative Technologies  
Hours 3  
This course introduces learners to administrative technologies and critical technology issues facing educational and organizational leaders. Technologies covered in the course include data management systems and course management systems. Issues include policies for safe and legal use of technology resources; diversity and social justice; ethical use of technology; and professional development.

INTE589 Instructional Technology Research and Product Development  
Hours 3  
This culminating course is intended to give students an experience of the "what" and "how" in instructional technology research (action research) and/or product development through collaboration with businesses, schools and/or community entities.  
Prerequisite(s): CAT 531, INTE 532, INTE 533

College Teaching, Graduate Certificate  
The Graduate Certificate in College Teaching is a 12-credit (4-course) sequence designed to help graduate students in a variety of professional settings and disciplines who seek to enhance their understanding of teaching and learning issues for adult learners, particularly at institutions of higher education. Students who participate in the certificate program will have exposure to theory, research, and practice related to the professoriate and to teaching and learning in higher education. The intent of the Graduate Certificate in College Teaching is to assist professionals in responding to the increasingly complex and diversifying social and cultural contexts for adult learners. Students who complete the Certificate will have it listed on their transcripts. The Graduate Certificate in College Teaching involves coursework in The United States Professoriate and in College and University Teaching. Moreover, students take an elective related to a specific area of interest. Finally, students participate in a mentored teaching experience. The coursework includes:

Educational Leadership, Ed.D.  
As a professional degree the EdD in educational leadership is designed to meet the needs of individuals seeking to improve their knowledge
and skills to become highly competent educational leader-practitioners at the state, district, school, or classroom level. The EdD is designed to promote a standard of excellence intended to meet the growing demands faced by educational leaders in a context defined by instructional leadership, public accountability for teaching-learning results, increased globalization, diversity, and the emergence of new digital technologies as a part of life. The EdD programs are guided by a model of professional inquiry and reflection that emphasizes the development and improvement of systematic decision skills to address the problems, challenges, and opportunities of practice. Students examine the core content domains of strategic and instructional leadership, organizational theory, data-driven decision-making, law, supervision and evaluation, design, implementation, assessment and evaluation of curricular programs, professional development, school economics and budget planning, and other content specialization areas. Knowledge from these domains is designed to facilitate the process of framing and addressing in critical ways the problems of practice. Although the primary goal of individuals seeking either of these EdD degrees is exemplary practice, the quality and rigor of the EdD experiences at The University of Alabama are such that pursuing a career as a university professor may be accomplished with these degrees.

Admission and Application Process Description

Doctoral students are admitted twice annually. Students are encouraged to submit their applications for admission before the deadlines listed below and they should allow several weeks for the Graduate School to process their applications:

1. Fall Deadline: October 31
2. Spring Deadline: April 1

For additional information, please contact Vanessa Williams, Senior Office Associate of ELPTS: willi077@ua.edu (willi077@bamaed.ua.edu)

Application and Entrance Requirements

Potential applicants should be aware that admission to the UA doctoral programs is a competitive process and that submitting an application does not guarantee admission. Minimum entrance requirements include the following:

1. Masters Degree – An earned Masters degree from an accredited institution
2. Minimum GPA – A minimal graduate grade point average of 3.0 on a 4.0 scale
3. GRE/MAT Exam – While the Graduate Record Exam (GRE) is preferred, potential applicants are required to report scores from the GRE or Miller’s Analogy Test (MAT). Test scores at or above the 50th percentile on the Verbal and Quantitative Reasoning subscales of the GRE are needed. A score at or above the 50th percentile on the MAT is needed. Please note that scores submitted for consideration for admission must be less than 5 years old from the applicant’s admission deadline.
4. Other Requirements – Other application requirements include.
   a. Reference Letters – The application must include letters of professional and academic reference letters, including one from a current supervisor, as described in and as part of the Graduate School Application Process;
   b. Purpose, Rationale and Career Statement – A purpose statement which addresses the following: (1) the student’s rationale for applying for the Ed.D.; (2) a statement regarding career/professional goals; and (3) a statement of how the student’s rationale and career goals are consistent with the purpose of the Ed.D. degree as articulated by the Department and Program.
   c. Writing Sample – An academic or professional writing sample written by the applicant within the last year that provides evidence of the student’s writing ability.
   d. Professional Experience – It should be noted that for the Ed.D. degree, experience in teaching and/or leadership are key factors considered in the admission process.

Application Process and Procedures

The process consists of the following:

1. Step 1: Graduate School Application – Applicants must first submit an application to the University of Alabama’s Graduate School. For a complete listing of graduate application forms please visit the Graduate School at: http://graduate.ua.edu/application/
2. Step 2: Department of ELPTS Application – After completing the application to the Graduate School, students must then complete the ELPTS Department’s Application for Admission to either of the Ed.D. programs. Please note, the application is not considered complete until students have submitted: (1) the Graduate School Application; and (2) The Departmental Application. The following items should be sent to Vanessa Williams willi077@bamaed.ua.edu at the following mailing address: Program in Educational Leadership, Department of Educational Leadership, Policy, and Technology Studies, University of Alabama, Box 870302, Tuscaloosa, AL 35487-0302.
   a. Completed Departmental Application – This is to be downloaded, completed and returned to Vanessa Williams. The application is located under quick links.
   b. Three Letters of Recommendation – As described in the Graduate School Application above, the three required letters of recommendation, with one letter from a current direct supervisor, are to be sent directly to Vanessa Williams willi077@bamaed.ua.edu.
   c. Vita – Applicants are required to include a vitae or resume.
   d. Writing Sample – Applicants are required to include a recent sample (within the last year) of their academic/professional writing.

Program Prerequisites

Applicants must provide evidence of the following:

1. Masters degree – Prior to acceptance applicants must provide evidence in the admission process and before the final admission decision that they have earned a Masters degree in education or a closely related and relevant field from an accredited institution.
2. Course Prerequisites – Prior to admission, applicants must provide evidence that they have completed courses in the following areas with the following parameters:
   a. Special Education Course – Applicants must have taken a special education course with a grade of ‘B’ or better.
   b. Graduate Level Statistics Research Course – In addition, if applicants have not taken BER 540 Statistical Methods In Educ or an acceptable/pre-approved masters-level equivalent within the last four years with a grade of ‘B’ or better, then if accepted into the doctoral program, students must complete this course before beginning the 12 hour research requirement.

Program and Course Requirements for Degree

A minimum of 72 semester credit hours beyond the Masters degree is required for completion of the Ed.D. program. These 72 hours must
consist of the following courses: Educational Leadership Courses (AEL) = 36 hours; Educational Foundations Courses (BEF) = 12 hours; Educational Research (BER) = 12 hours; Dissertation Hours = 12 hours. It should be noted that depending on coursework prior to admission to the Ed.D. program, that prerequisites for more advanced study in educational leadership may be required.

Educational Leadership (AEL) Course Requirements: 36 hours: Ed.D. students must successfully complete a total of 36 semester hours to qualify for the degree. These requirements must be distributed as follows:

Core Educational Leadership (AEL) Requirements: 15 hours – All doctoral students in Educational Leadership are required to take the core AEL course requirements at the University of Alabama. The AEL core consists of following 600-level courses:

<table>
<thead>
<tr>
<th>Course Requirement</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>AEL 650 Organizational Theory</td>
<td>18</td>
</tr>
<tr>
<td>AEL 671 Survey Instructnl Superv</td>
<td></td>
</tr>
<tr>
<td>AEL 682 Lead &amp; Org/Theory &amp; Appl</td>
<td></td>
</tr>
<tr>
<td>AEL 619 Politics Of Education</td>
<td></td>
</tr>
</tbody>
</table>

Total Hours: 39

1 Beyond the AEL 15 hour core requirements, Ed.D. students are required to take 21 hours of AEL electives. All electives must be at the 600 or doctoral level. In conjunction with his/her/their advisor, the student is to select courses listed in the Graduate Catalog (p. 410).

Transfer Parameters on AEL courses – Please note that as of April 2017, the following policies guide the transference of courses into the Ed.D. program:

- Applicants with an Ed.S. in leadership from The University of Alabama – For students with an Ed.S. from The University of Alabama and at the discretion of a student’s program of study committee, up to 15 hours (6 AEL courses) of the AEL Ed.S. may be counted toward the Ed.D. degree if the following parameters are met: (1) the course was completed no more than 5 years from the date of the student’s admittance; (2) a grade ‘B’ or better (note, not a ‘B-’) was earned in the course, and (3) the course is not an independent study nor a “practicum” type course.
- Applicants with an Ed.S. in leadership not from University of Alabama – (Effective April 1, 2017) For students who have completed an Ed.S. at institutions other than the University of Alabama and at the discretion of a student’s Program of Study committee, up to 12 hours of their Ed.S. program may be counted to the Ed.D. degree if the following parameters are met: (1) the institution from which the student took these courses is accredited; (2) the course(s) addresses a major curricular component of the Ed.D. program at the University of Alabama as captured in the Program’s current array of doctoral AEL courses; (3) the course(s) was completed no more than 5 years from the date of the student’s admittance; (4) a grade ‘B’ or better (note, not a ‘B-’) was earned in the course(s), and (5) the course is not an independent study nor a practicum course.
- Applicants with an Ed.S. in a specific curricular area of education, or in Teacher Leadership rather than in educational leadership. Under review – TBD.

Foundations Course Requirements: 12 hours

Students are required to take a minimum of 12 semester hours of graduate coursework from content areas outside of the Educational Leadership Program. For these 12 hours students are expected to select courses from areas that will inform their research and professional interests and that, when considered as a whole, cohere thematically. This rationale for course selection in fulfilling this requirement contrasts with electing to take a course simply because it was convenient to one’s schedule. Research courses cannot be used to meet this requirement. All choices must be approved by the student’s Advisor and Program of Study Committee. The following should guide students’ choices:

1. Selection Parameters – Foundations course hours must be met with courses outside of the student’s program area. For example, while these courses can be within the Department they must be outside of the Educational Leadership Program or within the larger College, e.g., Educational Psychology, Curriculum and Instruction, etc. or outside of the College of Education, e.g., Political Science, Business, Sociology, Anthropology, Law, etc. All courses must be approved by the student’s Advisor and by his/her/their Program of Study Committee. Note: Courses from a student’s master’s degree can be used to fulfill this requirement. However, it should be noted that while master’s level courses fulfill the 12-hour Foundations Requirement, they may not count toward the 72 hours beyond the masters needed to fulfill the requirements for the Ed.D. Hence, students using any courses from the master’s degree to fulfill the 12-hour foundation requirement will need to take additional 600-level courses to meet the 72-hour requirement.

2. Recommended Courses – Given the importance of ethics and cultural diversity to leadership, the following courses are recommended, but not required.

3. AEL 681 Ethics and Education / BEF 681 Ethics And Education

Note: Students who sign up for the 681 or 667 as AEL courses to fulfill this Foundations Requirement may not count these as part of the 24 hour AEL elective requirement. Instead they should enroll in these courses as BEF courses.

Research Requirements: 12 hours: Students are required to take a minimum 12 hours of course work in quantitative and qualitative research methods.

1. Prerequisite Statistics Requirement: BER 540 Statistical Methods
   - In Educ – if students have not taken BER 540 Statistical Methods in Educ or an acceptable/pre-approved masters-level equivalent within the last four years with a grade of ‘B’ or better, then students must complete this course before beginning the 12-hour research requirement. This prerequisite cannot be used to fulfill the 12-hour Research Requirement.

2. Research Course Requirements – Students are encouraged to choose research courses that focus on the specific methods they will use in their dissertation study. All students are required to take at least one 600-level methods course in qualitative methods. Likewise, all students are required to take at least one 600-level methods course in quantitative methods. Recommend Courses include:
   - BER 630 Case Study Research Methods
   - BER 631 Inqry As Interp: Qual I
   - BER 632 Reflect Resist: Qual II BER 633 Ethics & Aesthc:Qual III
   - BER 640 Quantitative II
• BER 641 Multivariate Statistics
• BER 646 Structural Equation Modl
• BER 660 Eval I: Theory & Practice
• BER 661 Evaluation 2

3. Transfer Parameters for Research Courses (Effective April 1, 2012) – Given the importance of research methods to doctoral study and the propensity of human knowledge to recede if not used on a consistent basis, faculty and students are strongly encouraged to minimize the number of research courses transferred into the doctoral program. Graduate level statistics courses taught by research faculty at other universities may be accepted for transfer only if the following conditions are met: (a) the institution from which the student took these courses is accredited; (b) the course taken was a doctoral level course; (c) the course was completed no more than 4 years from the date of the student’s admittance to the UA doctoral program, and (d) the student received a grade of ‘B’ or better (note, not a ‘B-’) in the course.

Dissertation Research Requirements: 12 hours: Ed.D. students are required to complete a minimum of 12 hours of AEL 699 Dissertation Research. Policies regarding registration for this course are as follows:

1. Passing of Comprehensive Exam required – Students cannot register for AEL 699 Dissertation Research until after they have passed the Doctoral Comprehensive Exam.

2. Continuous enrollment required – Continuous enrollment in AEL 699 Dissertation Research is required until the dissertation is completed. It should be noted that unless they are drawing on the resources of the University and making use of their dissertation advisor, students do not need to register for dissertation hours in the Summer. However, students working with and being advised by their chair during the Summer must register for dissertation hours in the Summer.

3. Minimum number of hours allowed for registration: 3 semester hours – While the number of hours per semester will vary depending on the advice to the student given by his/her committee chair in conjunction with the work load of the student, students must register for a minimum of 3 hours per semester. It should further be noted that if students complete their dissertation work prior to having registered for 12 hours of AEL 699 Dissertation Research, that the Registrar’s Office will require the student to enroll in and pay for the full 12 hour requirement prior to graduation.

III. Doctoral Comprehensive Qualifying Exam

A comprehensive exam designed to assess the breadth and depth of a student’s knowledge and skills is administered twice each academic year. It should be noted that the Doctoral Comprehensive Qualifying Exam is not offered in the Summer. Policies governing this exam are as follows:

1. Purpose of Comp Exam: The comprehensive exam is designed to assess the breadth and depth of a student’s knowledge and skills based on the entire range of his/her doctoral course work and consistent with the purpose of the Ed.D. degree.

2. Exam Date and Time: Unless specified otherwise, this multi-hour, single day exam is given on both the Tuscaloosa campus and at the Graduate Center in Gadsden, and is typically offered on Saturdays during the 9th-12th week of these semesters (9:00-12:00, 1:00-4:00). Students are required to take and successfully pass this exam before they can formally begin the dissertation process and register for dissertation research hours (AEL 699 Dissertation Research). If students fail their Comprehensive Exams, they may retake them during the regular exam time during the following semester.

3. Logistics of Exam: The Student’s Advisor selects questions that reflect the individual needs of the doctoral student. The Advisor disseminates the questions to the examination proctor, coordinates the evaluation, and reports the results. Students may choose to either type or handwriting their examination. No lap top computers, books, notes or other outside materials will be allowed in the Examination Room during the exam. A room with sufficient computers will be provided. It is appropriate for students to seek information from professors on the general domains to be examined in a given course; students will not, however, be given information regarding specific questions that may appear on their exams.

4. Requirements for Taking Exam: Before sitting for the Comprehensive exam, the following parameters must be met by the student:
   a. Approved Program of Study – Students cannot sit for the Comprehensive exam unless their Program of Study has been both completed and officially approved.
   b. Completed all AEL course requirements – Students cannot sit for the Comprehensive Exam unless they have completed all AEL course requirements (AEL core + electives) or are in the last semester of doing so.
   c. Removal of all Incompletes from Academic Record – Students cannot sit for the Comprehensive Exam unless they have removed all Incompletes (‘I’) from their academic record.
   d. Completion of Comprehensive Exam Application Form – Students cannot sit for the Comprehensive Exam unless they have completed and submitted the Request To Take Comprehensive Exam Form via e-mail or fax (205.348.2161) to Vanessa Williams at willi077@bamaed.ua.edu

IV. Doctoral Residency Requirement

A. Policies Guiding Residency Requirement Fulfillment: The Ph.D. residency requirement can be satisfied ONLY by enrolling in 9 semester hours of coursework in two consecutive semesters. Dissertation research cannot be used to fulfill the nine hours. Courses delivered via IITS, GOALS, or QUEST formats may not be used to satisfy residency requirements.

B. Options for Ed.D. Students Completing Residency Requirements: The following options have been approved for Ed.D. students by the College of Education for completing residency requirements.

1. Normal Doctoral Residency – The student spends an academic year in continuous residence on the campus of The University of Alabama as a full-time student in the Graduate School (or, if specifically approved by the faculty concerned, one full summer consisting of two terms, preceded by or followed by one regular semester). Two contiguous semesters registered on-campus for a minimum of nine hours each term. This requirement may be satisfied only with courses taught in Tuscaloosa, and may not include dissertation research.

2. Alternate Doctoral Residency – As an alternative option, Ed.D. students beginning in the summer may take a total of 24 hours of coursework in the first four semesters of their program study:
   a. First Summer: 9 hours
   b. Fall Semester: 3 hours
   c. Spring Semester: 3 hours
   d. Second Summer: 9 hours

3. UA-Gadsden Doctoral Students – For those students enrolled in a doctoral program at Gadsden, 24 hours of continuous enrollment within 24 months. Courses may be taken either at the Gadsden Center or in Tuscaloosa.
4. UA-UNA Florence Doctoral Students – For those students pursuing the Doctor of Education (EDD) in Florence, participation in the cohort experience simultaneously fulfills the residency requirement pending the approval and recommendations of the student’s Advisor and Program of Study Committee.

V. Program of Study Form – Completion

During their initial year of study and no later than the beginning of the second year of study, doctoral students are required to submit an approved Program of Study. Completed under the guidance of the student’s assigned advisor, the Program of Study must be officially approved by this advisor and the student’s program committee. The Program of Study functions to: (1) specify in advance program course requirements; (2) plan, chart and monitor a student’s progress in the program; and (3) define the parameters regarding the course credits taken at other colleges/universities that may be transferred in to meet doctoral program requirements at the University of Alabama. Note, students are advised against making premature judgments about courses to be transferred in from other institutions and programs. In addition to the guidelines specified in the Program of Study (above), such decisions are based on the professional judgments of tenure-track faculty in the Educational Leadership and Instructional Leadership Programs at the University of Alabama-Tuscaloosa campus. Other UA personnel (either at the UA-Gadsden or UNA campuses) are not authorized to advise nor approve a student’s Program of Study. Program of Study Forms for the Ed.D. degree can be found at the following link:

EdD Program of Study – Educational Leadership

VI. Time Limits on Receiving the Ed.D. Degree

A minimum of two academic years of graduate study beyond the Masters degree is required for completion of Ed.D. degree. Students accepted into the Ed.D. program in Educational Leadership or in Instructional Leadership at the University of Alabama have seven years from the semester in which they were admitted to complete the Ed.D. degree. This translates into 21 Fall, Spring and Summer semesters. Students who exceed this limit must request an extension from the Graduate School at the University of Alabama and approval from the student’s advisor, the department chair, and from the Graduate School. The Graduate School Catalogue at the University of Alabama says: Only under well-documented, extraordinary circumstances beyond the student’s control, a student may petition for a one-semester extension to the seven-year time limit that, if recommended by the advisor, the department head and approved by the college dean, and finally by the graduate dean or his/her designee. If a student fails to complete all degree requirements within seven years of his/her admission to the doctoral program or within a Graduate School approved one-semester extension, the student will be officially suspended from the doctoral program and must reapply for admission.’

Educational Leadership, Ed.S.

The EdS degree in educational leadership requires a minimum of 30 hours and provides coursework for those seeking Class AA Instructional Leader certification or Class AA Teacher Leader certification.

Admission and degree requirements for the Graduate School and for the College of Education are detailed in earlier sections of this catalog. Admission and degree requirements are subject to change and may be under revision at the time of publication. Please check with the Office of Student Services and Certification or the Department of Educational Leadership, Policy, and Technology Studies for the most current information.

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to-date information about requirements. A current program checklist may be obtained from the program office. Students should consult their advisors each semester before registering.

Admission Requirements

Admission requirements for the Graduate School (Admission Criteria) and the College of Education (General Admission (p. 387)) are detailed in earlier sections of this catalog.

Class AA Instructional Leader (P-12) certification

Admission Requirements

To be considered, applicants must:

1. present an acceptable GRE or MAT score (at least 300 on the GRE or the 50th percentile or above on the MAT) for regular admission,
2. hold a valid Alabama Class A Professional Educator certificate in Instructional Leadership or a valid Class A Professional Leadership certificate, and
3. meet one of the following criteria:
   • currently serving as a superintendent, assistant or associate superintendent, principal, assistant principal, supervisor (any subject and/or grade level), administrator of career and technical education, coordinator or evaluator;
   • three years of experience in an instructional leadership position; OR
   • demonstrate each of the abilities in the Class A Instructional Leadership standards

Please note: Classes taken for Class A certification and credits over six years old cannot be counted toward this degree. The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education.

In order to maintain compliance with the Alabama Board of Education, admission and program requirements are subject to change. Admission forms and requirements, specific program parameters, departmental policies and contact information can be found at the departmental website. Students should consult with their advisors before registering each semester.

Degree Requirements

This course listing applies to those who begin this program June 1, 2017, and thereafter. A comprehensive exam is required, and candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C.

Additional Requirements:
SPE 500 is required if a special education survey course was not part of the undergraduate program or another graduate program. 0-3

Total Hours 30-33

Certification
To be awarded Alabama Class AA Instructional Leader certification, students must:

• earn a passing score on a comprehensive exam covering the content of the program,
• maintain a GPA of at least 3.5 (effective July 1, 2017) on all courses with no grade below a C, and
• complete the State Department of Education certification application forms

Class AA Teacher Leader (P-12) certification
Admission Requirements
To be considered, applicants must:

1. hold a valid master’s level professional educator certificate in any teaching field or area of instructional support,
2. have a minimum of three full years of full-time teaching experience in a P-12 setting, and
3. submit a portfolio containing three recommendations, evidence of the ability to positively affect student achievement, and evidence of collaborative leadership potential.

Please note: Classes taken for Class A certification and credits over six years old cannot be counted toward this degree. The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education.

In order to maintain compliance with the Alabama Board of Education, admission and program requirements are subject to change. Admission forms and requirements, specific program parameters, departmental policies and contact information can be found at the departmental website. Students should consult with their advisors before registering each semester.

Degree Requirements
This course listing applies to those who begin this program June 1, 2017, and thereafter. A comprehensive exam is required, and candidates must present a GPA of at least 3.50 on all courses in the program, with no grade below a C.

Educational Leadership, MA
Master of Arts in Educational Leadership leading to Class A Instructional Leader Certification (P-12)
(30 semester hours). The primary purpose of the Master of Arts degree in educational leadership is to provide students with the initial certification in Alabama for Instructional Leadership in P-12 schools. The coursework provides students with a thorough knowledge and understanding of the central concepts, tools of inquiry, and structures of the field of instructional leadership for schools. Candidates learn to work with students, families, and communities in ways that reflect the dispositions expected of educational leaders. The program content is consistent with state and national standards.

The Graduate Catalog is published annually. State-approved program checklists may be updated more frequently and are thus likely to provide the most up-to-date information about requirements. A current program checklist may be obtained from the program office. Students should consult their advisors each semester before registering.
MA in Educational Leadership with Class A Instructional Leader certification

Admission Requirements

An entrance exam score (at least 300 on the GRE or the 50th percentile or above on the MAT) is needed for regular admission. In addition to meeting admission requirements of the Graduate School and the College of Education, applicants must meet the following additional requirements for admission to the Educational Leadership/MA program leading to Class A Instructional Leader certification:

- a valid Alabama Class B professional educator certificate in a teaching field or a valid Alabama Class A professional educator certificate in a teaching field or instructional support area,
- a minimum of three full years of full-time, acceptable professional educational experience in a P-12 setting, which must include at least one full year of full-time P-12 classroom teaching experience,
- the submission of a portfolio before the interview,
- an application to the educational leadership department, and
- passing an interview conducted by the program committee.

The application portfolio must include:

1. three letters of recommendation, one of which must be from the applicant’s principal or direct supervisor,
2. a completed copy (all forms) of the most recent performance evaluation including the professional development component, if available,
3. evidence of ability to improve student achievement,
4. evidence of leadership and management potential, including evidence of most recent accomplishments in educational leadership,
5. a summary of the candidate’s reasons for pursuing the certification in instructional leadership, and
6. a summary of what the candidate expects from the certification program.

Individuals must be unconditionally admitted to the Class A Instructional Leader program before enrolling in any leadership courses in the program.

Degree Requirements

This course listing applies to those who begin this program June 1, 2017. A minimum of 30 hrs of appropriate graduate work, successful completion of a comprehensive exam, and passing scores on the appropriate Praxis subject assessment are required. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C.

Total Hours: 30-33

* SDE-approved diversity course

Reduced-Hour Option leading to Class A Instructional Leader (certification only)

Beginning Summer 2015, individuals holding a valid, Alabama Class A professional educator certificate may apply for admission to the reduced-hour option to pursue certification only.

Admission Requirements

Minimum requirements include:

- a valid Alabama Class A professional educator certificate in a teaching field or instructional support area,
- a minimum of three full years of full-time, acceptable professional educational experience in a P-12 setting, which must include at least one full year of full-time P-12 classroom teaching experience,
- a graduate GPA of 3.0 or above on a 4.0 scale,
- submission of a portfolio before participation in the assessment process, which will include an interview, and
- submission of a writing sample in a sit-down format and a review by the program admission committee.

Reduced-hour Option leading to Class A Instructional Leader (certification only)

Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C. Successful completion of a comprehensive exam and passing scores on the appropriate Praxis subject assessment are required.

The program helps students develop the knowledge, skills, and abilities
necessary to advance in leadership positions by combining theoretically-
rich studies with an applied research approach. The Executive EdD is a
cohort program that allows students to build an immediate network of
colleagues. Intensive coursework and a carefully-structured dissertation
process allow students to complete the degree in nine semesters and
maintain professional positions. The Executive EdD program's alternative
format meets all the expectations of a rigorous higher education
program, including the credit hour and degree requirements stipulated by
the College of Education and the Graduate School.

Admission to the Graduate School (Admission Criteria) and the College
of Education (General Admission (p. 387)) do not ensure admission
to the doctoral programs. Admission forms and requirements, specific
program parameters, departmental policies, and contact information for
each doctoral degree can be found at the ELPTS website.

See the Admission Criteria section of this catalog for more information.

**Certification**

To be awarded Alabama Class A Instructional Leader certification, students must:

a. maintain a GPA of at least 3.25 (effective July 1, 2017) on all courses
   with no grade below a C;

b. receive a passing score on a comprehensive assessment
documenting mastery of the curriculum,

c. successfully complete the internship and residency,

d. receive a passing score on the required Praxis subject assessment,

e. complete a survey of special education course (SPE 300 Survey Spe
   Accomd Stratg or SPE 500 Intro Exc Childr/Youth) or its equivalent.

The certification programs of the department have been designed to
fulfill current requirements of the Alabama State Board of Education.
The state requirements change from time to time and, accordingly, the
department's requirements and programs are subject to change.

Field experience objectives, including progression from observation
through participation to leadership behaviors are embedded in each
course and assessed by the faculty member of record for each course.

The program of study leading to Class A Instructional Leader certification
is based on a cohort approach to instruction with cohorts being established annually. For admission forms and requirements, specific
program parameters, departmental policies and contact information,
please review the ELPTS website.

**Higher Education Administration, Ed.D.**

The Higher Education Administration Program offers the EdD program in
Tuscaloosa. The EdD program is also offered in an executive format.

The EdD degree provides academic preparation and professional
development for those individuals who have or will assume upper-level
administrative and executive roles in two- and four-year colleges and
universities, state and federal postsecondary education agencies and
other education-related organizations. The curriculum is designed around
the key competencies necessary to assume a leadership role, with
courses in program assessment and evaluation, policy, organizational
change and student affairs administration. The EdD requires 66 semester
hours beyond the master's degree. These 66 semester hours include at
least 54 hours of coursework and 12 hours of dissertation research. The
plan of study also includes 12 semester hours in theoretical foundations
and a minimum of 12 semester hours in research methods.

The Executive EdD program is designed to meet the unique needs of
experienced professionals seeking a doctorate in higher education.
The program helps students develop the knowledge, skills, and abilities
necessary to advance in leadership positions by combining theoretically-
rich studies with an applied research approach. The Executive EdD is a
cohort program that allows students to build an immediate network of
colleagues. Intensive coursework and a carefully-structured dissertation
process allow students to complete the degree in nine semesters and
maintain professional positions. The Executive EdD program's alternative
format meets all the expectations of a rigorous higher education

**Higher Education Administration, MA**

The Master of Arts degree in higher education is offered in Tuscaloosa
and online. The Master of Arts is a 36-hour degree program designed for
students seeking to enter or advance in a range of professional careers in
postsecondary education. The program follows standards and guidelines
from the Council for the Advancement of Standards in Higher Education,
and it includes courses in foundational studies, professional studies,
supervised practice, research, and electives. The program partners
with staff in Student Life and Academic Affairs to provide professional
development opportunities in and outside of the classroom experience.
An internship is required for most students in the program.

Candidates for the master's degree must earn a minimum of 33 semester
hours of credit and complete a 3-hour culminating "Capstone" experience.
This plan requires a minimum of 18 semester hours in the major subject.
With the approval of the major program, the remainder of the coursework
may be completed in either the major or a related field.

Candidates may be required to participate successfully in seminar or
problem courses that will give them an acquaintance with the methods
of research and an appreciation of the place and function of original
investigation in the field.

**Higher Education Administration, Ph.D.**

The Higher Education Administration Program offers a PhD program in
Tuscaloosa only.

The PhD degree prepares students to assume scholarly roles in higher
education. The PhD program emphasizes working with faculty in a one-
on-one setting with students participating in a mentored teaching and
research sequence, providing first-hand experiences of faculty life.
Students investigate and contribute to a body of knowledge that informs
higher education policy and practice at the institutional, statewide,
national, and international levels.

The PhD requires 78 semester hours beyond the master's degree. These
78 semester hours include at least 54 hours of coursework and 24 hours
of dissertation research. The program of study also includes 12 semester
hours in theoretical foundations and a minimum of 12 semester hours in
research methods.

PhD students also are required to complete mentored teaching and
mentored research courses. In mentored teaching, students are required
to assist a higher education faculty member with course instruction. In
mentored research, students work individually with a higher education
faculty member to complete a research project.

Admission to the Graduate School (Admission Criteria) and the College
of Education (General Admission (p. 387)) do not ensure admission
to the doctoral programs. Admission forms and requirements, specific
program parameters, departmental policies and contact information for each doctoral degree can be found at the ELPTS website.

**Instructional Leadership, Ed.D.**

**Instructional Leadership, EdD—Nurse Educator**

The UA College of Education and the Capstone College of Nursing have combined to offer a Doctor of Education in instructional leadership with a concentration in nurse educator. This low-residency program is designed to prepare future faculty with the teaching and research skills necessary for positions in community colleges, four-year colleges, and universities.

Working within annual cohorts and employing distance-based instruction, coursework requirements and the dissertation study are typically completed in 4 and one-half years.

The curriculum supports the competencies for nurse educators specified by the National League for Nursing (NLN) and the Southern Regional Education Board Council on Collegiate Education in Nursing (SCCEN).

**Admission Requirements:**

In this program, nurses that have an MSN degree enter the program to earn a Doctorate in Education (EdD) for Nurse Educators. To be admitted into the program, students will meet the criteria for admission to The University of Alabama Graduate School and the Colleges of Nursing and Education.

Prerequisites include:

- an undergraduate GPA of 3.0 on a 4.0 scale, a 3.0 average for the last 60 semester hours in a degree program, or a 3.0 or higher in a completed graduate degree program
- an unencumbered RN license in the state in which the student will practice
- BSN degree from an accredited institution
- M.S.N. degree from an accredited institution

The fall admission deadline is April 1st. An admissions committee comprising nursing and education faculty will select students based upon the following requirements. Each step must be completed to be considered for admission.

Step 1) Complete the Graduate School application

Step 2) Submit department materials

- Resume
- Admission Form
- Three letters of recommendation
- Sample of your academic writing (e.g., a scholarly paper presented in a previous graduate course that demonstrates your knowledge of an area, powers of organization, command of language, and communication skills.)

Conditional Admission

A degree applicant whose credentials do not meet the above requirements for regular admission may be considered for conditional admission. Applicants for conditional admission will not be considered if their GPA is lower than 3.0. The conditional status is satisfied, and the status of regular admission automatically assumed, if the student makes a grade of "B" or better in each class during the first twelve hours of their graduate work. Failure to meet this requirement will result in the student being dropped from the program.

Admission to the Graduate School and the College of Education do not ensure admission to the doctoral programs. Admission forms and requirements, specific program parameters, departmental policies, and contact information for each doctoral degree can be found at the ELPTS website.

Additional requirements for the Graduate School (Degree Requirements) and the College of Education (Doctoral Degrees (p. 380)) are detailed in earlier sections of this catalog.

**Program Requirements:**

The Doctorate of Education requires a minimum of 72 credit hours beyond the master's degree (60 hours of coursework and 12 hours of dissertation study). Students must also meet the University residency requirement.

The 60 hours of required coursework is typically completed in three years of full-time study through a blended format of online courses and campus meetings (scheduled four times a semester on Friday evenings and Saturdays). The dissertation study must be completed no later than seven years after first enrollment.

**Residency**

Students will meet the University Residency Requirement by successfully completing 18 hours of required coursework within a 12-month period, including three of five core courses (currently BEF 644, AEL 667, BEF 641, AEL 695 or AHE 603) in consecutive semesters.

**Comprehensive Exam**

A comprehensive exam measures students' command of the content presented in the coursework portion of the degree.

**Dissertation**

During dissertation research, continuous registration is required for a minimum of 3 hours per term (fall and spring) until graduation. Registration is also necessary for summer graduation.

**Nurse Educator Dissertation: Policy & Procedure**

**Purpose.** A dissertation—demonstrating the ability to conduct independent research and skill in organization, writing and presentation—must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. The subject of the dissertation must be approved by the dissertation committee of the major department or division and by the dean of the Graduate School.

**Policy.** The dissertation progresses through the following benchmarks:

(i) **Prospectus.** The dissertation committee meets to review a brief outline (typically around 20 pages) of the proposed research project. Upon approval, the Application to Candidacy form is signed and submitted to the department office.

(ii) **Proposal.** The dissertation committee meets to review the first three chapters of the dissertation manuscript. Where appropriate, this should include the justification and design of any proposed field research. Upon approval, the Appointment of Committee form is signed and submitted to the department office. The student can then seek the IRB approval necessary to conduct their study.

(iii) **Defense.** The dissertation committee meets to review the final manuscript, including analysis of the study's findings and discussion of their significance in the light of current research and policy. Upon approval, the Committee Acceptance form is signed and submitted to
the department office. The complete and edited dissertation is then uploaded at the ETD website, as explained below.

**Graduate School Guidelines**

- A dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. The committee shall have no fewer than five members, all of whom are approved by the dean of the Graduate School. The graduate dean’s approval of the proposed dissertation committee is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the form for Appointment/Change of a Doctoral Dissertation Committee.
- All members of a dissertation committee must be members of the Graduate Faculty. The committee chair must be a full member of the graduate faculty, as described in the Catalog’s section on Qualifications of the Graduate Faculty. One member must be from outside the student’s major department. Please see INSTRUCTIONS FOR APPOINTMENT TO TEMPORARY GRADUATE FACULTY. Unless there are extraordinary circumstances meriting approval by the graduate dean beforehand, all members of the dissertation committee must attend the final oral defense of the dissertation.
- The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations. Graduate School deadlines, including each semester’s dissertation deadline, are available at the Graduate School’s homepage.
- Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.
- The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research. If certain conditions are met for the student’s final semester, however, the student may qualify to enroll for fewer than 3 hours of 699 dissertation research, but only in the final semester.

**Application for Degree**

The Application for Degree form must be submitted in the first week of the semester that you plan to graduate.

### Instructional Leadership, Ph.D.

#### Instructional Leadership – Instructional Technology Concentration (PhD)

The Instructional Leadership PhD with a concentration in Instructional Technology is dedicated to the improvement of professional practice and service to learning communities. The PhD prepares individuals to conduct original research and to use current and emerging technologies and instructional strategies to create effective learning environments. Further, the degree prepares individuals to assume instructional technology roles of preparing future researchers and teachers in schools and colleges, and for positions in educational technology, instructional design, and training in business and industry.

### Instructional Leadership – Social and Cultural Studies Concentration (PhD)

The Instructional Leadership PhD with a concentration in Social and Cultural Studies is dedicated to the improvement of professional practice within learning communities. We develop future scholars, researchers, and instructional leaders for schools, colleges, and other learning institutions. Our work is guided by the principles of reflective practice, professional growth, democratic action, and individual responsibility. The overarching goal is the preparation of theoretically informed leaders with the critical understanding of social and cultural issues necessary to enact organizational, curricular, and pedagogic reforms within their respective institutional settings.

Admission to the Graduate School and the College of Education does not ensure admission to the doctoral programs. Admission forms and requirements, specific program parameters, departmental policies, and contact information for each doctoral degree can be found at the ELPTS website.

### Doctoral Degrees

The PhD in instructional leadership prepares educational leaders, scholar practitioners, policy makers, professors, and researchers who can use—and contribute to—knowledge of learning processes, pedagogy, and the social foundations of schooling. Courses focus on curriculum, professional development, supervision, learning, pedagogy, and questions of diversity and social justice. Throughout, the overarching aim is to develop the skills of inquiry and reflective decision making so that graduates are able to construct ethical and politically informed judgments that advance education while respecting diversity, honoring difference, and promoting social justice. The PhD offers optional concentrations in instructional technology (preparing future researchers, teachers, and corporate trainers in the field of instructional design and e-learning) and the social and cultural foundations of education (preparing students for academic positions in higher education).

#### Instructional Leadership, PhD (Instructional Technology)

**Admission Requirements**

To be considered for regular admission, students must score above the 50th percentile on either the GRE or MAT. For admission, an applicant must apply online through the Graduate School. Applicants should select the Instructional Leadership PhD and then the specialty area of Instructional Technology. Other requirements include a departmental information sheet, a curriculum vita or resume, a statement of purpose, three recommendations, and a writing sample.

**Program Requirements**

When admitted to the program, applicants are assigned a temporary advisor—they may continue to work with this person or select another advisor when they get to know the faculty. Advisors work with students to complete a Program of Study. This is your degree plan; it specifies the courses you must complete in order to graduate. Students must also meet the University residency requirement.

The Instructional Leadership PhD with an Instructional Technology concentration is an 84-hour degree. It is comprised of 60 hours of coursework and 24 hours of dissertation credit.

**Graduate School Requirements**

1. Within the first 30 hours of study, copies of students’ Program of Study Form must be submitted to the department and to the graduate
out the courses you must complete in order to graduate. 

2. All requirements must be completed within seven years. Credit earned in the six years preceding enrollment in the doctoral program may be applied. 

3. The minimum period in which the doctoral degree can be earned is three full academic years of graduate study.

Dissertation (AIL 699 Dissertation Research, 24 hours). Continuous enrollment of a minimum of 3 hours during Fall and Spring semesters is required until the dissertation is complete. Dissertation hours are not required during summer semesters.

Application for Degree 
The Application for Degree form must be submitted in the first week of the semester in which a student plans to graduate.

Instructional Leadership, PhD (Social and Cultural Studies) 
Students pursuing this concentration may follow either the traditional or the alternate doctoral residency. The alternate doctoral residency requires students to enroll in 18 credit hours of approved graduate level coursework across three consecutive semesters. The 18 hours of coursework must include six of twelve of the doctoral core on the Tuscaloosa campus. Students may include up to six hours of advisor approved online, distance education, hybrid, or Gadsden coursework. Students may not take more than three hours of online or hybrid instruction in a single semester during the residency period.

Admission Requirements
To be considered for regular admission, students must have maintained an undergraduate grade point average of 3.0 on a 4.0 scale or a 3.0 average for the last 60 semester hours in a degree program. No entrance exam is required for application to the Instructional Leadership PhD with concentration in Social and Cultural Studies. However, students who have already taken the GRE and scored at or above the 50th percentile are encouraged to submit their results to supplement their application. For admission, an applicant must apply through the Graduate School. You will be asked to submit names for recommendations, a departmental information sheet, your curriculum vita or resume, a statement of purpose, and a writing sample.

Program Requirements
When admitted to the program you will be assigned a temporary advisor—you may continue to work with this person or select another advisor when you get to know the faculty. One of the first projects, usually completed in the first or second semester, is to form a Program Advisory Committee and complete a Program of Study Form. This is your degree plan; it lays out the courses you must complete in order to graduate.

1. Within your first 30 hours of study, copies of your Program of Study Form must be submitted to the department and to the graduate school. Any changes to the program of study must be made by completing a course substitution form.

2. Your Program of Study Form must indicate how you will meet the University Residency Requirement.

3. Up to 21 hours of required course work may be transferred if credit meets conditions stated in the Doctoral Degrees section of the Graduate Catalog. Use the Transfer Graduate Credit Form.

4. All requirements must be completed within seven years. Credit earned in the six years preceding enrollment in the doctoral program may be applied. See the checklist pertaining to each degree for any exceptions. (Some programs may be eight years if certain conditions prevail.)

The doctoral program requires a minimum of 72 credit hours beyond the master’s degree or 90 hours beyond the bachelor’s degree. A typical 72-credit hour PhD is comprised of 48 hours of coursework, a comprehensive examination, 24 hours of dissertation credit, and the University residency requirement.

Students must complete 33 hours of coursework relevant to the major, including, at a minimum, 18 hours of BEF coursework. These 18 hours must include the following program core courses: BEF 644, AEL 667/BEF 667, AEL 669, AEL 681/BEF 681, and 3 hours of BEF 698. BEF 698 is a one-hour credit course that can be taken multiple times. Additionally, students are strongly encouraged to complete at least one course in each of the constituent program disciplines: sociology, history, and philosophy. Preapproved courses are as follows:

- Sociology: BEF 507, BEF 641, BEF 650
- History: BEF 503, BEF 653
- Philosophy: BEF 504, BEF 642, BEF 654

Remaining hours of coursework may come from the following elective courses: Any disciplinary course not taken from above and BEF 512, BEF 534, BEF 575, BEF 585, BEF 607, BEF 639; AEL 619, AEL 664, AEL 695.

In consultation with their advisors, students are encouraged to seek relevant courses outside the program and College to fulfill both disciplinary and elective needs according to their academic interests and professional goals.

A majority of courses in the program of study must be at the 600 level or higher.

Research. 15 hours of coursework in quantitative and/or qualitative research methods must be included in the program of study.

Proposal. The dissertation proposal normally constitutes the first three chapters of the dissertation study. Typically, this comes after the student has met to discuss their prospectus. At this point, a student who should submit the Application for Admission to Candidacy form to the Graduate School—and a photocopy to the department.

Dissertation (AEL 699 Dissertation Research, 24 hours). Continuous enrollment is required until the dissertation is complete. The number of hours will vary depending on workload of the student and professor on the document.

Doctoral Residency. The minimum period in which the doctoral degree can be earned is three full academic years of graduate study. The student must spend an academic year in continuous residence as a full-time student in the Graduate School of The University of Alabama (or, if specifically approved by the faculty concerned, one full summer consisting of two terms, preceded by or followed by one regular semester). Full time enrollment consists of 9 credit hours per semester. This requirement can be satisfied only by enrolling in coursework; dissertation or thesis research cannot be used. Students following the traditional residency requirement are advised that distance education courses may not count toward that requirement.

Instructional Technology Certificate
The Graduate Certificate in Instructional Technology provides students with the knowledge, skills, and dispositions to effectively 1) integrate technology within their teaching as a means of improving learning outcomes; 2) design and deliver distance and online courses; and 3)
lead campus and organizational instructional technology initiatives. The program takes a research-to-practice approach by grounding instructional technology practice in research-based evidence.

**Required Core Coursework (6 hours):**
- AIL 602 Electrnc Instruct Design 3
- AIL 604 Distance Technologies 3

**Required Elective Coursework (3 hours):**
- AIL 690 Sem Instructional Technology 3
- AIL 601 Prin Instruct Technology 3

**Elective Coursework (6 hours):**
- AIL 600 Integr Tech Educ & Train
- AIL 601 Prin Instruct Technology
- AIL 603 Telecommctn & Networks
- AIL 605 Interact Multimedia Proc
- AIL 606 Software Technology
- AIL 607 Readings in Instruct. Tech.
- AIL 630 Technology Management
- AIL 631 Administrative Technology
- AIL 690 Sem Instructional Technology

Total Hours 15

- With approval of the Program Coordinator for Instructional Technology, AIL courses taken as part of a student’s existing program of study that meet the requirements of the certificate program will be accepted as credit towards the certificate.

### Instructional Technology, MA

The Master of Arts in instructional technology is an online degree program for individuals who wish to increase their understanding of technology’s role in teaching, learning, design, and training. This online degree is designed to prepare individuals in the state, nation, and the world to use current and emerging technologies and instructional strategies to create effective learning environments. The degree prepares individuals for positions in instructional technology, educational technology, instructional design, and training in business and industry.

**Admission Requirements**

Applicants to the Master of Arts in instructional technology must apply to the Graduate School for admission. To apply, connect to the Graduate School site at http://graduate.ua.edu/application/. Follow the online instructions, complete the required forms and provide appropriate transcripts.

**Application Process**

Applications are accepted throughout the year. For the application to be processed for each semester, the application should be submitted no later than:
- July 10th for Fall admission
- November 10th for Spring admission
- April 10th for Summer admission

**Program Requirements**

- Candidates for the master’s degree must earn a minimum of 30 semester hours of credit.
- Candidates must complete a digital portfolio as a comprehensive examination
- There are 21 required hours (7 courses) and 9 elective hours (3 courses) of CAT/INTE hours; one elective course may be taken outside the INTE program from other programs/colleges at The University of Alabama, with advisor approval.

#### Instructional Technology, MA

**Total Hours** 30

**Required courses:**
- CAT 531 Computer Based Instruction 3
- INTE 532 Instructional Tech Design (Instructional Technology Design) 3
- INTE 533 Online Teaching and Learning (eLearning (Online Learning)) 3
- INTE 534 Issues & Trends Instruct Tech (Issues and Trends in Instructional Design) 3
- INTE 535 INTE Assistive Technology (Adaptive and Assistive Technologies) 3
- INTE 536 Assessment and Evaluation (Assessment and Evaluation in Instructional Technology) 3
- INTE 589 Instruct Tech Resea & Prod Dev (Instructional Technology Research and Product Development) 3

**Elective courses (Choose 3 from the options below):**
- INTE 537 Game-Based Learning (Game-Based Learning) 3
- INTE 538 mLearning (mLearning) 3
- INTE 539 Special Topics in IT 3
- INTE 540 Plan & Manage Tech Projects (Technology Project Management and Budgeting) 3
- INTE 541 IT Leadership (IT Leadership and Administrative Technology) 3

One advisor-approved course outside the INTE program

---

Counselor Education

BCE511 Principles Of Guidance
Hours 3
Explores the rationale for guidance by examining human development and sociological, psychological, and philosophical bases for guidance. Provides awareness of services by surveying components of guidance programs. Offered fall semester.

BCE512 Counseling Theory Proc
Hours 3
Introduction to counseling, counseling theories, and the counseling relationship; and an overview of the counseling process. Offered fall and spring semesters.

BCE513 Career Development
Hours 3
An introduction for counselors and teachers to career development concepts, labor force information, and other resources needed to help persons with career planning and decision making. Offered spring semester.

BCE514 Counseling Skills
Hours 3
An experiential course involving applied elements of theoretical models and customary helping skills to orient and prepare students for their initial supervised work with counseling clients. Offered fall and spring semesters.

BCE515 Practicum Counseling I
Hours 3
Laboratory training in attending, listening, and influencing skills. Supervised experience in counseling. Offered fall and spring semesters.

BCE516 Practicum Counseling II
Hours 3
Supervised practice in counseling. Offered fall and spring semesters.
Prerequisite(s): BCE 515

BCE517 Professional Issues, Ethics, and Advocacy in Counseling
Hours 3
This course is designed to expose students to the fundamental principals of being a professional counselor. This course will help students to be familiar with assumptions, theories, strategies, applications, ethical, and legal considerations related to the development of counseling.

BCE518 Intro to Clin. Ment. Hlth Cnsl
Hours 3
Seminar and fieldwork designed to acquaint the student with the functions and roles of the counselor in various community and agency settings. Offered fall semester.

BCE521 Group Proced Coun Educ
Hours 3
Background in group methods, including group guidance, group counseling, and group dynamics. One-half of class time is spent in a laboratory experience during which each student is provided an opportunity to function in a group. Offered fall and spring semesters and in summer school.

BCE522 Indiv & Group Appraisal
Hours 3
An overview of measurement methods, practice in administration and interpretation of standardized tests, and evaluation of tests and testing programs for counseling and guidance. Offered spring semester and in summer school.

BCE523 Prog Development & Mgt
Hours 3
An examination of the organization and implementation of the guidance functions of schools and the guidance responsibilities of counselors, teachers and administrators. Offered spring semester.
Prerequisite(s): BCE 511

BCE525 Internship in School and Clinical Mental Health Counseling
Hours 3-12
Supervised field experience in an appropriate job setting. Offered fall, spring and summer semesters/terms.
Prerequisite(s): BCE 515

Hours 3
Advanced study and discussion of a variety of agency-specific issues and topics. Offered spring semester.
Prerequisite(s): BCE 518

BCE533 Special Topics
Hours 1-3
This course is designed to offer students a range of counseling-focused 500-level special topic classes.

BCE540 Orientation to Rehabilitation Counseling
Hours 3
Philosophical, social, psychological, and legislative bases of rehabilitation; the nature and scope of the rehabilitation process and the functions of the rehabilitation counselor; and study of the individual. Offered fall semester.

BCE541 Prin Pract Rehabilitatin Cnsl
Hours 3-6
Supervised experiences in selected rehabilitation and agency settings to provide an opportunity to integrate theory and practice early and to do selected independent field studies. Offered fall semester.

BCE542 Medical and Psychosocial Aspects Disabilities
Hours 3
General knowledge of chronic illness and disability is important for rehabilitation counselors, allied health professionals, and other human services workers who work in settings involved with serving persons with disabilities. This course will explore the personal, psychosocial, and vocational impact of chronic illness and disability. The course provides an overview of various body systems, the etiology and pathology of diseases, injuries, and disabilities that can affect the body systems, the prognosis, psychosocial and vocational implications of these conditions. Also examined will be the various models of conceptualizing disability and assistive technology.
BCE543 Psychosoc Cult Aspects Disabl
Hours 3
Psychological and sociological attitudes, adjustment problems, sexuality, rehabilitation techniques, placement, family and social systems implications, programs, and facilities; emphasis on severely disabled individuals. Offered spring semester.

BCE545 Case Management, Vocational Rehabilitation, & Placement
Hours 3
The purpose of this course is to provide students with the knowledge and necessary skills to complete case management and vocational rehabilitation placement services. Course content includes competencies of case management; intake interviews; medical and psychological evaluation and life care planning.

BCE546 Pract Rehab Counseling
Hours 3-6
Supervised practice in rehabilitation counseling. Offered fall, spring, and summer semesters/terms.
Prerequisite(s): BCE 514

BCE547 Internship in Rehabilitation Counseling
Hours 3-12
Supervised field experience in a rehabilitation setting. Offered fall, spring, and summer semesters/terms.
Prerequisite(s): BCE 546

BCE548 Medical Aspects Disabil II
Hours 3
A study of medical, psychosocial, and rehabilitation considerations surrounding cognitive disabilities arising from brain trauma, mental illness, and addictions. Offered spring semester.

BCE611 Multicult. Approach Counseling
Hours 3
This course is designed to introduce students to multicultural issues unique to counseling and other helping professions. Offered even-numbered fall semesters.

BCE613 Substance Abuse Counseling
Hours 3
The primary goals for this course are to deepen students' understanding of substance use disorders, facilitate the development of addiction counseling competencies associated with positive treatment outcomes and increase students' level of confidence in identification of substance abuse issues.

BCE615 Field Exper Counselor Ed
Hours 3
Supervised field experiences in counseling to supplement accredited, advanced-level internships. Offered annually.

BCE616 Advanced Practicum In Counseling
Hours 3-6
Supervised practice in counseling for advanced majors. Offered alternate spring semester.

BCE618 Adv Theory Counseling
Hours 3
Historical and current approaches to individual counseling, and the theories of personality structure and individual behavior from which these approaches are derived. Offered alternate spring semesters.

BCE619 Supervision in Counselor Education
Hours 3-6
Supervision of practicum students within a structured pedagogical course. Offered in the fall and spring semesters.

BCE620 Human Sexuality Counseling
Hours 3
A course that identifies sexual issues and dysfunctions and examines counseling strategies, treatment planning and interventions. Offered even-numbered fall semesters.

BCE625 Advanced Internship
Hours 6-18
Supervised field experiences in counseling and counselor education for advanced students. Offered fall, spring, and summer semesters/terms.
Prerequisite(s): BCE 615 or BCE 616 or BCE 617

BCE626 Readings
Hours 3
Independent study under faculty direction. Offered fall, spring, and summer semesters/terms.

BCE631 Consul Adm & Ldrs in Counselng
Hours 3
Study of consultation with teachers, administrators, parents, and various community agencies, emphasizing behavioral, ecological, mental health, and organized models and appropriate interventions to be planned with consultees. Offered alternate spring semesters.

BCE633 Advanced Seminar
Hours 3
Seminars focusing on contemporary counseling issues and topics. Varied offerings.

BCE635 Teaching and Scholarship in Counselor Education
Hours 3
This course is designed for advanced counseling students who study teaching and scholarship in Counselor Education.

BCE636 Leadership and Advocacy in Counselor Education
Hours 3
The course is designed for advanced counseling students who study leadership and advocacy in Counselor Education.

BCE650 Couns Stratg Fam Relatns
Hours 3
Examination of theoretical and applied elements of systemic intervention with troubled families. Offered spring semester.

BCE651 Counseling Strategy Couple Relat
Hours 3
Examination of theoretical and applied elements of intervention with distressed couples. Offered fall semester.
BCE652 Couns Stratg Adult-Child  
Hours 3  
Examination of theoretical and applied elements of intervention with discordant relationships between adults and children. Offered summer terms only.

BCE653 Intro Play Therapy  
Hours 3  
Lecture/laboratory experience focusing on an overview of play therapy, including history, theories, beginning skills, and practicum experience. Variable offerings.

BCE654 Advanced Play Therapy  
Hours 3  
Individual readings, conferences, group discussions, lecture and reports focusing on techniques/methods, applications to special settings or populations, ethics, and professional responsibilities with an extended practicum experience.

BCE698 Non-Dissertn Research  
Hours 3-6  
Directed research not related to dissertation research. Variable offerings.

BCE699 Dissertation Research  
Hours 1-15  
Student research for writing dissertation.

Educational Psychology  

BEP500 Adv Educational Psych  
Hours 3  
Principles of educational psychology for teaching and for educational services in schools and colleges.

BEP501 Proseminar in Educational Psychology  
Hours 1  
This course presents an introduction to doctoral studies in Educational Psychology at The University of Alabama.

BEP505 Motivation and Self-Regulation  
Hours 3  
Investigates the development of self-regulatory processes and the match between those processes and educational practice. Transitions from home to school, elementary to secondary, and high school to college/work are considered in depth.

BEP541 Authentic Sch Learn Tchg  
Hours 3  
Cognitive approaches to learning/teaching with focus on what constitutes authentic learning. Topics/themes include nature of preschool learning, sources contributing to learning, constructivism, and holistic perspectives.

BEP555 Adolescent Psychology  
Hours 3  
Theories and research on adolescent psychology. Examination of physical, cognitive and personality/social development within the context of the family, schools and peer relations.
BEP665 Motivation/Emotion Education  
**Hours 3**
Exploration into processes of human motivation and emotion with a focus on educational settings.

BEP670 Research Methods and Trends in Educational Neuroscience  
**Hours 3**
Focuses on research methods and trends in educational neuroscience. Seminar format with some data analysis activities. Topics are grouped under three themes: research trends, methods (e.g., MRI, EEG), and neuroscience theory (e.g., connectivity).
Prerequisite(s): BEP 570

BEP672 Teaching Ed Psych Coll  
**Hours 3-12**
Seminar for graduate student instructors. Students must be GTAs in educational/school psychology. Designed to help GTAs use reflective decision making and knowledge of educational psychology to teach undergraduates.

BEP673 Research/Ethics Seminar  
**Hours 3**
Critical study of current issues in educational psychology.

BEP690 Readings In Educ Psych  
**Hours 1-6**
An opportunity for the student to study intensively a topic in educational psychology, covering a sizable body of literature (the topic chosen should nevertheless be narrower than that subsumed under the name of a course).

BEP698 Non-Dissertatn Research  
**Hours 3-12**
Participation in a research project relating to educational psychology.

BEP699 Dissertation Research  
**Hours 1-15**
Research by student for dissertation.

**Educational Research**

BER500 Intro Educatn Research  
**Hours 3**
An overview of research methodology, primarily for master's students. Offered fall, spring, and summer semesters.

BER545 Analy Variance In Educ  
**Hours 3**
This is a three-hour course in which the student will learn various forms of the General Linear Model (GLM) using Analysis of Variance (ANOVA) methods. One and Two-Way ANOVAs; including contrast and interaction analyses, analysis of covariance ANCOVA; Repeated Measures; and Mixed-Model design; non-parametric. SPSS is required. Offered fall and spring semesters.
Prerequisite(s): BER 540

BER550 Eval Classroom Learning  
**Hours 3**
A comprehensive contemporary approach to the development, application, and interpretation of teacher-made classroom assessments; use of textbook assessments to be aligned with national and state achievement standards. Attention is given to interpreting standardized norm and criterion referenced tests. Grading practices are presented especially to be aligned with No Child Left Behind Federal legislation 2001. Offered fall semester.

BER558 Intro To Psychometrics  
**Hours 3**
An introduction to classical and current theories and practices in psychometrics. Theory is presented together with exposure to many of the popular assessment procedures. Offered fall semester.
Prerequisite(s): BER 540 or by permission of instructor

BER600 Quant Research Methods  
**Hours 3**
An overview of research methods and procedures in education, primarily for doctoral students. Emphasis is given to the quantitative and qualitative methods used in writing a doctoral dissertation.

BER603 Survey Research In Educ  
**Hours 3**
Comprehensive introduction to using survey instruments for research purposes. Survey development, construction, validation scaling, sampling, and research methods as they apply to matching the survey to research questions are covered.
Prerequisite(s): BER 540

BER630 Case Study Research Methods  
**Hours 3**
Examines the production of case studies of individual practices, discrete institutions and organizations, and state-level policies. Explores the research methods that can inform the production of case study representations of human experience, as well as the different styles of case study writing. Offered summer term.

BER631 Inqry As Interp: Qual I  
**Hours 3**
Examines the history and philosophy of naturalistic studies of human experience. Concentrates on post-positivistic, phenomenological, structuralist, and post-structuralist theory and modes of analysis. Course assignments provide practice with rudimentary qualitative research skills. Offered fall, spring, and summer semesters.
BER632 Reflect Resist: Qual II
Hours 3
Examines the irony and ideology of naturalistic studies of human experience. Examines the epistemic limits of any method of research representation, and the political and ethical implications of those limits for researchers. Course assignments provide practice with intermediate qualitative research skills, including participant observation, field note development, and interviewing skills. Offered spring and summer semesters.
Prerequisite(s): BER 631 or BER 630

BER633 Ethics & Aesth:Qual III
Hours 3
Examines the ethics, aesthetics and opportunities for advocacy in naturalistic studies of human experience. Explores feminist, Afrocentric, critical theoretic, artistic and journalistic conceptions of data collection, and a variety of styles and formulas for research writing. Course assignments support the development of students' research interests and are geared toward scholarly publication. Offered all semesters.
Prerequisite(s): BER 630 or BER 631 with a minimum passing grade of C, and BER 632 with a minimum passing grade of C

BER634 Narrative Inquiry
Hours 3
This course serves as an introduction to narrative inquiry and analysis in qualitative research. Topics covered include: theoretical and philosophical underpinnings of narrative inquiry, ethics and reflexivity in narrative inquiry, analytic methods in narrative inquiry, narrative interviewing, and (re)presenting narrative work.
Prerequisite(s): BER 631 or equivalent

BER635 The Materialist Turn in Qualitative Inquiry
Hours 3
This course examines the implications of the materialist turn in qualitative inquiry, challenging students to think beyond linguistically-oriented forms of research (those based solely on words) to consider intersections with relationally-informed conceptions of materialism. Students will learn the theoretical bases for materialism and design a qualitative study informed from this perspective.
Prerequisite(s): BER 631 or equivalent

BER636 Qualitative Interviewing
Hours 3
This course serves as an introduction to qualitative interviewing in human subjects research. Topics covered include: 1) Types of qualitative interviews (e.g. phenomenological ethnographic, feminist, and focus group interviews); 2) The ways that theoretical frameworks have historically shaped interviewing and the ways that theories inform students’ interviewing approaches; 3) The ethical concerns of conducting different forms of interviews with different populations.
Prerequisite(s): BER 631 or equivalent

BER637 Arts-Based Research
Hours 3
This course consists both the historical and current landscape of artsbased research and its place in/against the field of qualitative research. Further, it engages students in readings that span the breadth of artsbased research practices, while cultivating opportunities for students to become arts-based research practitioners.
Prerequisite(s): BER 631 or equivalent

BER640 Quantitative II: Statistical Methods in Education II
Hours 3
The primary emphasis of this course focuses on the relationships between single dependent variable and one or two independent variables. Although more complex models can be considered (i.e. more than two independent variables) generalizations for the models discussed in this case can be applied to multiple-variable scenario. Topics covered include: one-way ANOVA, two-way ANOVA, repeated measures ANOVA and multiple regression.
Prerequisite(s): BER 540 or equivalent

BER641 Multivariate Statistics
Hours 3
Covers the following statistical procedures: principal component analysis, factor analysis, cluster analysis, multidimensional scaling, discriminate analysis, canonical correlation, and hierarchical linear modeling (HLM) and other interdependent multivariate methods.
Prerequisite(s): BER 640

BER642 Advanced Regression Methods
Hours 3
Different multiple regression methods are presented including an overview of ordinary least squares regression, ordinal regression, logistic and probit regression, loglinear, mixed, and regression discontinuity. Interpretation of results diagnostics, and applications are covered for the several glm models.
Prerequisite(s): BER 640

BER645 Advanced Experimental Design
Hours 3
Advanced statistical methods in Experimental Design, including specialty ANOVA designs and designing of experimental studies. Topics include Factorial ANOVA, Randomized Block Designs, Nested Designs, Random and Mixed Effects ANOVA, Repeated Measures ANOVA, and Incomplete Block Designs.
Prerequisite(s): BER 640

BER646 Structural Equation Modl
Hours 3
Includes an introduction to the basic concepts of structural equation modeling, including approaches to regression, path analysis, confirmatory factor analysis, and model building with dependent and independent variables. Offered spring.
Prerequisite(s): BER 641 or BER 642
BER658 Psychometric Theory Pract
Hours 3
Major topics include true score reliability, validity, classical theory, generalizability theory, contemporary theory: item response theory. Computer applications required. Offered spring of odd years.
Prerequisite(s): BER 540 and BER 558 with a minimum passing grade of C

BER660 Eval I: Theory & Practice
Hours 3
Concepts and techniques for evaluating education programs, projects, materials, curriculum, and personnel. Field work and computer analyses required. Offered fall semester.

BER661 Evaluation 2 Improvement Science Methodologies
Hours 3
This course will introduce students to the six principles of Improvement Science and related, "engaged research" methodologies (e.g. Design-Based Implementation Research, Developmental Evaluation). It will provide an opportunity to apply these principles to a problem of practice in schools and/or health and human service agencies. Students will learn to assess systems-level problems and barriers through Causal Systems Analysis, develop complex theories of action through diagrams, and design and implement Plan-Do-Study-Act (PDSA) Cycles.
Prerequisite(s): BER 540; BER 631

BER665 Mixed Methods Research Design
Hours 3
Course participants will be provided with an overview of the history and foundations of mixed methods research, literature on emerging trends in mixed methods research, types of MM designs, types of research problems addressed by MM research, data collection and analysis strategies, and reporting and evaluating mixed methods research.
Prerequisite(s): BER 540 and BER 631

BER672 Mentored Teaching in Educational Research Methodology
Hours 3
This course provides students with the opportunity to assist with teaching a research methods course. Working closely with an Educational Research faculty member, students will gain experience in designing curriculum, implementing thoughtful pedagogical practices, as well as insight into the affordances and challenges that accompany teaching various research-related topics.
Prerequisite(s): Completion of 12 credit hours in BER courses.

BER687 Field Work Educ Research
Hours 3-6
Faculty-supervised participation in research and other educational projects. Work is related to advisor's research interests. Field work required. Offered fall, spring and summer semesters.
Prerequisite(s): By permission of instructor only.

BER689 Practicum Educ Research
Hours 3-6
Practicum is a student-initiated research project done with faculty supervision. Field work is required. Offered fall, spring and summer semesters.
BSP601 Appl Pediatric Neuropsych
Hours 3
Study of applied brain-behavior relationship in the areas of academics, behavior, and social/emotional skills. Various disorders, assessment techniques, interventions, and preventions will be examined and discussed.

BSP625 Behavioral Consultation and Interventions for School-Based Problems
Hours 3
Study of consultation with teachers, administrators, parents, and various community agencies, emphasizing behavioral, ecological, mental health and organizational models and use of data-based decision making to plan and implement appropriate interventions for children with social and behavioral challenges and disabilities.

Prerequisite(s): BSP 500 or permission of the instructor

BSP635 Academic and Instructional Consultation and Intervention
Hours 3
Advanced study of assessment and remediation of academic skills problems for children with learning challenges and disabilities, instructional and academic consultation, aptitude-treatment interaction, study-skills training, self-regulation and monitoring, peer-influenced academic interventions, prevention, and other interventions to meet the needs of all students in inclusive settings.

Prerequisite(s): BSP 500 or permission of the instructor

BSP660 Psychopathology
Hours 3
Thorough examination of the history, scope, and understanding of abnormal behavior through the life span, with emphasis on educational and clinical implications. The most recent classification system is used to structure topics and issues in the course.

BSP673 Research/Ethics Seminar
Hours 3
Covers topics of current interest to school psychologists.

BSP686 Consult Interv Practicum
Hours 3
Requires 150 hours of supervised experience in conducting consultation and intervention (within a team-decision-making framework) with children, parents, teachers, and administrators in public schools and other agencies.

BSP687 Specialist Internship
Hours 3-6
The student performs the activities of a school psychologist in an educational or other agency, under supervision.

BSP688 Doctor Intern School Py
Hours 3-6
The student performs the duties of a school psychologist in an educational agency, under supervision.

BSP689 Res Pract School Psych
Hours 3
Participation in cooperative faculty/student research on some aspect of school psychology.

BSP690 Readings School Psych
Hours 1-6
An opportunity for the student to study intensively a topic in school psychology, covering a sizable body of literature (the topic chosen should nevertheless be narrower than that subsumed under the name of a course).

BSP696 Advanced Doctoral Practicum-School Psychology
Hours 1-3
Supervised field experiences for doctoral students in conducting school psychology assessment, consultation, and intervention with children, parents, teachers, and administrators in public schools or other agencies.

Prerequisite(s): BSP 500, BSP 515, BSP 516, BSP 625, BSP 635, BSP 586, BSP 686, BSP 601

BSP698 Non-Dissertatn Research
Hours 3
Participation in a research project relating to school psychology.

BSP699 Dissertation Research
Hours 1-12
Research for student’s dissertation.

Counselor Education, Ed.S.

The Educational Specialist degree in counselor education leads to advanced certification for school counselors. Successful completion of the program results in eligibility to be recommended for Class AA (specialist-level) certification as a school counselor.

Admission Requirements

Admission requires valid, master’s level certification in School Counseling and at least two full years of full-time acceptable professional educational work experience in a P-12 school system.

An entrance exam score (GRE score of at least 300 or the 50th percentile or above on the MAT) is needed for regular admission.

Admission requirements for the Graduate School (Admission Criteria) and the College of Education (General Admission (p. 387)) are detailed in earlier sections of this catalog.

Degree Requirements

A minimum of 30 hours of appropriate work beyond the MA degree in Counselor Education (School Counseling) and the completion of a comprehensive exam are required for the educational specialist degree. The course of study includes:

1. foundations of professional studies, 6 hrs
2. educational research, 3 hrs
3. instructional support area courses, 12 hrs
4. electives (which may be specified), 9 hrs (If a survey of special education course has not been completed, SPE 500 is required.)

A list of courses that fulfill these requirements may be obtained from the Counselor Education office.

The Graduate Catalog is published annually. Program checklists may be updated more frequently and are likely to provide the most up-to-date information about requirements. Students should obtain the most recent program checklists from their program advisors.

Please note: Courses taken for the prerequisite Class A certification and credits over six years old cannot be counted toward this degree. The certification programs of the department have been designed to fulfill current requirements of the Alabama State Board of Education.

In order to maintain compliance with the Alabama State Board of Education, admission and program requirements are subject to change.

For the most current information, please check with the Office of Student Services and Certification or the Program in Counselor Education.

Certification

To be awarded Alabama Class AA School Counselor certification, students must:

1. maintain a GPA of at least 3.5 (effective July 1, 2017) on all courses with no grade below a C
2. receive a passing score on a comprehensive assessment documenting mastery of the curriculum
3. hold valid, prerequisite Alabama Class A School Counselor certification
4. complete an application for certification through the Alabama State Department of Education

Counselor Education, Ph.D.

The PhD degree is also offered in Counselor Education.

The Council for Accreditation of Counseling and Related Programs (CACREP), a specialized accrediting body recognized by the Commission on Higher Education Accreditation (CHEA), has conferred accreditation on the following: Clinical Mental Health Counseling (MA), School Counseling (MA), and Counselor Education (PhD). The Council on Rehabilitation Education (CORE), also recognized by CHEA, has conferred accreditation for Rehabilitation Counseling (MA).

See the Admission Criteria section of this catalog for more information.

Admission Requirements

Cohort admission decisions are made annually. Admission to pursue a doctoral degree in Counselor Education is a two-step procedure. Regular admission to the Graduate School is the initial step for those seeking the doctoral degree. Within this step, students are engaged in post-master’s study and are subject to scrutiny and review by program faculty for their suitability for doctoral study. Statement of purpose and letters of recommendation consistent with goals of the program, entrance exam scores (300 or above on the GRE or at least the 50th percentile on the MAT), and a GPA of 3.0 on a 4.0 scale are needed for regular admission.

An applicant for doctoral study must:

1. possess a completed master’s degree in Counselor Education
2. when necessary, complete supplemental master’s-equivalency courses to comply with the CACREP-accredited course of study for the master’s degree
3. successfully complete a pre-admission doctoral interview for formal pursuit of the doctoral degree in Counselor Education

Course credit in post-master’s study may be used to fulfill doctoral degree requirements only after supplemental master’s-equivalency study is completed and a successful interview is conducted.

Degree Requirements

Degree requirements are noted on the official Plan of Study for the various degrees/tracks. These documents are available from the chairperson or administrative staff for the department.

All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit for the doctoral degree. Otherwise, a "hold" may be placed on future registrations.

If later there are changes in the Plan of Study, the student submits an amended plan of study to the Graduate School at the time the
student applies for admission to candidacy for the degree. Admission to Candidacy forms are on the Graduate School's website.

A department-approved Admission to Candidacy for the Doctoral Degree is submitted to the Graduate School as soon as possible after passing the comprehensive (preliminary) examination.

Alternative Doctoral Residency in Counselor Education
The required doctoral residency may be met through a combination of traditional campus classes and online classes in Counselor Education. Students will complete a minimum of nine semester hours in each of the two contiguous residency semesters/terms of their doctoral study. No more than three semester hours of online graduate course work in Counselor Education may be taken during either of the nine-hour residency semesters/terms.

Counselor Education: Clinical Mental Health Counseling Option, MA
Three Master of Arts (MA) degree options in the Counselor Education Program provide the professional preparation necessary for work in schools, colleges, rehabilitation, agency, and clinical mental health settings. The MA programs are in Clinical Mental Health Counseling, School Counseling, and Rehabilitation Counseling. No thesis is required in any of the MA programs.

The Council for Accreditation of Counseling and Related Programs (CACREP), a specialized accrediting body recognized by the Commission on Higher Education Accreditation (CHEA), has conferred accreditation on the Clinical Mental Health Counseling (MA), School Counseling (MA), Rehabilitation Counseling (MA), and Counselor Education (PhD) degrees.

Admission Requirements
Admission decisions are made each semester. Admission to pursue a master's degree in any track within the program in Counselor Education is based upon success in admission for graduate study with the Graduate School. Statement of purpose and letters of recommendation consistent with goals of the program, entrance exam scores (300 or above on the GRE or at least the 50th percentile on the MAT), and a GPA of 3.0 on a 4.0 scale are needed for regular admission.

Degree Requirements
Degree requirements are noted on the official Plan of Study for the various degrees/tracks in Counselor Education. These documents are available from the chairperson or administrative staff for the department.

If later there are changes in the Plan of Study, the student applies for admission to candidacy for the degree. Admission to Candidacy forms are on the Graduate School's website.

Counselor Education: School Counseling Option, MA
Three Master of Arts (MA) degree options in the Counselor Education Program provide the professional preparation necessary for work in schools, colleges, rehabilitation, agency, and clinical mental health settings. The MA programs are in Clinical Mental Health Counseling, School Counseling, and Rehabilitation Counseling. The MA program in Rehabilitation Counseling requires a minimum of 60 semester hours of study. No thesis is required in any of the MA programs.

The Council for Accreditation of Counseling and Related Programs (CACREP), a specialized accrediting body recognized by the Commission on Higher Education Accreditation (CHEA), has conferred accreditation on the Clinical Mental Health Counseling (MA), School Counseling (MA), Rehabilitation Counseling (MA), and Counselor Education (PhD) degrees.

Counselor Education: Clinical Mental Health Counseling Option, MA
Three Master of Arts (MA) degree options in the Counselor Education Program provide the professional preparation necessary for work in schools and colleges, and in rehabilitation, agency, and clinical mental health settings. The MA programs are in Clinical Mental Health Counseling, School Counseling, and Rehabilitation Counseling. The MA program in Rehabilitation Counseling requires a minimum of 60 semester hours of study. No thesis is required in any of the MA programs.

The Council for Accreditation of Counseling and Related Programs (CACREP), a specialized accrediting body recognized by the Commission on Higher Education Accreditation (CHEA), has conferred accreditation on the Clinical Mental Health Counseling (MA), School Counseling (MA), Rehabilitation Counseling (MA), and Counselor Education (PhD) degrees.

Admission Requirements
Admission decisions are made each semester. Admission to pursue a master's degree in any track within the program in Counselor Education is based upon success in admission for graduate study with the Graduate School. Statement of purpose and letters of recommendation consistent with goals of the program, entrance exam scores (300 or above on the GRE or at least the 50th percentile on the MAT), and a GPA of 3.0 on a 4.0 scale are needed for regular admission.

GRE or at least the 50 percentile on the MAT), and a GPA of 3.0 on a 4.0 scale are needed for regular admission.

Degree Requirements

Degree requirements are noted on the official Plan of Study for the various degrees in Counselor Education. These documents are available from the chairperson or administrative staff for the department. Program requirements are subject to change, so students should consult with their advisors each semester for the most current information.

If later there are changes in the Plan of Study, the student submits an amended Plan of Study to the Graduate School at the time the student applies for admission to candidacy for the degree. Admission to Candidacy forms are on the Graduate School's website.

Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C. Passing scores on a comprehensive exam and the appropriate Praxis assessment(s) are required.

Degree Requirements

The University of Alabama Educational Psychology Program admits candidates to the master’s (MA), Educational Specialist (EdS), Doctor of Education (EdD) and PhD graduate degree programs. The mission of this catalog. Additional information is in the Degree Requirements (p. 20) section of this catalog.

Educational Psychology, Ed.S.

The University of Alabama Educational Psychology Program admits candidates to the master’s (MA), Educational Specialist (EdS), Doctor of Education (EdD) and PhD graduate degree programs. The mission of the program is to provide students with a thorough understanding of the theory and research related to learners, learning, and developmental processes. All degree programs reflect this mission and prepare students for careers as faculty members within academic settings, researchers in agencies or businesses, and school practitioners. The program invites applications from all potential students, especially those in underrepresented populations.

Admission Requirements

Statement of purpose and letters of recommendation consistent with goals of the program, GRE score of 300 or above, and a GPA of 3.0 on a 4.0 scale are needed for regular admission. Prospective students are encouraged to complete their applications by January 15 for admission the following fall.

See the Admission Criteria section of this catalog for more information.

Degree Requirements

Doctoral degrees require 72 or more hours beyond the MA. Additional information is in the Degree Requirements (p. 20) section of this catalog.

Educational Psychology, Ed.D.

The University of Alabama Educational Psychology Program admits candidates to the master’s (MA), Educational Specialist (EdS), Doctor of Education (EdD) and PhD graduate degree programs. The mission of the program is to provide students with a thorough understanding of the theory and research related to learners, learning, and developmental processes. All degree programs reflect this mission and prepare students for careers as faculty members within academic settings, researchers in agencies or businesses, and school practitioners. The program invites applications from all potential students, especially those in underrepresented populations.

Admission Requirements

Statement of purpose and letters of recommendation consistent with goals of the program, GRE score of 300 or above, and a GPA of 3.0 on a 4.0 scale are needed for regular admission. Prospective students are encouraged to complete their applications by January 15 for admission the following fall.

See the Admission Criteria section of this catalog for more information.

Degree Requirements

EdS degrees require 30–33 hours beyond the MA. Additional information is in the Degree Requirements (p. 20) section of this catalog.

Educational Psychology, MA

The University of Alabama Educational Psychology Program admits candidates to the master’s (MA), Educational Specialist (EdS), Doctor of Education (EdD) and PhD graduate degree programs. The mission of the program is to provide students with a thorough understanding of the theory and research related to learners, learning, and developmental processes. All degree programs reflect this mission and prepare students for careers as faculty members within academic settings, researchers in agencies or businesses, and school practitioners. The program invites applications from all potential students, especially those in underrepresented populations.
The MA in Educational Psychology provides an advanced introduction to the field. Students may select a thesis or nonthesis option. There are also two MA options offered in collaboration with educational research. These options are: learning and evaluation (thesis and nonthesis options) and program evaluation (nonthesis only). In addition, the program offers a learning and assessment MA in an online format designed for practitioners interested in developing a strength in educational research as it relates to the learning process and assessment practices within educational settings. (For further information, see http://bamabydistance.ua.edu/degrees/ma-in-ed-psych-learning-and-assessment/index.php).

See the Admission Criteria section of this catalog for more information.

**Admission Requirements**

Statement of purpose and letters of recommendation consistent with goals of the program, GRE score of at least 300 or a MAT score in the 50 percentile or above and a GPA of 3.0 on a 4.0 scale are needed for regular admission.

**Summary of Degree and Program Requirements**

A major part of graduate training is successful participation in courses. Coursework requirements for the MA degree options in Educational Psychology are listed in this booklet. The MA degree requires 30 graduate credit hours.

Coursework requirements are found in “Program Planning Records.” Each student is expected to maintain a Program Planning Record with his/her/their adviser in order to monitor completion of coursework requirements.

Each student is appointed a temporary faculty adviser upon initial acceptance into the program. A student may select a permanent adviser after beginning coursework. Advisers assist students with planning coursework, registering for courses, completing program planning records, portfolio evaluations and other activities.

**Program Outcomes**

All degree requirements in the Educational Psychology Program are carefully designed and sequenced according to program outcomes. Program outcomes are the areas of knowledge and skill students are expected to demonstrate upon successful completion of the coursework and other training activities. Students provide evidence of each program outcome during the required portfolio evaluations. Program outcomes for the MA degree in Educational Psychology are listed in this booklet.

**Transfer of Credit and Use of Previous Graduate Work**

The University of Alabama allows students to transfer equivalent courses from other accredited institutions where the student was enrolled in the graduate school. Up to one-half of the required coursework, exclusive of thesis or dissertation credit, may be transferred from another institution. Credits may be transferred only if they were earned during the six-year period prior to admission to the program. Transfer of courses must be approved by the student’s adviser. The Dean of the Graduate School must also approve transfer of courses. The Graduate School form to request consideration of transfer of credits is located in the Student Handbook.

**Limits on Coursework**

Educational Psychology Program requirements exclude credit for undergraduate study, study which is remedial, or study which is designed to remove deficiencies in meeting requirements for program admission. In addition, the program limits the number of courses not open exclusively to graduate students to no more than one-third of a student’s program.

**Continuous Portfolio Reviews**

All students in the Educational Psychology Program are required to participate in a continuous portfolio review process in order to monitor student progress and determine that program outcomes are being achieved. A general description of the portfolio review process, including a portfolio checklist and rating scale, is located in the Student Handbook. Specific requirements for portfolios for the M.A. degree are located in this booklet.

**Research Participation**

All students in the Educational Psychology Program are expected to obtain skills in research. Each student is expected to join a faculty member’s research team during the first semester of graduate study. Masters’ and Ed.S. students take a number of research courses and are encouraged to participate in research projects during courses and field experiences.

**Comprehensive Examinations**

All degree students in the Educational Psychology Programs are required to successfully complete written comprehensive examinations before the degrees will be granted. The specific procedures for comprehensive examinations for the M.A. degree are designed in collaboration with the student’s advisor. The examinations are completed independently on a “take-home” basis, and require students to integrate knowledge and skills obtained during coursework and other training activities. Each student is allowed to take comprehensive examinations only twice.

**Educational Psychology, Ph.D.**

The University of Alabama Educational Psychology Program admits candidates to the master’s (MA), Educational Specialist (EdS), Doctor of Education (EdD), and PhD graduate degree programs. The mission of the program is to provide students with a thorough understanding of the theory and research related to learners, learning, and developmental processes. All degree programs reflect this mission and prepare students for careers as faculty members within academic settings, researchers in agencies or businesses, and school practitioners. The program invites applications from all potential students, especially those in underrepresented populations.

The PhD is an advanced research degree and is designed specifically for students interested in careers within academic and research settings. PhD students may develop areas of study in:

- Learning
- Motivation
- Human Development
- Educational Neuroscience (an established PhD concentration)

**Admission Requirements**

Statement of purpose and letters of recommendation consistent with goals of the program, GRE score of 300 or above and a GPA of 3.0 on a 4.0 scale are needed for regular admission. Prospective students requiring financial support should complete their applications by January 15 for admission the following fall.

See the Admission Criteria section of this catalog for more information.

**Degree Requirements**

Doctoral degrees require 72 or more hours.
Additional information is in the Degree Requirements (p. 20) section of this catalog.

**Educational Psychology-School Psychometry, MA**

The University of Alabama School Psychology Program is designed to provide exemplary graduate training in research, application, and practice related to learning, development, and mental health of children and youth, as well as their families, educators, and other professionals who work with them. The School Psychology Program admits candidates to the master's (MA), educational specialist (EdS), and PhD graduate degree programs. The degrees in school psychology prepare candidates for direct school-based practice and, for PhD candidates, careers in academic and other settings as faculty members, researchers, and practitioners. The degree programs in school psychology focus on the provision of school psychology services that are based on a strong foundation of research and application related to learners and learning processes. The school psychology degree programs include an integrated and sequential program of study with comprehensive coursework and supervised field experiences. Candidates participate in courses and seminars in assessment and data collection; interventions and decision making, prevention and consultation, professional school psychology, sociocultural foundations, psychological foundations, human development, educational foundations, statistics and research, and other areas. Candidates are required to participate in extensive practicum, internship, and research experiences.

Two options are available for the MA degree: On-campus option and distance learning option. In the on-campus option, our MA degree is incorporated into program requirements for candidates in our EdS and PhD degree programs. The MA degree is required and built into our program of study, and students admitted to the EdS or PhD program receive the MA along the way during their programs. After about one-and-one-half years into their graduate programs of study, EdS and PhD candidates have completed the 33 graduate credits for the MA degree during the course of their EdS or PhD programs. EdS and PhD students then go on to complete the additional coursework, practica and internships for their EdS or PhD degrees.

The distance learning option blends online classes with intensive campus weekends and is offered through the College of Continuing Studies: http://bamabydistance.ua.edu/degrees/educational-psychology-school-psychometry/index.php. The distance learning program does not hold NASP approval. Currently, only applicants who hold a valid bachelor’s-level Professional Educator Certificate in a teaching field or a valid master’s-level Professional Educator Certificate in another area of instructional support will be considered for the distance program.

**Admission Requirements**

Applicants to the on-campus program are encouraged to complete their applications by January 15 for admission the following fall semester. Statement of purpose and letters of recommendation consistent with goals of the program, GRE score of 300 or above and a GPA of 3.0 on a 4.0 scale are needed for regular admission. Applicants may be considered for admission in some circumstances if they meet either the GPA requirement OR the GRE score requirement; however, both factors are considered. In addition, distance learning applicants must meet admission requirements established by the Alabama State Department of Education:

1. valid bachelor’s level or master’s level professional educator certificate in a teaching field OR valid master’s level professional educator certificate in another area of instructional support,
2. two years of acceptable educational experience, and
3. fingerprinting/background clearance

See the Admission Criteria section of this catalog for more information.

**Degree Requirements (Distance Learning Program)**

This course listing applies to those who begin this program June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C.

**Certification**

Requirements for certification and licensure in School Psychometry vary from state to state. Students are expected to determine the requirements for the state in which they intend to practice before beginning the program.

Graduates who met admission criteria above and obtain the MA degree in Educational Psychology-School Psychology in the distance learning program may be eligible for Alabama Class A certification in School Psychometry IF the following prerequisites are met:

- a passing score on comprehensive exams, and
Qualitative Research, Graduate Certificate

The primary mission of the Educational Research Program is to offer a quality graduate program that prepares scholars to critically engage in educational research and evaluation, develop appropriate and innovative research designs, and contribute conceptually sound analyses to the overlapping fields of education, the social sciences, and the health sciences.

The Educational Research Program offers a PhD in educational research and post-master's certificate in qualitative or quantitative research. There is an EdS offered in conjunction with educational psychology. There are also two MA options offered in collaboration with educational psychology. These options are learning and evaluation (thesis and nonthesis options), and program evaluation (nonthesis only). The degrees require coursework in educational statistics, assessment/measurement, program evaluation, and qualitative research. A student may choose to specialize in educational statistics, program evaluation, assessment/ measurement, research methodology, or qualitative research at the PhD level. Field experiences are required as part of the program.

Graduate Certificate in Qualitative Research

The Graduate Certificate in Qualitative Research is a 15-credit course sequence that integrates theoretical knowledge with practical application and field-based experience. Students who complete the certificate will have developed the methodological expertise and background necessary to be recognized as an emerging scholar in the field of qualitative inquiry. Though this certificate is housed in the College of Education, students from all disciplines are welcome to apply.

How to Apply:
1. Apply through the Graduate School's online application center.
2. Select the Qualitative Research Certificate Program when applying

Application Materials include:
1. Statement of Purpose focusing on the student's goals in pursuing a Qualitative Research certificate;
2. Writing sample submitted directly to the department for faculty consideration

General Requirements:
- Student must have a Master's degree in education (or a related field) and be accepted to the Qualitative Research non-degree certificate program by the Graduate School and departmental faculty.
- Applications will consist of evidence of having a Master's degree, a statement of purpose, and writing sample.
- Student must have a minimum of 15 required hours.
The primary mission of the Educational Research Program is to offer a quality graduate program that prepares scholars to critically engage with educational research and evaluation, develop appropriate and innovative research design, and contribute conceptually sound analyses to the overlapping fields of education, the social sciences, and the health sciences.

The Educational Research Program offers the PhD in educational research and post-master's certificate in qualitative or quantitative research. ### How to Apply:

1. Apply through the Graduate School’s online application center.

Application Materials include:

1. Statement of Purpose focusing on the student’s goals in pursuing a Quantitative Research certificate;
2. Evidence of prerequisite research/statistics courses comparable to BER 640 Quantitative Research II, must have achieved a grade of B or better in prerequisite research courses.

**General Requirements:**

- Student must have a Master’s degree in education (or a related field) and be accepted to the Quantitative Research non-degree certificate program by the Graduate School and departmental faculty.
- Applications will consist of evidence of having a Master’s degree, a statement of purpose and evidence of prerequisite courses.
- Student must have a minimum of 15 required hours.
- Certificate completion will be monitored by certificate program administrators.

Certificate Completion Requirements: All courses listed above

Time Limit: 6 Years.

You may contact Dr. Jamie Mills about enrolling in this certificate: jmills@bamaed.ua.edu

Total Hours 15
Admission Requirements

Admission to pursue an educational specialist degree in educational psychology (Educational Research emphasis) is based upon success in admission for graduate study with the Graduate School as well as the following: completion of a master's degree in the behavioral sciences, education, math or statistics.

Statement of purpose and letters of recommendation consistent with goals of the program, GRE score of 300 or above and a GPA of 3.0 on a 4.0 scale are needed for regular admission. Prospective students are encouraged to complete their applications by January 15 for admission the following fall.

See the Admission Criteria section of this catalog for more information.

School Psychology, Ed.S.

School Psychology

The University of Alabama’s School Psychology program is designed to provide exemplary graduate training in research, application, and practice related to learning, development, and mental health of children and youth, as well as their families, educators, and other professionals who work with them. The School Psychology Program admits candidates to the master’s (MA), educational specialist (EdS), and PhD graduate degree programs. The degree programs prepare candidates for direct school-based practice and, for PhD candidates, careers in academic and other settings as faculty members, researchers, and practitioners. These programs focus on the provision of school psychology services that are based on a strong foundation of research and application related to learners and learning processes, and they include an integrated and sequential program of study with comprehensive coursework and supervised field experiences. Candidates participate in courses and seminars in assessment and data collection; interventions and decision making, prevention and consultation, professional school psychology, sociocultural foundations, psychological foundations, human development, educational foundations, statistics and research, and other areas. Candidates are required to participate in extensive practicum, internship, and research experiences.

Two options are available for the EdS degree: On-campus option and distance learning option:

The traditional, on-campus EdS and PhD degrees in the School Psychology Program hold full approval status from the National Association of School Psychologists (NASP) and national recognition by CAEP. Applicants with undergraduate or previous graduate degree in psychology, education, human development, or related fields are eligible for admission to the traditional, on-campus School Psychology program.

The distance learning option blends online classes with intensive campus weekends and is offered through the College of Continuing Studies. The distance learning program does NOT hold NASP approval. Currently, only applicants who hold master’s level, professional educator certification in psychometry or special education from a state department of education will be considered for the hybrid program.

Admission Requirements

Statement of purpose, vita/resume, and letters of recommendation consistent with goals of the program, GRE score of 300 or above and a GPA of 3.0 on a 4.0 scale are needed for regular admission. Applicants may also be considered for admission in some circumstances if they meet either the GPA requirement OR the GRE score requirement, but not both.

Applicants to the on-campus program are encouraged to complete their applications by January 15 for admission the following fall semester. Note that a prior graduate degree or educator certification is NOT required for admission to our on-campus EdS or PhD degree programs.

Applicants to the distance learning program are encouraged to complete their applications by April 15. Statement of purpose, vita/resume and letters of recommendation consistent with goals of the program, GRE score of 300 or above and a GPA of 3.0 on a 4.0 scale are needed for regular admission. Applicants may also be considered for admission in some circumstances if they meet either the GPA requirement OR the GRE score requirement, but not both. In addition, distance learning applicants must meet admission requirements established by the Alabama State Department of Education:

1. valid master's level certification as a school psychometrist or in special education
2. two years of acceptable educational experience
3. fingerprinting/background clearance

See the Admission Criteria section of this catalog for more information.

Certification

Requirements for certification and licensure in school psychology vary from state to state. Students are expected to determine the requirements in the state or states in which they are interested in practicing before beginning the program. The degrees from the School Psychology program may lead to state and national credentials:

- Graduates of the NASP-approved (main campus) program, who obtain the EdS and PhD degrees in School Psychology, are eligible for the National Certification in School Psychology (NCSP), following successful completion of the national school psychologist Praxis assessment and internship. The NCSP is used by over 30 states, including Alabama, as one possible route to grant state certification in school psychology.
- Graduates of the distance learning program who obtain the EdS in Educational Psychology-School Psychology may be eligible for Alabama Class AA certification in School Psychology if the following prerequisites are met:
  a. a minimum GPA of 3.50 on all program courses (effective for candidates unconditionally admitted to a Class AA School Psychology program July 1, 2017, and thereafter.)

Requirements for the Graduate School (Degree Requirements (p. 20)) and the College of Education (Master’s (p. 20), Professional Certification, EdS (p. 22), Doctoral (p. 23)) are detailed in earlier sections of this catalog. For specific program requirements visit the College of Education Programs web site or for a student handbook and additional information, email or call: Chairperson, School Psychology, The University of Alabama, College of Education, Box 870231, Tuscaloosa, AL 35487-0231; phone (205) 348-7575; fax (205) 348-0683; program office, 306 Carmichael Hall, email: pharriso@bamaed.ua.edu.
School Psychology, Ph.D.

School Psychology

The University of Alabama School Psychology Program is designed to provide exemplary graduate training in research, application, and practice related to learning, development, and mental health of children and youth, as well as their families, educators, and other professionals who work with them. The School Psychology Program admits candidates to the master’s (MA), educational specialist (EdS), and PhD graduate degree programs. The degrees in school psychology prepare candidates for direct school-based practice and, for PhD candidates, careers in academic and other settings as faculty members, researchers, and practitioners. The degree programs in school psychology focus on the provision of school psychology services that are based on a strong foundation of research and application related to learners and learning processes. The school psychology degree programs include an integrated and sequential program of study with comprehensive coursework and supervised field experiences. Candidates participate in courses and seminars in assessment and data collection; interventions and decision making, prevention and consultation, professional school psychology, sociocultural foundations, psychological foundations, human development, educational foundations, statistics and research, and other areas. Candidates are required to participate in extensive practicum, internship, and research experiences.

The PhD program is an on-campus option only; there is no distance learning option.

Admission Requirements

Prospective students for the PhD program are encouraged to complete their applications by January 15 for admission the following fall semester. Statement of purpose, vita/resume, and letters of recommendation consistent with goals of the program, GRE score of 300 or above and a GPA of 3.0 on a 4.0 scale are needed for regular admission. Applicants may also be considered for admission in some special circumstances if they meet either the GPA requirement OR the GRE score requirement, but not both. Note that a prior graduate degree or educator certification is NOT required for admission to our on-campus PhD degree program.

Department of Kinesiology (KIN)

- Majors
  - Human Performance (MA) (p. 447)
  - Human Performance (PhD) (p. 449)

KIN500 Sociology of Sport
Hours 3

Examines the institution of sport from a sociological perspective. Provides an opportunity to critically analyze the assumptions surrounding the social significance of sport through a process of reflective thought.

KIN506 Techniques of Research
Hours 3

Designed to acquaint the student with the types of research and the methods and materials necessary for scientific inquiry. Includes the development of a research proposal, with emphasis on form and style.

KIN507 Lab Techniques Phys Education
Hours 3

Theoretical and practical understanding of physiological instrumentation and measurement in physical education, including practical laboratory experiences, as preparation for graduate research or other research opportunities.

KIN508 Perceptual Motor Development
Hours 3

Perceptual-motor development of infants and young children. Current philosophies, theories, and methods; laboratory work in movement exploration. A clinical experience is required.

KIN510 Tchg & Supervg Elem PE
Hours 3

Open to elementary education and physical education majors. Reviews the essential concepts for successfully teaching grades 1-6; learning, function and duties of consultant.

KIN511 Readings in Sport Management: Trends and Issues
Hours 3

Online course. This course is designed to provide students with an opportunity to immerse themselves in the extant literature relating to trends and issues in sport and recreation management. Emphasis will be placed on approaches to proactively implement the contemporary trends.

KIN512 PE Curriculum
Hours 3

Program content and curriculum planning in grades 1-12 and higher education; includes developing curriculum plan applicable to one's need.
KIN538 Adv Adapted Phys Ed.  
Hours 3  
Pertinent information concerning legislation, mainstreaming, the physical education IEP, and movement problems of individuals who deviate from the norm. A clinical experience is required.

KIN551 Sport Management Internship  
Hours 3  
This course provides students with the opportunity to gain applied, practical experience in a suitable sport management related setting.

KIN552 Legal Issues in Sport  
Hours 3  
Legal Issues in Sport provides an overview of legal issues that frequently arise in the context of sport and physical activity. Emphasis will be placed on how sport managers should respond to specific situations based on the law.

KIN553 Sport Facility and Event Management  
Hours 3  
This course will provide students with an understanding of the factors involved in planning, designing, equipping, and managing sport facilities and event logistics.

KIN555 Sport Finance  
Hours 3  
An overview of the budgeting process, sources of revenue, types of expenditures, issued and innovations in financing for sport management.

KIN562 Admin Sports Programs  
Hours 3  
Problems and issues in organizing and administering secondary and college athletic programs.

KIN566 Evaluation in Phys Education  
Hours 3  
Covers practical aspects of measurements and evaluation in schools and colleges to measure clients, patients, and students. A practical measurement/evaluation on project is completed.

KIN585 Lab & Field Experience  
Hours 3,6  
Provides for teaching laboratory, internship, and/or practicum experiences, according to individual needs and goals.

KIN588 Marketing and the Media  
Hours 3  
This course examines the various components of sport marketing and consumer culture. Particular emphasis is given to the influence of the media in promoting sporting goods and products.

KIN590 Sports/Dance Workshop  
Hours 1-6  
In-depth study of physical education subject matters (gymnastics, dance, fitness, aquatics, track and field, and sports/games) focusing on content, theoretical frameworks, and educational perspectives. Students enroll in 1-credit-hour workshops according to individual needs and certification requirements.

KIN592 Physiology of Exercise  
Hours 3  
Designed to be an overview of the human physiological response to exercise.

KIN593 Advanced Fitness Testing and Exercise Prescription  
Hours 3  
Explores advanced fitness testing and exercise prescription techniques using practical experiences.

KIN595 Workshop Physical Education  
Hours 1-6  
This course is designed to help students improve their ability to teach elementary, secondary, and/or college physical education and understand theory and research as it is applied in each setting.

KIN596 Independent Study  
Hours 1-3  
Designed to provide the opportunity for independent study in a specific area of physical education.

KIN598 Non-Thesis Research  
Hours 3  
Experimental or analytical investigation of problems in physical education.

KIN599 Thesis Research  
Hours 1-6  
Research in a selected area of physical education.

KIN602 Readings Physical Education  
Hours 3  
An independent readings course for doctoral students.

KIN603 Special Proj Physical Ed  
Hours 3  
Experimental or analytical investigations of problems in physical education, arranged on an independent basis for doctoral students.

KIN604 Sem in Physical Education  
Hours 3  
Critical issues in athletics, curriculum, instruction, evaluation, research, fitness, individual differences, and financial support.

KIN612 Res Phys Ed Teach Education  
Hours 3  
An examination of the development, design, and application of research in physical education/teacher education.

KIN615 Organizational Behavior & Theory Development in Sport  
Hours 3  
The purpose of this course is to introduce the student to critical areas of sport management and the theories associated with organizational behavior and theory development.

KIN622 Analy Res Teach Phys Ed  
Hours 3  
A thorough analysis of published research on teaching in physical education.
KIN632 System Observ Phys Educ  
Hours 3  
An examination of analytical techniques used to collect and evaluate data related to teacher and student behaviors. Instruction in the development and use of systematic observation instruments is provided.

KIN642 Instruct Design PE High Ed  
Hours 3  
An examination of methods, applications, and current research related to instructional design.

KIN685 Field & Lab Experience  
Hours 3  
Arranged on an independent basis for doctoral students. Participation and research in schools and agencies.

KIN690 Exercise Health Disease  
Hours 3  
Designed to acquaint the student with the health benefits of regular physical activity and exercise. The most recent research literature is critically analyzed.

KIN691 Res Sociology Human Perf  
Hours 3  
Provides students with an in-depth understanding of the literature on the occupational socialization of physical education teachers.

KIN692 Sem Exercise Physiology  
Hours 3  
Provides an opportunity to study in depth the scientific literature related to various exercise physiology topics. May be taken more than once.

KIN698 Non-Dissertn Research  
Hours 3  
Experimental or analytical investigation of problems in kinesiology.

KIN699 Dissertation Research  
Hours 1-15  
Design, research, and/or analytical investigation of a problem in the field of kinesiology to satisfy the dissertation requirement for the doctoral degree.

Human Performance, MA

The Department of Kinesiology offers the Master of Arts degree with the following areas of study:

- sport management (two options: non-certification or Class A Sport Manager certification)
- exercise science
- general studies in human performance (coursework options from exercise science, sport pedagogy, and sport management)
- sport pedagogy (traditional Class A and Alternative Class A certification in physical education)

The latter three programs are available under Plan I (thesis) and Plan II (nonthesis). The sport management area of study involves completing a “Capstone experience” project. In addition, there is a sport management area of study that leads to Class A Sport Manager certification. The sport pedagogy area of study leads to Class A Physical Education certification. Additionally, the sport pedagogy area of study offers a non-traditional approach to certification for those with an undergraduate degree in a non-teaching field and leads to Alternative Class A certification in physical education.

There are admission requirements specific to the department in addition to those in the Graduate Catalogs on Admission Criteria. Please pay special attention to the Degree Requirements (p. 20) section of this catalog for important information on transfer of course work, time limits, plan of study, admission to candidacy, etc.

See the Admission Criteria section of this catalog for more information.

For the College of Education, note the sections on General Admission (p. 11), Master’s (p. 20), Professional Certification, and Doctoral (p. 20) earlier in this catalog.

Physical Education, Traditional Class A Certification

For admission, applicants must hold appropriate prior certification in physical education (P-12) or the approved equivalent.

This course listing applies to those who begin this program June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. A minimum of 30 hrs of course credit must be earned, and a comprehensive exam must be successfully completed. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C.

Required course:

KIN 510 Tchg & Supervg Elem PE  3

Foundations of Professional Studies:

KIN 691 Res Sociology Human Perf  3

Select ONE course from these SDE approved diversity courses:  3

BEF 503 History Of Amer Edcun
BEF 507 Sociology Of Education
All courses in the program, with no grade below a C, and earn passing scores on a comprehensive exam and the appropriate Praxis subject assessment(s).

**Curriculum and Teaching:**
- KIN 510  Tchg & Supervg Elem PE  3
- KIN 512  PE Curriculum  3

**Foundations of Professional Studies:**
- BEF 510  Phil Hist Socl Founds Ed  3

**Technology:**
- CAT 531  Computer Based Instruction  3

**Evaluation of Teaching and Learning:**
- KIN 566 is required if KIN 366 was not taken prior to unconditional admission.

**Literacy:**
- CRD 512 is required if CRD 350 was not taken prior to unconditional admission.

**Teaching Field:**
- KIN 595  Workshop Physical Education  6
- KIN 590  Sports/Dance Workshop  6

**Full-time Internship:**
- KIN 585  Lab & Field Experience  6

**Special Education Coursework:**
- SPE 500 is required if SPE 300 was not completed prior to unconditional admission.

**Total Hours:**
- 30-39

**Physical Education, Alternative Class A Certification**

In addition to meeting admission requirements of the Graduate School, applicants must complete specified undergraduate prerequisite courses.

For admission to the Alternative Class A (non-traditional) program in physical education (sport pedagogy), applicants must meet the following requirements:

- **Transcript evaluation:** Applicants should contact the Office of Student Services & Certification for a transcript evaluation to determine prerequisite courses and other requirements.
- **Degree requirement:** An appropriate bachelor’s degree from a regionally accredited institution with a minimum overall GPA of 2.75 OR a master’s degree with a GPA of at least 3.0 is required.
- **Assessment of basic skills:** Applicants must meet current basic skills requirements of the Alabama Educator Certification Assessment Program (AECAP). Effective September 1, 2017, passing scores on the Praxis Core Academic Skills for Educators Tests of mathematics, reading and writing are required (or passing scores on all components of the previously accepted Basic Skills assessment before 9/1/17). Information about the Praxis Core tests is available online at https://www.ets.org/praxis/al/al_teacher_ed or in the Office of Student Services & Certification (104 Carmichael Hall).
- **Teaching Field:** Applicants must have an academic content major (or the equivalent) in the teaching field. The transcript evaluation will determine if an applicant meets the teaching field requirement.
- **Fingerprinting/background clearance**

This course listing applies to those who begin this program June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C, and earn passing scores on a comprehensive exam and the appropriate Praxis subject assessment(s).
Human Performance, Ph.D.

The Department of Kinesiology offers programs leading to the Doctor of Philosophy (PhD) degree in human performance with areas of study in exercise science and sport pedagogy.

Exercise Science

The Doctor of Philosophy (Ph.D.) degree with a specialization in exercise science has been designed to provide students with the coursework, laboratory, and practical experiences to become a leading educator and researcher.

Admission

Admission to the PhD program area of study in exercise science is competitive and based on prior academic achievement, graduate record examination (GRE) scores, recommendations, and research interests. Minimum requirements consist of:

- a master's degree from an accredited institution
- a composite (verbal and quantitative) GRE score of 300
- one of the following:
  - 3.0 GPA for the last 60 semester hours in a degree program
  - 3.0 GPA for a completed graduate degree program.

Preference is given to students who have strong backgrounds in the Life Sciences or related fields, meet the minimum requirements stated above, and have research interests compatible with at least one of the Exercise Science faculty members.

Financial Support

A limited number of graduate assistantships are available each year. These assistantships are awarded on a competitive basis. Graduate assistants may be asked to assist with teaching, research, and/or the outreach mission of the academic unit.

Procedures & Deadlines

Interested applicants should apply online to the Graduate School of the University of Alabama (http://graduate.ua.edu/applicants.html). Students will be admitted on a rolling basis at the discretion of program faculty as applications are received. Prospective students should identify a prospective research mentor and contact that person for more information regarding an admission timeline.

Residency Requirement

A minimum of two academic years of graduate study beyond the master's degree is required for completion of the Ph.D. program in the College of Education. At least one year of doctoral study must be spent in continuous residence as a full-time student (see also Alternative Residency Options on the departmental website).

Sequence of Steps through the Ph.D. Program

The sequence of steps for a doctoral student from admission to graduation is:

1. Satisfaction of admission requirements
2. Formation of doctoral program of study
3. Completion of coursework
4. Completion of major comprehensive exams
5. Formation of doctoral dissertation committee
6. Proposal of doctoral dissertation
7. Admission to candidacy
8. Oral examination of the dissertation
9. Submission of final copies of the dissertation

The Program

The Ph.D. degree requires a minimum of 72 hours beyond the master's degree. This program includes 1) 24-hour exercise science core; 2) 12-hour competency in research and statistics; 3) 12 hours of foundation courses (e.g., human physiology, biochemistry, endocrinology, etc.) to support the major; and 4) 24 hours of dissertation.

Doctoral Dissertation

The doctoral dissertation is designed to provide students with a significant research experience and is considered a contribution to the research and the literature in the field. It is anticipated that students will complete credits for the dissertation after the completion of all coursework and the comprehensive examination. The student will work closely with the doctoral program chair and committee in developing a dissertation proposal and conducting the dissertation research. The doctoral dissertation committee will consist of a minimum of five faculty members, one of whom must be from outside the department.

Advising

All doctoral students will be advised by a major professor with whom they will have been aligned as part of the admissions process. In the event a doctoral student is granted admission without a research mentor/major professor, they will be assigned an interim advisor upon admission to the Ph.D. program. The advisor will assist the student in the evaluation of previous work, selection of coursework, and research oversight.

Time Limit for Doctoral Study

Students must complete all requirements for the Ph.D. degree within seven calendar years from the time they are officially admitted to a program of study.

Sport Pedagogy

The Doctor of Philosophy (Ph.D.) degree in human performance with a specialization in sport pedagogy has been designed to provide students with the coursework, laboratory, and practical experiences to become a leading educator and researcher.

Residency Requirement

A minimum of two academic years of graduate study beyond the master's degree is required for completion of the Ph.D. program in the College of Education. At least one year of doctoral study must be spent...
in continuous residence as a full-time student (see also Alternative Residency Options on the departmental website).

Admission to the Ph.D. Program
To be considered for regular admission to the Ph.D. program, a student must satisfy the following criteria: 1) a master's degree from an accredited institution and 2) a 3.0 grade point average for the last 60 semester hours (4.0 scale); and 3) Applications are accepted year round.

Sequence of Steps through the Ph.D. Program
The sequence of steps for a doctoral student from admission to graduation is:

- Satisfaction of admission requirements
- Formation of doctoral program of study
- Completion of coursework
- Completion of comprehensive exams
- Formation of doctoral dissertation committee
- Proposal of doctoral dissertation
- Admission to candidacy
- Oral examination of the dissertation
- Submission of final copies of the dissertation

The Program
The Ph.D. degree requires a minimum of 72 hours beyond the master’s degree. This program includes:

- 24-hour sport pedagogy core
- 12-hour competency in educational research and statistics
- 12 hours of foundation courses to support the major
- 24 hours of dissertation

Doctoral Dissertation
The doctoral dissertation is designed to provide students with a significant research experience and is considered a contribution to the research and the literature in the field. It is anticipated that students will complete credits for the dissertation after the completion of all coursework and the comprehensive examination. The student will work closely with the doctoral program chair and committee in developing a dissertation proposal and conducting the dissertation research. The doctoral dissertation committee will consist of a minimum of five faculty members, one of whom must be from outside the department.

Advising
All doctoral students will be assigned an interim advisor upon admission to the Ph.D. program. The interim advisor will assist the student in the evaluation of previous work, selection of coursework, and the preliminary work in selecting a program chair and a program advisory committee.

Financial Support
A limited number of graduate assistantships are available each year. These assistantships are awarded on a competitive basis. Graduate assistants may be asked to assist with teaching, research, and/or the outreach mission of the academic unit.

Time Limit for Doctoral Study
Students must complete all requirements for the Ph.D. degree within seven calendar years from the time they are officially admitted to the program.

Department of Music Education (MUE)

General Requirements
Before 12 hours of graduate study are completed in any graduate degree program, students enrolled in music education graduate programs may be required, at the discretion of the department, to demonstrate professional competence in music theory and music history and, if requested, to perform a placement audition on the major instrument. Information about specific examinations can be obtained through the Music Education Office, Box 870366, Tuscaloosa, AL 35487-0366 (205) 348-6054.

Graduate-level music education courses which meet requirements for specific State-approved certification programs (Class A, Class AA) are typically offered during summer sessions. Applicants for music education graduate degrees should anticipate that summer enrollment may be necessary to complete degree requirements. Questions concerning the rotation of course offerings should be directed to the Music Education Department; Box 870366, Tuscaloosa, AL 35487-0366; (205) 348-6054.

The content of all graduate programs in music education is determined, in part, by the background and goals of the individual student. Each program will include graduate courses in music education (choral, instrumental, or general) and professional education, and may include studio courses and other graduate study as indicated by the student's background and interests in consultation with his or her advisor. It is recommended that each student contact his or her advisor during the first term of graduate study in order to plan the program.

Degree requirements are noted on the official Plan of Study for the various degrees and tracks. These documents are available from the chairperson or administrative staff for the department.

Traditional Class A Certification in Music Education (MA in Secondary Education)
Applicants to the traditional Class A program must hold appropriate prior certification in Music Education (Instrumental or Choral) to be considered for admission. An acceptable score on either the GRE or the MAT is required for admission.

Applicants may be required, at the discretion of the department, to demonstrate professional competence in music theory and music history; to submit a tape of an ensemble performance or teaching sample; and, if requested, to perform a placement audition on the major instrument prior to the completion of 12 hours of graduate study. If requested, applicants will interview with the music education faculty prior to an admission decision. Contingent upon faculty and Graduate School approval, conditional admission is granted in some instances.

Two MA plans in Music Education (Plan I and Plan II, below) are offered in the College of Education. Both Plan I and Plan II lead to Alabama Class A (masters level) professional educator certification. Both require compliance with the State-approved certification program and a minimum of 30 graduate semester hours as follows: (a) required music education courses, 6 hours; (b) foundations of professional studies, 6 hours; (c) educational research, 3 hours; (d) technology, 3 hours; (e) faculty-approved teaching field, 12 hours; and, additional requirements/ electives, 9-3 hours. Candidates under Plan I for the master's degree must write a thesis (6 semester hours of thesis research may be used toward the degree). Plan II candidates must earn a minimum of 30 graduate semester hours. No music education master's degree programs are
Applicants must meet the following requirements:

acceptable score on either the GRE or the MAT is required for admission. Specified undergraduate prerequisite courses are also required. An undergraduate degree in an area of music from a school accredited by the National Association of Schools of Music. Applicants must meet the following requirements:

- **Transcript evaluation:** Applicants should contact the Office of Student Services & Certification for a transcript evaluation to determine prerequisite courses and other requirements.

Degree requirement: An appropriate bachelor’s degree from a regionally accredited institution with a minimum overall GPA of 2.75 OR a master’s degree with a GPA of at least 3.0 is required.

Assessment of basic skills: Applicants must meet current basic skills requirements of the Alabama Educator Certification Assessment Program (AECAP). Effective September 1, 2017, passing scores on the Praxis Core Academic Skills for Educators Tests of reading and writing are required (or passing scores on all components of the previously accepted Basic Skills assessment before 9/1/17). Information about the Praxis Core tests is available online at https://www.ets.org/praxis/al/al_teacher_ed or in the Office of Student Services & Certification (104 Carmichael Hall).

Teaching Field: Applicants must have an academic content major (or the equivalent) in the teaching field. The transcript evaluation will determine if an applicant meets the teaching field requirement.

Fingerprinting/background clearance

This course listing applies to candidates having appropriate prior certification who begin this program at UA on June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.25 on all courses in the program below, with no grade below a C.

Class AA Certification in Music Education (EDS in Secondary Education)

Applicants to the EdS program must hold valid Alabama Class A certification in Music Education or an approved equivalent certification to be considered for admission. An acceptable score on either the Graduate Record Examination or the Miller Analogies Test is required.

Additionally, applicants must successfully complete a formal screening interview with the music education faculty prior to an admission decision. Applicants are required to demonstrate professional competence in music theory and music history; to submit a tape of an ensemble
performance or teaching sample; and, if requested, to perform a placement audition on the major instrument prior to the completion of 12 hours of graduate study. It is highly recommended that applicants have a minimum of three years’ full-time contractual teaching experience prior to beginning a post-masters degree program. Contingent upon faculty and Graduate School approval, conditional admission is granted in some instances.

A minimum of 30 hours of appropriate work beyond the MA degree, including completion of a research project, is required for the educational specialist (EdS) degree. The total hours of graduate work, including the MA degree, must be 60 hours. Those pursuing certification options must be certain their programs of study meet all certification requirements according to programs approved by the Alabama Department of Education. Courses used to qualify for a lower level supporting certificate cannot be used again in a higher level certification program. The fulfillment of these requirements leads to the Alabama Class AA professional educator certificate in Music Education (P-12).

This course listing applies to candidates having appropriate prior certification who begin this program at UA on June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.50 on all courses in the program below, with no grade below a C.

### Required Courses (See advisor to select from the following):

- MUE 630 Mu Ed Curric Theory Dv *
- MUE 635 Curriculum Projects Mued
- MUE 698 Non-Dissertatn Research
- MUE 525 Choral Techn Materials
- MUE 526 Instrml Techn Materls

If the above courses were part of the Class A certificate, approved MUE electives may be utilized.

### Teaching Field (See advisor to select from the following):

- MUE 525 Choral Techn Materials
- MUE 526 Instrml Techn Materls
- MUE 560 Functional Instruments
- MUE 631 Doctor of Philosophy Diagnostic/Admission Exam
- MUE 635 Curriculum Projects Mued
- MUE 690 Advanced Seminar Music Educati

### Foundations of Professional Studies:

- MUE 500 Foundatn Music Education

Select ONE of these SDE approved diversity courses:

- BEF 503 History Of Amer Educn
- BEF 507 Sociology Of Education
- BEF 534 Multicultural Education
- BEF 575 Found Educn Through Film
- BEF 607 Readings In Soc Of Ed
- BEF 650 Critical Race Theory In Educ
- BEF 667 Multicult Soc Ed Leadership
- BEF 681 Ethics And Education

### Educational Research:

- MUE 540 (If BER 500 was part of the Class A program, select a music education elective instead of MUE 540.)

### Additional requirements:

- SPE 500 is required if a special education survey course was not part of the undergraduate program or another graduate program.

Total Hours: 30-33

* If MUE 530 Mus Ed Curr Theory Dev is part of Class A certificate, select MUE 635.

### EdD and PhD in Secondary Education (Music Education option)

An acceptable score on either the Graduate Record Examination or the Miller Analogies Test is required. Applicants should have either a bachelor’s or master’s degree in music education. Additionally, applicants must submit a writing sample and successfully complete a formal screening interview with the music education faculty prior to an admission decision. Applicants are required to demonstrate professional competence in music theory and music history; to submit a tape of an ensemble performance or teaching sample; and, if requested, to perform a placement audition on the major instrument prior to the completion of 12 hours of graduate study. It is highly recommended that applicants have a minimum of three years’ full-time contractual teaching experience prior to beginning a post-masters degree program. Contingent upon faculty and Graduate School approval, conditional admission is granted in some instances.

The doctoral degrees (EdD and PhD) in secondary education (music education option) are designed to include a broad field of study in a major area of specialization. Selection and sequence of courses are contingent on the skills, background, and professional goals of the student. Each student’s program will include courses in music, music education, professional education, and research.

All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit for the doctoral degree.

A department-approved Admission to Candidacy for the Doctoral Degree is submitted to the Graduate School as soon as possible after passing the comprehensive (preliminary) examination. For details on Plan of Study, Admission to Candidacy, and all other degree requirements, visit the Degree Requirements section of this catalog.

Graduate work in music education is an option through the Curriculum and Instruction Department in the College of Education. Interested applicants should contact Music Education, Box 870366, Tuscaloosa, AL 35487-0366 (205) 348-6054, or speak with a music education adviser.

- MUE500 Foundatn Music Education
  Hours 3

Investigation of the purposes and functions of music education from antiquity to the present. Philosophical foundations and a chronological survey of historical issues related to the inclusion of music in general education will also be discussed.

- MUE525 Choral Techn Materials
  Hours 3

Organization, rehearsal, programming and performance of choral groups.

- MUE526 Instrml Techn Materls
  Hours 3

Organization, rehearsal, programming and performance of instrumental groups.
MUE530 Mus Ed Curr Theory Dev  
Hours 3  
Analysis of music curricula and study of the development process.

MUE532 Research in the History and Aesthetics of Music Education  
Hours 3  
This course will address various techniques into the history and aesthetics of music education.

MUE535 Curriculum Projects In Mued  
Hours 1-3  
The design, proposal, implementation, evaluation, and reporting of a curriculum project or an improved instructional procedure in music. Independent study.

MUE540 Intro Research In Mued  
Hours 3  
Introduction to research study in music education.

MUE560 Functional Instruments  
Hours 0.5,1  
No description available

MUE580 Introduction to Graduate Studies in Music Education  
Hours 3  
Introduction designed to prepare student for the application of scholarly thinking to topics in the areas of music psychology, teacher training, and music education.

MUE586 Marching Band Techniques  
Hours 3  
Fundamentals of marching, maneuvering, and preparation and presentation of formations. Prerequisite: Graduate Standing.  
Prerequisite(s): Graduate Standing

MUE589 Clinical Experiences in Music Education  
Hours 2-6  
Part-time supervised teaching experience in secondary instrumental music education. Four-twelve hours weekly for 14 weeks in Tuscaloosa area public schools.

MUE590 Seminar In Music Education  
Hours 1-3  
Study of special topics in music education.

MUE591 Workshop In Music Education  
Hours 1-3  
Provide students with professional development opportunities in the field of music education through attendance at regional and national conferences, especially through the AMEA Annual Conference. Attendance at sessions including workshops on topics affecting all aspects of teaching, especially as they relate to music educators. Prerequisite: Graduate standing.  
Prerequisite(s): Graduate standing

MUE597 Practicum Music Educatn  
Hours 3-12

MUE600 Foundations of Music Education  
Hours 3  
The purposes of this course are (a) to introduce ideas, people, and events that inform the history and philosophy of Western music education, particularly in the North American context, and (b) to acquaint students with tools of philosophical and historical inquiry appropriate for their ongoing engagement with music education as reflective practitioners and as graduate student researchers.

MUE625 Choral Techniques and Materials  
Hours 3  
This course is an overview of resources for college level students of choral teaching and conducting. It includes such topics as philosophy, learning theory, human behavior, and history as it investigates the various roles of the choral conductor. It also reviews such issues as the relationship between conductor and vocalist, mechanics of singing, and rehearsal strategies informed by the findings of past choral scholars and some of the most recent and salient research in choral singing. It is designed as a graduate level survey course for those interested in expanding their knowledge base in various choral methods techniques, within the context of both historical and divergent contemporary choral rehearsal and performance practices.

MUE626 Instrumental Tech & Materials  
Hours 3  
Advanced organization, rehearsal, programming and performance of instrumental groups.

MUE630 Mu Ed Curric Theory Dv  
Hours 3  
Advanced analysis of music curricula and study of the development process.

MUE631 Doctor of Philosophy Diagnostic/Admission Exam  
Hours 0  
Examination required prior to completion of no more than six hours of study for admission to a Ph.D. program in music education.

MUE635 Curriculum Projects Mued  
Hours 1-3  
The design, proposal, implementation, evaluation, and reporting of a curriculum project or an improved instructional procedure in music. Independent study.

MUE641 Adv Research Music Educ  
Hours 3  
The design, implementation and reporting of research studies that illustrate a variety of methodological and statistical plans for research in music education.  
Prerequisite(s): MUE 540
MUE690 Advanced Seminar Music Education
Hours 1-3

SPE500 Intro Exc Childr/Youth
Hours 3
Introduction to programs and problems of children and youth who deviate from the norm in physical, mental, emotional, and social characteristics.

SPE501 Diagnosis and Assessment of Exceptional Children and Youth
Hours 3
Comprehensive study of diagnosis and assessment, emphasizing concepts of tests and measurements, formal and informal assessment, test administration, and use of diagnostic results in educational intervention.

SPE502 Adv Behav Mgt Spec Educ
Hours 3
Concepts and principles of behavior change and management; practical experience in developing plans to prevent and remedy behavior problems. Research project required.

SPE503 Masters Seminar In Spe
Hours 3
Critique of research and research problems in current special education issues.

SPE504 Introduction to Assistive Technology
Hours 3
This is an introductory course for teacher educators in the fundamentals of assistive technology identification, consideration, and implementation.

SPE505 Professionalism
Hours 2
No description available

SPE506 Working W/Families
Hours 3
Examination of the effects of an exceptional child on the family, and the various approaches to intervention with the family.

SPE509 The Learner
Hours 2
No description available

SPE514 Teach Consult Model Spe
Hours 3
Introduction to various direct and indirect service delivery models for students with mild disabilities; consultant techniques demonstrated.

SPE571 Educ Yng Child W/Disablt
Hours 3
An introductory course to the field of early childhood special education, including rationale, legal issues, and characteristics of children from birth through kindergarten.

SPE575 Practicum in Early Childhood Special Education (0-8 years)
Hours 0-6
Involves a demonstration of teaching expertise of candidate with students identified with severe/profound and/or multiple disabilities in special and general education classrooms.

SPE576 Assessment Young Childrn
Hours 3
Selection, administration, and interpretation of assessments of young children (birth through kindergarten).

SPE578 Meth Tch Yng Child W/Dis
Hours 3
Use of curricula, materials, and management techniques for young children (birth through kindergarten) with disabilities.

SPE579 Intern Ed Yg Child Div Abil
Hours 3-6
Fourteen week split internship providing supervised teaching experience in classrooms for young children. Offered spring and fall only. Application for internship must be made the semester prior to internship (excluding summer term) through Office of Educational Field Experience.

SPE581 Psy Gift Tal Child Yth
Hours 3
Examination of the nature of youth with high potential in multiple areas. Contemporary theory, research, and the relationship between definition/identification and educational planning are considered.

SPE582 Teach Gifted And Taltd
Hours 3
Use and evaluation of teaching-learning methods for education of the gifted and talented, including consideration of roles, expectations for learning, and organizational procedures.

SPE583 Creative Prob Solving
Hours 3
A guided sequence of exercises and experiences leading to increased personal creative behavior, with emphasis on methods for nurturing creative talent in students of all ages.

SPE584 Spec Populatn Gift Educ
Hours 3
Examination of a variety of administrative designs, curriculum options, instructional models, and strategies to meet the unique cognitive and affective needs/abilities of special populations of gifted students.

SPE585 Teaching Thinking Skills
Hours 3
Survey of existing thinking-skills programs and techniques for creating new programs for thinking. Emphasis is on integrating thinking skills into gifted education and regular education.

SPE586 Socl Emotl Compnts Talent Dev
Hours 3
This course will explore current research, psychological theory and practical counseling techniques relevant to the social and emotional components of giftedness. Some topics include perfectionism, gender issues, underachievement, and special populations.

SPE587 Indiv Needs Talents Classroom
Hours 3
This course will outline instructional and managerial techniques that can be used in the grade level or heterogeneous classroom to address the individual learning needs, strengths, styles, and preferences of all students.

SPE589 Internship Gift/Talent
Hours 3-9
Intensive, supervised teaching experience in programs for gifted and talented.
SPE590 Intro Mild Disabilities
Hours 3
An intensive study of the background and current perspective on mild disabilities. Emphasis on developing professional knowledge base.

SPE591 Adv Academic Methods Elem
Hours 3
Designed to develop skills in the use of curriculum, materials, and strategies for students with disabilities at the elementary school level.

SPE592 Adv Academic Methods Sec
Hours 3
Designed to develop skills in the use of curriculum, materials, and strategies for students with disabilities at the secondary level.

SPE593 Intro Severe/Profound Disabili
Hours 3
An intensive study of the background and current perspective on severe disabilities. Emphasis is on developing professional knowledge.

SPE594 Methods Severe Disability
Hours 3
Emphasizes educational programming, subject matter, professional responsibilities of teachers and related service personnel, curriculum development, communication, and physical management and handling procedures of individuals with severe disabilities.

SPE595 Practicum in Severe Disabilities Education (K-12 grades)
Hours 0-6
Involves a demonstration of teaching expertise of candidate with students identified with severe/profound and/or multiple disabilities in special and general education classrooms.

SPE596 Practicum in Collaborative (K-6 or 6-12 grades)
Hours 0-6
Involves a demonstration of teaching expertise of candidate with students identified with severe/profound and/or multiple disabilities in special and general education classrooms.

SPE597 Transition In Special Ed
Hours 3
Focuses on the strategies, methods, curriculum, and measurement for facilitating an effective transition from school to adulthood of adolescents with disabilities.

SPE598 Internship In Special Ed
Hours 3-9
Intensive, supervised teaching experience in a special education program.

SPE600 Doctoral Seminar Spe
Hours 3
Required for all first-year doctoral students; diagnostic in function. Activities include examination of career goals and assessment of skills in written and oral presentations. Offered fall semester.

SPE601 Sem Col Teachg In Spe
Hours 3
Course structure, lecturing and other delivery techniques, student evaluation, and practicum supervision are included among topics that are reviewed to develop skills in college training. Offered fall semester.

SPE602 Seminar Research Spe
Hours 3
Focuses on the unique aspects of the exceptional population in relationship to typical statistical and research design procedures. Offered spring semester.

SPE606 Topical Seminar In Spe
Hours 3-6
May be repeated for credit. Selected topics, review and critique of current literature, research problems, and methodology.

SPE609 Practicum In Spe
Hours 3-6
Designed for advanced graduate students. Students practice effective supervision skills or college teaching skills under the direction of the course instructor.

SPE611 Ind Study In Spe
Hours 1-6
Intensive investigation of a specific aspect of special education, by one student under the supervision of a faculty member in the student's area of concentration.

SPE612 Readg Research In Spe
Hours 1-6
For doctoral students, an opportunity to initiate, develop, and successfully defend a dissertation topic dealing with a problem of magnitude in the field of special education.

SPE613 Consult Proc Spe Progs
Hours 3
Training in human-relations techniques and administrative strategies designed to facilitate communication and interaction with individuals and groups in special education programming.

SPE614 Assmt Tch Lrn In Spe
Hours 3
Strategies for curricular designs, teaching methods, and program models using informal and observational techniques to assess teaching effectiveness and learner outcomes (academic and behavioral) in special education programs.

SPE616 Advanced Professional Development
Hours 3
Theories and types of training and development programs will be reviewed and analyzed, needs assessments will be explored and conducted, and professional development sessions will be developed, facilitated, and evaluated.

SPE617 Special Education Leadership, Policy and Law
Hours 3
This course is designed to instruct the ethical, legal, and leadership principles that govern the field of special education. It includes emphasis on preparing for administrative positions in special education programs in local education agencies.

SPE621 Issues in Special Education: Early Childhood
Hours 3
Discussion of current research and investigation of major issues in the education of young students with disabilities, focusing on best practices, assessment and learning, programming, evaluation, community involvement, and facilitation.
SPE622 Advanced Curriculum Workshop: Early Childhood Special Education  
Hours 3  
This course assists leaders in early childhood special education in applying studies in basic disciplines to the development and implementation of appropriate curriculum for young students with disabilities. It includes emphasis on application of diverse teaching models and the use of a variety of program alternatives and skills in designing, managing, and evaluating program alternatives.

SPE623 Issues in Collaborative Education  
Hours 3  
Discussion of current research and investigation of major issues in the education of students with disabilities, focusing on best practices, assessment and learning, programming, evaluation, community involvement, and facilitation.

SPE624 Advanced Curriculum Workshop in Special Education: Collaborative  
Hours 3  
This course assists leaders in collaborative education in basic disciplines to the development and implementation of appropriate curriculum for students with disabilities. It includes emphasis on application of diverse teaching models and the use of a variety of program alternatives and skills in designing, managing, and evaluating program alternatives.

Special Education, Ed.D.  
The doctor of education (EdD) degree program is offered to provide competencies in professional development, administration, and leadership. In preparing for any of these three professional activities, EdD students usually specialize in one of the fields within special education; they are also expected, however, to acquire broad-based information across the spectrum of exceptional children and youth.

Prerequisites for admission to doctoral work in special education are an earned MA degree in special education (or a related area) and three years of appropriate experience, defined as three years of work in agencies serving children and youth, one year of which must have been spent in direct, full-time interaction with exceptional children. Graduate faculty members individually evaluate and collectively discuss admission applications.

Special Education, Ed.S.  
Special education graduate programs are designed to help establish, maintain, and improve educational services to exceptional children by providing exemplary personnel resources. Courses of study leading to the Educational Specialist (EdS) degree and Class AA professional educator certification in the education of exceptional children are offered.

Traditional Class AA programs are available in  
- collaborative education  
- early childhood special education  
- gifted and talented

Admission  
In addition to meeting the Graduate School's admission requirements, a student interested in the EDS program must have earned a master's degree with appropriate prerequisite Class A certification.

In addition to meeting admission requirements for the Graduate School and the College of Education, students interested in the special education programs should also be aware of the admission requirements established by the Alabama Department of Education.

Collaborative (K-6, 6-12), Class AA  
This course listing applies to candidates having appropriate prior certification who begin this program June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.50 on all courses in the...
program, with no grade below a C. Credits used for the previous Class A support certificate may not be used for this program.

For admission, applicants must hold valid master’s level certification in a teaching field. Candidates admitted to the Class AA program without prior Class A certification in collaborative or an approved area of special education must take the following courses in addition to the coursework below: SPE 590, SPE 591 or SPE 592, SPE 594, SPE 501 (or the equivalent), and SPE 596. Up to three semester hours of the prerequisite work may be used to meet the elective requirements in this program. Passing scores on the appropriate Praxis subject assessment(s) are required if changing areas of certification.
Admission Requirements

In addition to meeting admission requirements for the Graduate School and the College of Education, students interested in the special education programs should also be aware of the admission requirements established by the Alabama Department of Education.

Traditional Class A Certification Programs

For admission to traditional Class A programs of study in collaborative education, early childhood special education, or gifted and talented education, the appropriate prior certification must be held in a teaching field.

For admission to the Class A program of study in severe disabilities, the appropriate prior certification must be held in early childhood special education or collaborative education.

Collaborative (K-6), Class A

This course listing applies to candidates having appropriate prior certification who begin this program June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C. Passing scores on the appropriate Praxis subject assessment(s) are required if changing areas of certification.

For admission, applicants must hold valid bachelor's level certification in a teaching field.

Alternative Class A, Nontraditional, Initial Teacher Certification Programs

Special Education & Multiple Abilities offers teacher education programs that do not require prior certification in a teaching field. These programs lead to Alabama Alternative Class A certification in special education (collaborative teacher, K–6; collaborative teacher, 6–12; early childhood special education, P-3; or gifted, P-12) and are designed to allow individuals with undergraduate degrees in nonteaching fields to enter the field of education.

Admission to a nontraditional, alternative certification program in special education requires full admission to the Graduate School and the completion of specified undergraduate prerequisite courses.

For admission to the Alternative Class A (non-traditional) program in collaborative education, early childhood special education, or gifted and talented education, applicants must meet the following requirements:

- **Transcript evaluation:** Applicants should contact the Office of Student Services & Certification for a transcript evaluation to determine prerequisite courses.
- **Degree requirement:** An appropriate bachelor’s degree from a regionally accredited institution with a minimum overall GPA of 2.75 OR a master’s degree with a GPA of at least 3.0 is required.
- **Assessment of basic skills:** Applicants must meet current basic skills requirements of the Alabama Educator Certification Assessment Program (AECAP). Effective September 1, 2017, passing scores on the Praxis Core Academic Skills for Educators Tests of mathematics, reading and writing are required (or passing scores on all components of the previously accepted Basic Skills assessment before 9/1/17). Information about the Praxis Core tests is available online at https://www.ets.org/praxis/al/al_teacher_ed or in the Office of Student Services & Certification (104 Carmichael Hall).
- **General Studies and Teaching Field:** For Alternative Class A in Collaborative or Early Childhood Special Education, applicants must have completed 12 hours of coursework in each of four areas: humanities, social science, science and mathematics. (This is called the 4 x 12 requirement.) Applicants who do not meet the 4 x 12 requirement have the option to earn a passing score on the appropriate Praxis subject assessment in lieu of completing the deficient 4 x 12 courses. For Alternative Class A in Gifted, applicants must have an academic major in a discipline that is approved in the Alabama Course of Study.
- **Fingerprinting/background clearance**
Collaborative (K-6), Alternative Class A

This course listing applies to candidates who have completed a baccalaureate degree at a regionally accredited college or university and who begin this program June 1, 2017. Candidates earning graduate credit prior to this date may elect to utilize this program. Candidates must present a GPA of at least 3.25 on all courses in the program, with no grade below a C.

* SDE approved diversity course

** Two 3-hour internships are required, one of which must be S.E.W.

**Certification**
The Alabama State Board of Education grants Class A professional educator certification in special education (collaborative, K-6; collaborative, 6-12; early childhood special education, P-3; gifted, P-12; or severe disabilities, P-12). To be eligible, candidates must hold appropriate prerequisite certification OR complete an Alternative Class A program and must complete all requirements for the MA degree in the chosen program as described in this catalog, including a comprehensive exam, state assessments (if applicable), and the Praxis subject assessment(s).

**Special Education, Ph.D.**
The doctor of philosophy (PhD) program is designed to prepare scholars for roles as university professors or researchers.

Prerequisites for admission to doctoral work in special education are an earned MA degree in special education (or a related area) and three years of appropriate experience, defined as three years of work in agencies serving children and youth, one year of which must have been spent in direct, full-time interaction with exceptional children. Graduate faculty members individually evaluate and collectively discuss admission applications.

**College of Engineering**
Department of Aerospace Engineering and Mechanics (AEM) (p. 466)
Department of Chemical and Biological Engineering (CHBE) (p. 479)
Department of Civil, Construction and Environmental Engineering (CCEE) (p. 487)
Department of Computer Science (CS) (p. 502)
Department of Electrical and Computer Engineering (ECE) (p. 513)
Department of Mechanical Engineering (ME) (p. 522)
Department of Metallurgical and Materials Engineering (MTE) (p. 532)

**Graduate Degrees**
The College of Engineering offers the following graduate degrees:

Master of Science in aerospace engineering, chemical engineering, civil engineering, computer science, electrical engineering, engineering (environmental engineering), engineering science and mechanics, mechanical engineering, and metallurgical engineering

Doctor of Philosophy in the fields of aerospace engineering and mechanics, chemical engineering, civil engineering, computer science, electrical engineering, mechanical engineering and materials/metalurgical engineering (the PhD in materials/metalurgical engineering is offered jointly with The University of Alabama at Birmingham)

**Joint interdisciplinary PhD program in Materials Science**
A PhD degree in the field of materials science is also offered, in collaboration with The University of Alabama at Birmingham and The University of Alabama in Huntsville. Full details of the program and its admission requirements may be found in the Interdisciplinary Programs (p. 28) section of the Graduate School Catalog.

Requirements for the Graduate School (Admission Criteria (p. 11) and Degree Requirements (p. 20)) and the College of Engineering (General Admission (p. 11), MS Degree (p. 20), and PhD Degree (p. 23)) are detailed in sections of this catalog. Additional requirements are outlined in the individual department descriptions in this catalog.
Master of Science Degrees

Master of Science degrees with appropriate designations are conferred on those students who satisfy the requirements of:

- the programs or departments in which they are enrolled,
- the College of Engineering, and
- the Graduate School as outlined earlier in the Degree Requirements (p. 20) section of this catalog.

Any requirements established by the individual departments are outlined in the departmental information that follows.

Master of Science Degree Requirements

Minimum requirements for the master's degree in all programs are 24 semester hours of acceptable coursework under Plan I (plus 6 thesis hours) or 30 hours under Plan II. Specific course requirements (in addition to those established by the Graduate School) are as follows:

- The greater of 12 hours or 25 percent of the required coursework for a master’s degree may be transferred, subject to the approval of the appropriate faculty and final approval by the Graduate School. Average grade must be at least “B.” The Request for Transfer of Graduate Credit is available at the website of the Graduate School.
- Engineering courses numbered 400 to 499 (offered primarily for senior undergraduates) may be taken by master’s students (not doctoral) for graduate credit with prior approval of the student’s supervisory committee and prior approval of the Graduate School requested on the Approval of 400-Level Course for Master’s Credit form (p. 11). A maximum of 6 semester hours of 400-level course credit may be accepted for a master’s degree. To receive graduate credit for such courses, a minimum grade of “B” must be made in courses in the student’s major field of study, and a minimum grade of “C” in courses outside the major field. Courses numbered 500 to 599 are offered primarily for master’s students. Courses numbered 600 to 699 are offered primarily for students beyond the master’s level.
- Students will be expected to have received credit for MATH 238 Appld Diff Equations I prior to admission, or to complete the course with a passing grade after admission (no graduate credit will be awarded), unless they are enrolled in the computer science program.
- All courses are selected by the student with the approval of the student’s supervisory committee. If there are deficiencies in undergraduate subjects, the student’s supervisory committee may require additional coursework to correct them.
- Under no circumstances will graduate credit be given for courses numbered below 400.
- Under Plan I, an approved thesis must be completed; a minimum of 6 semester hours of credit in 599 Thesis Research is required for Plan I students, in addition to the 24 hours of coursework.
- Under both Plan I and Plan II, students must pass a final comprehensive examination on the content of the degree program. Information about the comprehensive examination is detailed in the Degree Requirements section of this catalog.

MSE (Environmental Engineering) Degree Requirements

The interdisciplinary master of science in engineering program in environmental engineering is administered by the Department of Civil and Environmental Engineering; inquiries should be directed to the director of the Environmental Engineering Program, Box 870205, Tuscaloosa, AL 35487-0205. The program is open to persons with baccalaureate degrees who have completed at least one year’s work in chemistry, mathematics through differential equations, and an engineering mechanics sequence through fluid mechanics. These prerequisites and others may be satisfied by completing appropriate coursework for non graduate credit.

The versatile MSE (environmental engineering) program uses environmental engineering courses offered by the College of Engineering and appropriate courses in biology, chemistry, geology, and microbiology. A list of courses approved for inclusion in the environmental engineering major is available upon request. The flexibility of the degree requirements permits a student to follow a course of study designed to suit individual interests and needs. Degree requirements are as follows:

- For Plan I students, 24 semester hours of approved environmental coursework and a minimum of 6 additional semester hours of credit in CE 599 Thesis Research is required, along with an approved completed thesis. For Plan II students, 30 semester hours of approved environmental coursework is required. It is expected that master’s students will pursue the Plan I (thesis) option. The Plan II (non-thesis) option may be pursued only with approval of the faculty of the department. Students wishing to pursue the Plan II option must formally petition the department faculty to be considered for approval and must present substantial reasons for seeking the variance.
- No more than 6 hours at the 400-level may be applied to this program, and as noted on the Approval of 400-Level Course for Master’s Credit form, approval must be obtained from the department and Graduate School before a 400-level course is taken for master’s credit.
- One course in air pollution and one course in water pollution are required.

Doctor of Philosophy Degree

Doctor of Philosophy students in each College of Engineering department with a PhD program must meet minimum course requirements and all other requirements described in the Doctoral Degrees (p. 23) and Degree Requirements (p. 20) section of this catalog.

Plan of Study

Requirements for the Graduate School include but are not limited to submission of a completed PhD Plan of Study (available on the Graduate School website) to the Graduate School. Early in the graduate program, students must meet with their program advisor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. All doctoral students must have a completed PhD Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a hold may be placed on future registration.

An amended Plan of Study (if needed) must be submitted to the Graduate School when the student submits the form for Admission to Candidacy for Doctoral Degree.

Admission to Candidacy

A department-approved Admission to Candidacy for the Doctoral Degree is submitted to the Graduate School as soon as possible after passing the comprehensive (preliminary) examination. See the online Graduate Catalog (Sec. 4.11.3) for details on Plan of Study, Admission to Candidacy, and all other degree requirements.

400-level Credit

Under no circumstances will graduate credit be given for courses numbered below 400. Only the 400-level credit (6 hours maximum) that was accepted for a master’s program may be accepted for a doctoral degree program.
Research Skill/Language Requirements

Each college or department offering the PhD degree may set its own requirements for the language/research skill. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further information about PhD foreign language/research skill requirements, students may contact their departments or the Graduate School Degree Requirements (p. 20) section of this catalog.

For additional information about all requirements for the PhD degree, see Admission Criteria (p. 11) and Degree Requirements (p. 20) in earlier sections of this catalog. Students need to review requirements outlined in individual department descriptions in this catalog and visit the College of Engineering website.

Cooperative Education Program

Graduate students in the College of Engineering may choose to pursue their studies under a cooperative plan of education. The program is necessarily flexible, so that the study-work experience schedule will meet the needs of individual students. The availability of the cooperative plan will be dependent on the employment being approved by the student’s graduate committee.

A student in the Cooperative Education Program should be able to complete all requirements for the MS degree in two years. The schedule for PhD candidates is arranged, in cooperation with the participating industry, to fit the needs of the individual student.

Admission Requirements

Applicants for graduate work in engineering must apply for admission to the Graduate School of the University. Regular admission to graduate study may be granted to applicants who

- have earned baccalaureate degrees from institutions with programs accredited by the Accreditation Board for Engineering and Technology (ABET) or, for applicants for computer science programs, programs accredited by ABET or the Computing Sciences Accreditation Board (CSAB)
- have an overall GPA of at least 3.0 on a 4.0 scale, or at least 3.0 for the last 60 hours completed

Each applicant is required to submit a statement of purpose as part of the application packet; there are no exceptions.

All students, except University Scholars students, who are applying to engineering are required to submit a GRE score.

Other appropriate requirements may be established by the individual engineering departments.

Regular admission may also be granted to applicants who are not graduates of ABET- or CSAB-accredited programs and who have Graduate Record Examination general test scores of 1000 or higher, as specified by the department of interest. Each applicant should have the equivalent of a 3.0 or higher GPA (as in requirements listed above). Other appropriate requirements may be established by the individual engineering departments.

International Admission

International applicants for engineering graduate programs must satisfy the above requirements and must also have TOEFL scores of at least 550 or IELTS score of at least 6.5. The student’s proposed plan of study shall include a schedule for removing any undergraduate course deficiencies.

Conditional Admission

Conditional admission may be granted to applicants who

- have earned baccalaureate degrees from institutions with programs accredited by the Accreditation Board for Engineering and Technology (ABET) or, for applicants for computer science programs, institutions accredited by ABET or the Computing Sciences Accreditation Board (CSAB)
- have an overall GPA of at least 2.5 on a 4.0 scale

Other appropriate requirements may be established by the individual engineering departments.

Conditional admission may be granted to applicants who are not graduates of ABET- or CSAB-accredited programs and who have Graduate Record Examination general test scores of 1000 or higher, as specified by the department of interest. Each applicant should have the equivalent of a 2.5 or higher GPA (as in requirements listed above). Other appropriate requirements may be established by the individual engineering departments.

A student admitted conditionally is required to maintain a "B" average for the first 12 semester hours of graduate coursework and to remove any conditions imposed for admission in order to continue graduate study.

Applicants with GPAs of less than 2.5 (out of a possible 4.0) may be considered for admission to the Graduate School only after demonstrating the ability to pursue advanced work successfully.

See the Admission Criteria section of this catalog for more information.

Advisement and Committees

After admission to graduate study by the dean of the Graduate School, the student will be referred to the head of the appropriate department for assignment to a temporary advisor. The chairman and other members of the graduate student’s supervisory committee are usually appointed during the first term of enrollment. The examining committee (the membership of which is normally the same as that of the supervisory committee) is appointed approximately one semester before the student expects to graduate.

General Engineering Studies Courses

Graduate courses are offered on a regular basis in some departments, as indicated in the course listings. However, all graduate courses are taught only upon sufficient demand. In the following course listing, each description contains a set of parentheses immediately preceding the semester hours. The first number within the parentheses indicates the number of contact hours per week in lecture, recitation, or seminar. The second number indicates the number of contact hours per week in laboratory.

The College of Engineering requires that a grade of "C" or better be earned in all prerequisite courses.

Additional information is in the Admission Criteria (p. 11) section and the Degree Requirements (p. 20) section of this catalog.
GES courses are interdisciplinary and may be taken to meet individual program requirements.

GES500 Engineering Statistics
Hours 3
Probability and basic statistical concepts. Discrete and continuous distributions; the central limit theorem; sampling distributions; point and interval estimation; hypothesis testing; regression and correlation analysis; analysis of variance.

GES501 Operations Research
Hours 3
Model construction, linear programming, network models, dynamic models, stochastic models, queueing theory, and decision theory.

GES51 Matrix And Vector Analysis
Hours 3
This course provides a graduate level overview of linear algebra and vector analysis. Topics covered include: linear simultaneous equations, eigenvalues and eigenvectors, matrix functions, computer techniques, and transformations, vector calculus, the Laplacian, and integral theorems such as the theorems of Green and Stokes.

GES54 Partial Diff Equations
Hours 3
This course examines the solution of partial differential equations by focusing on three specific equations: (1) the heat equation, (2) the wave equation, and (3) Laplace’s equation. Topics covered include: Fourier transforms, Sturm-Liouville problems, classification of partial differential equations, Bessel functions, and numerical methods for solving partial differential equations.

GES55 Nonlinear Partial Differential Equations
Hours 3
An introduction to nonlinear partial differential equations. Exact solutions, approximate solutions, and numerical solutions will all be considered. The course content is supported by numerous applications.

Prerequisite(s): GES 554

GES55 Genetic Algorithms
Hours 3
Theory and application of genetic algorithms. Computer implementation and current applications in parameter and combinatorial optimization and optimal control genetics-based machine learning systems. Focus on both fundamental theory and modern applications.

Assistantships (teaching and research) are offered by the department and individual faculty to highly qualified applicants with preference towards those pursuing a PhD. Most assistantships start in the fall and last one academic year with consideration for renewal. An assistantship provides a competitive stipend, full tuition, and health benefits. No additional application is necessary. Contacting faculty with similar research interests is encouraged.

For more information about Aerospace Engineering and Mechanics graduate programs, contact Dr. James P. Hubner (phubner@eng.ua.edu).

- Majors
  - Aerospace Engineering and Mechanics (MS) (p. 470)
  - Aerospace Engineering and Mechanics (PhD) (p. 474)

[object Object]
Master’s students may, with permission of the department and prior approval by the Graduate School, receive credit for six (6) hours of 400-level credit. No 400-level courses can be approved for application to a PhD degree, other than the maximum of six (6) hours already completed as part of a master’s degree. A master’s student may, with approval of a petition, meet prerequisites with a combination of related coursework and experience.

AEM500 Intermediate Fluid Mechanics
Hours 3
Development and use of the integral and differential forms of the equations of continuity, momentum, and energy with ideal fluids and compressible fluids. Advanced topics in fluid mechanics, including potential flow, boundary layer flow, compressible flow, and open channel flow.

AEM508 Propulsion Systems
Hours 3
Basic propulsion dynamics, thermodynamics of fluid flow, combustion kinetics, air-breathing engines, rockets, design criteria, performance, and advanced propulsion systems.

AEM513 Compressible Flow
Hours 3
Fundamentals of high-speed aerodynamics theory discussed. Topics covered include: normal and oblique shock waves, heat addition and friction effects in one-dimensional flow, expansion waves in two-dimensional flow, quasi 1-D nozzle flow, unsteady compressible flow calculations using method of characteristics, shock tube relations.

AEM514 Experimental Aerodynamics
Hours 3
The course provides a laboratory counterpart to concepts discussed in aerodynamics and fluid mechanics. Course topics include statistical and uncertainty analysis techniques, design of experiments, computer-based data-acquisition, sensors for fluid mechanic measurements, and aerodynamic measurement techniques and facilities.

AEM515 Micro-Aerial Vehicles (MAVs)
Hours 3
This course surveys topics related to micro air vehicles (MAVs). These are small, flying vehicles generally classified by a maximum length of 15 cm. It is intended to be interdisciplinary in nature, involving seniors and first-year graduate students from different engineering academic departments.
AEM516 Helicopter Theory
Hours 3
Critical examination of the propulsive airscrew, including induced velocity relations, flow patterns, and similarity. Practical applications approached through existing theory and practice.

AEM517 Aircraft Systems
Hours 3
The principal objective of this course is to establish, develop, and refine capability in the integrated analysis and interdependency of aircraft systems.

AEM520 Computational Fluid Dynamics
Hours 3
Introduction to basic mathematical concepts and engineering problems associated with numerical modeling of fluid systems. Application of the state of the art numerical models to engineering problems. Fundamentals of Finite Difference and Finite Volume Methods and their applications in fluid dynamics and heat transfer problems will be covered.

AEM528 Space Propulsion
Hours 3
Students are introduced to different types of space propulsion systems in this class. Different rockets, such as: monopropellant, bi-propellant, solid, liquid, nuclear and electric rockets are discussed in detail. Working principles of these rockets, their intended use and their design are discussed. Power limited and energy limited rocket working principles are given. Several rocket design projects are assigned throughout the class.

AEM530 Continuum Mechanics
Hours 3

AEM535 Applied Finite Element Analysis
Hours 3
Applications of the finite element method to static stress analysis, heat transfer, natural frequency and Eigen-mode determination, for linear, hyper-elastic, and elastic-plastic materials. The course includes a basic background on finite element theory as well as usage of current finite element software.

AEM546 Intermediate Solid Mechanics
Hours 3
Two-dimensional theory of elasticity; exact and approximate solutions of bending, torsion, and buckling for bars; open sections and curved beams; stresses in axisymmetric members; and finite-element and energy methods.

AEM548 Stochastic Mechanics
Hours 3
This course develops, analyzes and discusses the application of uncertainty quantification in engineering systems and design methodologies to include uncertainties in the systems. Topics include: classification of uncertainties and methods of quantification, perturbation approaches, polynomial chaos, sampling techniques, random processes and Bayesian analysis.

AEM552 Composite Materials
Hours 3
First exposure to composite materials. Focus on how heterogeneity/ anisotropy in composites influence thermomechanical behavior. The behavior of both continuous and short fiber reinforced composites will be emphasized. Stress analysis for design, manufacturing processes and test methods of composite materials will be covered.

AEM553 Multiscale Analysis of Advanced Composites
Hours 3
Concepts of multiscale analysis, nano-mechanics, micromechanics - principles of analysis of heterogeneous systems, information transfer between multiple spatial and temporal scales, including atomistic-to-continuum coupling, continuum-to-continuum coupling, and temporal bridging. Prerequisite(s): AEM 655 or equivalent or consent of instructor.

AEM555 Nondestructive Evaluation
Hours 3
Fundamental theories, limitations and instrumentation of nondestructive test methods used for metal, polymer and composites materials. The ultrasonic, acoustic emission, vibration, thermography, eddy current, penetrant, and radiography methods are emphasized.

AEM559 Orbital Mechanics
Hours 3
Introduction to engineering application of celestial mechanics, high-speed, high-altitude aerodynamics, and other fields related to the contemporary problems of space vehicles. Fundamentals of applied dynamics, nomenclature of space flight, space environment and solar system, and two-body orbits. Kepler’s laws, coordinate transformations, and related studies.

AEM570 Mechanical Vibrations
Hours 3
Free and forced vibrations, both undamped and damped. Systems with many degrees of freedom are formulated and analyzed by matrix methods. Experimental techniques of vibration measurement are introduced.

AEM574 Structural Dynamics
Hours 3
Theoretical foundations of structural dynamics and application of methods to modeling, analysis, and design.
AEM575 Fundamentals of Aeroelasticity
Hours 3
Aeroelasticity deals with interactions between aerodynamic loads and elastic static and/or dynamic deformations, as well as the influence of the interactions on aircraft performance. The performance of interest may include stability of structures immersed in an airflow (e.g., divergence, buffetting, and flutter), rejection of external disturbances (e.g., gust alleviation), and controllability of flight vehicle trajectory (attitude or motion). Structural mass and stiffness are often tailored to change the aerodynamic load distributions on lifting surfaces. Aeroelasticity is not just fluid mechanics or solid mechanics. Its major emphasis is the fluid-structure interaction. This course focuses on understanding the phenomenology of aerodynamic and structural interactions, instead of the complicated modeling processes. The material is relatively self-contained as we will introduce concepts such as mass and stiffness matrices, shear centers, aerodynamic coefficients, and aerodynamic centers, and then build on these concepts. The students will have access to some simple models, which may become complicated when the fluid-structure interaction is considered. With the study in the class, the students will be able to analyze fundamental aeroelastic phenomena and solve the problem by using a numerical tool. Students should learn the concept of aeroelastic tailoring and structural designs with aeroelastic constraints.

Prerequisite(s): AEM 574 or instructor's permission

AEM577 Advanced Linear Control
Hours 3
Modern techniques for the analysis and design of linear control systems. Matrix formulation; multivariable control systems; state-variable concepts; discrete-time systems; optimization; and statistical design methods.

AEM581 Complex Engineering Systems
Hours 3
Introduction to the concepts and techniques associated with the analysis of complex systems, dynamic systems, chaos, lumped parameter modeling, feedback, networks, thermal/electrical circuit analogies, entropy.

AEM582 Space Systems
Hours 3
Concepts in systems engineering of space systems: systems engineering, space systems, satellites, space transportation systems, space environment, attitude determination and control, telecommunications, space structures, rocket propulsion, and spacecraft systems.

AEM584 Space Environment
Hours 3
This course provides an introduction to the effects of the space environment on spacecraft. The harsh space environment introduces several unique challenges to the spacecraft designer. Focus on the impact of this environment and how best to mitigate these effects through early design choices will give the satellite designer better tools. Topics include: geomagnetic field, gravitational field of the Earth, Earth’s magnetosphere, vacuum, solar UV, atmospheric drag, atomic oxygen, free and trapped radiation particles, plasma, spacecraft charging, micrometeoroids.

AEM588 Advanced Space Propulsion and Power
Hours 3
This course will explore concepts, theory, and performance of electrical, nuclear, and exotic space propulsion systems for use in space. This exploration will include fundamental physical processes exploited by these propulsion schemes. The course will also include concept, theory and performance of power generation methods in space. Systems studied will include low and high power systems intended for short term or long term applications. Thermal, solar and nuclear devices and the energy conversion means for converting energy from these sources into useful electrical power will be studied.

AEM591 Special Problems
Hours 1-6
Independent investigations of special problems. Credit is based on the amount of work undertaken.

AEM592 Special Problems
Hours 1-6
Independent investigations of special problems. Credit is based on the amount of work undertaken.

AEM594 Special Projects
Hours 2-6
Planning, executing, and presenting results of individual project involving a research design, analysis, or similar undertaking.

AEM598 Non-Thesis Research
Hours 1-3
Research not related to thesis.

AEM599 Thesis Research
Hours 1-12
Research related to thesis.

AEM606 Physical Gas Dynamics
Hours 3
Introduction to the behavior of gases. Gases are treated as interacting particles and the collective behavior is studied as an ensemble of semi-random events. The evolution of gas properties from the molecular viewpoint to the continuum viewpoint will be examined. Applications of interest include chemical reactions important to hypersonic aircraft, scramjet engines, current and future high pressure ratio gas turbine engines as well as rocket propulsion.

AEM614 Airfoil And Wing Theory
Hours 3
Compressible and incompressible airfoil and wing theory.

AEM616 Rotorcraft Aeromechanics
Hours 3
This course presents the fundamentals of rotorcraft aeromechanics, which study equilibrium, motion, and control of elastic rotorcraft under aerodynamic loading. Topics included: blade motion, unsteady rotor aerodynamics, rotor wakes, dynamic stall, noise, and stability and control.

Prerequisite(s): AEM 516
AEM621 Viscous Flow
Hours 3
Development of basic boundary layer equations and concepts. Classical incompressible solutions for laminar boundary layer, approximate solutions, and concepts of turbulence.

AEM622 Turbulent Flows
Hours 3
Introduction to the physics and modeling of turbulent flows. This course will cover the governing equations of multi-species viscous laminar flows, origin and characteristics of turbulence, mathematical methods for obtaining the governing equations of turbulent flows, various modeling techniques for resolving closure problems associated with the governing equations of turbulent flows.

AEM624 Hypersonic Flow
Hours 3
This course develops, analyzes and discusses the application of hypersonic flow theory. Topics include: Hypersonic Shock/expansion wave relations, approximate methods to calculate lift and drag on hypersonic vehicles, boundary layer equations for hypersonic flow, and hypersonic viscous interactions.

AEM625 Advanced Computational Fluid Dynamics
Hours 3
Finite volume methods for numerical analysis of transport problems including fluid dynamics and heat transfer in complex curvilinear boundary fitted domain will be developed and applied.
Prerequisite(s): AEM 420 or AEM 520

AEM626 Unsteady Flow
Hours 3
This course develops, analyzes and discusses unsteady potential flow theory and the calculation of steady and unsteady aerodynamic loads and response on airfoils, wings and bodies as well as corresponding topics of current interest.
Prerequisite(s): BSAE or AEM 500 or instructor’s consent

AEM630 Flow Control
Hours 3
Passive, active and reactive flow management strategies to achieve transition delay/advance, separation control, mixing augmentation, drag reduction, lift enhancement, and noise suppression. Unified framework for flow control.
Prerequisite(s): AEM 500 or AEM 621 or equivalent

AEM635 Finite Element Methods
Hours 3
Finite-element formulations in the areas of solid mechanics, fluid mechanics, and heat conduction; isoparametric elements; assembly process; solution of stiffness equations; and convergence of results.

AEM637 Theory Of Elasticity
Hours 3
Equations of linear elasticity, principal stresses and strains, stress and displacement potentials, energy principles, and numerical methods. Boundary value problems of elasticity.

AEM638 Introduction to Experimental Mechanics
Hours 3
Theory and application of electrical resistance strain gauges for stress analysis and for use as transducers. Study of circuits and instruments used for strain measurement. Theory and application of photoelasticity for measurement of stress. Fundamentals of servohydraulic testing.

AEM644 Engineering Fracture Mechanics
Hours 3
Linear elastic and elastic-plastic fracture mechanics. Fracture analysis using Griffith’s criterion, stress intensity factors, CTOD methods, and the J-Integral.
Prerequisite(s): GES 554

AEM648 Theory Of Plasticity
Hours 3
Fundamentals of inelastic behavior of solids. Basic stress-strain relations for plastic action, yield criteria of metals, plastic instability, and slip-line field theory. Applications to axial, flexural, torsional, and cylindrically symmetric loads.
Prerequisite(s): AEM 637

AEM649 Fatigue Analysis
Hours 3
Presentation of the strain life and fracture mechanics approaches to fatigue analysis. Review of damage parameters, mean stress effects, and cycle counting methods for uniaxial and multiaxial loading.

AEM655 Advanced Composite Materials
Hours 3
Advanced topics in composite materials, including theories of linear orthotropic elasticity, micro-mechanics of composites, nano-composites, and sandwich structures.

AEM662 Multibody Dynamics
Hours 3
This course presents the fundamentals of multibody dynamics: kinematics and dynamics of multibody systems, analytical dynamics, constrained dynamical systems, and flexible multibody dynamics.
Prerequisite(s): AEM 562

AEM668 Advanced Dynamics Of Flight
Hours 3
Analysis of the rigid body dynamic motions of an aircraft; response of an airplane to actuation of controls; introduction to automatic control and stability; introduction to vehicle simulation by digital computer.

AEM685 Engineering Optimization
Hours 3
This graduate course introduces the techniques of design optimization of engineering systems. Topics include: Basic principles of optimization theory, parameter optimization problems, linear and nonlinear programming. Unconstrained and constrained problems treated by simplex, penalty function, generalized reduced gradient methods, global optimization techniques, and surrogate modeling.
Prerequisite(s): GES 551
AEM691 Special Problems
Hours 1-3
Independent investigations of special problems. Credit is based on the amount of work undertaken.

AEM694 Special Project
Hours 2-6
Planning, executing, and presenting results of an individual project involving a research design, analysis, or similar undertaking.

AEM698 Non-Dissertation Research
Hours 1-3
Research not related to dissertation.

AEM699 Dissertation Research
Hours 1-12
Research related to dissertation.

Aerospace Engineering and Mechanics, MS

Admission Requirements
Admission requirements are outlined in the Admission Criteria section of this catalog. Specific admission information relating to the Department of Aerospace Engineering and Mechanics is listed on their departmental web page.

See the Admission Criteria section of this catalog for more information.

Degree Requirements
A list of current degree requirements and additional information can be found on the Department of Aerospace Engineering and Mechanics website. The following departmental requirements are in addition to those specified by the Graduate School (Degree Requirements) and the College of Engineering (MS Degree and PhD Degree requirements) detailed in earlier sections of this catalog.

MS in Aerospace Engineering and Mechanics

The Department of Aerospace Engineering and Mechanics offers a Master of Science in aerospace engineering and mechanics degree via an on-campus program and an off-campus (distance learning) program through the College of Continuing Studies.

An MSAEM can be earned by coursework only or by a combination of coursework and an approved thesis. Most distance learning students elect to complete the coursework only degree option. On-campus students supported by assistantships are expected to complete an approved thesis.

- MSAEM – Thesis (Plan I) Option
- MSAEM – Non-Thesis (Plan II) Option
Thesis (Plan I) Option

Credit Hours
A total of 30 semester credit hours is required for a masters of science in aerospace engineering and mechanics degree. For the MSAEM Plan I option, these credit hours consist of:

<table>
<thead>
<tr>
<th>Core coursework</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mathematics coursework, including GES 554</td>
<td>6</td>
</tr>
<tr>
<td>Elective coursework</td>
<td>12</td>
</tr>
<tr>
<td>AEM 599 Thesis Research</td>
<td>6</td>
</tr>
<tr>
<td>Total Hours</td>
<td>30</td>
</tr>
</tbody>
</table>

Elective coursework must be approved by the student’s advisor. Of the 12 Elective coursework credit hours, at least 6 must have an AEM designation.

Core Course Requirements
All students must complete a minimum of one (1) class from the Aerospace Core listing of classes and one (1) class from the Mechanics Core listing of classes.

Aerospace Core
- AEM 569 Orbital Mechanics
- AEM 582 Space Systems
- AEM 614 Airfoil And Wing Theory
- AEM 668 Advanced Dynamics Of Flight

Mechanics Core
- AEM 500 Intermediate Fluid Mechanics
- AEM 530 Continuum Mechanics
- AEM 562 Intermediate Dynamics
- AEM 637 Theory Of Elasticity

Mathematics Requirement
A total of six credit hours of mathematics is required. GES 554 Partial Diff Equations, which is three credit hours, is required and counts toward the six-credit hour mathematics requirement. The remaining three credit hours of mathematics coursework must be approved by the advisor.

Elective Coursework Requirement
A student must complete at least 12 hours of elective coursework. These courses are typically AEM courses, but other approved courses are acceptable. The specific courses must be approved by the student’s advisor.

Thesis Requirement
The student is required to submit a written thesis and defend in front of a thesis committee for approval by the committee and the graduate school.

Test Pilot School
Students who seek credit for Test Pilot School completed through the United States Air Force may send official transcripts from the TPS to the UA Graduate School for transfer credit. The student must receive a grade of at least a "B" in TPS for the credit to transfer. Additionally, the transfer of credit from TPS is subject to the restrictions placed on the transfer of credit by the Graduate School and the AEM Department. A maximum of six hours may be transferred. For additional information, view the transfer credit policy at the UA Graduate School website.

Non-Thesis (Plan II) Option

Credit Hours
A total of 30 semester credit hours is required for a Master of Science in aerospace engineering and mechanics degree. For the MSAEM Plan II option, these credit hours consist of:

<table>
<thead>
<tr>
<th>Core coursework</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mathematics coursework, including GES 554</td>
<td>6</td>
</tr>
<tr>
<td>Elective coursework</td>
<td>18</td>
</tr>
<tr>
<td>Total Hours</td>
<td>30</td>
</tr>
</tbody>
</table>

Elective coursework must be approved by the student’s adviser. Of the 18 Elective coursework credit hours, at least 12 must have an AEM designation.

Core Course Requirements
All students must complete at least one class from the Aerospace Core listing of classes and one class from the Mechanics Core listing of classes.

Aerospace Core
- AEM 569 Orbital Mechanics
- AEM 582 Space Systems
- AEM 614 Airfoil And Wing Theory
- AEM 668 Advanced Dynamics Of Flight

Mechanics Core
- AEM 500 Intermediate Fluid Mechanics
- AEM 530 Continuum Mechanics
- AEM 562 Intermediate Dynamics
- AEM 637 Theory Of Elasticity

Mathematics Requirement
A total of six credit hours of mathematics is required. GES 554 Partial Diff Equations, which is three credit hours, is required and counts toward the six-credit hour mathematics requirement. The remaining three credit hours of mathematics coursework must be approved by the advisor.

Elective Coursework Requirement
A student must complete a least 18 hours of elective coursework. These courses are typically AEM courses, but other approved courses are acceptable. The specific courses must be approved by student’s advisor.

Comprehensive Examination or Culminating Experience
Students pursuing the MSAEM Plan II degree option have the choice of completing one of the following options to satisfy the requirement of a comprehensive examination or culminating experience:

- Pass the Ph.D. qualifying examination that serves as the comprehensive examination or
- Complete a culminating experience and receive faculty adviser approval for the written report detailing the culminating experience. MSAEM Plan II students may, but are not required to, enroll in AEM 594 Special Projects, three credit hours, complete the culminating experience, and submit the written report detailing the culminating experience as part of the AEM 594 course requirements.

The student must have completed at least 18 hours of coursework prior to submitting the written report for the culminating experience. The approved written report for the culminating experience must be
submitted no later than the thesis deadline date during the semester in which the student intends to graduate. The comprehensive examination option may be attempted only twice.

**Test Pilot School**

Students that seek credit for Test Pilot School completed through the United States Air Force may send official transcripts from the TPS to the UA Graduate School for transfer credit. The student must receive a grade of at least a "B" in TPS for the credit to be transferable. Additionally, the transfer of credit from TPS is subject to the restrictions placed on the transfer of credit by the Graduate School and the AEM Department. A maximum of six hours can be transferred. For additional information, view the transfer credit policy at the UA Graduate School website.

**Master's Degrees**

The primary purpose of master's degree programs is to provide students with subject matter at an advanced level in their fields of study. Master's degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master’s programs also help students become familiar with methods of independent investigation.

**Program Requirements**

Two plans are offered for the master's degree:

**Plan I.** Candidates for the master’s degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

**Plan II.** Candidates for the master’s degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or “capstone experience” as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject. With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

**Residency Requirements**

A student's program at the master's level must provide sufficient association with the resident faculty to permit individual evaluation of the student's capabilities and achievements.

**Graduate Credit**

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

**Graduate Credit for Noncredit Experiences**

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

**Transfer of Credit**

Courses of full graduate-level credit earned in a regionally accredited institution where a student was enrolled in the graduate school may be submitted for review for inclusion in a master's degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student’s advisory committee and the dean of the Graduate School. Credit will not be accepted for transfer from any institution at which the student failed to achieve a “B” average on all graduate work attempted. Only courses in which a student earned a “B” grade or better may be transferred.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

A student initiates at the Graduate School’s website a Request for Transfer of Graduate Credit earned at another institution. It is also the student’s responsibility to assure that the Graduate School receives an official transcript of the credit requested for transfer, well in advance of the final semester.

With the approval of the student’s department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master's degree may be transferred from another institution. All credit toward the master's degree, including transfer credit, must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the master's degree is to be awarded. Revalidation (recertification) of graduate credits that will be more than 18 semesters old at the time of UA master’s program completion is not an option.

Please note that some departments allow fewer than 12 hours of graduate transfer credit. Be sure to check with your department’s graduate coordinator regarding your department's transfer policy.

**400-Level Courses**

A maximum of 6 semester hours of 400-level course credit may be accepted for a master's degree program, but only if a form for Approval of 400-Level Course Work for Master’s Credit is approved by the Graduate School prior to the semester in which the 400-level coursework will be taken.

**Time Limit**

All requirements for the master's degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. There is no provision for an extension of the time limit beyond six years for master's students.

**Admission to Candidacy**

During the 2013-2014 academic year, the Graduate Council eliminated the master’s candidacy requirement. Departments may monitor master’s candidacy if they wish, but the Graduate School does not monitor it and will not accept master’s candidacy forms. Doctoral candidacy is not affected and remains an important doctoral program requirement.

**Thesis**

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates...
who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student's major department or division.

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

**Article Style vs. Journal Format**

**Article Style.**

At the doctoral level, "article-style dissertations" are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an "article-style thesis" to be presented for a master's degree.

**Journal Format.**

A "journal-format thesis" is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal's "information for authors" or similarly titled guidelines in conjunction with the Graduate School's Student Guide to Preparing Electronic Theses and Dissertations.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. A form for Appointment or Change of Master's Thesis Committee is used to request that the graduate dean appoint a thesis committee. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student's major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student's thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. A final oral examination is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral examination unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting.

As of August 15, 2009, all theses are submitted electronically rather than on paper. See the Graduate School's homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School's website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student's major department.

**Protection of Human Subjects for Research**

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research. In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

**Comprehensive Examinations**

In addition to the regular course examinations, a final comprehensive examination representing a "culminating" or "capstone" experience for a degree is required of all candidates for the master's degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a "policy and practice" paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School. The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. A final report, on the Master's/EdS Examination Form is on the Graduate School website. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

**Application for Graduation**

Each candidate for a master's degree must apply for graduation through myBama no later than the registration period for the semester or the first session of the summer term in which requirements for the degree are to be completed.

**Second Master's Degree**

Six (6) semester hours of eligible credit from one master's degree at The University of Alabama may be applied to the requirements for a second master's degree, but only if the department of the second master's agrees
to the courses in the plan of study. Any hours from the previous master's degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. **Please note that if a student double counts six hours between two master’s degrees, no hours may double count toward any additional master’s degrees.

**Aerospace Engineering and Mechanics, Ph.D.**

**Admission Requirements**

Admission requirements are outlined in the Admission Criteria section of this catalog. Specific admission information relating to the Department of Aerospace Engineering and Mechanics is listed on their departmental web page.

See the Admission Criteria section of this catalog for more information.

**Degree Requirements**

A list of current degree requirements and additional information can be found on the Department of Aerospace Engineering and Mechanics website. The following departmental requirements are in addition to those specified by the Graduate School (degree requirements) and the College of Engineering (MS Degree and PhD Degree requirements) detailed in earlier sections of this catalog.

**Doctor of Philosophy in Aerospace Engineering and Mechanics**

The Department of Aerospace Engineering and Mechanics offers a Doctor of Philosophy degree on campus and through alternative residency (distance learning). A research-based degree, students are required to propose, complete and defend an approved dissertation on a research topic that contributes to the field of aerospace engineering and/or engineering science and mechanics.

**Credit Hours**

A total of 72 semester credit hours is required for a Ph.D. degree. These credit hours consist of:

<table>
<thead>
<tr>
<th>Hours</th>
<th>Core coursework</th>
</tr>
</thead>
<tbody>
<tr>
<td>6</td>
<td>GES 554 Partial Diff Equations</td>
</tr>
<tr>
<td>6</td>
<td>Mathematics coursework</td>

<tr>
<td>33</td>
<td>Elective coursework</td>
</tr>
<tr>
<td>24</td>
<td>AEM 699 Dissertation Research</td>
</tr>
<tr>
<td>72</td>
<td>Total Hours</td>
</tr>
</tbody>
</table>

Elective coursework must be approved by the student’s advisor. Of the 48 coursework credit hours, at least 24 must have an AEM designation.

**Core Course Requirements**

All students must complete a minimum of one (1) class from the Aerospace Core listing of classes and one (1) class from the Mechanics Core listing of classes.

<table>
<thead>
<tr>
<th>Hours</th>
<th>Aerospace Core</th>
</tr>
</thead>
<tbody>

<td>AEM 562 Intermediate Dynamics</td>
</tr>
<tr>
<td>3</td>
<td>AEM 637 Theory Of Elasticity</td>
</tr>
</tbody>
</table>

**Mathematics Requirement**

A total of nine credit hours of mathematics is required. GES 554 Partial Diff Equations, three credit hours, is required and counts toward the nine-credit-hour mathematics requirement. The remaining six credit hours of mathematics coursework must be approved by the adviser.

**Elective Coursework Requirement**

A student must complete at least 33 hours of elective coursework. These courses are typically AEM courses, but other approved courses are acceptable. The specific courses must be approved by the student’s adviser, in consultation with student’s graduate advisory committee.

**Ph.D. Qualifying Examinations**

Students in the PhD program are required to successfully complete the qualifying examination based on the student’s core coursework. The qualifying examination may only be taken twice. A student should pass the qualifying examination within 18 months after completing 24 credit hours of AEM coursework and at least twelve months prior to graduation. The written examination is offered twice a year, usually in early October and early March. The Graduate Program Coordinator coordinates the PhD qualifying examinations.

**Test Pilot School**

Students who seek credit for Test Pilot School completed through the United States Air Force may send official transcripts from the TPS to the UA Graduate School for transfer credit. The student must receive a grade of at least a “B” in TPS for the credit to transfer. Additionally, the transfer of credit from TPS is subject to the restrictions placed on the transfer of credit by the Graduate School and the AEM Department. A maximum of six hours can be transferred. For additional information, view the transfer credit policy at the UA Graduate School website.

**Doctoral Degrees**

The University offers several types of doctorates, each of which is described below.

The Doctor of Philosophy (PhD) degree is regarded as the researcher’s degree. Program requirements include the acquisition of special skills for conducting independent, scholarly research of publishable quality. Requirements traditionally include a working knowledge of one or more foreign languages, but currently a number of foreign-language alternatives have been approved by departments. Through acquisition of these skills, PhD candidates demonstrate their potential for careers as independent, publishing scholars. Refer to departmental sections of this Catalog for details on foreign-language requirements or alternatives.

The minimum period in which a doctoral degree can be earned is three full academic years of graduate study after completion of a baccalaureate degree, although in most disciplines the period is longer. Graduate teaching assistants (GTA) or graduate research assistants (GRA) whose work assignments are 10 hours per week (i.e. the equivalent of 3 semester hours) or more should expect to take more than the minimum period of 3 academic years to earn a doctoral degree. The only exception to the three-year minimum is the practice-focused DNP.
Doctor of Philosophy Degree

The Doctor of Philosophy degree is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and capacity for independent, original investigation. The first two criteria are tested in coursework and a comprehensive examination, the last in a dissertation in which the student must present clearly and effectively the results of substantial research. A combination of these accomplishments, rather than the mere accumulation of residence and course credits, is the essential consideration in awarding the PhD degree. The PhD differs from the EdD in a number of ways, including the fact that the PhD Plan of Study and comprehensive examination demonstrate a higher-level research focus, and there is a greater number of dissertation hours and higher level of complexity and independent thought in a PhD-level dissertation.

Field of specialization

A defined field of specialization is required of all candidates for the Doctor of Philosophy degree. A minimum of 48 semester hours of non-dissertation course credit is required. Candidates should consult their departments or the appropriate section of this Catalog for additional requirements. The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of 24 hours of dissertation research.

Research skill/language requirements

There is no universitywide foreign language/research skill requirement for doctoral students; each college or department offering the PhD degree may set its own requirements. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further information about PhD foreign language/research skill requirements, students may contact their departments or the Graduate School’s criteria for transfer of credit. It may be necessary for students. For further information about PhD foreign language/research skill requirements, students may contact their departments or the Graduate School office 205-348-5921.

Interdisciplinary Studies

There is a PhD degree program in interdisciplinary studies, and it is administered by the Graduate School. In addition to the general requirements for the PhD degree, the program of study and the supervisory committee for the prospective interdisciplinary studies degree candidate must be approved by the dean of the Graduate School before the student is admitted to the program. See Interdisciplinary Studies (IDS) (p. 603) at the Graduate School’s website for information on prerequisites, admission procedures, course of study, and other aspects of IDS programs.

Doctor of Education Degree

A minimum of two years of graduate study beyond the master’s degree is required for the completion of the EdD program. The student is required to complete 60 semester hours in approved graduate courses beyond the master’s degree, or 90 semester hours of approved graduate courses, and to defend a dissertation. The student must complete a minimum of 12 hours of dissertation research. In the College of Education (p. 380) section of the Graduate Catalog, there are specific regulations governing the EdD program.

Doctor of Musical Arts Degree

The DMA degree requires a minimum of 48 semester hours beyond the Master of Music degree, plus recitals and other examinations as determined by faculty of the School of Music. Specific requirements for each major area are outlined in the School of Music (p. 206) section of the Graduate Catalog.

Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) (p. 574) is a joint program offered by the University of Alabama in Huntsville College of Nursing (UAHCON), the University of Alabama at Birmingham School of Nursing (UABSON), and The University of Alabama Capstone College of Nursing (UACCN). The DNP is a practice-focused degree that is detailed in the Nursing section of this Catalog.

Admission to Doctoral Degree Programs

Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study. Admission to the Graduate School and the earning of a master’s degree from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student’s doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.

Residency Requirements

The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student’s doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog’s Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for
students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a "B" grade or better may be transferred. The student must have attained an overall graduate GPA of "B" or better on all graduate work attempted. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.

2. PhD Programs Only: A student holding an earned, in-field master’s degree and working in the field or a related field since earning the degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a "B" overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. For departments participating in this program, the use of this option must be indicated on the Plan of Study.

To participate in Option 2, the Plan of Study must be submitted during the first semester of enrollment. If any coursework from the in-field or related-field master’s degree was earned more than six years prior to the date of admission, the graduate program director or department head/chair must submit to the Graduate School for evaluation a Field-Related Employment Since Earning Master’s Degree form with the student’s CV and a PhD Plan of Study.

Consideration of transfer of credit or the acceptance of an earned master’s degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the penultimate semester or the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department's graduate coordinator regarding your department's transfer policy.

Each department wanting its doctoral students to be able to choose Option 2 needs to "opt in" to this option by informing the graduate dean in writing that they wish to be among the approved departments.

Time Limits

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master’s, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period (not seven years) prior to admission to the doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree. Revalidation (recertification) of any expired course credit is not an option.

Time Limits Extension Request

Only under compelling circumstances beyond the student’s control a student may petition for a one-semester extension to the seven-year time limit (or eight-year time limit for the selected programs noted above). The Graduate Council approved the following steps to request an extension:

- To begin the process, the student petitions the department head. In the petition the student:
  a. describes the compelling circumstances,
  b. briefly describes the current status of the dissertation, then
  c. includes a timeline showing each important remaining step in the completion of the dissertation. The last step and date in the timeline are submission of the successfully defended dissertation on or before the published final date for submission of dissertations for the requested extension semester.

- If the department head supports the petition, it is forwarded to the college dean.

- If the college dean supports the petition, it is sent to the graduate dean.

- If the graduate dean or his designee approves the extension, it will not require the student to validate any out-of-date UA or transfer courses previously approved for the plan of study.

- If a student fails to complete all degree requirements within the time limit for the student’s doctoral program or within a one-semester extension approved as noted above, the student will be dropped (suspended) from the doctoral program. To complete a doctoral degree, the student would have to reapply for admission and be admitted by the department and Graduate School. Graduate Council policies do not provide the option for a student failing to complete within the time limit to revalidate (recertify) either UA or transfer courses completed more than six years prior to the date of admission. Thus, a readmitted student would be able to apply to the new admission only those courses approved by the department and Graduate School and completed within the six years (18 fall, spring, and summer semesters) prior to the new admission.

Repeating Courses When Given an Extension

When requests are made for extensions of the doctoral time limits, and it is deemed that an out-of-date course is integral to the degree program, the college dean may request permission of the Graduate School for such a course to be repeated. In this case, both grades are used in calculation of the GPA.

Plan of Study

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School.

The PhD Plan of Study and DMA Plan of Study are available at the Graduate School website. The Plan of Study for other doctoral programs (EdD, DNP) are available from the student’s department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which
the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a "hold" may be placed on future registrations.

An amended Plan of Study (if needed) must be submitted to the Graduate School when the student submits the form for Admission to Candidacy for Doctoral Degree.

Preliminary or Comprehensive Examination
A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after

- any foreign language/research skill requirements are met (PhD students only);
- two full years of graduate study are completed; and
- the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student’s supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student’s research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Admission to Candidacy
The requirements for advancing to candidacy include passing the qualifying (major or preliminary) examination; completion of all coursework as listed on the approved program of study; receiving departmental approval of the dissertation subject (although some departments require the defense of a dissertation proposal and/or writing one or more preliminary sections of the dissertation as well); and having the committee recommend the student for Admission to Candidacy for the Doctoral Degree. The completed candidacy form is submitted to the Graduate School well in advance of the final semester.

Continuous Dissertation or Document Registration
Once a student has met the requirements for admission to candidacy, received approval for the dissertation research proposal, or initiated enrollment in 699 (dissertation research for a doctoral degree), the student must pursue completion of the dissertation without interruption by enrolling each fall and spring semester of the academic year for at least 3 hours of dissertation research. Summer enrollment for 699 Dissertation Research is expected if the student is working on the dissertation and using any University facilities or resources, including faculty time, but the only time summer registration is required for dissertation research (3 hours minimum) is when a doctoral student is graduating in August or defending the dissertation during the summer semester. This is true whether or not the student has formally submitted an Application for Admission to Candidacy.

Each PhD student must have completed a minimum of 24 hours of such dissertation work upon completion of the degree. The amount of dissertation research for which a student enrolls in any given semester should be commensurate with the progress a student is expected to make on the dissertation, as well as reflective of the extent to which University facilities and faculty time are invested in the proposed activities.

Dissertation Proposal
The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction giving an overview and stating the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal's format with respect to such things as the length of the introduction and detail of the review of the literature.

Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

Dissertation
A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. Early in the process, the subject of the dissertation must be approved by the dissertation committee of the major department or division and by the dean of the Graduate School.

A dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. The committee shall have no fewer than five members, all of whom are appointed by the dean of the Graduate School. The graduate dean’s approval of the proposed dissertation committee is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the form for Appointment/Change of a Doctoral Dissertation Committee.

All members of a dissertation committee must be members of the UA Graduate Faculty. The committee chair must be a full member of the Graduate Faculty, as described in the Catalog’s section on Qualifications of the Graduate Faculty (p. 34). One member must be from outside the student’s major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student’s dissertation committee.

The final oral dissertation defense is the culminating experience in the doctoral program. As such, all members of the dissertation committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations. Graduate School deadlines, including each semester’s dissertation deadline, are available at the Graduate School’s homepage.

Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research. If certain conditions are met for the student's final semester, the student may qualify to enroll for fewer than 3 hours of
699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester. This exception applies only to students who registered for at least 3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below:

**Final-Semester Dissertation (699) Minimum Registration Hours**

<table>
<thead>
<tr>
<th>When the <em>completed</em> electronic dissertation was submitted to ProQuest/the Graduate School</th>
<th>Minimum hours of 699 required in the final semester</th>
</tr>

<td>0</td>
</tr>
<tr>
<td>After 4:45 p.m. on the last-possible day for instructors to post grades for the semester before the student’s final semester, but before 4:45 p.m. on the last-possible day to register or add a course for the student’s final semester (both dates published in the University Academic Calendar)</td>
<td>1</td>
</tr>
<tr>
<td>After 4:45 p.m. on the last-possible day to register or add a course for the student’s final semester (date published in the University Academic Calendar)</td>
<td>3</td>
</tr>
</tbody>
</table>

*Completed* means submitted at ProQuest after being successfully defended; being carefully edited following the defense meeting; and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. At the time of ProQuest submission, the student also must submit the Survey of Earned Doctorates through the NORC website.

1 International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see "USCIS" section under “Minimum Hours–Other Policies and Regulatory Bodies” on page 3 of this policy.

2 The University Calendar is available at the Academics tab of the website of the University Registrar.

**Article-Style Dissertations**

This approach is intended for doctoral students whose dissertation will consist of a number of related manuscripts or articles that represent independent research or creative activity. It is an option available only to students in certain fields in which the faculty have received Graduate Council approval from the Graduate Council. A complete list of these fields is below:

- Accountancy
- Aerospace Engineering and Mechanics
- Applied Statistics
- Biological Sciences
- Chemical Engineering
- Chemistry
- Civil Engineering
- Computer Science
- Economics
- Education (all departments)
- Electrical and Computer Engineering
- Finance
- Geological Sciences
- Health Education and Promotion
- Management
- Management Science
- Marketing
- Mechanical Engineering
- Metallurgical and Materials Engineering
- Physics
- Psychology

Article-style dissertations must be based upon research completed while the student is enrolled at The University of Alabama. For each article used, the student must be the first author, or equivalent, as defined by the discipline.

As with traditional dissertations, the article-style dissertation must be the student’s original idea. It must be a unified work and include a sequence of articles of publishable quality around a cohesive theme, with a comprehensive review of literature demonstrating an in-depth understanding of the unifying framework.

- In article-style dissertations there will be introductory material to describe the studies, show how they are related, and explain their significance;
- connecting language to bridge each study to the next; and
- a summary making clear the importance of the studies, integrating the major findings, and discussing the implications for the overall topic.

These components do not have to be separate sections or chapters. They may be parts of the manuscripts or may be accomplished in an abstract.

All parts of both traditional and article-style dissertations must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline’s style manual require deviation. Students considering the article-style approach should contact the Graduate School before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the date of the required final oral examination.

**Electronic submission of dissertations:** August 15, 2009, is the date when electronic submission began to be required and paper submission no longer was accepted. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

**Protection of Human Subjects for Research**

Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University’s Institutional Review Board (IRB) for Protection
of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. The University's IRB approval form is available at the IRB website.

**Final Examinations**

When the dissertation has been completed, the candidate will be given a final oral examination by a committee of not fewer than five members, one of whom must be from outside the student’s major department or, for students in the College of Education, outside the student’s area (not program), and appointed by the dean of the Graduate School. This examination will focus primarily on the candidate's research work, as embodied in the dissertation, and the field in which the dissertation lies, but it may encompass the complete program for the degree. The results of the examination must be reported to the Office of the Graduate School at least six weeks before the commencement at which the degree is to be conferred.

**Application for Graduation**

Each candidate for a doctoral degree must submit an Application for Degree via myBama not later than the last day to register or add a course of the semester or the first term of the summer session in which requirements for the degree are to be completed. That day is published for each semester at the website of the University Registrar.

**Clearing the Academic Record for Commencement**

At least one week before commencement, the candidate’s record must have been cleared for graduation.

**Attendance at Commencement**

A candidate for a doctoral degree must be present at a scheduled commencement to receive the diploma and hood, unless excused by the graduate dean.

**Withholding or Withdrawing an Advanced Degree**

The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.

**Department of Chemical and Biological Engineering (CHBE)**

- Majors
  - Chemical Engineering (MS) (p. 480)
  - Chemical Engineering (PhD) (p. 482)

**CHE512 Polymer Materials Engineering**

Hours 3

Introduction to the manufacture, processing, and applications of organic polymeric materials. This course covers the chemistry of polymer manufacture, the molecular structures of polymers, and the structure-property relationships for thermoplastic and thermosetting polymers.

**CHE518 Tissue Engineering**

Hours 3

Tissue engineering is an emerging dynamic, experimental science in which engineering and biological science principles are used to develop techniques for improving or restoring the structure and function of tissue.

**CHE540 Health Safety Chem Process Ind**

Hours 3

This course will introduce chemical engineering students to the health and safety regulations and the designs and procedures to meet them in the Chemical Process. Advanced topics will also be introduced, including current relevant topics, such as recent accidents and ways and means of preventing a reoccurrence, advanced models of spills, and advanced safety analysis.

**CHE545 Introduction to Biochemical Engineering**

Hours 3

Study of biological processes, application of chemical engineering skills to areas including enzyme kinetics, fermentation, cell growth, and metabolic processes.

Prerequisite(s): CH 231

**CHE551 Adv Thermodynamics I**

Hours 3

Application of thermodynamic principles to chemical and phase equilibria.

**CHE552 Transport Phenomena**

Hours 3

Development of the analogy between momentum, energy, and mass transport, with applications.

**CHE553 Computation In Chem Engr**

Hours 3

Chemical-engineering applications of advanced calculus, numerical methods, and digital computer techniques, with emphasis on expressing physical situations in mathematical language.

**CHE554 Chemical Reaction Engr**

Hours 3

Chemical kinetics theory and experimental techniques. Industrial reactor design by advanced methods.

**CHE591 Special Problems**

Hours 1-4

Open to properly qualified graduate students. Advanced work of a research nature. Credit is based on the amount of work completed.

**CHE592 Special Problems**

Hours 1-3

Open to properly qualified graduate students. Advanced work of a research nature. Credit is based on the amount of work completed.

**CHE593 Chem & Biol Engr Practicum**

Hours 1-3

This course allows graduate students to gain classroom and lab experience under supervised conditions. Tasks may include grading for selected courses, structured lecturing, lab monitoring, and other related pedagogical exercises.

**CHE595 Seminar**

Hours 1

Discussion of current advances and research in chemical engineering, presented by graduate students and other speakers.
CHE596 Seminar
Hours 1
Discussion of current advances and research in chemical engineering, presented by graduate students and other speakers.

CHE598 Non-Thesis Research
Hours 1-6
No description available

CHE599 Thesis Research
Hours 1-12
No description available

CHE691 Special Problems
Hours 1-3
Problems of current research.

CHE692 Special Problems
Hours 1-3
Problems of current research.

CHE693 Chem & Biol Engr Practicum
Hours 1-3
This course allows graduate students to gain classroom and lab experience under supervised conditions. Tasks may include grading for selected courses, structured lecturing, lab monitoring, and other related pedagogical exercises.

CHE695 Seminar
Hours 1
Presentations of dissertation research.

CHE696 Seminar
Hours 1
Presentations of dissertation research.

CHE698 Non-Dissertation Research
Hours 1-6
No description available

CHE699 Dissertation Research
Hours 1-12
No description available

Chemical Engineering, MS

Admission Requirements

Specific admission requirements for the programs in chemical and biological engineering coincide with those of the Graduate School and the College of Engineering (p. 463) as detailed earlier in this catalog. Admission is also contingent upon approval by the graduate faculty of the Department of Chemical and Biological Engineering. Special opportunities are available for students with undergraduate degrees in fields other than chemical engineering. See the Admission Criteria section of this catalog for more information.

M.S. Degree Requirements

All graduate students in chemical engineering are required to pass the following core graduate courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>

Master of Science-Thesis Option (Plan I): 30 Credit hours

Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework and write a thesis (a minimum of six semester hours of thesis research required).

- A minimum of 24 credit hours of coursework is required.
- A minimum of six hours of thesis research is required.
- A student's curriculum and thesis must be approved by the student's graduate advisory committee. The student must pass a final comprehensive examination, which is typically a presentation and defense of the thesis. In addition, the student must satisfy all University requirements defined in the current edition of The University of Alabama Graduate Catalog.

Master of Science-Non-Thesis Option (Plan II): 30 Credit hours

Candidates for the master's degree under Plan II must earn a minimum of 30 semester hours of credit and complete a culminating or "Capstone experience" as described below.

- A minimum of 30 credit hours of coursework is required.
- A student's curriculum must be approved by the student's graduate advisory committee. The graduate advisory committee must also approve the submission of a manuscript, a conference proceeding or a graduate seminar presentation. This activity shall constitute The University of Alabama Graduate School culminating experience requirement for a MS Plan II degree in chemical engineering.

For additional information about chemical engineering graduate programs, contact Dr. Heath Turner.

Master's Degrees

The primary purpose of master's degree programs is to provide students with subject matter at an advanced level in their fields of study. Master's degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master's programs also help students become familiar with methods of independent investigation.

Program Requirements

Two plans are offered for the master's degree:

Plan I. Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a
minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

Plan II. Candidates for the master’s degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or “capstone experience” as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject. With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Residency Requirements
A student’s program at the master’s level must provide sufficient association with the resident faculty to permit individual evaluation of the student’s capabilities and achievements.

Graduate Credit
A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences
All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit
Courses of full graduate-level credit earned in a regionally accredited institution where a student was enrolled in the graduate school may be submitted for review for inclusion in a master’s degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student’s advisory committee and the dean of the Graduate School. Credit will not be accepted for transfer from any institution at which the student failed to achieve a “B” average on all graduate work attempted. Only courses in which a student earned a “B” grade or better may be transferred.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

A student initiates at the Graduate School’s website a Request for Transfer of Graduate Credit earned at another institution. It is also the student’s responsibility to assure that the Graduate School receives an official transcript of the credit requested for transfer, well in advance of the final semester.

With the approval of the student’s department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master’s degree may be transferred from another institution. All credit toward the master’s degree, including transfer credit, must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the master’s degree is to be awarded. Revalidation (recertification) of graduate credits that will be more than 18 semesters old at the time of UA master’s program completion is not an option.

Please note that some departments allow fewer than 12 hours of graduate transfer credit. Be sure to check with your department’s graduate coordinator regarding your department’s transfer policy.

400-Level Courses
A maximum of 6 semester hours of 400-level course credit may be accepted for a master’s degree program, but only if a form for Approval of 400-Level Course Work for Master’s Credit is approved by the Graduate School prior to the semester in which the 400-level coursework will be taken.

Time Limit
All requirements for the master’s degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. There is no provision for an extension of the time limit beyond six years for master’s students.

Admission to Candidacy
During the 2013-2014 academic year, the Graduate Council eliminated the master’s candidacy requirement. Departments may monitor master’s candidacy if they wish, but the Graduate School does not monitor it and will not accept master’s candidacy forms. Doctoral candidacy is not affected and remains an important doctoral program requirement.

Thesis
A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master’s degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student’s major department or division.

The final oral thesis defense is the culminating experience in the master’s program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

Article Style vs. Journal Format

Article Style.
At the doctoral level, “article-style dissertations” are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an "article-style thesis" to be presented for a master's degree.

Journal Format.
A “journal-format thesis” is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal's “information for authors” or similarly titled guidelines in conjunction with the Graduate School’s Student Guide to Preparing Electronic Theses and Dissertations.
A thesis committee must consist of at least three members appointed by the dean of the Graduate School. A form for Appointment or Change of Master’s Thesis Committee is used to request that the graduate dean appoint a thesis committee. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student’s major department. If the outside member is not a full or associate member of the University of Alabama, a highly qualified person from another university, a business, or industry, the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student’s thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. A final oral examination is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral examination unless there are extraordinary circumstances warranting the graduate dean’s approval of the absence prior to the defense meeting.

As of August 15, 2009, all theses are submitted electronically rather than on paper. See the Graduate School’s homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School’s website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student’s major department.

**Protection of Human Subjects for Research**

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University’s Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research. In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

**Comprehensive Examinations**

In addition to the regular course examinations, a final comprehensive examination representing a “culminating” or “capstone” experience for a degree is required of all candidates for the master’s degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a “policy and practice” paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School. The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. A final report, on the Master’s/EdS Examination Form is on the Graduate School website. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

**Application for Graduation**

Each candidate for a master’s degree must apply for graduation through myBama no later than the registration period for the semester or the first session of the summer term in which requirements for the degree are to be completed.

**Second Master’s Degree**

Six (6) semester hours of eligible credit from one master’s degree at The University of Alabama may be applied to the requirements for a second master’s degree, but only if the department of the second master’s agrees to the courses in the plan of study. Any hours from the previous master’s degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. ***Please note that if a student double counts six hours between two master’s degrees, no hours may double count toward any additional master’s degrees.

**Chemical Engineering, Ph.D.**

**Admission Requirements**

Specific admission requirements for the programs in chemical and biological engineering coincide with those of the Graduate School and the College of Engineering (p. 463) as detailed earlier in this catalog. Admission is also contingent upon approval by the graduate faculty of the Department of Chemical and Biological Engineering. Special opportunities are available for students with undergraduate degrees in fields other than chemical engineering.

See the Admission Criteria section of this catalog for more information.

**Doctor of Philosophy degree requirements**

Study in the doctoral program is contingent upon satisfactory performance on the qualifying examination described above. The department requires that students take and pass CHE 695 Seminar during the first part of the doctoral program of study and CHE 696...
Seminar in the latter part of the program. These two hours of seminar are in addition to the course hours needed for graduation.

A prospectus examination is required of all candidates for the doctor of philosophy degree. This examination is given after two full years of graduate study have been completed and the supervisory committee deems the student to have adequate preparation. The examination consists of a written proposal describing the student’s research activities and an oral presentation and defense of the proposal before the student’s supervisory committee. The examination must be completed at least one year prior to the final dissertation defense.

A doctoral Plan of Study must be submitted to the Graduate School by the time the student completes 30 hours of UA and/or transfer for the doctorate. The PhD Plan of Study is available at the Graduate School website.

A department-approved Admission to Candidacy for the Doctoral Degree is submitted to the Graduate School as soon as possible after passing the comprehensive (preliminary) examination. See the online Graduate Catalog (Sec. 4.11.3) for details on plan of study, admission to candidacy, and all other degree requirements. The College of Engineering MS Degree and PhD Degree requirements (p. 463) are detailed in earlier sections of this catalog.

**Doctoral Degrees**

The University offers several types of doctorates, each of which is described below.

The Doctor of Philosophy (PhD) degree is regarded as the researcher’s degree. Program requirements include the acquisition of special skills for conducting independent, scholarly research of publishable quality. Requirements traditionally include a working knowledge of one or more foreign languages, but currently a number of foreign-language alternatives have been approved by departments. Through acquisition of these skills, PhD candidates demonstrate their potential for careers as independent, publishing scholars. Refer to departmental sections of this Catalog for details on foreign-language requirements or alternatives.

The minimum period in which a doctoral degree can be earned is three full academic years of graduate study after completion of a baccalaureate degree, although in most disciplines the period is longer. Graduate teaching assistants (GTA) or graduate research assistants (GRA) whose work assignments are 10 hours per week (i.e. the equivalent of 3 semester hours) or more should expect to take more than the minimum period of 3 academic years to earn a doctoral degree. The only exception to the three-year minimum is the practice-focused DNP.

**Doctor of Philosophy Degree**

The Doctor of Philosophy degree is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and capacity for independent, original investigation. The first two criteria are tested in coursework and a comprehensive examination, the last in a dissertation in which the student must present clearly and effectively the results of substantial research. A combination of these accomplishments, rather than the mere accumulation of residence and course credits, is the essential consideration in awarding the PhD degree. The PhD differs from the EdD in a number of ways, including the fact that the PhD Plan of Study and comprehensive examination demonstrate a higher-level research focus, and there is a greater number of dissertation hours and higher level of complexity and independent thought in a PhD-level dissertation.

**Field of specialization**

A defined field of specialization is required of all candidates for the Doctor of Philosophy degree. A minimum of 48 semester hours of non-dissertation course credit is required. Candidates should consult their departments or the appropriate section of this Catalog for additional requirements. The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of 24 hours of dissertation research.

**Research skill/language requirements**

There is no universitywide foreign language/research skill requirement for doctoral students; each college or department offering the PhD degree may set its own requirements. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further information about PhD foreign language/research skill requirements, students may contact their departments or the Graduate School office 205-348-5921.

**Interdisciplinary Studies**

There is a PhD degree program in interdisciplinary studies, and it is administered by the Graduate School. In addition to the general requirements for the PhD degree, the program of study and the supervisory committee for the prospective interdisciplinary studies degree candidate must be approved by the dean of the Graduate School before the student is admitted to the program. See Interdisciplinary Studies (IDS) (p. 603) at the Graduate School’s website for information on prerequisites, admission procedures, course of study, and other aspects of IDS programs.

**Doctor of Education Degree**

A minimum of two years of graduate study beyond the master’s degree is required for the completion of the EdD program. The student is required to complete 60 semester hours in approved graduate courses beyond the master’s degree, or 90 semester hours of approved graduate courses, and to defend a dissertation. The student must complete a minimum of 12 hours of dissertation research. In the College of Education (p. 380) section of the Graduate Catalog, there are specific regulations governing the EdD program.

**Doctor of Musical Arts Degree**

The DMA degree requires a minimum of 48 semester hours beyond the Master of Music degree, plus recitals and other examinations as determined by faculty of the School of Music. Specific requirements for each major area are outlined in the School of Music (p. 206) section of the Graduate Catalog.

**Doctor of Nursing Practice**

The Doctor of Nursing Practice (DNP) (p. 574) is a joint program offered by the University of Alabama in Huntsville College of Nursing (UAHCON), the University of Alabama at Birmingham School of Nursing (UABSON), and The University of Alabama Capstone College of Nursing (UACCN). The DNP is a practice-focused degree that is detailed in the Nursing section of this Catalog.

**Admission to Doctoral Degree Programs**

Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study. Admission to the Graduate School and the earning of a master’s degree...
from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student’s doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.

**Residency Requirements**

The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student’s doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog’s Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

**Graduate Credit**

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

**Graduate Credit for Noncredit Experiences**

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

**Transfer of Credit**

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. **All doctoral programs:** Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a “B” grade or better may be transferred. The student must have attained an overall graduate GPA of “B” or better on all graduate work attempted. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.

2. **PhD Programs Only:** A student holding an earned, in-field master’s degree and working in the field or a related field since earning the degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a “B” overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. For departments participating in this program, the use of this option must be indicated on the Plan of Study.

To participate in Option 2, the Plan of Study must be submitted during the first semester of enrollment. If any coursework from the in-field or related-field master’s degree was earned more than six years prior to the date of admission, the graduate program director or department head/chair must submit to the Graduate School for evaluation a Field-Related Employment Since Earning Master’s Degree form with the student’s CV and a PhD Plan of Study.

Consideration of transfer of credit or the acceptance of an earned master’s degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the penultimate semester or the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department’s graduate coordinator regarding your department’s transfer policy.

Each department wanting its doctoral students to be able to choose Option 2 needs to “opt in” to this option by informing the graduate dean in writing that they wish to be among the approved departments.

**Time Limits**

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master’s, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period (not seven years) prior to admission to the doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree. Revalidation (recertification) of any expired course credit is not an option.

**Time Limits Extension Request**

Only under compelling circumstances beyond the student’s control a student may petition for a one-semester extension to the seven-year time limit (or eight-year time limit for the selected programs noted above). The Graduate Council approved the following steps to request an extension:

- To begin the process, the student petitions the department head. In the petition the student
A preliminary or comprehensive qualifying examination is required of all

will be completed, discuss research interests, and so forth. Then a Plan of
Study must be prepared and submitted to the Graduate School.
The PhD Plan of Study and DMA Plan of Study are available at the
Graduate School website. The Plan of Study for other doctoral programs
(EdD, DNP) are available from the student’s department, college, or
school. All doctoral students must have a completed Plan of Study
approved by the Graduate School no later than the semester during which
the student will complete 30 semester hours of UA and/or transfer credit
toward the doctoral degree. Otherwise, a “hold” may be placed on future
registrations.
An amended Plan of Study (if needed) must be submitted to the Graduate
School when the student submits the form for Admission to Candidacy
for Doctoral Degree.

Preliminary or Comprehensive Examination
A preliminary or comprehensive qualifying examination is required of all
doctoral candidates. This examination is given after

• describes the compelling circumstances,
• briefly describes the current status of the dissertation, then
• includes a timeline showing each important remaining step
in the completion of the dissertation. The last step and date
in the timeline are submission of the successfully defended
dissertation on or before the published final date for submission
of dissertations for the requested extension semester.

• If the department head supports the petition, it is forwarded to the
college dean.
• If the college dean supports the petition, it is sent to the graduate
dean.
• If the graduate dean or his designee approves the extension, it will
not require the student to validate any out-of-date UA or transfer
courses previously approved for the plan of study.
• If a student fails to complete all degree requirements within the time
limit for the student’s doctoral program or within a one-semester
extension approved as noted above, the student will be dropped
(suspended) from the doctoral program. To complete a doctoral
degree, the student would have to reapply for admission and be
admitted by the department and Graduate School. Graduate
Council policies do not provide the option for a student failing to
complete within the time limit to revalidate (recertify) either UA or
transfer courses completed more than six years prior to the date
of admission. Thus, a readmitted student would be able to apply to
the new admission only those courses approved by the department
and Graduate School and completed within the six years (18 fall,
spring, and summer semesters) prior to the new admission.

Continuous Dissertation or Document Registration
Once a student has met the requirements for admission to candidacy, received approval for the dissertation research proposal, or initiated enrollment in 699 (dissertation research for a doctoral degree), the student must pursue completion of the dissertation without interruption by enrolling each fall and spring semester of the academic year for at least 3 hours of dissertation research. Summer enrollment for 699 Dissertation Research is expected if the student is working on the dissertation and using any University facilities or resources, including faculty time, but the only time summer registration is required for dissertation research (3 hours minimum) is when a doctoral student is graduating in August or defending the dissertation during the summer semester. This is true whether or not the student has formally submitted an Application for Admission to Candidacy.

Each PhD student must have completed a minimum of 24 hours of such dissertation work upon completion of the degree. The amount of dissertation research for which a student enrolls in any given semester should be commensurate with the progress a student is expected to make on the dissertation, as well as reflective of the extent to which University facilities and faculty time are invested in the proposed activities.

Dissertation Proposal
The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction giving an overview and stating the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal’s format with respect to such things as the length of the introduction and detail of the review of the literature.

Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.
**Dissertation**

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. Early in the process, the subject of the dissertation must be approved by the dissertation committee of the major department or division and by the dean of the Graduate School.

A dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. The committee shall have not fewer than five members, all of whom are appointed by the dean of the Graduate School. The graduate dean's approval of the proposed dissertation committee is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the form for Appointment/Change of a Dissertation Committee.

All members of a dissertation committee must be members of the UA Graduate Faculty. The committee chair must be a full member of the Graduate Faculty, as described in the Catalog's section on Qualifications of the Graduate Faculty (p. 34). One member must be from outside the student’s major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student’s dissertation committee.

The final oral dissertation defense is the culminating experience in the doctoral program. As such, all members of the dissertation committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations. Graduate School deadlines, including each semester's dissertation deadline, are available at the Graduate School’s homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research. If certain conditions are met for the student's final semester, the student may qualify to enroll for fewer than 3 hours of 699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester. This exception applies only to students who registered for at least 3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below:

**Final-Semester Dissertation (699) Minimum Registration Hours**

<table>
<thead>
<tr>
<th>When was the completed electronic dissertation submitted to ProQuest/the Graduate School?</th>
<th>Minimum hours of 699 registration required in the final semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>By 4:45 p.m. on the last-possible day for instructors to post grades for the semester before the student’s final semester (date published in the University Academic Calendar)</td>
<td>0</td>

<tr>
<td>After 4:45 p.m. on the last-possible day to register or add a course for the student’s final semester (both dates published in the University Academic Calendar)</td>
<td>1</td>
</tr>
<tr>
<td>After 4:45 p.m. on the last-possible day to register or add a course for the student’s final semester (date published in the University Academic Calendar)</td>
<td>3</td>
</tr>
</tbody>
</table>

“Completed” means submitted at ProQuest after being successfully defended; being carefully edited following the defense meeting; and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. At the time of ProQuest submission, the student also must submit the Survey of Earned Doctorates through the NORC website.

International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see "USCIS" section under "Minimum Hours—Other Policies and Regulatory Bodies" on page 3 of this policy.

The University Calendar is available at the Academics tab of the website of the University Registrar.

**Article-Style Dissertations**

This approach is intended for doctoral students whose dissertation will consist of a number of related manuscripts or articles that represent independent research or creative activity. It is an option available only to students in certain fields in which the faculty have received Graduate Council approval from the Graduate Council. A complete list of these fields is below:

- Accountancy
- Aerospace Engineering and Mechanics
- Applied Statistics
- Biological Sciences
- Chemical Engineering
- Chemistry
- Civil Engineering
- Computer Science
- Economics
- Education (all departments)
- Electrical and Computer Engineering
the principal investigator is responsible for contacting the college Human case of dissertation research that involves the use of human subjects, matter how great or small the involvement of the human subjects. In the and approval to use human subjects in research precede the research, no is conducted ethically. University and federal policies require that review

Scientific research involving human subjects has produced substantial Protection of Human Subjects for Research

before the student can be cleared for graduation.

In article-style dissertations, there will be introductory material to describe the studies, show how they are related, and explain their significance;

• connecting language to bridge each study to the next; and

• a summary making clear the importance of the studies, integrating the major findings, and discussing the implications for the overall topic.

These components do not have to be separate sections or chapters. They may be parts of the manuscripts or may be accomplished in an abstract.

As with traditional dissertations, the article-style dissertation must be the student’s original idea. It must be a unified work and include a sequence of articles of publishable quality around a cohesive theme, with a comprehensive review of literature demonstrating an in-depth understanding of the unifying framework.

All parts of both traditional and article-style dissertations must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline’s style manual require deviation. Students considering the article-style approach should contact the Graduate School before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the date of the required final oral examination.

August 15, 2009, is the date when electronic submission began to be required and paper submission no longer was accepted. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

Electronic submission of dissertations: August 15, 2009, is the date

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University’s Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. The University’s IRB approval form is available at the IRB website.

Final Examinations

When the dissertation has been completed, the candidate will be given a final oral examination by a committee of not fewer than five members, one of whom must be from outside the student’s major department or, for students in the College of Education, outside the student’s area (not program), and appointed by the dean of the Graduate School. This examination will focus primarily on the candidate’s research work, as embodied in the dissertation, and the field in which the dissertation lies, but it may encompass the complete program for the degree. The results of the examination must be reported to the Office of the Graduate School at least six weeks before the commencement at which the degree is to be conferred.

Application for Graduation

Each candidate for a doctoral degree must submit an Application for Degree via myBama not later than the last day to register or add a course of the semester or the first term of the summer session in which requirements for the degree are to be completed. That day is published for each semester at the website of the University Registrar.

Clearing the Academic Record for Commencement

At least one week before commencement, the candidate’s record must have been cleared for graduation.

Attendance at Commencement

A candidate for a doctoral degree must be present at a scheduled commencement to receive the diploma and hood, unless excused by the graduate dean.

Withholding or Withdrawing an Advanced Degree

The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.

Department of Civil, Construction and Environmental Engineering (CCEE)

Graduate Degrees

• Civil Engineering (MS) (p. 492)

• Environmental Engineering (MS) (p. 499)

• Civil Engineering (PhD) (p. 495)

• Dual Graduate Degree Programs

• Scholars Program

Both coursework-only and coursework-with-thesis options are available in the master’s degree programs.

Graduate Research Focus Areas

• Construction Engineering and Management

• Environmental and Water Resources Engineering

• Structural Engineering and Materials

• Transportation Systems Engineering

While most graduate studies are focused in one of these four focus areas, many student plans of study involve two or more of the above areas.
For More Information

For additional information about our graduate programs, reference the Civil, Construction, and Environmental Engineering Graduate Handbook or contact Dr. Andrew J. Graettinger.

Master’s students may, with permission of the department and approval by the Graduate School, receive credit for six hours of 400-level credit. No 400-level courses can be approved for application to a PhD degree, other than the maximum of 6 hours already completed as part of a master’s degree. A master’s student may, with approval of a petition, meet prerequisites with a combination of related coursework and experience.

CE501 Masters Capstone Project-Plan II
Hours 3
Development of a research paper, professional practice or policy paper, or other equivalent report. Topic to be approved in advance by the student’s graduate advisor.
Prerequisite(s): MS Plan II students only

CE514 Information Systems Design
Hours 3
An overview of management information systems (MIS). The course will focus on the practical aspects, applications, and methodology or MIS, particularly from the construction engineer’s perspective. Information design methodology and building information modeling (BIM) will be covered in detail.

CE517 Advanced Project Management
Hours 3
Not open to students who have credit for CE 417. This is an engineering management course designed to introduce students to the functions of project engineers and managers. It details the processes of planning and controlling project scope, time, and cost.

CE518 Engineering Management
Hours 3
Not open to students who have credit for CE 418. An introduction to management principles, and the management functions of planning, organizing, motivating, and controlling. Management of engineers in research, design, manufacturing/construction, and quality will be studied.

CE521 Environmental Engineering Microbiology
Hours 3
Fundamentals of microbiology for environmental engineers and application of these principles to natural and engineered systems.
Prerequisite(s): CE 320 or equivalent

CE522 Solid Hazardous Waste Management
Hours 3
Engineering design and regulatory requirements for the collection, storage, recycling, treatment, and disposal of solid wastes.
Prerequisite(s): CE 320

CE524 Water & Wastewater Treatment
Hours 3
No description available
Prerequisite(s): AEM 311 or CHE 304; and CE 320

CE525 Air Pollution
Hours 3
Introduction to the source, characteristics, and effects of air pollution and to air pollution control technology and design.
Prerequisite(s): AEM 311 or CE 320

CE527 Storm Water Management
Hours 3
Quality and quantity of urban storm water. Receiving water problems and sources of pollutants. Runoff quality and quantity characteristics. Selection and design of controls. Regulations.

CE531 Structural Dynamics
Hours 3
Response of civil engineering structures to typical dynamic loads including theory, development of basic equations, and measurement of structure response in the laboratory.
Prerequisite(s): AEM 264 and CE 331

CE532 Matrix Analysis of Structures
Hours 3
Introduction to the matrix-displacement method of analysis for framed structures, including computer implementation of analysis. An introduction to finite-element analysis is also included.
Prerequisite(s): CE 331

CE533 Structural Loads
Hours 3
Calculation of typical gravity and lateral loads on Civil Engineering structures, identification of load paths for different building systems, and preliminary evaluation of structural adequacy.
Prerequisite(s): CE 331

CE534 Advanced Structural Mechanics
Hours 3
Introduction to advances structural mechanics topics, including elementary elasticity, elementary beam theories, beams on elastic foundations, energy methods, buckling and free vibration of beams, and elementary thin-plate theory.

CE535 Concrete Materials
Hours 3
Prerequisite(s): CE 331 or CE 340

CE536 Wood Structural Design
Hours 3
Modern timber engineering: design of beams, columns, trusses, and floor systems.
Prerequisite(s): CE 331
CE537 Reinforced Concrete Struct II
Hours 3
Design of reinforced concrete building components including two-way slabs, slender columns, prestressed beams, slap-on-grade, and retaining walls.
Prerequisite(s): CE 433

CE538 Struct Steel Design II
Hours 3
Basic and elementary design procedures for steel structures such as plate girders, mill buildings, multistory buildings, highway bridges, and light-gauge steel structures.
Prerequisite(s): CE 434

CE541 Wind and Earthquake Engineering
Hours 3
Wind and Earthquake engineering theories and their applications in load estimation and structural design.
Prerequisite(s): CE 531, Structural Dynamics or instructor permission.

CE542 Waste Containment Facility
Hours 3
Introduction to the fundamentals of soil behavior as they relate to environmental engineering. Topics include soil behavior, soil compaction, conduction phenomena, geosynthetics, and aspects of landfill design.
Prerequisite(s): CE 320

CE543 Prestressed Concrete Design
Hours 3
Analysis and design of prestressed concrete members, review of hardware, stress calculations, prestress losses, section proportioning, flexural design, shear design, deflections, and statically indeterminate structures.
Prerequisite(s): CE 433 or equivalent course on reinforced concrete structures

CE544 Foundation Engineering
Hours 3
Analysis and design of soil foundation systems.
Prerequisite(s): CE 340

CE554 Urban Transportation Planning
Hours 3
An introduction to the planning process, software associated with transportation modeling, and conducting transportation planning and traffic impact studies.

CE556 Transportation System Analysis
Hours 3
This course integrates the basic concepts and tools of systems analysis, including those from microeconomics, optimization, project evaluation and decision making into the context of transportation planning and management.
Prerequisite(s): CE 350

CE559 Pavement Design and Rehabilitation
Hours 3
This course covers two areas concerning care of existing highway asphalt and concrete pavements. Major maintenance includes overlay design, additional drainage, recycling, and slab repair. Routine maintenance includes distress surveys, pothole repair, and crack and joint sealing.
Prerequisite(s): CE 350 or CE 366

CE560 Front End Planning
Hours 3
Principles and applications for effective early planning of capital facilities, including: finance, economics decision making, risk management, team alignment, and front end planning processes and tools.

CE561 Horizontal Construction Method
Hours 3
Introduction to horizontal construction engineering equipment and methods. Design of horizontal construction systems, and construction operation analyses and simulation.

CE562 Vertical Construction Methods
Hours 3
Construction of buildings, including mechanical, electrical, plumbing and controls systems, design of temporary structures, and planning and design of lifts.
Prerequisite(s): CE 366

CE563 Construction Cost Estimating
Hours 3
Addresses the estimating and cost control function from conceptual planning through project execution. Topics include productivity analysis, organization of estimates, cost forecasting, estimating tolls and techniques, contingency planning and relationship to contract types and project execution strategies.
Prerequisite(s): CE 366

CE564 Safety Engineering
Hours 3
Not open to students with credit for CE 464. An exposure to safety engineering and accident prevention including state and federal laws related to general and construction projects. Topics include accident theories, safety regulations, Construction Safety Act, hazards and their control, human behavior and safety, and safety management.
Prerequisite(s): GES 255, CE 366

CE567 Constr. Accounting & Finance
Hours 3
Applications of accounting and financial practice to management of construction projects.
Prerequisite(s): CE366

CE568 Construction Scheduling
Hours 3
The management structure of construction companies and the laws, regulations, practices, tools, and processes used in planning, scheduling, and monitoring construction projects. Writing proficiency is required for a passing grade in this course.
CE570 Open Channel Flow  
Hours 3  
Basic concepts of fluid flow, energy and momentum principles, flow resistance in nonuniform sections, channel controls and transitions, and nonuniform flow computations.  
Prerequisite(s): CE 378

CE573 Statistical Applications  
Hours 3  
Applications of statistical and probabilistic methodologies for analysis and solution of practical civil engineering problems, including hypothesis testing, simple and multiple regression analysis, analysis of variance for single and multi-factor experiments, forecasting models, simulation, and statistical quality control.  
Prerequisite(s): GES 255

CE575 Hydrology  
Hours 3  
Hydrologic cycle, rainfall-runoff relations, unit hydrograph, statistical hydrology, and hydrologic simulation; includes a class project with application to flood control, water supply, and multipurpose projects.  
Prerequisite(s): CE 378

CE580 Forensic Engineering  
Hours 3  
When failures in the built environment occur, whether during design, construction or in-service, a thorough examination of the causes is essential to both the evolution sound engineering practices and to dispute resolution through the legal system. The role of the engineer in this process is examined.

CE581 Legal Aspects of Engineering and Construction  
Hours 3  
Legal aspects of engineering and construction contracts and specifications; contract formation, interpretation, rights and duties, and changes; legal liabilities and professional ethics of architects, engineers and contractors. This is a three hour survey course covering, primarily, the organization of the federal and state courts, construction contracting, potential tort liability and professionalism for engineers in Alabama.  
Prerequisite(s): CE 320, CE 331, CE 340, CE 350, CE 366 or CE 378, and one HU elective (3 credits)

CE584 Exp. Design & Field Sampling  
Hours 3  
Experimental design, sensitivity analyses, water sampling and flow monitoring, receiving water chemical reactions. Field investigations.

CE585 Constructn Site Erosion Contrl  
Hours 3  

CE586 GIS for Civil Engineers  
Hours 3  
Introduction to geographic information system design and use for civil engineering problem solving.  
Prerequisite(s): CE 260 and any CE 300 Level course

CE591 Special Problems  
Hours 1-3  
Independent study. Credit is based on the amount of work undertaken.

CE593 Practicum  
Hours 1-3  
This course allows graduate students to gain classroom and laboratory experience under supervised conditions. Tasks may include grading for selected courses, structured lecturing, laboratory monitoring, and other related pedagogical exercises.

CE598 Non-Thesis Research  
Hours 1-6  
Research Not Related to Thesis. Variable credit.

CE599 Thesis Research  
Hours 1-12  
Master's Thesis Research. One to Twelve hours.

CE616 Advanced Information Systems  
Hours 3  
Current concepts in information systems architecture and applications, including decision support systems and expert systems. Emphasis placed on expanded use of systems design methodology.  
Prerequisite(s): CE 414 or CE 514

CE631 Experimental Methods in Structural Dynamics  
Hours 3  
Introduction to experimental methods in the behavior of structures subjected to dynamic loading. Principles of vibration testing and digital signal processing. Current techniques in modal analysis, system identification, actuator and structural control, structural health monitoring.  
Prerequisite(s): CE 531

CE632 Structural Reliability  
Hours 3  
The knowledge taught in this course is to provide the background needed to understand how reliability-based design criteria were developed and to provide a basic tool for structural engineers interested in applying this reliability-based design criteria to other situations.  
Prerequisite(s): CE 573 Statistical Applications in Civil Engineering or instructor permission

CE635 Analytical Methods in Cement and Concrete  
Hours 3  
Experimental methods used to characterize cementitious materials and conduct forensic or in-service investigations of concrete structures in the field (i.e. SEM, EDS, XRD, XRF, electron microprobe, calorimetry, and nondestructive testing / data acquisition & processing). Capabilities and limitations of these methods. Topics to rotate as needed to support current research.  
Prerequisite(s): Graduate standing
CE636 Advanced Infrastructure Materials  
Hours 3  
Introduction to advanced and innovative materials used in civil infrastructure systems. An introduction to research methodology in materials is also included.  
Prerequisite(s): CE 331

CE640 Earthquake Engineering  
Hours 3  
This course integrates the knowledge from several engineering and science disciplines, to develop an understanding of the effect of earthquake ground motions on the civil engineering structures, and lead to the design of earthquake resistant structures. The topics include engineering seismology, ground motion characterization, probabilistic hazard analysis, response spectra, inelastic structural analysis and performance-based earthquake-resistant design. The course will also introduce the recent development in the use of supplemental damping and seismic isolation systems to improve the seismic performance of buildings and bridges.  
Prerequisite(s): CE 531

CE641 Wind Engineering  
Hours 3  
This research-oriented class is intended to provide a rational description of the phenomena involved and to develop appropriate analytical and design tools for structural engineering. The course attempts to present a synthesis of the main trends of specialized literature in Wind Engineering.  
Prerequisite(s): CE 531

CE655 Sustainable Transportation  
Hours 3  
No description available

CE656 Transportation Demand & Network Model  
Hours 3  
Theory and models of individual choice behavior and their applications in travel demand modeling; mathematical models for transportation network problems and their applications in planning and operation of urban highway and transit systems.  
Prerequisite(s): CE 456 and CE 556 and CE 573  
Prerequisite(s) with concurrency: CE 573

CE671 Hydrologic Modeling  
Hours 3  
Basics of surface water modeling including hydrologic modeling of watersheds / basins and floodrouting.  
Prerequisite(s): CE 378

CE686 Advanced Civil Engineering GIS Application Development  
Hours 3  
This advanced GIS application development course takes a student-centered project-based learning approach to customize and program in GIS. The course focuses on solving real problems in civil engineering that are worthy of scholarly publication. Independent learning, research skills, and technical writing are strongly emphasized in this course.  
Prerequisite(s): Introductory course in GIS

CE691 Special Problems  
Hours 1-6  
Advanced work in some area of specialization. Credit awarded is based on the amount of work completed.

CE693 Practicum  
Hours 1-3  
This course allows graduate students to gain classroom and laboratory experience under supervised conditions. Tasks may include grading for selected courses, structured lecturing, laboratory monitoring, and other related pedagogical exercises.

CE699 Dissertation Research  
Hours 1-12  
No description available

Civil Engineering, MS

The department offers programs leading to the Master of Science in civil engineering, Master of Science in engineering (environmental engineering) and Doctor of Philosophy degrees in civil engineering. Research programs in the department include environmental quality and water resources; management and safety of transportation systems; structural engineering including assessment, renewal, and protection of infrastructure; and construction engineering and management. Laboratory facilities are provided for graduate research and instruction in these and other areas.

The requirements for admission to the Graduate School are detailed here (p. 11). The Department of Civil, Construction, and Environmental Engineering also embraces the requirements of the College of Engineering, summarized as follows:

1. An applicant must have earned a baccalaureate degree from an institution accredited by the Engineering Accreditation Council (EAC) of ABET Inc. and have a GPA of at least 3.0 on a 4.0 scale, or at least 3.0 for the last 60 hours completed.
2. An applicant who is not a graduate of EAC/ABET-accredited programs must have Graduate Record Examination general test scores of 300 or higher and have a GPA of 3.0 or higher on a 4.0 scale.

See the Admission Criteria section of this catalog for more information.

Degree Requirements

Master of Science Degree Requirements

The basic requirements for both the master of science in civil engineering and master of science in engineering (environmental engineering) are identical. A total of 30 hours is required for a master's degree, consisting of at least 24 regular course hours and 6 or more thesis research hours for Plan I students. The student’s advisor and supervisory committee work with the student to define an appropriate plan of study that meets all degree requirements, including any prerequisite or preparatory work and a core set of courses as required and specified by each specialty area. Plan I students are required to pass a thesis defense administered by the student’s supervisory committee while Plan II students must pass CE 501 MS Capstone Proj. Plan II.

Thesis Option (Plan I): 30 Credit Hours

Plan of Study (minimum of 30 credit hours)

- 6 hours of CE 599 Thesis Research
- 0-3 hours of CE 593 Practicum/CE 693 Practicum
- 21-24 hours of approved coursework
  - 9 hours of core coursework (see below)
  - 6 hours maximum of approved 400-level courses
  - 12 hours maximum of approved transfer credit
  - 15 hours minimum of CE courses
- Thesis Committee and Defense
  - Minimum of three graduate faculty, with the majority from the department and at least one member from outside the department
  - Maximum of two attempts to pass defense
  - The Committee may require additional prerequisite courses (not allowed as part of the Plan of Study) for those students without an ABET/EAC-accredited degree
- Maximum of 6 years to complete degree requirements

Non-Thesis Option (Plan II): 30 Credit Hours

Plan of Study (minimum of 30 credit hours)

- 0-3 hours of CE 593 Practicum/CE 693 Practicum
- 0-3 hours of CE 598 Non-Thesis Research
- 21-27 hours of approved coursework
- Approved Coursework (21-27 hours)
  - 9 hours of core coursework (see below)
  - 6 hours maximum of approved 400-level courses
  - 12 hours maximum of approved transfer credit
  - 18 hours minimum of CE courses
- 3 Hours CE 501 Master Capstone Project
- Maximum of 6 years to complete degree requirements

MSCE Core Coursework Requirements (9 hours)

Master's Degrees

The primary purpose of master's degree programs is to provide students with subject matter at an advanced level in their fields of study. Master's degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master's programs also help students become familiar with methods of independent investigation.

Program Requirements

Two plans are offered for the master's degree:

Plan I. Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

Plan II. Candidates for the master's degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or "capstone experience" as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject. With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Residency Requirements

A student's program at the master's level must provide sufficient association with the resident faculty to permit individual evaluation of the student's capabilities and achievements.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Courses of full graduate-level credit earned in a regionally accredited institution where a student was enrolled in the graduate school may be submitted for review for inclusion in a master's degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student's advisory committee and the dean of the Graduate School. Credit will not be accepted for transfer from any institution at which the student failed to achieve a "B" average on all graduate work attempted. Only courses in which a student earned a "B" grade or better may be transferred.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

A student initiates at the Graduate School's website a Request for Transfer of Graduate Credit earned at another institution. It is also the student's responsibility to assure that the Graduate School receives an official transcript of the credit requested for transfer, well in advance of the final semester.

With the approval of the student's department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master's degree may be transferred from another institution. All credit toward the master's degree, including transfer credit, must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the master's degree is to be awarded. Revalidation (recertification) of graduate credits that will be more than 18 semesters old at the time of UA master's program completion is not an option.

Please note that some departments allow fewer than 12 hours of graduate transfer credit. Be sure to check with your department's graduate coordinator regarding your department's transfer policy.

400-Level Courses

A maximum of 6 semester hours of 400-level course credit may be accepted for a master's degree program, but only if a form for Approval of 400-Level Course Work for Master's Credit is approved by the Graduate School prior to the semester in which the 400-level coursework will be taken.

Time Limit

All requirements for the master's degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. There is no provision for an extension of the time limit beyond six years for master's students.

Admission to Candidacy

During the 2013-2014 academic year, the Graduate Council eliminated the master's candidacy requirement. Departments may monitor master's candidacy if they wish, but the Graduate School does not monitor it and will not accept master's candidacy forms. Doctoral candidacy is not affected and remains an important doctoral program requirement.

Thesis

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student's major department or division.

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.
Article Style vs. Journal Format

Article Style.

At the doctoral level, "article-style dissertations" are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an "article-style thesis" to be presented for a master's degree.

Journal Format.

A "journal-format thesis" is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal's "information for authors" or similarly titled guidelines in conjunction with the Graduate School's Student Guide to Preparing Electronic Theses and Dissertations.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. A form for Appointment or Change of Master's Thesis Committee is used to request that the graduate dean appoint a thesis committee. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student's major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student's thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. A final oral examination is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral examination unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting.

As of August 15, 2009, all theses are submitted electronically rather than on paper. See the Graduate School's homepage for a link to information on Electronic Theses and Dissertations (ETD) for details. Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School's website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student's major department.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research. In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

Comprehensive Examinations

In addition to the regular course examinations, a final comprehensive examination representing a "culminating" or "capstone" experience for a degree is required of all candidates for the master's degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a "policy and practice" paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School. The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. A final report, on the Master's/EdS Examination Form is on the Graduate School website. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Application for Graduation

Each candidate for a master’s degree must apply for graduation through myBama no later than the registration period for the semester or the first session of the summer term in which requirements for the degree are to be completed.

Second Master's Degree

Six (6) semester hours of eligible credit from one master’s degree at The University of Alabama may be applied to the requirements for a second master’s degree, but only if the department of the second master’s agrees to the courses in the plan of study. Any hours from the previous master’s degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded.***Please note that if a student double counts six hours between two master’s degrees, no hours may double count toward any additional master’s degrees.
Civil Engineering, Ph.D.

Admission Requirements

The requirements for admission to the Graduate School are detailed below. The Department of Civil, Construction, and Environmental Engineering also embraces the requirements of the College of Engineering, summarized as follows:

1. An applicant must have earned a baccalaureate degree from an institution accredited by the Engineering Accreditation Council (EAC) of ABET, inc. and have a GPA of at least 3.0 on a 4.0 scale, or at least 3.0 for the last 60 hours completed.
2. An applicant who is not a graduate of EAC/ABET-accredited programs must have Graduate Record Examination general test scores of 1000 or higher and a GPA of 3.0 or higher on a 4.0 scale.

See the Admission Criteria section of this catalog for more information.

Doctor of Philosophy Degree

Requirements

A total of 72 hours is required for the degree, including a minimum of 48 hours of coursework beyond the baccalaureate and 24 hours of dissertation research. A maximum of 24 hours of approved transfer credit is allowed, with approval of the Graduate School on the form for Request for Transfer of Graduate Credit.

The student’s adviser and supervisory committee will work with the student to define an appropriate plan of study that meets all degree requirements, including any prerequisite or preparatory work and a core set of courses as required and specified by each specialty area. After approval by the department the PhD Plan of Study is submitted to the Graduate School for final approval. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit for the doctoral degree. Otherwise, a “hold” may be placed on future registration.

Students are required to pass a preliminary examination that includes both written and oral components, a proposal defense, and a final dissertation defense administered by the student’s supervisory committee.

After passing the comprehensive (preliminary) examination, the student should complete and submit an Admission to Candidacy for the Doctoral Degree to the department for approval. A department-approved candidacy form will be forwarded to the Graduate School for final approval.

Doctoral Degrees

The University offers several types of doctorates, each of which is described below.

The Doctor of Philosophy (PhD) degree is regarded as the researcher’s degree. Program requirements include the acquisition of special skills for conducting independent, scholarly research of publishable quality. Requirements traditionally include a working knowledge of one or more foreign languages, but currently a number of foreign-language alternatives have been approved by departments. Through acquisition of these skills, PhD candidates demonstrate their potential for careers as independent, publishing scholars. Refer to departmental sections of this Catalog for details on foreign-language requirements or alternatives.

The minimum period in which a doctoral degree can be earned is three full academic years of graduate study after completion of a baccalaureate degree, although in most disciplines the period is longer. Graduate teaching assistants (GTA) or graduate research assistants (GRA) whose work assignments are 10 hours per week (i.e. the equivalent of 3 semester hours) or more should expect to take more than the minimum period of 3 academic years to earn a doctoral degree. The only exception to the three-year minimum is the practice-focused DNP.

Doctor of Philosophy Degree

The Doctor of Philosophy degree is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and capacity for independent, original investigation. The first two criteria are tested in coursework and a comprehensive examination, the last in a dissertation in which the student must present clearly and effectively the results of substantial research. A combination of these accomplishments, rather than the mere accumulation of residence and course credits, is the essential consideration in awarding the PhD degree. The PhD differs from the EdD in a number of ways, including the fact that the PhD Plan of Study and comprehensive examination demonstrate a higher-level research focus, and there is a greater number of dissertation hours and higher level of complexity and independent thought in a PhD-level dissertation.

Field of specialization

A defined field of specialization is required of all candidates for the Doctor of Philosophy degree. A minimum of 48 semester hours of non-dissertation course credit is required. Candidates should consult their departments or the appropriate section of this Catalog for additional requirements. The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of 24 hours of dissertation research.

Research skill/language requirements

There is no universitywide foreign language/research skill requirement for doctoral students; each college or department offering the PhD may set its own requirements. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further information about PhD foreign language/research skill requirements, students may contact their departments or the Graduate School office 205-348-5921.

Interdisciplinary Studies

There is a PhD degree program in interdisciplinary studies, and it is administered by the Graduate School. In addition to the general requirements for the PhD degree, the program of study and the supervisory committee for the prospective interdisciplinary studies degree candidate must be approved by the dean of the Graduate School before the student is admitted to the program. See Interdisciplinary Studies (IDS) (p. 603) at the Graduate School's website for information on prerequisites, admission procedures, course of study, and other aspects of IDS programs.

Doctor of Education Degree

A minimum of two years of graduate study beyond the master’s degree is required for the completion of the EdD program. The student is required to complete 60 semester hours in approved graduate courses beyond the master’s degree, or 90 semester hours of approved graduate courses, and to defend a dissertation. The student must complete a minimum of
Doctor of Musical Arts Degree

The DMA degree requires a minimum of 48 semester hours beyond the Master of Music degree, plus recitals and other examinations as determined by faculty of the School of Music. Specific requirements for each major area are outlined in the School of Music (p. 206) section of the Graduate Catalog.

Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) (p. 574) is a joint program offered by the University of Alabama in Huntsville College of Nursing (UAHCON), the University of Alabama at Birmingham School of Nursing (UABSON), and The University of Alabama Capstone College of Nursing (UACCN). The DNP is a practice-focused degree that is detailed in the Nursing section of this Catalog.

Admission to Doctoral Degree Programs

Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study. Admission to the Graduate School and the earning of a master’s degree from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student’s doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.

Residency Requirements

The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student’s doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog’s Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a “B” grade or better may be transferred. The student must have attained an overall graduate GPA of “B” or better on all graduate work attempted. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.

2. PhD Programs Only: A student holding an earned, in-field master’s degree and working in the field or a related field since earning the degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a “B” overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. For departments participating in this program, the use of this option must be indicated on the Plan of Study.

To participate in Option 2, the Plan of Study must be submitted during the first semester of enrollment. If any coursework from the in-field or related-field master’s degree was earned more than six years prior to the date of admission, the graduate program director or department head/chair must submit to the Graduate School for evaluation a Field-Related Employment Since Earning Master’s Degree form with the student’s CV and a PhD Plan of Study.

Consideration of transfer of credit or the acceptance of an earned master’s degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved.

This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the penultimate semester or the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department’s graduate coordinator regarding your department’s transfer policy.

Each department wanting its doctoral students to be able to choose Option 2 needs to “opt in” to this option by informing the graduate dean in writing that they wish to be among the approved departments.
Time Limits

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master’s, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period (not seven years) prior to admission to the doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree. Revalidation (recertification) of any expired course credit is not an option.

Time Limits Extension Request

Only under compelling circumstances beyond the student’s control a student may petition for a one-semester extension to the seven-year time limit (or eight-year time limit for the selected programs noted above). The Graduate Council approved the following steps to request an extension:

- To begin the process, the student petitions the department head. In the petition the student
  a. describes the compelling circumstances,
  b. briefly describes the current status of the dissertation, then
  c. includes a timeline showing each important remaining step in the completion of the dissertation. The last step and date in the timeline are submission of the successfully defended dissertation on or before the published final date for submission of dissertations for the requested extension semester.
- If the department head supports the petition, it is forwarded to the college dean.
- If the college dean supports the petition, it is sent to the graduate dean.
- If the graduate dean or his designee approves the extension, it will not require the student to validate any out-of-date UA or transfer courses previously approved for the plan of study.
- If a student fails to complete all degree requirements within the time limit for the student’s doctoral program or within a one-semester extension approved as noted above, the student will be dropped (suspended) from the doctoral program. To complete a doctoral degree, the student would have to reapply for admission and be admitted by the department and Graduate School. Graduate Council policies do not provide the option for a student failing to complete within the time limit to revalidate (recertify) either UA or transfer courses completed more than six years prior to the date of admission. Thus, a readmitted student would be able to apply to the new admission only those courses approved by the department and Graduate School and completed within the six years (18 fall, spring, and summer semesters) prior to the new admission.

Repeating Courses When Given an Extension

When requests are made for extensions of the doctoral time limits, and it is deemed that an out-of-date course is integral to the degree program, the college dean may request permission of the Graduate School for such a course to be repeated. In this case, both grades are used in calculation of the GPA.

Plan of Study

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School.

The PhD Plan of Study and DMA Plan of Study are available at the Graduate School website. The Plan of Study for other doctoral programs (EdD, DNP) are available from the student’s department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a "hold" may be placed on future registrations.

An amended Plan of Study (if needed) must be submitted to the Graduate School when the student submits the form for Admission to Candidacy for Doctoral Degree.

Preliminary or Comprehensive Examination

A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after

- any foreign language/research skill requirements are met (PhD students only);
- two full years of graduate study are completed; and
- the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student’s supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student's research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Admission to Candidacy

The requirements for advancing to candidacy include passing the qualifying (major or preliminary) examination; completion of all coursework as listed on the approved program of study; receiving departmental approval of the dissertation subject (although some departments require the defense of a dissertation proposal and/or writing one or more preliminary sections of the dissertation as well); and having the committee recommend the student for Admission to Candidacy for the Doctoral Degree. The completed candidacy form is submitted to the Graduate School well in advance of the final semester.

Continuous Dissertation or Document Registration

Once a student has met the requirements for admission to candidacy, received approval for the dissertation research proposal, or initiated enrollment in 699 (dissertation research for a doctoral degree), the student must pursue completion of the dissertation without interruption by enrolling each fall and spring semester of the academic year for at least 3 hours of dissertation research. Summer enrollment for 699 Dissertation Research is expected if the student is working on the dissertation and using any University facilities or resources, including faculty time, but the only time summer registration is required for dissertation research (3 hours minimum) is when a doctoral student is graduating in August or defending the dissertation during the summer.
semester. This is true whether or not the student has formally submitted an Application for Admission to Candidacy.

Each PhD student must have completed a minimum of 24 hours of such dissertation work upon completion of the degree. The amount of dissertation research for which a student enrolls in any given semester should be commensurate with the progress a student is expected to make on the dissertation, as well as reflective of the extent to which University facilities and faculty time are invested in the proposed activities.

Dissertation Proposal
The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction giving an overview and stating the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal’s format with respect to such things as the length of the introduction and detail of the review of the literature.

Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

Dissertation
A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. Early in the process, the subject of the dissertation must be approved by the dissertation committee of the major department or division and by the dean of the Graduate School.

A dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. The committee shall have not fewer than five members, all of whom are appointed by the dean of the Graduate School. The graduate dean’s approval of the proposed dissertation committee is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the form for Appointment/Change of a Doctoral Dissertation Committee.

All members of a dissertation committee must be members of the UA Graduate Faculty. The committee chair must be a full member of the Graduate Faculty, as described in the Catalog’s section on Qualifications of the Graduate Faculty (p. 34). One member must be from outside the student’s major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student’s dissertation committee.

The final oral dissertation defense is the culminating experience in the doctoral program. As such, all members of the dissertation committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations. Graduate School deadlines, including each semester’s dissertation deadline, are available at the Graduate School’s homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research. If certain conditions are met for the student’s final semester, the student may qualify to enroll for fewer than 3 hours of 699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester. This exception applies only to students who registered for at least 3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below:

Final-Semester Dissertation (699) Minimum Registration Hours

<table>
<thead>
<tr>
<th>When was the *completed electronic dissertation submitted to ProQuest/the Graduate School?</th>
<th>Minimum hours of 699 registration required in the final semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>By 4:45 p.m. on the last-possible day for instructors to post grades for the semester before the student’s final semester (date published in the University Academic Calendar)</td>
<td>0</td>
</tr>
<tr>
<td>After 4:45 p.m. on the last-possible day for instructors to post grades for the semester before the student’s final semester, but before 4:45 p.m. on the last-possible day to register or add a course for the student’s final semester (both dates published in the University Academic Calendar)</td>
<td>1</td>
</tr>
<tr>
<td>After 4:45 p.m. on the last-possible day to register or add a course for the student’s final semester (date published in the University Academic Calendar)</td>
<td>3</td>
</tr>
</tbody>
</table>

"Completed" means submitted at ProQuest after being successfully defended; being carefully edited following the defense meeting; and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. At the time of ProQuest submission, the student also must submit the Survey of Earned Doctorates through the NORC website.

1 International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see "USCIS section under "Minimum Hours—Other Policies and Regulatory Bodies" on page 3 of this policy.

2 The University Calendar is available at the Academics tab of the website of the University Registrar.
Article-Style Dissertations

This approach is intended for doctoral students whose dissertation will consist of a number of related manuscripts or articles that represent independent research or creative activity. It is an option available only to students in certain fields in which the faculty have received Graduate Council approval from the Graduate Council. A complete list of these fields is below:

- Accountancy
- Aerospace Engineering and Mechanics
- Applied Statistics
- Biological Sciences
- Chemical Engineering
- Chemistry
- Civil Engineering
- Computer Science
- Economics
- Education (all departments)
- Electrical and Computer Engineering
- Finance
- Geological Sciences
- Health Education and Promotion
- Management
- Management Science
- Marketing
- Mechanical Engineering
- Metallurgical and Materials Engineering
- Physics
- Psychology

Article-style dissertations must be based upon research completed while the student is enrolled at The University of Alabama. For each article used, the student must be the first author, or equivalent, as defined by the discipline.

As with traditional dissertations, the article-style dissertation must be the student’s original idea. It must be a unified work and include a sequence of articles of publishable quality around a cohesive theme, with a comprehensive review of literature demonstrating an in-depth understanding of the unifying framework.

- In article-style dissertations there will be introductory material to describe the studies, show how they are related, and explain their significance;
- connecting language to bridge each study to the next; and
- a summary making clear the importance of the studies, integrating the major findings, and discussing the implications for the overall topic.

These components do not have to be separate sections or chapters. They may be parts of the manuscripts or may be accomplished in an abstract.

All parts of both traditional and article-style dissertations must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline’s style manual require deviation. Students considering the article-style approach should contact the Graduate School before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the date of the required final oral examination.

Electronic submission of dissertations: August 15, 2009, is the date when electronic submission began to be required and paper submission no longer was accepted. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University’s Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. The University’s IRB approval form is available at the IRB website.

Final Examinations

When the dissertation has been completed, the candidate will be given a final oral examination by a committee of not fewer than five members, one of whom must be from outside the student’s major department or, for students in the College of Education, outside the student’s area (not program), and appointed by the dean of the Graduate School. This examination will focus primarily on the candidate’s research work, as embodied in the dissertation, and the field in which the dissertation lies, but it may encompass the complete program for the degree. The results of the examination must be reported to the Office of the Graduate School at least six weeks before the commencement at which the degree is to be conferred.

Application for Graduation

Each candidate for a doctoral degree must submit an Application for Degree via myBama not later than the last day to register or add a course of the semester or the first term of the summer session in which requirements for the degree are to be completed. That day is published for each semester at the website of the University Registrar.

Clearing the Academic Record for Commencement

At least one week before commencement, the candidate’s record must have been cleared for graduation.

Attendance at Commencement

A candidate for a doctoral degree must be present at a scheduled commencement to receive the diploma and hood, unless excused by the graduate dean.

Withholding or Withdrawing an Advanced Degree

The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.

Environmental Engineering, MS

Admission Requirements

The requirements for admission to the Graduate School are detailed below. The Department of Civil, Construction, and Environmental
Degree Requirements

RESEARCH THESIS OPTION (PLAN I)
The thesis option is a research-focused program, which includes conducting original research, writing a research thesis, and defending the thesis to the student’s graduate supervisory committee. The research thesis option degree requirements are as follows:

A minimum of 30 credit hours, including:

• 21 credit hours of approved coursework, including
  • 9 credit hours of core graduate coursework
  • (See later section for additional information regarding the graduate core)
  • A maximum of 6 hours of approved 400-level courses
    (Use Graduate School’s “Approval of 400-Level Course for Master’s Credit” form)
  • A minimum of 15 hours of CE-prefix courses
    (See Appendix I for a schedule for all CE-prefix courses offered by the department)
  • 3 hours of CE 593 Practicum or CE 693 Practicum
  • Taken with permission under the supervision of the student’s graduate advisor
  • (See later section for additional information regarding Practicum)
• 6 hours of CE 599 Thesis Research
  • Taken with permission under the supervision of the student’s graduate advisor
  • The graduate advisor must be a full member of the department’s graduate faculty
  • Once taken, CE 599 Thesis Research must be taken every term until graduation

PAPER/REPORT OPTION (PLAN II)
The paper/report, or non-thesis, option requires a research paper, a policy and practice paper, or equivalent culminating experience, which is graded by the student’s graduate advisor. The paper/report option requirements are as follows:

A minimum of 30 credit hours, including:

• 27 credit hours of approved coursework
  • 9 credit hours of core graduate coursework
    (See later section for additional information regarding the graduate core.)
  • A maximum of 6 hours of approved 400-level courses
    (Use Graduate School’s “Approval of 400-Level Course for Master’s Credit” form.)
  • A maximum of 3 hours of CE 593 Practicum or CE 693 Practicum
    (See later section for additional information regarding Practicum.)
  • A minimum of 18 hours of CE-prefix courses
  • 3 credit hours of CE 501 MS Capstone Proj. Plan II
    • Taken with permission under the direction of the student’s graduate advisor
    • The graduate advisor must be a full member of the department’s graduate faculty
    • Requires completion of a research paper, a policy and practice paper, or equivalent report with the topic, scope, and format preapproved by the student’s advisor
    • Must be taken the semester the student plans to graduate

EWR Core Course

Environmental and Water Resources Engineering Core Coursework (MSCivE, MSEnvE, Ph.D.):

• CE 573 Statistical Applications
• CE 575 Hydrology

Additional Course Requirements for Students Without an ABET/EAC-Accredited Degree

• AEM 201 Statics, AEM 264 Dynamics, AEM 250 Mechanics Of Materials I, AEM 311 Fluid Mechanics

Master’s Degrees

The primary purpose of master’s degree programs is to provide students with subject matter at an advanced level in their fields of study. Master’s degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master’s programs also help students become familiar with methods of independent investigation.

Program Requirements

Two plans are offered for the master’s degree:

Plan I. Candidates for the master’s degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

Plan II. Candidates for the master’s degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or “capstone experience” as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject. With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Residency Requirements

A student’s program at the master’s level must provide sufficient association with the resident faculty to permit individual evaluation of the student’s capabilities and achievements.
Graduate Credit
A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences
All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit
Courses of full graduate-level credit earned in a regionally accredited institution where a student was enrolled in the graduate school may be submitted for review for inclusion in a master’s degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student’s advisory committee and the dean of the Graduate School. Credit will not be accepted for transfer from any institution at which the student failed to achieve a "B" average on all graduate work attempted. Only courses in which a student earned a "B" grade or better may be transferred.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

A student initiates at the Graduate School's website a Request for Transfer of Graduate Credit earned at another institution. It is also the student's responsibility to assure that the Graduate School receives an official transcript of the credit requested for transfer, well in advance of the final semester.

With the approval of the student's department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master's degree may be transferred from another institution. All credit toward the master's degree, including transfer credit, must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the master's degree is to be awarded. Revalidation (recertification) of graduate credits that will be more than 18 semesters old at the time of UA master’s program completion is not an option.

Please note that some departments allow fewer than 12 hours of graduate transfer credit. Be sure to check with your department's graduate coordinator regarding your department's transfer policy.

400-Level Courses
A maximum of 6 semester hours of 400-level course credit may be accepted for a master's degree program, but only if a form for Approval of 400-Level Course Work for Master's Credit is approved by the Graduate School prior to the semester in which the 400-level coursework will be taken.

Time Limit
All requirements for the master's degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. There is no provision for an extension of the time limit beyond six years for master's students.

Admission to Candidacy
During the 2013-2014 academic year, the Graduate Council eliminated the master’s candidacy requirement. Departments may monitor master's candidacy if they wish, but the Graduate School does not monitor it and will not accept master's candidacy forms. Doctoral candidacy is not affected and remains an important doctoral program requirement.

Thesis
A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student's major department or division.

The final oral thesis defense is the culminating experience in the master’s program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

Article Style vs. Journal Format

Article Style.
At the doctoral level, "article-style dissertations" are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an "article-style thesis" to be presented for a master’s degree.

Journal Format.
A "journal-format thesis" is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal’s "information for authors" or similarly titled guidelines in conjunction with the Graduate School's Student Guide to Preparing Electronic Theses and Dissertations.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. A form for Appointment or Change of Master’s Thesis Committee is used to request that the graduate dean appoint a thesis committee. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student's major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student’s thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. A final oral examination is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral examination unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting.
As of August 15, 2009, all theses are submitted electronically rather than on paper. See the Graduate School’s homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School’s website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student’s major department.

**Protection of Human Subjects for Research**

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University’s Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research. In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

**Comprehensive Examinations**

In addition to the regular course examinations, a final comprehensive examination representing a "culminating" or "capstone" experience for a degree is required of all candidates for the master’s degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a "policy and practice" paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School. The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. A final report, on the Master’s/EdS Examination Form is on the Graduate School website. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

**Application for Graduation**

Each candidate for a master’s degree must apply for graduation through myBama no later than the registration period for the semester or the first session of the summer term in which requirements for the degree are to be completed.

**Second Master’s Degree**

Six (6) semester hours of eligible credit from one master’s degree at The University of Alabama may be applied to the requirements for a second master’s degree, but only if the department of the second master’s agrees to the courses in the plan of study. Any hours from the previous master’s degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. ***Please note that if a student double counts six hours between two master’s degrees, no hours may double count toward any additional master’s degrees.

**Department of Computer Science (CS)**

- Majors
  - Computer Science (MS) (p. 505)
  - Computer Science (PhD) (p. 507)

[object Object]

**CS503 Programming Languages**

Hours 3

(Not open to students who have earned credit for CS 403) This course provides a graduate level presentation of Programming Languages. Formal student of programming language specification, analysis, implementation, and run-time support structures; organization of programming languages with emphasis on language constructs and mechanisms; and study of non-programming paradigms.

Prerequisite(s): (CS 200 or CS 315) Minimum Grade C- AND CS 201 or CS 360) Minimum Grade C- AND ECE 383 Minimum Grade C- AND Not open to students who have earned credit for CS 403

**CS507 Software Interface Design**

Hours 3

(Not open to students who have earned credit for CS 407.) Concepts of the human-computer interface, emphasizing the software aspects. Dialog styles, form models, user documentation and the evaluation of human-computer software interfaces.

Prerequisite(s): (CS 200 or CS 315) Minimum Grade C- AND CS 201 or CS 360) Minimum Grade C- AND ECE 383 Minimum Grade C- AND Not open to students who have earned credit for CS 407.

**CS515 Software Design and Development**

Hours 3

Object-oriented design and development using UML and Java, design patterns, and architectural patterns.

Prerequisite(s): (CS 200 or CS 315) Minimum Grade C- AND CS 201 or CS 360) Minimum Grade C- AND ECE 383 Minimum Grade C- AND Not open to students who have earned credit for CS 415.
CS516 Testing and Quality Assurance
Hours 3
Study of verification & validation and related processes. Topics include techniques and tools for software analysis, testing, and quality assurance.
Prerequisite(s): (CS 200 or CS 315) Minimum Grade C- AND (CS 201 or CS 360) Minimum Grade C- AND ECE 383 Minimum Grade of C- AND Not open to students who have earned credit for CS 416.

CS517 Requirements Engineering
Hours 3
Study of requirements engineering and its phases. Topics include formal, semi-formal, and informal paradigms for elicitation, documentation, and management of software system requirements.
Prerequisite(s): CS 315, (CS 350 or CS 351), CS 360, and ECE 383

CS518 Software Project Management
Hours 3
Study of project management and its phases. Topics include techniques and tools for software project planning, estimation, organization, and management.
Prerequisite(s): CS 315, (CS 350 or CS 351), CS 360, and ECE 383

CS520 Software Maintenance & Evolution
Hours 3
Study of software change and its phases. Topics include techniques and tools for concept location, impact analysis, actualization, refactoring, and validation.
Prerequisite(s): CS 315, (CS 350 or CS 351), CS 360, and ECE 383

CS526 Intro Operating Systems
Hours 3
(Not open to students who have earned credit for CS 426.) This course provides a graduate level presentation of Introduction to Operating Systems. Study of basic operating system concepts with an emphasis on memory processor, device, and information management.
Prerequisite(s): (CS 200 or CS 315) Minimum Grade C- AND (CS 201 or CS 360) Minimum Grade C- AND ECE 383 Minimum Grade of C- AND Not open to students who have earned credit for CS 426.

CS528 Computer Security
Hours 3
An examination of computer security concepts, such as cryptographic tools, user authentication, access control, database security, intrusion detection, malicious software, denial of service, firewalls and intrusion prevention systems, trusted computing and multilevel security, buffer overflow, software security, physical and infrastructure security, human factors, and security auditing.
Prerequisite(s): CS 315 and ECE 383; and CS 350 or CS 351 or CS 352; and CS 360

CS34 Compiler Construction
Hours 3
(Not open to students who have earned credit for CS 434.) This course provides a graduate level presentation of Compiler construction. Syntax and semantics of procedure-oriented languages and translation techniques used in their compilation; includes computer implementation.
Prerequisite(s): (CS 200 or CS 315) Minimum Grade C- AND (CS 201 or CS 360) Minimum Grade C- AND ECE 383 Minimum Grade of C- AND Not open to students who have earned credit for CS 434.

CS535 Computer Graphics
Hours 3
(Not open to students who have earned credit for CS 435.) Display memory, generation of points, vectors, etc. Interactive versus passive graphics, analog storage of images on microfilm, etc. Digitizing and digital storage, pattern recognition by features, syntax tables, and random nets. The mathematics of three dimensions, projections, and the hidden-line problem.
Prerequisite(s): (CS 200 or CS 315) Minimum Grade C- AND (CS 201 or CS 360) Minimum Grade C- AND ECE 383 Minimum Grade of C- AND Not open to students who have earned credit for CS 435.

CS538 Computer Comm & Networks
Hours 3
(Not open to students who have earned credit for CS 438.) This course provides a graduate level presentation of Computer Communications and Networks. The student of the issues related to Computer communications. Topics include physical topologies, switching, error detection and correction, routing, congestion control, and connection management for global networks (such as the Internet) and local area networks (such as Ethernet). In addition, network programming and applications will be considered.
Prerequisite(s): (CS 200 or CS 315) Minimum Grade C- AND (CS 201 or CS 360) Minimum Grade C- AND ECE 383 Minimum Grade of C- AND Not open to students who have earned credit for CS 438.

CS548 Network Security
Hours 3
Concepts concerning network security, including an examination of network security concepts, algorithms, and protocols.
Prerequisite(s): CS 200, CS 201 and ECE 383

CS557 Database Management Systems
Hours 3
(Not open to students who have earned credit for CS 457.) This course provides a graduate level presentation of Database Management Systems. Constituent parts of database management (design, creation, and manipulation of databases), client-server, relational, and object-oriented data models.
Prerequisite(s): (CS 200 or CS 315) Minimum Grade C- AND (CS 201 or CS 360) Minimum Grade C- AND ECE 383 Minimum Grade of C- AND Not open to students who have earned credit for CS 457.
CS560 Introduction To Autonomous Robotics
Hours 3
(Not open to students who have earned credit for CS 460.) Issues involved with the implementation of robot control software including motion, kinematics, simulation testing, sensor incorporation and unmodeled factors.
Prerequisite(s): CS 426

CS565 Artificial Intelligence
Hours 3
The advanced study of topics under the umbrella of artificial intelligence including problem solving, knowledge representation, planning and machine learning.
Prerequisite(s): Graduate standing

CS567 Computer Systems Architecture
Hours 3
Computer architectures, computer design, memory systems design, parallel processing concepts, supercomputers, networks, and multiprocessing systems.

CS570 Computer Algorithms
Hours 3
(Not open to students who have earned credit for for CS 470.) This course provides a graduate level presentation of Introduction to Computer Algorithms. Construction of efficient algorithms for computer implementation.
Prerequisite(s): (CS 200 or CS 315) Minimum Grade C- AND (CS 201 or CS 360) Minimum Grade C- AND ECE 383 Minimum Grade of C- AND Not open to students who have earned credit for CS 470.

CS575 Formal Languages & Machines
Hours 3
(Not open to students who have earned CS 475.) Regular expressions and finite automata. Context free grammars and pushdown automata. Recursively enumerable languages and turing machine. The Chomsky hierarchy.
Prerequisite(s): (CS 200 or CS 315) Minimum Grade C- AND (CS 201 or CS 360) Minimum Grade C- AND ECE 383 Minimum Grade of C- AND Not open to students who have earned credit for CS 470.

CS580 Computer Simulation
Hours 3
Introduction to simulation and use of computer simulation models; simulation methodology, including generation of random numbers and variants, model design, and analysis of data generated by simulation experiments.
Prerequisite(s): (CS 200 or CS 315) Minimum Grade C- AND (CS 201 or CS 360) Minimum Grade C- AND ECE 383 Minimum Grade of C- AND Not open to students who have earned credit for CS 470.

CS591 Special Topics In Cs
Hours 3
Formal courses that cover new and innovative topics in computer science and do not yet have their own course numbers. Specific course titles will be announced.

CS592 Independent Study
Hours 1-6
This course requires a written proposal that must be approved by the sponsoring faculty member before registration.

CS598 Non-Thesis Research
Hours 1-6
No description available

CS599 Thesis Research
Hours 1-6
No description available

CS600 Foundatns Software Engr
Hours 3
Introduction to formal software development techniques; theoretical foundations of specification, design, and testing; and programming methodologies and software reuse.
Prerequisite(s) with concurrency: CS 515 or CS 415

CS602 Adv Formal Lang & Machin
Hours 3
Regular languages, context-free languages, recursive and recursively enumerable languages, nondeterminism, and undecidability.

CS603 Organz Program Languages
Hours 3
Design and implementation of programming languages; syntax and translation; semantic structures and run-time representations; data, operations, control structures, and storage management.
Prerequisite(s): CS 503
Prerequisite(s) with concurrency: CS 403

CS605 Artificial Intelligence
Hours 3
An advanced course in artificial intelligence topics. These topics include, but are not limited to, topics such as problem solving, knowledge representation, planning, and machine learning. The course will examine the various branches within the field as well as applications of artificial intelligence.

CS606 Analys Operating Systems
Hours 3
Design of operating systems; advanced examination of synchronization, deadlock, virtual memory, and security; and parallel and distributed systems.
Prerequisite(s) with concurrency: CS 426 or CS 526

CS607 Software User Interface
Hours 3
Concepts of the human-computer interface, emphasizing the software aspects. Dialog styles, form models, user documentation, and the evaluation of human-computer software interfaces.
Prerequisite(s): CS 507
Prerequisite(s) with concurrency: CS 407
CS609 Database Management
Hours 3
Data model theory, comparison of existing database systems, implementation technology, selection, evaluation techniques, integrity, security, authorization and protection, and hardware architecture.
Prerequisite(s): CS 557
Prerequisite(s) with concurrency: CS 457

CS612 Advanced Data Structures
Hours 3
A graduate-level study of data structures. Topics include self-balancing trees binomial and Fibonacci heaps, disjoint sets, graphs and digraphs.

CS613 Adv Computer Comm & Networks
Hours 3
Study of computer networks, including telecommunications and related data transmission techniques. Network philosophy, design, and implementation.
Prerequisite(s): CS 438 or CS 538

CS615 Cryptography and Data Security
Hours 3
An examination of algorithms and concepts in cryptography and data security, such as symmetric ciphers, asymmetric ciphers, public-key cryptography, hash functions, message authentication codes, key management and distribution.
Prerequisite(s): CS 528 or CS 428

CS618 Wireless Mbile Netrwrk Protoc
Hours 3
Network protocol design and analysis in wireless and mobile networks. Topics include ad hoc.
Prerequisite(s): CS 438 or CS 538 or CS 613 or ECE 406 or ECE 506 or ECE 502

CS630 Empirical Software Engineering
Hours 3
Introduction to empirical research methods in software engineering. Focus on measuring processes and designing experiments.
Prerequisite(s): CS 315 or CS 515

CS691 Special Topics
Hours 3
Formal courses that cover new and innovative topics in computer science and do not yet have their own numbers; specific course titles will be announced.

CS692 Special Topics
Hours 1-6
This course requires a written proposal that must be approved by the sponsoring faculty member before registration.

CS699 Dissertation Research
Hours 1-12
No description available

Faculty
Head
David W. Cordes
Professor
David W. Cordes

Computer Science, MS
Admission Requirements
In addition to meeting the admission requirements established by the Graduate School (Admission Criteria), students applying for graduate study in the department must also meet the following general requirements:
1. demonstrated competence in programming
2. completion of the equivalent of the department’s undergraduate core computer science curriculum
3. demonstration, by an appropriate score on the general test of the Graduate Record Examination, of competence in the discipline of computer science

See the Admission Criteria section of this catalog for more information.

Each student must submit scores from the Graduate Record Examination general test. This requirement may be waived for a student who graduated with a GPA of 3.0 or higher on a 4.0 scale from an institution accredited by the CAC Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 – telephone 410-347-7700. It is strongly recommended that each student submit a score from the GRE Subject Exam in Computer Science, particularly students who wish to be considered for funding opportunities.

Additional details of these requirements may be obtained directly from the department. Applicants who present most but not all of these qualifications may be considered for conditional admission.

Degree Requirements
Master of Science
Departmental degree requirements for the MS degree, which are in addition to those established by the College and by the Graduate School, are as follows for Plan I and Plan II students:
• Each Plan I candidate must earn a minimum of 24 semester hours of credit for coursework, plus a six-hour thesis under the direction of a faculty member.
• Each Plan II candidate must earn a minimum of 30 semester hours of credit for coursework, which may include a three-hour nonthesis project under the direction of a faculty member.
• Unlike the general College of Engineering requirements, graduate credit may not be obtained for courses at the 400-level.

Both plans also have core and depth requirements, which can be found at the website of the Department of Computer Science. Additional information is in the Degree Requirements section of this catalog.

Master’s Degrees
The primary purpose of master’s degree programs is to provide students with subject matter at an advanced level in their fields of study. Master’s degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases,
master's programs also help students become familiar with methods of independent investigation.

Program Requirements

Two plans are offered for the master's degree:

**Plan I.** Candidates for the master's degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

**Plan II.** Candidates for the master's degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or "capstone experience" as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject. With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Residency Requirements

A student's program at the master's level must provide sufficient association with the resident faculty to permit individual evaluation of the student's capabilities and achievements.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Courses of full graduate-level credit earned in a regionally accredited institution where a student was enrolled in the graduate school may be submitted for review for inclusion in a master's degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student's advisory committee and the dean of the Graduate School. Credit will not be accepted for transfer from any institution at which the student failed to achieve a "B" average on all graduate work attempted. Only courses in which a student earned a "B" grade or better may be transferred.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

A student initiates at the Graduate School's website a Request for Transfer of Graduate Credit earned at another institution. It is also the student's responsibility to assure that the Graduate School receives an official transcript of the credit requested for transfer, well in advance of the final semester.

With the approval of the student's department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master's degree may be transferred from another institution. All credit toward the master's degree, including transfer credit, must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the master's degree is to be awarded. Revalidation (recertification) of graduate credits that will be more than 18 semesters old at the time of UA master's program completion is not an option.

Please note that some departments allow fewer than 12 hours of graduate transfer credit. Be sure to check with your department's graduate coordinator regarding your department's transfer policy.

**400-Level Courses**

A maximum of 6 semester hours of 400-level course credit may be accepted for a master's degree program, but only if a form for Approval of 400-Level Course Work for Master's Credit is approved by the Graduate School prior to the semester in which the 400-level coursework will be taken.

Time Limit

All requirements for the master's degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. There is no provision for an extension of the time limit beyond six years for master's students.

Admission to Candidacy

During the 2013-2014 academic year, the Graduate Council eliminated the master’s candidacy requirement. Departments may monitor master's candidacy if they wish, but the Graduate School does not monitor it and will not accept master's candidacy forms. Doctoral candidacy is not affected and remains an important doctoral program requirement.

Thesis

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master's degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student's major department or division.

The final oral thesis defense is the culminating experience in the master's program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

Article Style vs. Journal Format

**Article Style.**

At the doctoral level, "article-style dissertations" are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an "article-style thesis" to be presented for a master's degree.
Journal Format.
A "journal-format thesis" is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal's "information for authors" or similarly titled guidelines in conjunction with the Graduate School's Student Guide to Preparing Electronic Theses and Dissertations.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. A form for Appointment or Change of Master's Thesis Committee is used to request that the graduate dean appoint a thesis committee. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student's major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student's thesis committee. Unless there are extraordinary circumstances meritng approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. A final oral examination is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral examination unless there are extraordinary circumstances warranting the graduate dean's approval of the absence prior to the defense meeting.

As of August 15, 2009, all theses are submitted electronically rather than on paper. See the Graduate School's homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School's website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student's major department.

Protection of Human Subjects for Research
Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research. In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

Comprehensive Examinations
In addition to the regular course examinations, a final comprehensive examination representing a "culminating" or "capstone" experience for a degree is required of all candidates for the master's degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a "policy and practice" paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School. The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. A final report, on the Master's/EdS Examination Form is on the Graduate School website. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Application for Graduation
Each candidate for a master's degree must apply for graduation through myBama no later than the registration period for the semester or the first session of the summer term in which requirements for the degree are to be completed.

Second Master's Degree
Six (6) semester hours of eligible credit from one master's degree at The University of Alabama may be applied to the requirements for a second master's degree, but only if the department of the second master's agrees to the courses in the plan of study. Any hours from the previous master's degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. ***Please note that if a student double counts six hours between two master’s degrees, no hours may double count toward any additional master's degrees.

Computer Science, Ph.D.
Admission Requirements
In addition to meeting the admission requirements established by the Graduate School (Admission Criteria), students applying for graduate study in the department must also meet the following general requirements:

1. demonstrated competence in programming
2. completion of the equivalent of the department's undergraduate core computer science curriculum
3. demonstration, by an appropriate score on the general test of the Graduate Record Examination, of competence in the discipline of computer science

See the Admission Criteria section of this catalog for more information. Each student must submit scores from the Graduate Record Examination general test. This requirement may be waived for a student who graduated with a GPA of 3.0 or higher on a 4.0 scale from an institution accredited by the CAC Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012 – telephone 410-347-7700. It is strongly recommended that each student submit a score from the GRE Subject Exam in Computer Science, particularly students who wish to be considered for funding opportunities.

Additional details of these requirements may be obtained directly from the department. Applicants who present most but not all of these qualifications may be considered for conditional admission.

Degree Requirements

Doctor of Philosophy

The doctor of philosophy degree is regarded as a research degree and is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and the capacity for independent, original investigation. The first two criteria are tested in coursework and a qualifying examination, the last by a dissertation that must present the results of substantial research clearly and effectively. A combination of these accomplishments, rather than the mere accumulation of residency and course credits, is the essential consideration in awarding the PhD degree.

A minimum of 48 semester hours of course credit is required. Graduate credit may not be obtained for courses at the 400-level. Approval of the selection of courses must be obtained from the student’s advisor and supervisory committee, and the course of study as a whole must be unified so that all its parts contribute to an organized program of study and research. A PhD Plan of Study (available at the Graduate School website) must be prepared and submitted to the Graduate School not later than the semester in which the student accumulates 30 hours of transfer and/or UA course work.

Students also must complete at least 24 semester hours of dissertation research and have fulfilled residency, passed the comprehensive (preliminary) and other exams. A department-approved Admission to Candidacy for the Doctoral Degree is submitted to the Graduate School as soon as possible after passing the comprehensive (preliminary) examination. See the website for the Department of Computer Science and details below on plan of study, admission to candidacy, and all other degree requirements.

All requirements for the PhD must be completed within seven years (21 fall, spring and summer semesters) of the admission semester. See this catalog’s time limits section below.

Doctoral Degrees

The University offers several types of doctorates, each of which is described below.

The Doctor of Philosophy (PhD) degree is regarded as the researcher’s degree. Program requirements include the acquisition of special skills for conducting independent, scholarly research of publishable quality. Requirements traditionally include a working knowledge of one or more foreign languages, but currently a number of foreign-language alternatives have been approved by departments. Through acquisition of these skills, PhD candidates demonstrate their potential for careers as independent, publishing scholars. Refer to departmental sections of this Catalog for details on foreign-language requirements or alternatives.

The minimum period in which a doctoral degree can be earned is three full academic years of graduate study after completion of a baccalaureate degree, although in most disciplines the period is longer. Graduate teaching assistants (GTA) or graduate research assistants (GRA) whose work assignments are 10 hours per week (i.e. the equivalent of 3 semester hours) or more should expect to take more than the minimum period of 3 academic years to earn a doctoral degree. The only exception to the three-year minimum is the practice-focused DNP.

Doctor of Philosophy Degree

The Doctor of Philosophy degree is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and capacity for independent, original investigation. The first two criteria are tested in coursework and a comprehensive examination, the last in a dissertation in which the student must present clearly and effectively the results of substantial research. A combination of these accomplishments, rather than the mere accumulation of residence and course credits, is the essential consideration in awarding the PhD degree. The PhD differs from the EdD in a number of ways, including the fact that the PhD Plan of Study and comprehensive examination demonstrate a higher-level research focus, and there is a greater number of dissertation hours and higher level of complexity and independent thought in a PhD-level dissertation.

Field of specialization

A defined field of specialization is required of all candidates for the Doctor of Philosophy degree. A minimum of 48 semester hours of non-dissertation course credit is required. Candidates should consult their departments or the appropriate section of this Catalog for additional requirements. The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of 24 hours of dissertation research.

Research skill/language requirements

There is no universitywide foreign language/research skill requirement for doctoral students; each college or department offering the PhD degree may set its own requirements. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further information about PhD foreign language/research skill requirements, students may contact their departments or the Graduate School office 205-348-5921.

Interdisciplinary Studies

There is a PhD degree program in interdisciplinary studies, and it is administered by the Graduate School. In addition to the general requirements for the PhD degree, the program of study and the supervisory committee for the prospective interdisciplinary studies degree candidate must be approved by the dean of the Graduate School before the student is admitted to the program. See Interdisciplinary Studies (IDS) (p. 603) at the Graduate School’s website for information on prerequisites, admission procedures, course of study, and other aspects of IDS programs.
Doctor of Education Degree
A minimum of two years of graduate study beyond the master's degree is required for the completion of the EdD program. The student is required to complete 60 semester hours in approved graduate courses beyond the master's degree, or 90 semester hours of approved graduate courses, and to defend a dissertation. The student must complete a minimum of 12 hours of dissertation research. In the College of Education (p. 380) section of the Graduate Catalog, there are specific regulations governing the EdD program.

Doctor of Musical Arts Degree
The DMA degree requires a minimum of 48 semester hours beyond the Master of Music degree, plus recitals and other examinations as determined by faculty of the School of Music. Specific requirements for each major area are outlined in the School of Music (p. 206) section of the Graduate Catalog.

Doctor of Nursing Practice
The Doctor of Nursing Practice (DNP) (p. 574) is a joint program offered by the University of Alabama in Huntsville College of Nursing (UAHCON), the University of Alabama at Birmingham School of Nursing (UABSON), and The University of Alabama Capstone College of Nursing (UACCN). The DNP is a practice-focused degree that is detailed in the Nursing section of this Catalog.

Admission to Doctoral Degree Programs
Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study. Admission to the Graduate School and the earning of a master's degree from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student's doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.

Residency Requirements
The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student's doctoral program must from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog's Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

Graduate Credit
A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences
All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit
Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied toward the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (re certification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a “B” grade or better may be transferred. The student must have attained an overall graduate GPA of “B” or better on all graduate work attempted. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.

2. PhD Programs Only: A student holding an earned, in-field master's degree and working in the field or a related field since earning the degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a “B” overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. For departments participating in this program, the use of this option must be indicated on the Plan of Study.

To participate in Option 2, the Plan of Study must be submitted during the first semester of enrollment. If any coursework from the in-field or related-field master's degree was earned more than six years prior to the date of admission, the graduate program director or department head/chair must submit to the Graduate School for evaluation a Field-Related Employment Since Earning Master's Degree form with the student's CV and a PhD Plan of Study.

Consideration of transfer of credit or the acceptance of an earned master's degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the penultimate semester or the final semester typically will delay graduation.
Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department’s graduate coordinator regarding your department's transfer policy.

Each department wanting its doctoral students to be able to choose Option 2 needs to "opt in" to this option by informing the graduate dean in writing that they wish to be among the approved departments.

**Time Limits**

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master’s, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period (not seven years) prior to admission to the doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree. Revalidation (recertification) of any expired course credit is not an option.

**Time Limits Extension Request**

Only under compelling circumstances beyond the student’s control a student may petition for a one-semester extension to the seven-year time limit (or eight-year time limit for the selected programs noted above). The Graduate Council approved the following steps to request an extension:

- To begin the process, the student petitions the department head. In the petition the student
  - a. describes the compelling circumstances,
  - b. briefly describes the current status of the dissertation, then
  - c. includes a timeline showing each important remaining step in the completion of the dissertation. The last step and date in the timeline are submission of the successfully defended dissertation on or before the published final date for submission of dissertations for the requested extension semester.

- If the department head supports the petition, it is forwarded to the college dean.

- If the college dean supports the petition, it is sent to the graduate dean.

- If the graduate dean or his designee approves the extension, it will not require the student to validate any out-of-date UA or transfer courses previously approved for the plan of study.

- If a student fails to complete all degree requirements within the time limit for the student’s doctoral program or within a one-semester extension approved as noted above, the student will be dropped (suspended) from the doctoral program. To complete a doctoral degree, the student would have to reapply for admission and be admitted by the department and Graduate School. Graduate Council policies do not provide the option for a student failing to complete within the time limit to revalidate (recertify) either UA or transfer courses completed more than six years prior to the date of admission. Thus, a readmitted student would be able to apply to the new admission only those courses approved by the department and Graduate School and completed within the six years (18 fall, spring, and summer semesters) prior to the new admission.

**Repeating Courses When Given an Extension**

When requests are made for extensions of the doctoral time limits, and it is deemed that an out-of-date course is integral to the degree program, the college dean may request permission of the Graduate School for such a course to be repeated. In this case, both grades are used in calculation of the GPA.

**Plan of Study**

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School.

The PhD Plan of Study and DMA Plan of Study are available at the Graduate School website. The Plan of Study for other doctoral programs (EdD, DNP) are available from the student's department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a “hold” may be placed on future registrations.

An amended Plan of Study (if needed) must be submitted to the Graduate School when the student submits the form for Admission to Candidacy for Doctoral Degree.

**Preliminary or Comprehensive Examination**

A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after

- any foreign language/research skill requirements are met (PhD students only);
- two full years of graduate study are completed; and
- the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student’s supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student’s research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

**Admission to Candidacy**

The requirements for advancing to candidacy include passing the qualifying (major or preliminary) examination; completion of all coursework as listed on the approved program of study; receiving departmental approval of the dissertation subject (although some departments require the defense of a dissertation proposal and/or writing one or more preliminary sections of the dissertation as well); and having the committee recommend the student for Admission to Candidacy for the Doctoral Degree. The completed candidacy form is submitted to the Graduate School well in advance of the final semester.

**Continuous Dissertation or Document Registration**

Once a student has met the requirements for admission to candidacy, received approval for the dissertation research proposal, or initiated enrollment in 699 (dissertation research for a doctoral degree), the student must pursue completion of the dissertation without interruption by enrolling each fall and spring semester of the academic year for at least 3 hours of dissertation research. Summer enrollment for 699
Dissertation Research is expected if the student is working on the dissertation and using any University facilities or resources, including faculty time, but the only time summer registration is required for dissertation research (3 hours minimum) is when a doctoral student is graduating in August or defending the dissertation during the summer semester. This is true whether or not the student has formally submitted an Application for Admission to Candidacy.

Each PhD student must have completed a minimum of 24 hours of such dissertation work upon completion of the degree. The amount of dissertation research for which a student enrolls in any given semester should be commensurate with the progress a student is expected to make on the dissertation, as well as reflective of the extent to which University facilities and faculty time are invested in the proposed activities.

**Dissertation Proposal**

The dissertation proposal aims to show the appropriateness, manageability, and significance of the proposed research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction giving an overview and stating the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal’s format with respect to such things as the length of the introduction and detail of the review of the literature.

Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

**Dissertation**

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. Early in the process, the subject of the dissertation must be approved by the dissertation committee of the major department or division and by the dean of the Graduate School.

A dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. The committee shall have not fewer than five members, all of whom are appointed by the dean of the Graduate School. The graduate dean’s approval of the proposed dissertation committee is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the form for Appointment/Change of a Doctoral Dissertation Committee.

All members of a dissertation committee must be members of the UA Graduate Faculty. The committee chair must be a full member of the Graduate Faculty, as described in the Catalog’s section on Qualifications of the Graduate Faculty (p. 34). One member must be from outside the student’s major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student’s dissertation committee.

The final oral dissertation defense is the culminating experience in the doctoral program. As such, all members of the dissertation committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations. Graduate School deadlines, including each semester’s dissertation deadline, are available at the Graduate School’s homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research. If certain conditions are met for the student’s final semester, the student may qualify to enroll for fewer than 3 hours of 699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester. This exception applies only to students who registered for at least 3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below.

**Final-Semester Dissertation (699) Minimum Registration Hours**

<table>
<thead>
<tr>
<th>When was the &quot;completed electronic dissertation submitted to ProQuest/the Graduate School?&quot;</th>
<th>Minimum hours of 699 registration required in the final semester</th>

</tbody>
</table>

"Completed” means submitted at ProQuest after being successfully defended; being carefully edited following the defense meeting; and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. At the time of ProQuest submission, the student also must submit the Survey of Earned Doctorates through the NORC website.

1 International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see “USCIS” section under “Minimum Hours—Other Policies and Regulatory Bodies” on page 3 of this policy.
Article-Style Dissertations

This approach is intended for doctoral students whose dissertation will consist of a number of related manuscripts or articles that represent independent research or creative activity. It is an option available only to students in certain fields in which the faculty have received Graduate Council approval from the Graduate Council. A complete list of these fields is below:

- Accountancy
- Aerospace Engineering and Mechanics
- Applied Statistics
- Biological Sciences
- Chemical Engineering
- Chemistry
- Civil Engineering
- Computer Science
- Economics
- Education (all departments)
- Electrical and Computer Engineering
- Finance
- Geological Sciences
- Health Education and Promotion
- Management
- Management Science
- Marketing
- Mechanical Engineering
- Metallurgical and Materials Engineering
- Physics
- Psychology

Article-style dissertations must be based upon research completed while the student is enrolled at The University of Alabama. For each article used, the student must be the first author, or equivalent, as defined by the discipline.

As with traditional dissertations, the article-style dissertation must be the student’s original idea. It must be a unified work and include a sequence of articles of publishable quality around a cohesive theme, with a comprehensive review of literature demonstrating an in-depth understanding of the unifying framework.

- In article-style dissertations there will be introductory material to describe the studies, show how they are related, and explain their significance;
- connecting language to bridge each study to the next; and
- a summary making clear the importance of the studies, integrating the major findings, and discussing the implications for the overall topic.

These components do not have to be separate sections or chapters. They may be parts of the manuscripts or may be accomplished in an abstract.

All parts of both traditional and article-style dissertations must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline’s style manual require deviation. Students considering the article-style approach should contact the Graduate School before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the date of the required final oral examination.

Electronic submission of dissertations: August 15, 2009, is the date when electronic submission began to be required and paper submission no longer was accepted. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. The University’s IRB approval form is available at the IRB website.

Final Examinations

When the dissertation has been completed, the candidate will be given a final oral examination by a committee of not fewer than five members, one of whom must be from outside the student’s major department or, for students in the College of Education, outside the student’s area (not program), and appointed by the dean of the Graduate School. This examination will focus primarily on the candidate’s research work, as embodied in the dissertation, and the field in which the dissertation lies, but it may encompass the complete program for the degree. The results of the examination must be reported to the Office of the Graduate School at least six weeks before the commencement at which the degree is to be conferred.

Application for Graduation

Each candidate for a doctoral degree must submit an Application for Degree via myBama not later than the last day to register or add a course of the semester or the first term of the summer session in which requirements for the degree are to be completed. That day is published for each semester at the website of the University Registrar.

Clearing the Academic Record for Commencement

At least one week before commencement, the candidate’s record must have been cleared for graduation.

Attendance at Commencement

A candidate for a doctoral degree must be present at a scheduled commencement to receive the diploma and hood, unless excused by the graduate dean.

Withholding or Withdrawing an Advanced Degree

The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.
Department of Electrical and Computer Engineering (ECE)

- Majors
  - Electrical and Computer Engineering (MS) (p. 515)
  - Electrical and Computer Engineering (PhD) (p. 517)

Master’s degree students may earn graduate credit for a maximum of 6 semester hours of 400-level course credit but only if a form for Approval of 400-Level Course Work for Master’s Credit (p. 11) is approved by the department and Graduate School prior to the semester in which the 400-level coursework will be taken.

ECE508 Communications
Hours 3
Analog and digital communication systems, random signals, sampling, filtering, analog-to-digital encoding, advanced digital modulation/demodulation, source encoding/decoding, channel encoding/decoding, multiplexing, system performance analysis.
Prerequisite(s): ECE 370 and MATH 355
Prerequisite(s) with concurrency: ECE 509

ECE509 Communications Lab
Hours 1
Modeling and design of communication systems. Familiarization with specialized communications equipment and techniques. Proper use of laboratory instruments.
Prerequisite(s): ECE 370 and MATH 355
Prerequisite(s) with concurrency: ECE 508

ECE530 Solid State Devices
Hours 3
Solid state physics for semiconductor devices, PN junction, metal semiconductor, JFET/MESFET, MOSFET, BJT, and non-ideal behaviors of solid state devices. Organic thin film devices, including organic solar cells, thin film transistors, light emitting diodes, and their application for flexible displays.
Prerequisite(s): ECE 330

ECE534 Mixed Signal Circuits
Hours 3
Design and testing issues in the context of mixed-signal embedded systems. Introduction to CMOS mixed-signal design methodology, layout techniques, analog to digital converters, digital to analog converters, circuit simulation and testing and packaging of complex mixed-signal systems.
Prerequisite(s): ECE 332

ECE538 Integr Circuit Fabr Prin
Hours 3
Study of the processing tools used in semiconductor device fabrication. Topics include semiconductor fundamentals, semiconductor device fabrication processes, interconnections and contacts, integrated circuit packaging, and chip yield. Oral presentation and advance analytical work required.

ECE539 Thin Film Technology
Hours 3
Crystal structure and defects, film nucleation and growth models, growth of polycrystalline and epitaxial films, vacuum science technology, physical and chemical vapor deposition, solution based methods, thin film characterization techniques.
Prerequisite(s): ECE 225 or PH 253

ECE540 Electromagnetic Waves
Hours 3
Mathematics and physics of the radiation, propagation and scattering of electromagnetic waves. Boundary value problems involving finite and infinite structures, waveguides, antennas and media.
Prerequisite(s): ECE 340

ECE551 Power Electronics
Hours 3
Prerequisite(s): ECE 332 and ECE 350

ECE552 Power Electronics Laboratory
Hours 1
Laboratory experience in three phase power systems and electric machinery. Laboratory experience on the theory and operation of power electronic converters, systems and machine drives.
Prerequisite(s): ECE 350 and ECE 332
Prerequisite(s) with concurrency: ECE 551

ECE553 Power Systems
Hours 3
Basic power systems concepts and per unit quantities; transmissions line, transformer and rotating machine modeling; power flow; symmetrical component of power systems; faulted power system analysis.
Prerequisite(s): ECE 350

ECE554 Power Systems Laboratory
Hours 1
Test and analysis of power systems and machine devices and the design of systems using devices.
Prerequisite(s): ECE 350
Prerequisite(s) with concurrency: ECE 553

ECE555 Electromechanical Systems
Hours 3
Static and dynamic modeling, analysis, and simulation of mechanical, electrical, hydraulic, and mixed systems. MATLAB and SIMULINK model development and simulation.
Prerequisite(s): ECE 225 and MATH 238
ECE561 Quantum Well Elec & Devices
Hours 3
Energy levels and wave functions of semiconductor microstructures; envelope function approximation; quantum wells, superlattices; excitons; optical and electrical properties; selection rules; quantum confined Stark Effect; Wannier-Stark localization; field-effect transistors, tunneling devices, quantum well lasers, electro-optic modulators, quantum-well intersubband photodetectors.
Prerequisite(s): ECE 330 or PH 253

ECE562 Semiconductor Optoelectronics
Hours 3
Elemental and compound semiconductors; fundamentals of semiconductors physical properties, solid state physics, optical recombination and absorption, light emitting diodes, quantum well lasers, quantum dots lasers, blue lasers, semiconductor modulators, photodetectors, semiconductor solar cells and semiconductor nanostructure devices.
Prerequisite(s): PH 253

ECE563 Magnetic Materials & Devices
Hours 3
Diamegnetism and Paramagnetism, Ferromagnetism, Antiferromagnetism, Ferrimagnetism, magnetic anisotropy, domains and the magnetization process, fine particles and thin films, magnetization dynamics.
Prerequisite(s): ECE 340

ECE566 Fund of Nanotechnology
Hours 3
Nanofabrication with electron beam lithography, focused ion beam, lithography, and nanoimprint; microscopies for nanostructures, including SEM, EDX, TEM, AFM, STM; nano-scale devices based on nanostructured materials (carbon nanotubes and metal oxide nanomaterials.).
Prerequisite(s): ECE 330 or PH 253

ECE579 Digital Control Systems
Hours 3
Frequency and time domain methods in discrete time control systems; sampling of continuous-time signals, stability, transform design techniques, state variable analysis, and design techniques.

ECE580 Digital Systems Design
Hours 3
Digital systems design with hardware description languages, programmable implementation technologies, electronic design automation design flows, design considerations and constraints, design for test, system on a chip designs, IP cores, reconfigurable computing, digital system design examples and applications.

ECE581 Digital Systems Design Lab
Hours 1
Logic design and simulation via hardware description languages, use of electronic design automation tools, and CPU design.

ECE582 Comp Visn Dig Image Proc
Hours 3
Introduction to computer vision and digital image processing with an emphasis on image representation, transforms, filtering, compression, boundary detection, and pattern matching.
Prerequisite(s): MATH 355 and CS 124

ECE584 Adv Computer Architect
Hours 3
Computer architectures, computer design, memory systems design, parallel processing concepts, supercomputers, networks, and multiprocessing systems.

ECE585 Programmable Logic Controllers
Hours 3
Programmable Logic Controllers, fundamentals of ladder logic programming and PLC systems, advanced PLC operation and related topics including networking, control applications, and human machine interface design.
Prerequisite(s): ECE 383

ECE586 Embedded Systems
Hours 3
Integration of microprocessors into digital systems. Includes hardware interfacing, bus protocols and peripheral systems, embedded and real-time operating systems, real-time constraints, networking and distributed process control.
Prerequisite(s): ECE 383. Corequisite: ECE 587

ECE587 Embedded Systems Laboratory
Hours 1
Design and implementation experience with microcontrollers, interfacing, digital control systems, bus protocols and peripheral systems, real-time constraints, embedded and real-time operating systems, distribution process control.
Prerequisite(s): ECE 383 Corequisite: ECE 586

ECE588 Computational Intelligence
Hours 3
Computational Intelligence is a discipline that relies on biologically inspired computation to solve real-world problems that otherwise are infeasible or impossible to solve using classical engineering approaches. The course will cover the fundamental techniques of computational intelligence and study practical applications in real-world engineering problems.
Prerequisite(s): MATH 355 or consent of instructor.

ECE593 Special Topics
Hours 1-5
Advanced topics of a specialized nature.

ECE598 Non-Thesis Research
Hours 1-6
No description available
ECE599 Thesis Research
Hours 1-12
No description available

ECE637 Fund Solid State Engineering
Hours 3
Fundamentals of solid state physics and quantum mechanics are covered to explain the physical principles underlying the design and operation of semiconductor devices. The second part covers applications to semiconductor microdevices and nanodevices such as diodes, transistors, lasers and photodetectors incorporating quantum structures.
Prerequisite(s): PH 253

ECE638 Adv. in Integ. Circuit Process
Hours 3
Semiconductor roadmap; wafer cleaning, thin film deposition processes, advanced lithographic techniques, wet/dry etching; deep reactive ion etching, chemical mechanical planarization; ultr thin oxides; low k dielectrics, high k materials; interconnect metallization; and self assembly.
Prerequisite(s): ECE 438 or ECE 538

ECE662 Advanced Nanoscience
Hours 3
Advanced quantum physics; basics of nanotechnology, molecular and nanoelectronics; fundamentals in nanophotonics; interaction of light and matter; nanostructure characterization; bionanotechnology.
Prerequisite(s): PH 253

ECE663 Spin Electronics
Hours 3
Prerequisite(s): ECE 463 or ECE 563

ECE680 System-on-Chip Design
Hours 3
Basic issues in System-on-Chip (SOC) design, SOC hardware structures, SOC design methodologies, system-level design of complex SOCs, configurable processors, advanced topics in SOC design.
Prerequisite(s): ECE 580/581 or consent of instructor

ECE693 Special Topics
Hours 1-9
Advanced topics of a specialized nature.

ECE699 Dissertation Research
Hours 1-12
No description available

Electrical Engineering, MS
Admission Requirements
Applicants for graduate work in electrical and computer engineering must apply for admission to the Graduate School. Each applicant must submit a statement of purpose. Regular admission may be granted to an applicant who has an electrical engineering degree from an ABET-accredited program and an overall GPA above 3.0 on a 4.0 scale. Electrical engineering graduates from non-ABET accredited programs can be awarded regular admission if they have overall GPAs of 3.0 on a 4.0 scale and an acceptable general test score on the Graduate Record Examination. Conditional admission may be granted to applicants who do not meet these requirements, such as those who have degrees in related fields or GPAs below 3.0. International students must have minimum TOEFL scores of 585 for the MS degree program and 620 for the PhD program.

Additional information is in the Admission Criteria section below.
See the Admission Criteria section of this catalog for more information.

Degree Requirements
Master of Science
The department offers MS degrees with a thesis (Plan I) and a nonthesis (Plan II) option.

Plan I requires 30 credit hours with at least 24 at the graduate level (i.e., at the 500 or 600 level). These credit hours must include at least 12 hours in a concentration area within electrical and computer engineering; 3 hours in mathematics, general engineering studies, or the sciences (physics, chemistry, or biology); nine hours in an approved elective area; and six hours of thesis research. Majoring in some areas of specialization may require specific courses in that area. The student must pass a final comprehensive examination, which typically is a presentation and defense of the thesis.

Plan II requires 30 credit hours with at least 24 at the graduate level (i.e., at the 500 or 600 level). These credit hours must include at least 15 hours in a concentration area within electrical and computer engineering; three hours in mathematics, general engineering studies or the sciences (physics, chemistry or biology); and 12 hours in an approved elective area. A graduate supervisory committee approved manuscript authored or co-authored by the candidate, and submitted to a refereed journal or conference shall constitute the University of Alabama Graduate School "culminating" or "Capstone" experience requirement for an MS Plan II degree in Electrical Engineering. In addition, the student must satisfy all the Graduate School Degree Requirements.

Master's Degrees
The primary purpose of master's degree programs is to provide students with subject matter at an advanced level in their fields of study. Master's degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master's programs also help students become familiar with methods of independent investigation.

Program Requirements
Two plans are offered for the master's degree:
Plan I. Candidates for the master’s degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

Plan II. Candidates for the master’s degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating examination or “capstone experience” as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject. With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Residency Requirements
A student’s program at the master’s level must provide sufficient association with the resident faculty to permit individual evaluation of the student’s capabilities and achievements.

Graduate Credit
A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences
All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit
Courses of full graduate-level credit earned in a regionally accredited institution where a student was enrolled in the graduate school may be submitted for review for inclusion in a master’s degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student’s advisory committee and the dean of the Graduate School. Credit will not be accepted for transfer from any institution at which the student failed to achieve a “B” average on all graduate work attempted. Only courses in which a student earned a “B” grade or better may be transferred.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

A student initiates at the Graduate School’s website a Request for Transfer of Graduate Credit earned at another institution. It is also the student’s responsibility to assure that the Graduate School receives an official transcript of the credit requested for transfer, well in advance of the final semester.

With the approval of the student’s department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master’s degree may be transferred from another institution. All credit toward the master’s degree, including transfer credit, must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the master’s degree is to be awarded. Revalidation (recertification) of graduate credits that will be more than 18 semesters old at the time of UA master’s program completion is not an option.

Please note that some departments allow fewer than 12 hours of graduate transfer credit. Be sure to check with your department’s graduate coordinator regarding your department’s transfer policy.

400-Level Courses
A maximum of 6 semester hours of 400-level course credit may be accepted for a master’s degree program, but only if a form for Approval of 400-Level Course Work for Master’s Credit is approved by the Graduate School prior to the semester in which the 400-level coursework will be taken.

Time Limit
All requirements for the master’s degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. There is no provision for an extension of the time limit beyond six years for master’s students.

Admission to Candidacy
During the 2013-2014 academic year, the Graduate Council eliminated the master’s candidacy requirement. Departments may monitor master’s candidacy if they wish, but the Graduate School does not monitor it and will not accept master’s candidacy forms. Doctoral candidacy is not affected and remains an important doctoral program requirement.

Thesis
A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master’s degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student’s major department or division.

The final oral thesis defense is the culminating experience in the master’s program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

Article Style vs. Journal Format
Article Style.
At the doctoral level, “article-style dissertations” are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an “article-style thesis” to be presented for a master’s degree.

Journal Format.
A “journal-format thesis” is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal’s”information for authors” or similarly titled guidelines in
conjunction with the Graduate School’s Student Guide to Preparing Electronic Theses and Dissertations.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. A form for Appointment or Change of Master’s Thesis Committee is used to request that the graduate dean appoint a thesis committee. The request normally is made as soon as the successful defense of the thesis proposal has been completed.

All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student’s major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student’s thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. A final oral examination is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral examination unless there are extraordinary circumstances warranting the graduate dean’s approval of the absence prior to the defense meeting.

As of August 15, 2009, all theses are submitted electronically rather than on paper. See the Graduate School’s homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School’s website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student’s major department.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University’s Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research.

In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

Comprehensive Examinations

In addition to the regular course examinations, a final comprehensive examination representing a “culminating” or “capstone” experience for a degree is required of all candidates for the master’s degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a “policy and practice” paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School. The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. A final report, on the Master’s/EdS Examination Form is on the Graduate School website. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Application for Graduation

Each candidate for a master’s degree must apply for graduation through myBama no later than the registration period for the semester or the first session of the summer term in which requirements for the degree are to be completed.

Second Master’s Degree

Six (6) semester hours of eligible credit from one master’s degree at The University of Alabama may be applied to the requirements for a second master’s degree, but only if the department of the second master’s agrees to the courses in the plan of study. Any hours from the previous master’s degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. ***Please note that if a student double counts six hours between two master’s degrees, no hours may double count toward any additional master’s degrees.

Electrical Engineering, Ph.D.

Admission Requirements

Applicants for graduate work in electrical and computer engineering must apply for admission to the Graduate School. Each applicant must submit a statement of purpose. Regular admission may be granted to an applicant who has an electrical engineering degree from an ABET-accredited program and an overall GPA above 3.0 on a 4.0 scale. Electrical engineering graduates from non-ABET accredited programs can be awarded regular admission if they have overall GPAs of 3.0 on a 4.0 scale and an acceptable general test score on the Graduate Record Examination. Conditional admission may be granted to applicants who do not meet these requirements, such as those who have degrees in related fields or GPAs below 3.0. International students must have minimum TOEFL scores of 585 for the MS degree program and 620 for the PhD program.
Additional information is in the Admission Criteria section below. See the Admission Criteria section of this catalog for more information.

**Degree Requirements:**

**Doctor of Philosophy**

In the electrical and computer engineering department, the PhD degree requires a minimum of 48 credit hours of coursework. This must include 27 credit hours of closely related coursework in the major area. In addition, each student’s program must include 15 hours in a minor field of electrical and computer engineering or other approved area; six hours in mathematics, general engineering studies, or science (physics, chemistry, or biology); and 24 hours of dissertation research.

Early in the program each student meets with an advisor to complete a Plan of Study. The PhD Plan of Study is available at the Graduate School website. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit for the doctoral degree.

All candidates must pass a qualifying examination and a final examination. The final examination is generally a presentation and defense of the dissertation. A department-approved Admission to Candidacy for the Doctoral Degree is submitted to the Graduate School as soon as possible after passing the qualifying examination.

See below for details on plan of study, admission to candidacy, and all other degree requirements.

**Doctoral Degrees**

The University offers several types of doctorates, each of which is described below.

The Doctor of Philosophy (PhD) degree is regarded as the researcher’s degree. Program requirements include the acquisition of special skills for conducting independent, scholarly research of publishable quality. Requirements traditionally include a working knowledge of one or more foreign languages, but currently a number of foreign-language alternatives have been approved by departments. Through acquisition of these skills, PhD candidates demonstrate their potential for careers as independent, publishing scholars. Refer to departmental sections of this Catalog for details on foreign-language requirements or alternatives.

The minimum period in which a doctoral degree can be earned is three full academic years of graduate study after completion of a baccalaureate degree, although in most disciplines the period is longer. Graduate teaching assistants (GTA) or graduate research assistants (GRA) whose work assignments are 10 hours per week (i.e. the equivalent of 3 semester hours) or more should expect to take more than the minimum period of 3 academic years to earn a doctoral degree. The only exception to the three-year minimum is the practice-focused DNP.

The maximum period in which a doctoral degree can be earned is five years, but this may be extended beyond five years, with the approval of the student’s advisor and the Graduate School.

**Doctor of Philosophy Degree**

The Doctor of Philosophy degree is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and capacity for independent, original investigation. The first two criteria are tested in coursework and a comprehensive examination, the last in a dissertation in which the student must present clearly and effectively the results of substantial research. A combination of these accomplishments, rather than the mere accumulation of residence and course credits, is the essential consideration in awarding the PhD degree. The PhD differs from the EdD in a number of ways, including the fact that the PhD Plan of Study and comprehensive examination demonstrate a higher-level research focus, and there is a greater number of dissertation hours and higher level of complexity and independent thought in a PhD-level dissertation.

**Field of specialization**

A defined field of specialization is required of all candidates for the Doctor of Philosophy degree. A minimum of 48 semester hours of non-dissertation course credit is required. Candidates should consult their departments or the appropriate section of this Catalog for additional requirements. The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of 24 hours of dissertation research.

**Research skill/language requirements**

There is no universitywide foreign language/research skill requirement for doctoral students; each college or department offering the PhD degree may set its own requirements. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further information about PhD foreign language/research skill requirements, students may contact their departments or the Graduate School office 205-348-5921.

**Interdisciplinary Studies**

There is a PhD degree program in interdisciplinary studies, and it is administered by the Graduate School. In addition to the general requirements for the PhD degree, the program of study and the supervisory committee for the prospective interdisciplinary studies degree candidate must be approved by the dean of the Graduate School before the student is admitted to the program. See Interdisciplinary Studies (IDS) (p. 603) at the Graduate School’s website for information on prerequisites, admission procedures, course of study, and other aspects of IDS programs.

**Doctor of Education Degree**

A minimum of two years of graduate study beyond the master’s degree is required for the completion of the EdD program. The student is required to complete 60 semester hours in approved graduate courses beyond the master’s degree, or 90 semester hours of approved graduate courses, and to defend a dissertation. The student must complete a minimum of 12 hours of dissertation research. In the College of Education (p. 380) section of the Graduate Catalog, there are specific regulations governing the EdD program.

**Doctor of Musical Arts Degree**

The DMA degree requires a minimum of 48 semester hours beyond the Master of Music degree, plus recitals and other examinations as determined by faculty of the School of Music. Specific requirements for each major area are outlined in the School of Music (p. 206) section of the Graduate Catalog.

**Doctor of Nursing Practice**

The Doctor of Nursing Practice (DNP) (p. 574) is a joint program offered by the University of Alabama in Huntsville College of Nursing (UAHCON), the University of Alabama at Birmingham School of Nursing (UABSON), and The University of Alabama Capstone College of Nursing (UACCN).
The DNP is a practice-focused degree that is detailed in the Nursing section of this Catalog.

**Admission to Doctoral Degree Programs**

Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study. Admission to the Graduate School and the earning of a master’s degree from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student’s doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.

**Residency Requirements**

The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student’s doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog’s Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

**Graduate Credit**

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

**Graduate Credit for Noncredit Experiences**

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

**Transfer of Credit**

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a “B” grade or better may be transferred. The student must have attained an overall graduate GPA of “B” or better on all graduate work attempted. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.

2. PhD Programs Only: A student holding an earned, in-field master’s degree and working in the field or a related field since earning the degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a “B” overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. For departments participating in this program, the use of this option must be indicated on the Plan of Study.

To participate in Option 2, the Plan of Study must be submitted during the first semester of enrollment. If any coursework from the in-field or related-field master’s degree was earned more than six years prior to the date of admission, the graduate program director or department head/chair must submit to the Graduate School for evaluation a Field-Related Employment Since Earning Master’s Degree form with the student’s CV and a PhD Plan of Study.

Consideration of transfer of credit or the acceptance of an earned master’s degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the penultimate semester or the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department’s graduate coordinator regarding your department’s transfer policy.

Each department wanting its doctoral students to be able to choose Option 2 needs to “opt in” to this option by informing the graduate dean in writing that they wish to be among the approved departments.

**Time Limits**

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master’s, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period (not seven years) prior to admission to the doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree. Revalidation (recertification) of any expired course credit is not an option.
**Time Limits Extension Request**

Only under compelling circumstances beyond the student’s control a student may petition for a one-semester extension to the seven-year time limit (or eight-year time limit for the selected programs noted above). The Graduate Council approved the following steps to request an extension:

- To begin the process, the student petitions the department head. In the petition the student
  a. describes the compelling circumstances,
  b. briefly describes the current status of the dissertation, then
  c. includes a timeline showing each important remaining step in the completion of the dissertation. The last step and date in the timeline are submission of the successfully defended dissertation on or before the published final date for submission of dissertations for the requested extension semester.
- If the department head supports the petition, it is forwarded to the college dean.
- If the college dean supports the petition, it is sent to the graduate dean.
- If the graduate dean or his designee approves the extension, it will not require the student to validate any out-of-date UA or transfer courses previously approved for the plan of study.
- If a student fails to complete all degree requirements within the time limit for the student’s doctoral program or within a one-semester extension approved as noted above, the student will be dropped (suspended) from the doctoral program. To complete a doctoral degree, the student would have to reapply for admission and be admitted by the department and Graduate School. Graduate Council policies do not provide the option for a student failing to complete within the time limit to revalidate (recertify) either UA or transfer courses completed more than six years prior to the date of admission. Thus, a readmitted student would be able to apply to the new admission only those courses approved by the department and Graduate School and completed within the six years (18 fall, spring, and summer semesters) prior to the new admission.

**Repeating Courses When Given an Extension**

When requests are made for extensions of the doctoral time limits, and it is deemed that an out-of-date course is integral to the degree program, the college dean may request permission of the Graduate School for such a course to be repeated. In this case, both grades are used in calculation of the GPA.

**Plan of Study**

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School.

The PhD Plan of Study and DMA Plan of Study are available at the Graduate School website. The Plan of Study for other doctoral programs (EdD, DNP) are available from the student’s department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a “hold” may be placed on future registrations.

An amended Plan of Study (if needed) must be submitted to the Graduate School when the student submits the form for Admission to Candidacy for Doctoral Degree.

**Preliminary or Comprehensive Examination**

A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after

- any foreign language/research skill requirements are met (PhD students only);
- two full years of graduate study are completed; and
- the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student’s supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student’s research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

**Admission to Candidacy**

The requirements for advancing to candidacy include passing the qualifying (major or preliminary) examination; completion of all coursework as listed on the approved program of study; receiving departmental approval of the dissertation subject (although some departments require the defense of a dissertation proposal and/or writing one or more preliminary sections of the dissertation as well); and having the committee recommend the student for Admission to Candidacy for the Doctoral Degree. The completed candidacy form is submitted to the Graduate School well in advance of the final semester.

**Continuous Dissertation or Document Registration**

Once a student has met the requirements for admission to candidacy, received approval for the dissertation research proposal, or initiated enrollment in 699 (dissertation research for a doctoral degree), the student must pursue completion of the dissertation without interruption by enrolling each fall and spring semester of the academic year for at least 3 hours of dissertation research. Summer enrollment for 699 Dissertation Research is expected if the student is working on the dissertation and using any University facilities or resources, including faculty time, but the only time summer registration is required for dissertation research (3 hours minimum) is when a doctoral student is graduating in August or defending the dissertation during the summer semester. This is true whether or not the student has formally submitted an Application for Admission to Candidacy.

Each PhD student must have completed a minimum of 24 hours of such dissertation work upon completion of the degree. The amount of dissertation research for which a student enrolls in any given semester should be commensurate with the progress a student is expected to make on the dissertation, as well as reflective of the extent to which University facilities and faculty time are invested in the proposed activities.

**Dissertation Proposal**

The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction giving an overview and stating the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal’s format with respect to such things as the length of the introduction and detail of the review of the literature.
Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

**Dissertation**

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. Early in the process, the subject of the dissertation must be approved by the dissertation committee of the major department or division and by the dean of the Graduate School.

A dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. The committee shall have not fewer than five members, all of whom are appointed by the dean of the Graduate School. The graduate dean’s approval of the proposed dissertation committee is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the form for Appointment/Change of a Dissertation Committee.

All members of a dissertation committee must be members of the UA Graduate Faculty. The committee chair must be a full member of the Graduate Faculty, as described in the Catalog’s section on Qualifications of the Graduate Faculty (p. 34). One member must be from outside the student’s major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student’s dissertation committee.

The final oral dissertation defense is the culminating experience in the doctoral program. As such, all members of the dissertation committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations. Graduate School deadlines, including each semester’s dissertation deadline, are available at the Graduate School’s homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research. If certain conditions are met for the student’s final semester, the student may qualify to enroll for fewer than 3 hours of 699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester. This exception applies only to students who registered for at least 3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below:

<table>
<thead>
<tr>
<th>Final-Semester Dissertation (699) Minimum Registration Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>When was the *completed electronic dissertation submitted to ProQuest/the Graduate School?</td>
</tr>
<tr>
<td>By 4:45 p.m. on the last-possible day for instructors to post grades for the semester before the student’s final semester</td>
</tr>
<tr>
<td>After 4:45 p.m. on the last-possible day for instructors to post grades for the student’s final semester, but before 4:45 p.m. on the last-possible day to register or add a course for the student’s final semester</td>
</tr>
<tr>
<td>After 4:45 p.m. on the last-possible day to register or add a course for the student’s final semester</td>
</tr>
</tbody>
</table>

"Completed" means submitted at ProQuest after being successfully defended; being carefully edited following the defense meeting; and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. At the time of ProQuest submission, the student also must submit the Survey of Earned Doctorates through the NORC website.

1 International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see “USCIS” section under “Minimum Hours—Other Policies and Regulatory Bodies” on page 3 of this policy.

2 The University Calendar is available at the Academics tab of the website of the University Registrar.

**Article-Style Dissertations**

This approach is intended for doctoral students whose dissertation will consist of a number of related manuscripts or articles that represent independent research or creative activity. It is an option available only to students in certain fields in which the faculty have received Graduate Council approval from the Graduate Council. A complete list of these fields is below:

- Accountancy
- Aerospace Engineering and Mechanics
- Applied Statistics
- Biological Sciences
- Chemical Engineering
- Chemistry
- Civil Engineering
- Computer Science
- Economics
- Education (all departments)
- Electrical and Computer Engineering
the principal investigator is responsible for contacting the college Human case of dissertation research that involves the use of human subjects, and approval to use human subjects in research precede the research, no is conducted ethically. University and federal policies require that review of Human Subjects is to ensure that research involving human subjects benefits for society, but it also has significant ethical questions. The Scientific research involving human subjects has produced substantial before the student can be cleared for graduation.

The Graduate School. The graduate dean must approve the dissertation submission, including information on what needs to be submitted to no longer was accepted. Consult the ETD website for details of ETD when electronic submission began to be required and paper submission

Electronic submission of dissertations: August 15, 2009, is the date when electronic submission began to be required and paper submission no longer was accepted. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

Protection of Human Subjects for Research
Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. The University's IRB approval form is available at the IRB website.

Final Examinations
When the dissertation has been completed, the candidate will be given a final oral examination by a committee of not fewer than five members, one of whom must be from outside the student's major department or, for students in the College of Education, outside the student's area (not program), and appointed by the dean of the Graduate School. This examination will focus primarily on the candidate's research work, as embodied in the dissertation, and the field in which the dissertation lies, but it may encompass the complete program for the degree. The results of the examination must be reported to the Office of the Graduate School at least six weeks before the commencement at which the degree is to be conferred.

Application for Graduation
Each candidate for a doctoral degree must submit an Application for Degree via myBama not later than the last day to register or add a course of the semester or the first term of the summer session in which requirements for the degree are to be completed. That day is published for each semester at the website of the University Registrar.

Clearing the Academic Record for Commencement
At least one week before commencement, the candidate's record must have been cleared for graduation.

Attendance at Commencement
A candidate for a doctoral degree must be present at a scheduled commencement to receive the diploma and hood, unless excused by the graduate dean.

Withholding or Withdrawing an Advanced Degree
The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.

Department of Mechanical Engineering (ME)
Two basic plans are available for earning an MS degree, one requiring a thesis (Plan I) and one not requiring a thesis (Plan II). The Plan II option is also available via distance to off-campus students. During the first semester, a student enrolled in any graduate program should form a supervisory committee and, in counsel with an advisor, submit a program of courses for the degree. Forms and information for this purpose can be obtained from the departmental office.

- Majors
  - Mechanical Engineering (MS) (p. 524)
  - Mechanical Engineering (PhD) (p. 526)

The department has active research programs in acoustics, additive manufacturing, additive repair, additive friction stir, automobile engineering, biomedical engineering, combustion, computational modeling and simulation, computational fluid dynamics and heat transfer, internal combustion engines, control systems, dynamic systems and control, IC engines, control systems, energy systems, energy conservation, fatigue and fracture mechanics, fluid mechanics, heat transfer, high strain rate mechanics, HVAC, manufacturing, materials processing and characterization, mechatronics, renewable and sustainable energy, robotics, smart manufacturing structural mechanics, sustainable manufacturing, vehicle dynamics, and vibrations.
To support research, the department maintains well-equipped laboratories for bio-robotics, controls, combustion, computational mechanics, engines, energy assessment, computer-aided automation, HVAC, manufacturing, numerical modeling, structures, vibro-acoustics and sound quality, metrology and precision engineering, and vehicles manufacturing, propulsion and space exploration, vibrations, and vehicle dynamics. The department also maintains a modularized area capable of supporting many separate projects, as well as a student machine shop. Students have easy access to modern computer facilities, including a departmental computer room.

ME501 Mech Engr Analysis I
Hours 3
Analysis of mechanical engineering systems; presentations and application of advanced analysis techniques for continuous and discrete dynamic systems.

ME503 Intermed Gas Dynamics
Hours 3
Basic equations and concepts of compressible flow; shock and expansion waves; and development of the generalized one-dimensional equations and solution of these equations for various types of flow, using computer software.

ME506 Found Thermal Power Gen
Hours 3
Thermal power systems; components, process analysis and modeling, fuels, combustion, environmental aspects, and availability analysis in steam and gas turbine plants. Examination of recent trends such as cogeneration and combined cycles.

ME509 Intermed Heat Transfer
Hours 3
Intermediate treatment of conduction, convection, and radiation heat transfer.
Prerequisite(s): ME 309 and AEM 311

ME516 Fnd Energy Conserv & Mgt
Hours 3
Analysis and management of energy use in residential, commercial, and industrial applications, including lighting, heating and cooling, controls, and energy management systems. Topics include economics, auditing, energy management, and alternative energy sources.

ME518 Princ of Combustion I
Hours 3
Combustion thermodynamics, flame temperature and equilibrium compositions, ignition processes, detonation and deflagration, diffusion flames, and similitude; assigned papers.

ME522 Reliability Maint & TPM
Hours 3
No description available

ME530 Fuzzy Set Theory & Application
Hours 3
No description available
Prerequisite(s): GES 257

ME562 Intermediate Dynamics
Hours 3
Dynamics of systems in moving coordinate frames; Lagrangian formulation and Hamilton's principle; stability and perturbation concepts for rigid body motion; motion of systems of rigid bodies in three dimensions.

ME570 Mechanical Vibrations
Hours 3
Formulation and solution of free and forced vibration problems for undamped and damped systems with single and multiple degrees of freedom. Both modal and frequency response techniques are discussed. An introduction to continuous systems is included.

ME571 Fundamentl Of Acoustics
Hours 3
Fundamental physical principles underlying wave propagation and resonance in mechanical systems. Introduces applications and provides experience in acoustic and audio measurements and the associated instrumentation.

ME577 Advanced Linear Control
Hours 3
Modern techniques for the analysis and design of linear control systems. Matrix formulation; multivariable control systems; state-variable concepts; discrete-time systems; optimization; and statistical design methods.

ME585 Computer-Aided Design
Hours 3
Basics of computer-aided design including solid modeling, model assembly, structural and thermal analysis, mechanism simulation, and parametric/optimization study. Interactive computer programs are used to design and analyze mechanical components/devices.

ME591 Special Problems
Hours 1-3
Credit awarded is based on the amount of work undertaken.

ME594 Special Project
Hours 2-6
Planning, executing, and presenting results of an individual project involving a research design, analysis, or similar undertaking.

ME598 Non-Thesis Research
Hours 1-3
No description available

ME599 Thesis Research
Hours 1-12
No description available

ME605 Classical Thermodynamics
Hours 3
Classical macroscopic thermodynamic analysis of systems, pure substances, mixtures, and reacting systems.
ME607 Condution Heat Transfer
Hours 3
Transient, multidimensional heat conduction in various geometries, and the mathematical and numerical means to analyze them.

ME609 Convection Heat Transfer
Hours 3
Laminar and turbulent internal and external flow, natural convection, and the mathematical and numerical means to analyze them.

ME618 Princ Of Combustion II
Hours 3
Parameters of confined combustion; evaporation of fuel, velocity of flames, detonation, and chamber design; dynamic effects; and measuring techniques. Assigned papers.

ME674 Nonlinear Control Systems
Hours 3
Analysis of nonlinear systems. Nonlinear controller design techniques. State variables, phase plane analysis, describing functions, and Lyapunov stability theory.
Prerequisite(s): ME 475 OR ECE 475

ME691 Special Problems
Hours 1-6
No description available

ME694 Special Project
Hours 2-6
Planning, executing, and presenting results of an individual project involving a research design, analysis, or similar undertaking.

ME699 Dissertation Research
Hours 1-12
No description available

Mechanical Engineering, MS

Admission Requirements
Descriptions of the Graduate School Admission Criteria and the College of Engineering general admission requirements are listed below. See the Admission Criteria section of this catalog for more information.

A master's degree applicant for a mechanical engineering program should normally have a baccalaureate degree in mechanical engineering from an ABET-accredited curriculum or a recognized international university. Applicants in related areas such as science and mathematics are encouraged to apply; however, prerequisite undergraduate courses will be required that will not apply for graduate credit.

Admission to the PhD program usually requires completion of a master's degree; however, exceptionally qualified applicants may be admitted directly to the PhD program from the bachelor's degree in mechanical engineering. Those students typically earn an MS degree while pursuing the PhD.

A GRE score is required for most applicants. For current undergraduate students applying to the Accelerated Master's Program at The University of Alabama, no GRE score is required. For students that have applied for the MBA program, the GMAT is accepted in lieu of the GRE for admission to any of the College's dual degree programs if the applicant has a bachelor's degree in engineering or computer science from an ABET/EAC- or ABET/CAC-accredited program with a GPA of at least 3.0. International students generally must submit TOEFL or equivalent scores in English language proficiency.

Degree Requirements
Graduate School Degree Requirements and College of Engineering MS and PhD degree requirements are detailed below. Also refer to the online Graduate Handbook on the departmental homepage.

Master's Degree Requirements

Plan I
All students on teaching or research assistantships in the department are expected to pursue the Plan I option. The following are the department's requirements for the Plan I Master's degree:

• A minimum of 24 semester hours of approved courses (excluding ME 599 Thesis Research) that together satisfy all other course requirements for the degree
• A minimum of 12 semester hours in a major area at the 500 and/or 600 level, of which 3 hours may be in a closely related supporting area;
• A minimum of 6 semester hours of mathematics taken in the Department of Mathematics or the College of Engineering
• An approved thesis and a minimum of 6 semester hours of ME 599.

Plan II
The following are the department's requirements for the Plan II Master's degree:

• A minimum of 30 semester hours of approved courses that together satisfy all other course requirements for the degree
• A minimum of 18 semester hours in a major area at or above the 500 level, of which 6 hours may be in closely related supporting areas
• A minimum of 6 semester hours of mathematics taken in the Department of Mathematics or the College of Engineering
• A comprehensive exam. (A Ph.D. proposal, as approved by the committee, can serve as a comprehensive exam.)
• Note that this degree may be completed via distance.

See the online Graduate Catalog (p. 10) for details on Plan of Study, Admission to Candidacy, and all other Degree Requirements.

Master's Degrees
The primary purpose of master's degree programs is to provide students with subject matter at an advanced level in their fields of study. Master's degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master's programs also help students become familiar with methods of independent investigation.

Program Requirements
Two plans are offered for the master's degree:
Plan I. Candidates for the master’s degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

Plan II. Candidates for the master’s degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating examination or “capstone experience” as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject. With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Residency Requirements
A student’s program at the master’s level must provide sufficient association with the resident faculty to permit individual evaluation of the student’s capabilities and achievements.

Graduate Credit
A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences
All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit
Courses of full graduate-level credit earned in a regionally accredited institution where a student was enrolled in the graduate school may be submitted for review for inclusion in a master’s degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student’s advisory committee and the dean of the Graduate School. Credit will not be accepted for transfer from any institution at which the student failed to achieve a “B” average on all graduate work attempted. Only courses in which a student earned a “B” grade or better may be transferred.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

A student initiates at the Graduate School’s website a Request for Transfer of Graduate Credit earned at another institution. It is also the student’s responsibility to assure that the Graduate School receives an official transcript of the credit requested for transfer, well in advance of the final semester.

With the approval of the student’s department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master’s degree may be transferred from another institution. All credit toward the master’s degree, including transfer credit, must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the master’s degree is to be awarded. Revalidation (recertification) of graduate credits that will be more than 18 semesters old at the time of UA master’s program completion is not an option.

Please note that some departments allow fewer than 12 hours of graduate transfer credit. Be sure to check with your department’s graduate coordinator regarding your department’s transfer policy.

400-Level Courses
A maximum of 6 semester hours of 400-level course credit may be accepted for a master’s degree program, but only if a form for Approval of 400-Level Course Work for Master’s Credit is approved by the Graduate School prior to the semester in which the 400-level coursework will be taken.

Time Limit
All requirements for the master’s degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. There is no provision for an extension of the time limit beyond six years for master’s students.

Admission to Candidacy
During the 2013-2014 academic year, the Graduate Council eliminated the master’s candidacy requirement. Departments may monitor master’s candidacy if they wish, but the Graduate School does not monitor it and will not accept master’s candidacy forms. Doctoral candidacy is not affected and remains an important doctoral program requirement.

Thesis
A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master’s degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student’s major department or division.

The final oral thesis defense is the culminating experience in the master’s program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

Article Style vs. Journal Format

Article Style.
At the doctoral level, “article-style dissertations” are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an “article-style thesis” to be presented for a master’s degree.

Journal Format.
A “journal-format thesis” is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal’s “information for authors” or similarly titled guidelines in
A thesis committee must consist of at least three members appointed by the dean of the Graduate School. A form for Appointment or Change of Master’s Thesis Committee is used to request that the graduate dean appoint a thesis committee. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student’s major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student’s thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. A final oral examination is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral examination unless there are extraordinary circumstances warranting the graduate dean’s approval of the absence prior to the defense meeting.

As of August 15, 2009, all theses are submitted electronically rather than on paper. See the Graduate School’s homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School’s website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student’s major department.

**Protection of Human Subjects for Research**

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University’s Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research. In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

**Comprehensive Examinations**

In addition to the regular course examinations, a final comprehensive examination representing a “culminating” or “capstone” experience for a degree is required of all candidates for the master’s degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a "policy and practice" paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School. The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. A final report, on the Master’s/EdS Examination Form is on the Graduate School website. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

**Application for Graduation**

Each candidate for a master’s degree must apply for graduation through myBama no later than the registration period for the semester or the first session of the summer term in which requirements for the degree are to be completed.

**Second Master’s Degree**

Six (6) semester hours of eligible credit from one master’s degree at The University of Alabama may be applied to the requirements for a second master’s degree, but only if the department of the second master’s agrees to the courses in the plan of study. Any hours from the previous master’s degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. ***Please note that if a student double counts six hours between two master’s degrees, no hours may double count toward any additional master’s degrees.

**Mechanical Engineering, Ph.D. Admission Requirements**

Descriptions of the Graduate School Admission Criteria and the College of Engineering general admission requirements are listed below.

See the Admission Criteria section of this catalog for more information.

A master’s degree applicant for a mechanical engineering program should normally have a baccalaureate degree in mechanical engineering from an ABET-accredited curriculum or a recognized international university. Applicants in related areas such as science and mathematics are encouraged; however, prerequisite undergraduate courses will be required that will not apply for graduate credit.
Admission to the PhD program usually requires completion of a master’s degree; however, exceptionally qualified applicants may be admitted directly to the PhD program from the bachelor’s degree.

The GRE is not required for graduates from ABET-accredited programs. All other applicants must submit GRE scores. International students generally must submit TOEFL or equivalent scores in English language proficiency.

**Degree Requirements**

Graduate School Degree Requirements and College of Engineering MS and PhD degree requirements are detailed below. Also refer to the online Graduate Handbook on the departmental homepage.

**Doctor of Philosophy**

The following are the department’s requirements for the PhD degree:

- A minimum of 48 semester hours (excluding ME 699 Dissertation Research) of approved courses that together satisfy all other course requirements for the degree
- A minimum of 24 semester hours of coursework in the major technical area, of which 9 hours may be in closely related supporting areas
- A minimum of 12 semester hours in any minor technical areas included in the student’s program of study
- A comprehensive exam. A Ph.D. proposal or journal paper, as approved by the committee, can serve as a comprehensive exam.
- An approved dissertation and a minimum of 24 semester hours of ME 699.

Early in the graduate program, each student confers with a faculty adviser to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study is prepared and submitted to the Graduate School. The PhD Plan of Study is available at the Graduate School website. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit for the doctoral degree. Otherwise, a “hold” may be placed on future registration.

If later there are changes in the Plan of Study, the student simply submits an amended PhD Plan of Study to the Graduate School at the time that the form for Admission to Candidacy for Doctoral Degree is submitted. A department-approved Admission to Candidacy for the Doctoral Degree is submitted to the Graduate School as soon as possible after passing the comprehensive (preliminary) examination.

See the online Graduate Catalog (p. 10) for details on Plan of Study, Admission to Candidacy, and all other Degree Requirements.

**Doctoral Degrees**

The University offers several types of doctorates, each of which is described below.

The Doctor of Philosophy (PhD) degree is regarded as the researcher’s degree. Program requirements include the acquisition of special skills for conducting independent, scholarly research of publishable quality. Requirements traditionally include a working knowledge of one or more foreign languages, but currently a number of foreign-language alternatives have been approved by departments. Through acquisition of these skills, PhD candidates demonstrate their potential for careers as independent, publishing scholars. Refer to departmental sections of this Catalog for details on foreign-language requirements or alternatives.

The minimum period in which a doctoral degree can be earned is three full academic years of graduate study after completion of a baccalaureate degree, although in most disciplines the period is longer. Graduate teaching assistants (GTA) or graduate research assistants (GRA) whose work assignments are 10 hours per week (i.e. the equivalent of 3 semester hours) or more should expect to take more than the minimum period of 3 academic years to earn a doctoral degree. The only exception to the three-year minimum is the practice-focused DNP.

**Doctor of Philosophy Degree**

The Doctor of Philosophy degree is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and capacity for independent, original investigation. The first two criteria are tested in coursework and a comprehensive examination, the last in a dissertation in which the student must present clearly and effectively the results of substantial research. A combination of these accomplishments, rather than the mere accumulation of residence and course credits, is the essential consideration in awarding the PhD degree. The PhD differs from the EdD in a number of ways, including the fact that the PhD Plan of Study and comprehensive examination demonstrate a higher-level research focus, and there is a greater number of dissertation hours and higher level of complexity and independent thought in a PhD-level dissertation.

**Field of specialization**

A defined field of specialization is required of all candidates for the Doctor of Philosophy degree. A minimum of 48 semester hours of non-dissertation course credit is required. Candidates should consult their departments or the appropriate section of this Catalog for additional requirements. The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of 24 hours of dissertation research.

**Research skill/language requirements**

There is no universitywide foreign language/research skill requirement for doctoral students; each college or department offering the PhD degree may set its own requirements. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further information about PhD foreign language/research skill requirements, students may contact their departments or the Graduate School office 205-348-5921.

**Interdisciplinary Studies**

There is a PhD degree program in interdisciplinary studies, and it is administered by the Graduate School. In addition to the general requirements for the PhD degree, the program of study and the supervisory committee for the prospective interdisciplinary studies degree candidate must be approved by the dean of the Graduate School before the student is admitted to the program. See Interdisciplinary Studies (IDS) (p. 603) at the Graduate School’s website for information on prerequisites, admission procedures, course of study, and other aspects of IDS programs.

**Doctor of Education Degree**

A minimum of two years of graduate study beyond the master’s degree is required for the completion of the EdD program. The student is required
to complete 60 semester hours in approved graduate courses beyond the master’s degree, or 90 semester hours of approved graduate courses, and to defend a dissertation. The student must complete a minimum of 12 hours of dissertation research. In the College of Education (p. 380) section of the Graduate Catalog, there are specific regulations governing the EdD program.

**Doctor of Musical Arts Degree**
The DMA. degree requires a minimum of 48 semester hours beyond the Master of Music degree, plus recitals and other examinations as determined by faculty of the School of Music. Specific requirements for each major area are outlined in the School of Music (p. 206) section of the Graduate Catalog.

**Doctor of Nursing Practice**
The Doctor of Nursing Practice (DNP) (p. 574) is a joint program offered by the University of Alabama in Huntsville College of Nursing (UAHCON), the University of Alabama at Birmingham School of Nursing (UABSON), and The University of Alabama Capstone College of Nursing (UACCN). The DNP is a practice-focused degree that is detailed in the Nursing section of this Catalog.

**Admission to Doctoral Degree Programs**
Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study. Admission to the Graduate School and the earning of a master’s degree from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student’s doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.

**Residency Requirements**
The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student’s doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog’s Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University.

**Graduate Credit**
A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

**Graduate Credit for Noncredit Experiences**
All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

**Transfer of Credit**
Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a “B” grade or better may be transferred. The student must have attained an overall graduate GPA of “B” or better on all graduate work attempted. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.

2. PhD Programs Only: A student holding an earned, in-field master’s degree and working in the field or a related field since earning the degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a “B” overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. For departments participating in this program, the use of this option must be indicated on the Plan of Study.

To participate in Option 2, the Plan of Study must be submitted during the first semester of enrollment. If any coursework from the in-field or related-field master’s degree was earned more than six years prior to the date of admission, the graduate program director or department head/chair must submit to the Graduate School for evaluation a Field-Related Employment Since Earning Master’s Degree form with the student’s CV and a PhD Plan of Study.

Consideration of transfer of credit or the acceptance of an earned master’s degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the penultimate semester or the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department’s graduate coordinator regarding your department’s transfer policy.
Each department wanting its doctoral students to be able to choose Option 2 needs to “opt in” to this option by informing the graduate dean in writing that they wish to be among the approved departments.

**Time Limits**

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master’s, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period (not seven years) prior to admission to the doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree. Revalidation (recertification) of any expired course credit is not an option.

**Time Limits Extension Request**

Only under compelling circumstances beyond the student’s control a student may petition for a one-semester extension to the seven-year time limit (or eight-year time limit for the selected programs noted above). The Graduate Council approved the following steps to request an extension:

- To begin the process, the student petitions the department head. In the petition the student
  a. describes the compelling circumstances,
  b. briefly describes the current status of the dissertation, then
  c. includes a timeline showing each important remaining step in the completion of the dissertation. The last step and date in the timeline are submission of the successfully defended dissertation on or before the published final date for submission of dissertations for the requested extension semester.
- If the department head supports the petition, it is forwarded to the college dean.
- If the college dean supports the petition, it is sent to the graduate dean.
- If the graduate dean or his designee approves the extension, it will not require the student to validate any out-of-date UA or transfer courses previously approved for the plan of study.
- If a student fails to complete all degree requirements within the time limit for the student’s doctoral program or within a one-semester extension approved as noted above, the student will be dropped (suspended) from the doctoral program. To complete a doctoral degree, the student would have to reapply for admission and be admitted by the department and Graduate School. Graduate Council policies do not provide the option for a student failing to complete within the time limit to revalidate (recertify) either UA or transfer courses completed more than six years prior to the date of admission. Thus, a readmitted student would be able to apply to the new admission only those courses approved by the department and Graduate School and completed within the six years (18 fall, spring, and summer semesters) prior to the new admission.

**Repeating Courses When Given an Extension**

When requests are made for extensions of the doctoral time limits, and it is deemed that an out-of-date course is integral to the degree program, the college dean may request permission of the Graduate School for such a course to be repeated. In this case, both grades are used in calculation of the GPA.

**Plan of Study**

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School.

The PhD Plan of Study and DMA Plan of Study are available at the Graduate School website. The Plan of Study for other doctoral programs (EdD, DNP) are available from the student’s department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a “hold” may be placed on future registrations.

An amended Plan of Study (if needed) must be submitted to the Graduate School when the student submits the form for Admission to Candidacy for Doctoral Degree.

**Preliminary or Comprehensive Examination**

A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after

- any foreign language/research skill requirements are met (PhD students only);
- two full years of graduate study are completed; and
- the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student’s supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student’s research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

**Admission to Candidacy**

The requirements for advancing to candidacy include passing the qualifying (major or preliminary) examination; completion of all coursework as listed on the approved program of study; receiving departmental approval of the dissertation subject (although some departments require the defense of a dissertation proposal and/or writing one or more preliminary sections of the dissertation as well); and having the committee recommend the student for Admission to Candidacy for the Doctoral Degree. The completed candidacy form is submitted to the Graduate School well in advance of the final semester.

**Continuous Dissertation or Document Registration**

Once a student has met the requirements for admission to candidacy, received approval for the dissertation research proposal, or initiated enrollment in 699 (dissertation research for a doctoral degree), the student must pursue completion of the dissertation without interruption by enrolling each fall and spring semester of the academic year for at least 3 hours of dissertation research. Summer enrollment for 699 Dissertation Research is expected if the student is working on the dissertation and using any University facilities or resources, including faculty time, but the only time summer registration is required for dissertation research (3 hours minimum) is when a doctoral student is
Dissertation Proposal

The dissertation proposal aims to show the appropriateness, manageability, and significance of the proposed research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction giving an overview and stating the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal's format with respect to such things as the length of the introduction and detail of the review of the literature.

Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

Dissertation

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. Early in the process, the subject of the dissertation must be approved by the dissertation committee of the major department or division and by the dean of the Graduate School.

A dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. The committee shall have no fewer than five members, all of whom are appointed by the dean of the Graduate School. The graduate dean's approval of the proposed dissertation committee is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the form for Appointment/Change of a Doctoral Dissertation Committee.

All members of a dissertation committee must be members of the UA Graduate Faculty. The committee chair must be a full member of the Graduate Faculty, as described in the Catalog's section on Qualifications of the Graduate Faculty (p. 34). One member must be from outside the student's major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student's dissertation committee.

The final oral dissertation defense is the culminating experience in the doctoral program. As such, all members of the dissertation committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

The dissertation must comply with the regulations in a Student Guide to Preparing Electronic Theses and Dissertations. Graduate School deadlines, including each semester's dissertation deadline, are available at the Graduate School's homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research. If certain conditions are met for the student's final semester, the student may qualify to enroll for fewer than 3 hours of 699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester. This exception applies only to students who registered for at least 3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below:

**Final-Semester Dissertation (699) Minimum Registration Hours**

<table>
<thead>
<tr>
<th>When was the *completed electronic dissertation submitted to ProQuest/the Graduate School?</th>
<th>Minimum hours of 699 registration required in the final semester</th>
</tr>
</thead>

</tbody>
</table>

*Completed* means submitted at ProQuest after being successfully defended; being carefully edited following the defense meeting; and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. At the time of ProQuest submission, the student also must submit the Survey of Earned Doctorates through the NORC website.

International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see "USCIS" section under "Minimum Hours–Other Policies and Regulatory Bodies" on page 3 of this policy.
Article-Style Dissertations

This approach is intended for doctoral students whose dissertation will consist of a number of related manuscripts or articles that represent independent research or creative activity. It is an option available only to students in certain fields in which the faculty have received Graduate Council approval from the Graduate Council. A complete list of these fields is below:

- Accountancy
- Aerospace Engineering and Mechanics
- Applied Statistics
- Biological Sciences
- Chemical Engineering
- Chemistry
- Civil Engineering
- Computer Science
- Economics
- Education (all departments)
- Electrical and Computer Engineering
- Finance
- Geological Sciences
- Health Education and Promotion
- Management
- Management Science
- Marketing
- Mechanical Engineering
- Metallurgical and Materials Engineering
- Physics
- Psychology

Article-style dissertations must be based upon research completed while the student is enrolled at The University of Alabama. For each article used, the student must be the first author, or equivalent, as defined by the discipline.

As with traditional dissertations, the article-style dissertation must be the student's original idea. It must be a unified work and include a sequence of articles of publishable quality around a cohesive theme, with a comprehensive review of literature demonstrating an in-depth understanding of the unifying framework.

- In article-style dissertations there will be introductory material to describe the studies, show how they are related, and explain their significance;
- connecting language to bridge each study to the next; and
- a summary making clear the importance of the studies, integrating the major findings, and discussing the implications for the overall topic.

These components do not have to be separate sections or chapters. They may be parts of the manuscripts or may be accomplished in an abstract.

All parts of both traditional and article-style dissertations must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline’s style manual require deviation. Students considering the article-style approach should contact the Graduate School before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the date of the required final oral examination.

Electronic submission of dissertations: August 15, 2009, is the date when electronic submission began to be required and paper submission no longer was accepted. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University’s Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. The University’s IRB approval form is available at the IRB website.

Final Examinations

When the dissertation has been completed, the candidate will be given a final oral examination by a committee of not fewer than five members, one of whom must be from outside the student's major department or, for students in the College of Education, outside the student's area (not program), and appointed by the dean of the Graduate School. This examination will focus primarily on the candidate's research work, as embodied in the dissertation, and the field in which the dissertation lies, but it may encompass the complete program for the degree. The results of the examination must be reported to the Office of the Graduate School at least six weeks before the commencement at which the degree is to be conferred.

Application for Graduation

Each candidate for a doctoral degree must submit an Application for Degree via myBama not later than the last day to register or add a course of the semester or the first term of the summer session in which requirements for the degree are to be completed. That day is published for each semester at the website of the University Registrar.

Clearing the Academic Record for Commencement

At least one week before commencement, the candidate's record must have been cleared for graduation.

Attendance at Commencement

A candidate for a doctoral degree must be present at a scheduled commencement to receive the diploma and hood, unless excused by the graduate dean.

Withholding or Withdrawing an Advanced Degree

The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.
Department of Metallurgical and Materials Engineering (MTE)

An interdisciplinary PhD degree in materials science is also offered (see Interdisciplinary Programs (p. 28)). The graduate program in metallurgical and materials engineering allows for close association between graduate students and the faculty.

- Majors
  - Metallurgical Engineering (MS) (p. 538)
  - Materials/Metallurgical Engineering (PhD) (p. 534)

Research

Research interests of the department include thermodynamics and kinetics of molten metal processes, chemical metallurgy, metal-casting, corrosion phenomena, computer modeling of solidification and other metallurgical processes; electrodynamics of molten metals, metal matrix composites, thin-film technology, tribology, magnetic materials, microgravity effects in solidification, modeling microstructural evolution, and micromechanical behavior in cast materials, fracture mechanics, refractories, molten salts, electronic materials, thin films, and fuel cells, and phase equilibria. Facilities are available for directional and high-speed solidification, levitation melting, sputtering and chemical vapor-deposition, optical and electron microscopy, X-ray diffraction, corrosion, nanoindentation, and electrochemistry, materials characterization facilities, MEMS and thermal properties, and thermodynamic properties.

A metal-casting facility is equipped with up-to-date metal melting and casting equipment and is one of the finest facilities in the United States for teaching, research, and service to the metal-casting and processing industry. Well-qualified machinists are available for construction of highly specialized research equipment.

Computational facilities are comprehensive, ranging from workstations, minicomputers, and PC units with associated data-acquisition peripherals to access the campus mainframe equipment.

MTE519 Solidification Science
Hours 3
Overview of the principles of solidification processing, the evolution of solidification microstructure, segregation, defects and the use of analytical and computational tools for the design, understanding and use of solidification processes.

MTE539 Metallurgy Of Welding
Hours 3
Thermal, chemical, and mechanical aspects of welding using the fusion welding process. The metallurgical aspects of welding, including microstructure and properties of the weld, are also covered. Various topics on recent trends in welding research.

Prerequisite(s): MTE 380

MTE546 Macroscp Transp Mat Proc
Hours 3
Elements of laminar and turbulent flow; heat transfer by conduction, convection, and radiation; and mass transfer in laminar and in turbulent flow; mathematical modeling of transport phenomena in metallurgical systems including melting and refining processes, solidification processes, packed bed systems, and fluidized bed systems.

Prerequisite(s): MATH 238 and MTE 353

MTE549 Powder Metallurgy
Hours 3
It is an elective class for graduate students, and is aimed at providing metallurgical engineering students with in-depth knowledge of powder metallurgy technology which is one of principal technologies for manufacturing near net-shape products. This course covers all processing steps involved in transforming powders into consolidated products, starting from powder fabrication to sintering of compacted powders with emphasis on the scientific principles associated with design and operation of these processes and on the structure and physical properties of the final product. The applications and specific engineering details are used as illustration. The ultimate goal of this course is to make students be able from the materials learned to select and design the optimal processing route for any given product properties.

MTE550 Sputtered Thin Film Basics Ap
Hours 3
This course will cover fundamental technology involved in thin film processing. Plasma deposition and etch technology will be discussed. The basics of plasma processing equipment will be detailed, with special emphasis on sputtering tools. A range of thin film applications will be explored, with examples of magnetics, semiconductor, optical, and medical applications. The fundamentals of process optimization using a Design of Experiments will be taught with a test case of process optimization for the final exam.

Prerequisite(s): With permission of instructor.

MTE556 Advanced Mechanical Behavior
Hours 3
Topics include elementary elasticity, plasticity, and dislocation theory; strengthening by dislocation substructure, and solid solution strengthening; precipitation and dispersion strengthening; fiber reinforcement; martensitic strengthening; grain-size strengthening; order hardening; dual phase microstructures, etc.

Prerequisite(s): MTE 455

MTE562 Metallurgicl Thermodyn
Hours 3
Laws of thermodynamics, equilibria, chemical potentials and equilibria in heterogeneous systems, activity functions, chemical reactions, phase diagrams, and electrochemical equilibria; thermodynamic models and computations; and application to metallurgical processes.

Prerequisite(s): MTE 362
MTE567 Strengthening Mechanisms in Materials  
Hours 3  
Mechanisms and micromechanics of strengthening in engineering materials. This course covers the physical phenomena that contribute towards high mechanical strength in engineering materials. Principles for designing high strength materials will be addressed.  
Prerequisite(s): MTE 455 or equivalent: or permission of instructor

MTE579 Advanced Physical Metallurgy  
Hours 3  
Graduate-level treatments of the fundamentals of symmetry, crystallography, crystal structures, defects in crystals (including dislocation theory), and atomic diffusion.

MTE583 Adv Structure Of Metal  
Hours 3  
Graduate-level treatments of symmetry, crystallography, crystal structures and defects in crystals. Application of analytical techniques to study crystal structures and textures in materials.

MTE585 Materls At Elevd Temps  
Hours 3  
Influence of temperatures on behavior and properties of materials.

MTE587 Corrosion Science & Engr  
Hours 3  
Fundamental causes of corrosion problems and failures. Emphasis is placed on tools and knowledge necessary for predicting corrosion, measuring corrosion rates, and combining this with prevention and materials selection.  
Prerequisite(s): MTE 271 and CH 102 or CH 118

MTE591 Special Problems  
Hours 1-4  
Advanced work of an investigative nature. Credit awarded is based on the work accomplished.

MTE592 Special Problems  
Hours 1-3  
Advanced work of an investigative nature. Credit awarded is based on the work accomplished.

MTE595 Seminar Senior Thesis  
Hours 1  
Discussion of current advances and research in metallurgical engineering; presented by graduate students and the staff.

MTE596 Seminar  
Hours 1  
Discussion of current advances and research in metallurgical engineering; presented by graduate students and the staff.

MTE599 Thesis Research  
Hours 1-12  
No description available

MTE643 Magnetic Materials and Magnetic Recording  
Hours 3  
This course provides knowledge on basic magnetism and magnetic materials of various types, and also introduces the applications. Origin of magnetism, ferro-magnetism, anti-ferro-magnetism, ferrimagnetism, hard- and soft-magnetic materials, spintronics, magnetic recording, magnetic random access memory (MRAM), spin-transfer-torque MRAM, spin transistor and Optical recording.  
Prerequisite(s): MTE 271 and permission of instructor.

MTE655 Electron Microscopy Matl  
Hours 4  
Topics include basic principles of operation of the transmission electron microscope, principles of electron diffraction, image interpretation, and various analytical electron-microscopy techniques as they apply to crystalline materials.

MTE670 Scanning Electron Microscopy  
Hours 3  
Theory, construction, and operation of the scanning electron microscope. Both imaging and x-ray spectroscopy are covered. Emphasis is placed on application and uses in metallurgical engineering and materials-related fields.

MTE680 Advanced Phase Diagrams  
Hours 3  
Advanced phase studies of binary, ternary, and more complex systems; experimental methods of construction and interpretation.

MTE684 Fund Solid State Engineering  
Hours 3  
Fundamentals of solid state physics and quantum mechanics are covered to explain the physical principles underlying the design and operation of semiconductor devices. The second part covers applications to semiconductor microdevices and nanodevices such as diodes, transistors, lasers, and photodetectors incorporating quantum structures.  
Prerequisite(s): MTE 271 or ECE 332

MTE687 Microstructure Evolution of Materials  
Hours 3  
The course will cover the fundamentals and state-of-the-art techniques used in mathematical modeling and computer simulation of microstructure formation and control during the solidification and solid state transformations of materials. The concepts and methodologies covered in this course for net-shape casting and ingot remelt processes can be applied, with some modifications, to model other materials processes such as welding, deposition, and heat treatment processes. Modeling and simulation of microstructure evolution requires complex multi-scale computational areas, from computational fluid dynamics macroscopic modeling through mesoscopic to microscopic modeling, as well as strategies to link various length-scales emerged in modeling of microstructural evolution.

MTE691 Special Problems  
Hours 1-3  
Credit awarded is based on the amount of work undertaken.

MTE695 Seminar  
Hours 1  
Presentations on dissertation-related research or on items of current interest in materials and metallurgical engineering.
Doctor of Philosophy Degree

The Doctor of Philosophy degree is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and capacity for independent, original investigation. The first two criteria are tested in coursework and a comprehensive examination, the last in a dissertation in which the student must present clearly and effectively the results of substantial research. A combination of these accomplishments, rather than the mere accumulation of residence and course credits, is the essential consideration in awarding the PhD degree. The PhD differs from the EdD in a number of ways, including the fact that the PhD Plan of Study and comprehensive examination demonstrate a higher-level research focus, and there is a greater number of dissertation hours and higher level of complexity and independent thought in a PhD-level dissertation.

Field of specialization

A defined field of specialization is required of all candidates for the Doctor of Philosophy degree. A minimum of 48 semester hours of non-dissertation course credit is required. Candidates should consult their departments or the appropriate section of this Catalog for additional requirements. The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of 24 hours of dissertation research.

Research skill/language requirements

There is no universitywide foreign language/research skill requirement for doctoral students; each college or department offering the PhD degree may set its own requirements. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further information about PhD foreign language/research skill requirements, students may contact their departments or the Graduate School office 205-348-5921.

Interdisciplinary Studies

There is a PhD degree program in interdisciplinary studies, and it is administered by the Graduate School. In addition to the general requirements for the PhD degree, the program of study and the supervisory committee for the prospective interdisciplinary studies degree candidate must be approved by the dean of the Graduate School before the student is admitted to the program. See Interdisciplinary Studies (IDS) (p. 603) at the Graduate School's website for information on prerequisites, admission procedures, course of study, and other aspects of IDS programs.

Doctor of Education Degree

A minimum of two years of graduate study beyond the master's degree is required for the completion of the EdD program. The student is required to complete 60 semester hours in approved graduate courses beyond the master's degree, or 90 semester hours of approved graduate courses, and to defend a dissertation. The student must complete a minimum of 12 hours of dissertation research. In the College of Education (p. 380) section of the Graduate Catalog, there are specific regulations governing the EdD program.

Doctor of Musical Arts Degree

The DMA degree requires a minimum of 48 semester hours beyond the Master of Music degree, plus recitals and other examinations as determined by faculty of the School of Music. Specific requirements for
each major area are outlined in the School of Music (p. 206) section of the Graduate Catalog.

**Doctor of Nursing Practice**

The Doctor of Nursing Practice (DNP) (p. 574) is a joint program offered by the University of Alabama in Huntsville College of Nursing (UAHCON), the University of Alabama at Birmingham School of Nursing (UABSON), and The University of Alabama Capstone College of Nursing (UACCN).

The DNP is a practice-focused degree that is detailed in the Nursing section of this Catalog.

**Admission to Doctoral Degree Programs**

Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study. Admission to the Graduate School and the earning of a master's degree from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student's doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.

**Residency Requirements**

The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student's doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog's Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

**Graduate Credit**

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

**Graduate Credit for Noncredit Experiences**

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

**Transfer of Credit**

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School's criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. **All doctoral programs:** Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a "B" grade or better may be transferred. The student must have attained an overall graduate GPA of "B" or better on all graduate work attempted. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.

2. **PhD Programs Only:** A student holding an earned, in-field master's degree and working in the field or a related field since earning the degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a "B" overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. For departments participating in this program, the use of this option must be indicated on the Plan of Study.

To participate in Option 2, the Plan of Study must be submitted during the first semester of enrollment. If any coursework from the in-field or related-field master's degree was earned more than six years prior to the date of admission, the graduate program director or department head/chair must submit to the Graduate School for evaluation a Field-Related Employment Since Earning Master's Degree form with the student's CV and a PhD Plan of Study.

Consideration of transfer of credit or the acceptance of an earned master's degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the penultimate semester or the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department's graduate coordinator regarding your department's transfer policy.

Each department wanting its doctoral students to be able to choose Option 2 needs to "opt in" to this option by informing the graduate dean in writing that they wish to be among the approved departments.

**Time Limits**

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master's, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period (not seven years) prior to admission to the doctoral program or accepted by the Graduate School.
as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree. Revalidation (recertification) of any expired course credit is not an option.

**Time Limits Extension Request**

Only under compelling circumstances beyond the student’s control a student may petition for a one-semester extension to the seven-year time limit (or eight-year time limit for the selected programs noted above). The Graduate Council approved the following steps to request an extension:

- To begin the process, the student petitions the department head. In the petition the student
  a. describes the compelling circumstances,
  b. briefly describes the current status of the dissertation, then
  c. includes a timeline showing each important remaining step in the completion of the dissertation. The last step and date in the timeline are submission of the successfully defended dissertation on or before the published final date for submission of dissertations for the requested extension semester.

- If the department head supports the petition, it is forwarded to the college dean.

- If the college dean supports the petition, it is sent to the graduate dean.

- If the graduate dean or his designee approves the extension, it will not require the student to validate any out-of-date UA or transfer courses previously approved for the plan of study.

- If a student fails to complete all degree requirements within the time limit for the student's doctoral program or within a one-semester extension approved as noted above, the student will be dropped (suspended) from the doctoral program. To complete a doctoral degree, the student would have to reapply for admission and be admitted by the department and Graduate School. Graduate Council policies do not provide the option for a student failing to complete within the time limit to revalidate (recertify) either UA or transfer courses completed more than six years prior to the date of admission. Thus, a readmitted student would be able to apply to the new admission only those courses approved by the department and Graduate School and completed within the six years (18 fall, spring, and summer semesters) prior to the new admission.

**Repeating Courses When Given an Extension**

When requests are made for extensions of the doctoral time limits, and it is deemed that an out-of-date course is integral to the degree program, the college dean may request permission of the Graduate School for such a course to be repeated. In this case, both grades are used in calculation of the GPA.

**Plan of Study**

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School. The PhD Plan of Study and DMA Plan of Study are available at the Graduate School website. The Plan of Study for other doctoral programs (EdD, DNP) are available from the student’s department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a “hold” may be placed on future registrations.

An amended Plan of Study (if needed) must be submitted to the Graduate School when the student submits the form for Admission to Candidacy for Doctoral Degree.

**Preliminary or Comprehensive Examination**

A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after

- any foreign language/research skill requirements are met (PhD students only);
- two full years of graduate study are completed; and
- the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student’s supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student’s research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

**Admission to Candidacy**

The requirements for advancing to candidacy include passing the qualifying (major or preliminary) examination; completion of all coursework as listed on the approved program of study; receiving departmental approval of the dissertation subject (although some departments require the defense of a dissertation proposal and/or writing one or more preliminary sections of the dissertation as well); and having the committee recommend the student for Admission to Candidacy for the Doctoral Degree. The completed candidacy form is submitted to the Graduate School well in advance of the final semester.

**Continuous Dissertation or Document Registration**

Once a student has met the requirements for admission to candidacy, received approval for the dissertation research proposal, or initiated enrollment in 699 (dissertation research for a doctoral degree), the student must pursue completion of the dissertation without interruption by enrolling each fall and spring semester of the academic year for at least 3 hours of dissertation research. Summer enrollment for 699 Dissertation Research is expected if the student is working on the dissertation and using any University facilities or resources, including faculty time, but the only time summer registration is required for dissertation research (3 hours minimum) is when a doctoral student is graduating in August or defending the dissertation during the summer semester. This is true whether or not the student has formally submitted an Application for Admission to Candidacy.

Each PhD student must have completed a minimum of 24 hours of such dissertation work upon completion of the degree. The amount of dissertation research for which a student enrolls in any given semester should be commensurate with the progress a student is expected to make on the dissertation, as well as reflective of the extent to which University facilities and faculty time are invested in the proposed activities.

**Dissertation Proposal**

The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The student...
formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction giving an overview and stating the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal’s format with respect to such things as the length of the introduction and detail of the review of the literature.

Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

Dissertation

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. Early in the process, the subject of the dissertation must be approved by the dissertation committee of the major department or division and by the dean of the Graduate School.

A dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. The committee shall have not fewer than five members, all of whom are appointed by the dean of the Graduate School. The graduate dean’s approval of the proposed dissertation committee is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the form for Appointment/Change of a Doctoral Dissertation Committee.

All members of a dissertation committee must be members of the UA Graduate Faculty. The committee chair must be a full member of the Graduate Faculty, as described in the Catalog’s section on Qualifications of the Graduate Faculty (p. 34). One member must be from outside the student’s major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student’s dissertation committee.

The final oral dissertation defense is the culminating experience in the doctoral program. As such, all members of the dissertation committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations. Graduate School deadlines, including each semester’s dissertation deadline, are available at the Graduate School’s homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research. If certain conditions are met for the student’s final semester, the student may qualify to enroll for fewer than 3 hours of 699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester. This exception applies only to students who registered for at least 3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below.

### Final-Semester Dissertation (699) Minimum Registration Hours

<table>
<thead>
<tr>
<th>When was the *completed electronic dissertation submitted to ProQuest/the Graduate School?</th>
<th>Minimum hours of 699 registration required in the final semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>By 4:45 p.m. on the last-possible day for instructors to post grades for the semester before the student's final semester (date published in the <em>University Academic Calendar)</em></td>
<td>0</td>
</tr>
<tr>
<td>After 4:45 p.m. on the last-possible day for instructors to post grades for the semester before the student’s final semester, but before 4:45 p.m. on the last-possible day to register or add a course for the student’s final semester (both dates published in the University Academic Calendar)</td>
<td>1</td>
</tr>
<tr>
<td>After 4:45 p.m. on the last-possible day to register or add a course for the student’s final semester (date published in the University Academic Calendar)</td>
<td>3</td>
</tr>
</tbody>
</table>

“Completed” means submitted at ProQuest after being successfully defended; being carefully edited following the defense meeting; and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. At the time of ProQuest submission, the student also must submit the Survey of Earned Doctorates through the NORC website.

1. International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see “USCIS” section under “Minimum Hours—Other Policies and Regulatory Bodies” on page 3 of this policy.

2. The University Calendar is available at the Academics tab of the website of the University Registrar.

### Article-Style Dissertations

This approach is intended for doctoral students whose dissertation will consist of a number of related manuscripts or articles that represent independent research or creative activity. It is an option available only to students in certain fields in which the faculty have received Graduate Council approval from the Graduate Council. A complete list of these fields is below:

- Accountancy
- Aerospace Engineering and Mechanics
- Applied Statistics
- Biological Sciences
- Chemical Engineering
- Chemistry

• Civil Engineering
• Computer Science
• Economics
• Education (all departments)
• Electrical and Computer Engineering
• Finance
• Geological Sciences
• Health Education and Promotion
• Management
• Management Science
• Marketing
• Mechanical Engineering
• Metallurgical and Materials Engineering
• Physics
• Psychology

Article-style dissertations must be based upon research completed while the student is enrolled at The University of Alabama. For each article used, the student must be the first author, or equivalent, as defined by the discipline.

As with traditional dissertations, the article-style dissertation must be the student's original idea. It must be a unified work and include a sequence of articles of publishable quality around a cohesive theme, with a comprehensive review of literature demonstrating an in-depth understanding of the unifying framework.

• In article-style dissertations there will be introductory material to describe the studies, show how they are related, and explain their significance;
• connecting language to bridge each study to the next; and
• a summary making clear the importance of the studies, integrating the major findings, and discussing the implications for the overall topic.

These components do not have to be separate sections or chapters. They may be parts of the manuscripts or may be accomplished in an abstract.

All parts of both traditional and article-style dissertations must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline's style manual require deviation. Students considering the article-style approach should contact the Graduate School before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the date of the required final oral examination.

Electronic submission of dissertations: August 15, 2009, is the date when electronic submission began to be required and paper submission no longer was accepted. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

Protection of Human Subjects for Research
Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. The University's IRB approval form is available at the IRB website.

Final Examinations
When the dissertation has been completed, the candidate will be given a final oral examination by a committee of not fewer than five members, one of whom must be from outside the student's major department or, for students in the College of Education, outside the student's area (not program), and appointed by the dean of the Graduate School. This examination will focus primarily on the candidate's research work, as embodied in the dissertation, and the field in which the dissertation lies, but it may encompass the complete program for the degree. The results of the examination must be reported to the Office of the Graduate School at least six weeks before the commencement at which the degree is to be conferred.

Application for Graduation
Each candidate for a doctoral degree must submit an Application for Degree via myBama not later than the last day to register or add a course of the semester or the first term of the summer session in which requirements for the degree are to be completed. That day is published for each semester at the website of the University Registrar.

Clearing the Academic Record for Commencement
At least one week before commencement, the candidate's record must have been cleared for graduation.

Attendance at Commencement
A candidate for a doctoral degree must be present at a scheduled commencement to receive the diploma and hood, unless excused by the graduate dean.

Withholding or Withdrawing an Advanced Degree
The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.

Metallurgical Engineering, MS
Admission Requirements
Admission requirements are outlined in the Admission Criteria section of this catalog.

See the Admission Criteria section of this catalog for more information.

Degree Requirements
Plan I (thesis) is the standard MS degree plan. However, in exceptional cases, a student who has the approval of his or her supervisory committee may follow Plan II (non-thesis). A student who believes there are valid reasons for using Plan II must submit a written request detailing these reasons to the department head. No later than mid-term of the first semester in residence.

All graduate students, during the first part and the last part of their programs, are required to satisfactorily complete MTE 595 Seminar Senior Thesis (first part) and MTE 596 Seminar (last part). This required credit is in addition to the other degree requirements. Additional information is in the Degree Requirements section of this catalog.
Master's Degrees

The primary purpose of master’s degree programs is to provide students with subject matter at an advanced level in their fields of study. Master’s degrees are designed to assist students either to continue their graduate studies or to meet the goals of their professions. In most cases, master’s programs also help students become familiar with methods of independent investigation.

Program Requirements

Two plans are offered for the master’s degree:

Plan I. Candidates for the master’s degree under Plan I must earn a minimum of 24 semester hours of credit in coursework plus earn a minimum of 6 additional hours of thesis research hours, for a total of 30 hours.

Plan II. Candidates for the master’s degree under Plan II must earn a minimum of 30 semester hours of coursework credit and pass the comprehensive examination or complete a culminating or “capstone experience” as described under the Comprehensive Examinations section below.

Both plans require a minimum of 18 semester hours in the major subject. With the approval of the major department, the remainder of the coursework may be completed in either the major or a related field.

In some divisions and in many departments of the University, candidates are required to do their work under Plan I. Candidates working under Plan II may be required to participate successfully in seminar or problem courses that will give them an acquaintance with the methods of research and an appreciation of the place and function of original investigation in the field.

Residency Requirements

A student’s program at the master’s level must provide sufficient association with the resident faculty to permit individual evaluation of the student’s capabilities and achievements.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Courses of full graduate-level credit earned in a regionally accredited institution where a student was enrolled in the graduate school may be submitted for review for inclusion in a master’s degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student’s advisory committee and the dean of the Graduate School. Credit will not be accepted for transfer from any institution at which the student failed to achieve a “B” average on all graduate work attempted. Only courses in which a student earned a “B” grade or better may be transferred.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

A student initiates at the Graduate School’s website a Request for Transfer of Graduate Credit earned at another institution. It is also the student’s responsibility to assure that the Graduate School receives an official transcript of the credit requested for transfer, well in advance of the final semester.

With the approval of the student’s department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master’s degree may be transferred from another institution. All credit toward the master’s degree, including transfer credit, must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the master’s degree is to be awarded. Revalidation (recertification) of graduate credits that will be more than 18 semesters old at the time of UA master’s program completion is not an option.

Please note that some departments allow fewer than 12 hours of graduate transfer credit. Be sure to check with your department’s graduate coordinator regarding your department’s transfer policy.

400-Level Courses

A maximum of 6 semester hours of 400-level course credit may be accepted for a master’s degree program, but only if a form for Approval of 400-Level Course Work for Master’s Credit is approved by the Graduate School prior to the semester in which the 400-level coursework will be taken.

Time Limit

All requirements for the master’s degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. There is no provision for an extension of the time limit beyond six years for master’s students.

Admission to Candidacy

During the 2013-2014 academic year, the Graduate Council eliminated the master’s candidacy requirement. Departments may monitor master’s candidacy if they wish, but the Graduate School does not monitor it and will not accept master’s candidacy forms. Doctoral candidacy is not affected and remains an important doctoral program requirement.

Thesis

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master’s degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student’s major department or division.

The final oral thesis defense is the culminating experience in the master’s program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

Article Style vs. Journal Format

Article Style.

At the doctoral level, “article-style dissertations” are unified works that include several distinct but related studies of research or creative activity,
each of which is of publishable quality. The University does not permit an “article-style thesis” to be presented for a master's degree.

Journal Format.

A “journal-format thesis” is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal’s “information for authors” or similarly titled guidelines in conjunction with the Graduate School’s Student Guide to Preparing Electronic Theses and Dissertations.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. A form for Appointment or Change of Master’s Thesis Committee is used to request that the graduate dean appoint a thesis committee. The request normally is made as soon as the successful defense of the thesis proposal has been completed. All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student’s major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student’s thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. A final oral examination is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral examination unless there are extraordinary circumstances warranting the graduate dean’s approval of the absence prior to the defense meeting.

As of August 15, 2009, all theses are submitted electronically rather than on paper. See the Graduate School’s homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School’s website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student’s major department.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University’s Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research. In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

Comprehensive Examinations

In addition to the regular course examinations, a final comprehensive examination representing a “culminating” or “capstone” experience for a degree is required of all candidates for the master's degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a "policy and practice" paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School. The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. A final report, on the Master's/EdS Examination Form is on the Graduate School website. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Application for Graduation

Each candidate for a master's degree must apply for graduation through myBama no later than the registration period for the semester or the first session of the summer term in which requirements for the degree are to be completed.

Second Master's Degree

Six (6) semester hours of eligible credit from one master's degree at The University of Alabama may be applied to the requirements for a second master's degree, but only if the department of the second master's agrees to the courses in the plan of study. Any hours from the previous master's degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. ***Please note that if a student double counts six hours between two master's degrees, no hours may double count toward any additional master's degrees.

College of Human Environmental Sciences

Department of Clothing, Textiles, and Interior Design (p. 542)
Department of Consumer Sciences (p. 543)
General Degree Requirements

The following is a brief summary of requirements; students should confer with their department heads for additional information. A program plan for completing course requirements for the master’s degree must be approved by the student’s major advisor and committee and filed in the office of the dean of the College of Human Environmental Sciences no later than the beginning of the second semester of graduate study. Program plans are based on undergraduate preparation, previous experiences, and expressed objectives for graduate study. Students pursuing the Master of Science in Human Environmental Sciences can specialize in one of the following areas: clothing, textile, and interior design; consumer sciences; human nutrition; human development and family studies; and general studies in human environmental sciences. Students may complete degree requirements following Plan I (thesis) or Plan II (nonthesis).

Plan I (thesis)

All Plan I students must earn a minimum of 24 semester hours of credit, including HES 509 Research Methods, one course in statistics, and 18 hours in courses in the area of specialization and in areas supporting the specialization. In addition, all Plan I students must complete at least six semester hours of thesis research and write a thesis. The format of the thesis may vary, depending on the advice and consent of the thesis committee. A final oral examination is required upon completion of the thesis, and a manuscript of publishable quality based on the thesis research is expected of each Plan I degree candidate.

Plan II (nonthesis)

Students pursuing the Master of Science in Human Environmental Sciences degree under Plan II complete 30 hours of coursework, including HES 509, and a final evaluation as determined by departmental guidelines.

Information on all other degree requirements is in the Degree Requirements (p. 20) section of this catalog.

Repeating Courses in Selected Programs

Students majoring in Human Nutrition, Consumer Sciences, or Human Development and Family Studies are permitted to repeat a course in which a grade of “C” was earned. The option to repeat a course is not available to HES students in any program other than these three. Both grades earned will be recorded on the transcript and will be included in the computation of the GPA. Only one attempt will count in the Plan of Study, and the second attempt will not reduce the minimum number of hours required for the degree.

The Graduate Council approved the above policy as a waiver to the usual policy on not being able to repeat a course in which a “C” was earned. The policy’s effective date was September 25, 2007.

Admission Requirements

The Master of Science degree offered through the College of Human Environmental Sciences reflects a diverse range of missions and objectives. Enrollment in all specializations is limited and competitive. Admissions are supervised by committees of the graduate faculty in each of the specializations. General application and admission requirements are outlined in the Admission Criteria and Application (p. 17) sections of this catalog. Students with deficiencies in undergraduate preparation may be required to complete designated undergraduate requirements before admission to the program.

See the Admission Criteria section of this catalog for more information.

HESS508 Intro Research Interact Technl

Hours 3

This course is an introductory course designed to familiarize students with methods of research appropriate for conducting research either using web-based technology or addressing issues around technology. Qualitative and quantitative approaches will be discussed.

HESS509 Research Methods

Hours 3

This course is an introduction to scientific methods appropriate for human sciences. It is designed to acquaint students with types of research, methods, and materials necessary for scientific inquiry and to provide students with practical steps to conduct and understand scientific research. Emphasis will be placed on quantitative, qualitative, and mixed methods designs appropriate for research in human sciences.

HESS525 Workforce Development

Hours 3

This course is included in the Masters in Human Environment Science curriculum in order to give participants an additional mechanism for studying quality, health and safety, or conflict management and leadership methods, and thinking about how they can be applied through the process of teaching these methods to a workforce.

Prerequisite(s): HES 506, HES 507, & HES 508

HESS551 Seminar: Sport Facilities and Event Management

Hours 3

This course is designed for sport professionals desiring to increase their knowledge and understanding of Sport Facilities and Event Management.

Prerequisite(s): Graduate student in Human Environmental Sciences

HESS552 Trends And Issues in Sports Business Management

Hours 3

In-depth analysis for sport professionals to study and review management and leadership strategies in various sport organizations.

Prerequisite(s): Graduate student in Human Environmental Sciences.

HESS554 Management and Administration in Sports Business Management

Hours 3

This course is designed for sport professionals desiring to increase their knowledge and understanding of management and administration issues in the sport industry.

Prerequisite(s): Graduate student in Human Environmental Sciences

HESS559 International Strategies in Sports Business Management

Hours 3

This course is designed for sport professionals desiring to increase their knowledge and understanding of management and administration issues in the sport industry.

Prerequisite(s): Graduate student in Human Environmental Sciences
**HES560 Sports Business Management**  
Hours 3  
This course is designed for student/prospective sport industry professional desiring to increase their knowledge and understanding of current issues in sports business management and the sport industry.  
Prerequisite(s): Admission to the Sports Business Management Program or prior approval from the program director.

**HES561 Marketing, Sales, and Public Relation in Sports Business Management**  
Hours 3  
This course is designed for sport professionals desiring to increase their knowledge & understanding of marketing, sales and public relations issues in the sport industry.  
Prerequisite(s): Graduate student in Human Environmental Sciences

**HES563 Finance and Accounting in Sports Business Management**  
Hours 3  
This graduate course is designed for sport professionals desiring to increase their knowledge and understanding of financial and accounting issues in the sport industry.  
Prerequisite(s): Graduate student in Human Environmental Sciences

**HES565 Legal and Ethical Issues in Sports Business Management**  
Hours 3  
This course is designed for student/prospective sport industry professional desiring to increase their knowledge and understanding of current legal and ethical issues in sports business management and the sport industry. This class (HES 565) uses Blended (Hybrid) Delivery Methods of readings, classroom presentations and online and residential exams to present critical topics.  
Prerequisite(s): Graduate student in Human Environmental Sciences

**HES570 Fellowship in Sports Business Management**  
Hours 3  
Under the supervision of an approved and qualified sports business management professional, the graduate student will experience activities related to job specific tasks in sports business management. This full-time work experience/fellowship in the sport industry must take place in a professional organization, in which the student has been selected and offered a fellowship.  
Prerequisite(s): Graduate student in Human Environmental Sciences

**HES590 Sp Prob Human Envir Std**  
Hours 3-6  
This course is for students who desire to investigate a topic in Conflict Mediation, Management, and Negotiation (CMMN) or to complete the Capstone project.

**HES591 Special Problems in Human Sciences**  
Hours 3  
This course is open to qualified graduate students who will study special problems in human sciences.

**HES592 Special Problems in Sports Business Management**  
Hours 3  
Under the supervision of an approved and qualified sport management professional, the graduate student will experience activities related to job specific tasks in sport management. This full-time work experience/fellowship in the sport industry must take place in a professional organization, in which the student has been selected and offered a fellowship.  
Prerequisite(s): Graduate student in Human Environmental Sciences

**HES598 Non-Thesis Research**  
Hours 1-6  
Development of a professional paper on a topic selected by the student and approved by the graduate committee.  
Prerequisite(s) with concurrency: CSM 562 and HES 509 and CSM 564 and CSM 572

**HES595 Special Topics In Hes**  
Hours 3  
Critical analysis of current issues in selected areas of human environmental sciences. May be taken up to a total of four times.

**Faculty**

**Dean**

**Department of Clothing, Textiles, and Interior Design**

The General Studies Human Environmental Sciences (MS) (p. 566) focused area of study in clothing, textiles, and interior design provides preparation for careers in higher education, business and industry, and government services, and for admission to doctoral programs in clothing, textiles, interior design, and related fields.

CTD546 Cult Dynam Apparel Text  
Hours 3  
Examination of the impact of cultural dynamics on apparel and textile production and marketing.

CTD548 History Of Costumes  
Hours 3  
Study of costume development from prehistoric to modern times; includes cultural forces in relation to the evolution of costume.
CTD549 Social Psychological Aspects of Clothing
Hours 3
Application of behavioral science theories to clothing.

CTD561 Quality Control for Textiles
Hours 3
Quality Assurance for Textiles offers the opportunity for graduate fashion retailing and apparel design students to develop a deeper and broader understanding of textile materials. Offered during the fall semester only, the class meets with the lectures and labs of CTD 461.
Prerequisite(s): CTD 261

CTD581 Practicum Cloth & Text
Hours 1-3
Supervised experience in a business related to the major field of study.

CTD590 Spec Prob Clothing
Hours 1-4
Independent investigation of selected topics in clothing.

CTD591 Spec Prob Interior Design
Hours 1-4
Independent investigation of selected topics in interior design.

CTD592 Spec Prob In Textiles
Hours 1-4
Independent investigation of selected topics in textiles.

CTD593 Readings Cloth Textiles
Hours 3
Comprehensive review and critical evaluation of the literature in clothing and textiles.

CTD594 Readings Interior Design
Hours 1-4
Comprehensive review and critical evaluation of the literature in interior design.

CTD595 Ctd Research I
Hours 3
Discussions emphasizing contemporary issues, trends, relevant research, professional problems, and interests of students.

CTD596 Research II Clothing & Textile
Hours 3
Survey and evaluation of current research in clothing and textiles.

CTD599 Thesis Research
Hours 1-6

Department of Consumer Sciences

Consumer Sciences, MS (p. 547)
Consumer Conflict Management Certificate (p. 547)

CSM500 Personal Insurance Plan & Mgt
Hours 3
Survey of the myriad of personal risks facing consumers and families throughout the life cycle. An emphasis is placed on the fundamentals of risk management. Includes a comprehensive study of insurance products.
Prerequisite(s): CSM 204

CSM501 Consumer Protection
Hours 3
Study of laws and agencies affecting the consumer’s well-being, sources of consumer information, and discussion of current consumer issues.

CSM502 Readings in Consumer Sciences
Hours 3
To create an awareness of foundational research and current developments within the field of consumer economics among graduate students.

CSM504 Personal Investment Plan & Mgt
Hours 3
Focus on personal investing in marketable securities. Covers the basics of investing, including detailed definitions of investment terms, descriptive materials on how securities are purchased and sold, theoretical models of security valuation and practical examples of how to calculate growth rates.
Prerequisite(s): CSM 204
CSM505 Public Policy
Hours 3
A detailed analysis of U.S. public policy, recognizing the broader social and economic impacts of selected policies. Students will develop a better understanding of how and why specific policies are implemented and assess the strengths and weaknesses of different policy structures.

CSM506 Consumer Mgt Quality Assurance
Hours 3
Provides in-depth coverage of the primary theories and methods necessary for quality assurance in a wide range of organizational settings.

CSM507 Consumr Qual Mgt Facilitn Skil
Hours 3
Provides a comprehensive study of facilitation skills necessary to lead an organization in continuous improvement.

CSM508 Consumer Quality Mgt Systems
Hours 3
Provides an in-depth analysis of management systems as a method of organizing and leading business, educational, and health care institutions. Covers the primary issues related to management systems.

CSM510 Pers Retire Plan Empl Benefits
Hours 3
Fundamentals of personal retirement planning and the selection of employee benefits.
Prerequisite(s): CSM 204

CSM511 Analysis in Quality Control
Hours 3
This course introduces quantitative tools and concepts that are useful for process analysis and quality control. Conceptual understanding and data analysis using software is required and emphasized throughout the course. Topics include: Statistical and graphical data summaries, inferences about process quality, control charts for measurement and attribute data, process capability analysis, monitoring tools, experimental design, Taguchi methodology, and acceptance sampling.

CSM512 Personal Investment Planning & Management II
Hours 3
This course expands upon the content of CSM 404/504, adding a number of new concepts that are relevant to understanding the management of investments for family and individual goal attainment. Lectures, readings, case studies, and problem sets are designed to help students in preparing for the Investment Planning section of the Certified Financial PlannerTM examination.
Prerequisite(s): CSM 504

CSM513 Customer Service Management
Hours 3
Course provides an in-depth study of the functions and structures of customer relations as it relates to business and government agencies. Course analyzes consumer needs, complaints, and education.

CSM514 Personal Estate Planning
Hours 3
Techniques of personal estate planning within the family life cycle.
Prerequisite(s): CSM 204

CSM515 Consumer Communications
Hours 3
Principles, methods, techniques, and resources used in developing, presenting, and evaluating a complete consumer communications programs.

CSM516 Addiction and Dysfunction in Money Management
Hours 3
CSM 424/524 is an exploration of addictions and dysfunctions related to managing money and finances and a brief guide for changing dysfunctional behavior related to money. The course does not provide training in diagnosing, but rather emphasizes describing behavior.

CSM517 Conflict Resolution for the Workplace
Hours 3
This course provides skill building and practical methods for handling organizational and personal conflicts. Appropriate for the student who has received no formal preparation in managing conflict, and also for the professional who is educated in conflict theory and negotiation strategy, but needs grounding in basic interpersonal communication and management skills, such as rapport building, empathic listening, behavior modeling, reframing, problem solving, and decision making.

CSM518 Emotional Intelligence: The Personal Qualities of the Negotiator
Hours 3
This course teaches students to accurately identify and express emotions, and to develop and improve the emotional intelligence skills essential to managing conflict successfully. Students are directed through a series of self-evaluations to determine their current skill levels, learn the characteristics of specific skills, and apply and model the new learning. Students learn to break the habit of emotional reactivity and to model emotional proactiveness.

CSM519 Processes of Negotiation
Hours 3
This course deepens students' understanding of negotiation skills that can be used across a variety of settings. Students explore best practices in negotiation and learn to identify and apply optimal strategies. The dynamics of negotiating across diverse cultures and contexts are also examined.

CSM520 Family & Consumer Law for Non-Lawyers
Hours 3
The study of family law for non-lawyers. Topics include marriage, divorce, custody, child support, alimony and property division, and the role of alternative dispute resolution in the family law setting, including mediation, private judges, and collaborative practice. Students will acquire a general understanding of legal terms, resources, and the legal system and its adversarial proceedings.

CSM521 Psychology Of Money
Hours 3
Innovative study of financial behaviors and their relationship to money management with emphasis placed on both theory and its application.

CSM522 Developing The Leader Within
Hours 3
An in-depth look at leadership principles, qualities, styles, and models with a focus on developing leadership skills and potential within the individual students. Designed to assist students in identifying opportunities for improvement.
CSM547 Digital Resources
Hours 3
Online class providing students with technological skills to live and work in a digital environment. Asynchronous class trains students in the use of computers, Internet, Web 2.0, mobile devices and other digital tools. Aids graduate students in any major with skills to enhance their career paths.

CSM549 Professional Social Networking
Hours 3
The course content is focused on current genre of communication tools identified as ‘social media’. Content includes an overview of the origins of the current social media tools, definitions and terminology, and case studies of current uses of social media in specific settings. The social media tools selected are examined as discrete units and as components of larger initiatives within organizations. Connections of these tools to the functions of various organizations and individual professional initiatives are explored; the applications presented are those within large organizations, smaller groups and individual, professional offices. Popular press items on these tools as well as research foundations are included as background for the selection and use of social media. Case studies from a range of disciplines will be used as primary instructional tools. The precise suite of tools is revised each term.
Prerequisite(s): Good standing in The Graduate School and/or permission of instructor.

CSM550 Consumer Economics
Hours 3
Examination of the role of the consumer in the economy; economic analysis of market and non-market consumption activities, incorporating relevant social, psychological, political, and ecological considerations.

CSM551 Consumer Demographics
Hours 3
This course will focus on developing students’ ability to understand consumer demographics and impacts from these demographic changes. The course will cover basic concepts and measurement issues of demography as it relates to consumer and families. This class will also develop student’s ability to adapt to changing trends in a dynamic world. Writing proficiency is required for a passing grade in this course.
Prerequisite(s): N/A
Prerequisite(s) with concurrency: N/A

CSM554 Personal Income Tax Mgt Plang
Hours 3
Analysis of personal income tax management and planning as it relates to consumers and families throughout the life cycle.
Prerequisite(s): CSM 204

CSM555 Consumer Analytics Methods
Hours 3
This course introduces research methods with an emphasis on non-experimental research designs. Examples and exercises are drawn from real-world research applications that inform consumer behavior and policy. Students learn how to execute the methodologies using software used by consumer analysts in consumer research settings. Topics include: research design, sampling, data management, descriptive statistics, data visualization, statistical inference, simple linear regression, and multivariate regression.

CSM558 Spreadsheets in Fin. Decisions
Hours 3
Focus is on developing a working knowledge of Microsoft Excel as it may be used to analyze problems related to personal financial planning with an emphasis on life-cycle planning and computer literacy.
Prerequisite(s): CSM 204 or RHM 474 or AC 210

CSM559 Tech of Counsl in Cons Science
Hours 3
Introduces students to basic interactional interviewing skills and strategies. Course is beneficial to those entering the fields of financial planning, business, management, sales or any commercial activity that involves interpersonal communication. Students who plan to supervise and manage others would benefit by expanding theory with practical application. Students with career goals involved counseling families, couples and individuals regarding life decisions will benefit from this course.
Prerequisite(s): CSM 204

CSM560 Finan Plan Case Study Capstone
Hours 3
A systems approach to financial management for individuals and families from the perspective of planner/counselor. Focuses on analytical techniques. Emphasizes identification and development of strategies for meeting client goals.
Prerequisite(s): CSM 558

CSM561 Managing in a High Performance Organization
Hours 3
This course will provide an interactive exploration of management skills that enable an individual to effectively communicate, build and lead teams, delegate, make presentations and manage priorities to achieve success.

CSM562 Cognition Strategy & Technology
Hours 3
This course lays some of the cornerstones of the program emphasis in interactive technology, guiding students in the development of their philosophy and understanding about the use of technology in teaching and learning as well as human interactions. Topics include synchronous vs. asynchronous learning, paradigm shifts in how people learn, and a review of the theory serving to underpin this topic.

CSM564 Digital Tools
Hours 3
This course was designed just for majors in the IT specialization in GHE. The focus of this course is the use of a broad range of digital tools, including the skills considered core skills required to function in the asynchronous environment of this online degree program. Building a collaborative environment (a course goal) requires this specific skill set. Computer-mediated communications applied to collaborative, web-based environments are emphasized.
CSM566 Multimedia Design Development
Hours 3
Reviews the basic schools of thought and major theorists in the field of electronic design and development. Advanced development tools in the context of actual design and development projects. Students will combine an understanding of the theory of design and development with advanced tools.
Prerequisite(s) with concurrency: CSM 564

CSM568 Emerging Technologies
Hours 3
New technologies will be introduced as emerging tools for personal productivity, training-education, and marketing customer service areas and examined in terms of policy, implement within organizations and applications within the various fields of the students. Ethics, privacy and security will also be addressed.

CSM570 Coor Delivry Info W/Digtl Tech
Hours 3
An ever-growing range of options are available for delivering information via digital technologies, including web-based tutorials, online courses, webinars, synchronous and asynchronous communication media, multimedia presentations, Web 2.0 technologies, and wireless handheld devices. The tools needed to coordinate these technologies will be addressed from the viewpoint of developer and content manager.
Prerequisite(s) with concurrency: CSM 564

CSM572 Needs Assessment Plan & Evaltn
Hours 3
Course outcomes include demonstrated understanding of program evaluation strategies based on a systems theory model for comprehensive planning, formative and summative evaluation. These evaluation activities focus on e-learning environments and applications in a wide-range of settings. Planning models are also introduced around which projects and action research can be structured.

CSM574 Technology Privacy & Security
Hours 3
This course is an introduction to some of the basic issues confronting technology users, especially those in today’s workplaces. It is designed for entrepreneurs, small business owners and managers, freelance consultants, and anyone who works with technology but in organizations which may or may not have IT departments. It is also appropriate for those working remotely at home or concerned about privacy and security in personal technology use. The topics include threats to computer and communication systems and privacy concepts; basic security defense techniques; web and network security issues; portable device security; operating systems security issues; email security; and security issues for home networks and smaller work environments such as privately-held companies and non-profit groups.

CSM575 Entrepreneurship In Hes
Hours 3
Sound advice and vital practical help on developing an idea into a business and the different aspects of managing a home-based or small business. Examines each segment of creating and managing a small business.

CSM576 Collaborative Tools for Project Management
Hours 3
This course is an introduction to the use of collaborative tools for project management. Many professionals use collaborative tools but this class emphasizes their use specifically for project management, as using collaborative tools for project management is emerging as a managerial skill set. In today’s global economy, the ability to work virtually is paramount, because organizations are increasingly distributed, with remote members and locations. Just knowing how to use virtual communication tools does not equate specifically to project management. Communication techniques in these organizations are no longer the same as they were when all members were located in the same building. Traditional managerial communication techniques do not apply to distributed teams, where in-person meetings may occur but are limited. Further, even employees who are geographically co-located need to communicate and plan using virtual means. Online collaboration tools provide opportunity for project success and will be covered, using examples and case studies from project management. Social media tools offer exciting opportunities to improve team communication, efficiency, and success and will be discussed. While online tools and strategies may be familiar to enrollees, this class focuses on the particular use of these for project management. Project management is significantly different from even usual business communications, something emphasized in the materials provided and the learning activities used in the class.

CSM580 E-Commerce@Ches
Hours 3
Sound advice and vital practical help on developing an idea into a business on the internet. Addresses the different aspects of designing a web site, internet marketing, the role of search engines, measuring the effectiveness or an internet strategy.

CSM581 Practicum
Hours 3
Supervised experience in a related business, industry, or social agency.

CSM582 Non-thesis Research
Hours 3
Course focuses on preparation and planning for the Capstone Project, including examination and analysis of collateral research studies. Students will prepare articles for submission to a referred journal or presentation at a professional conference or online module.
Prerequisite(s) with concurrency: CSM 564

CSM583 Spec Prob in Inter Tech
Hours 3-6
This is the Capstone Project Plan II (for the IT specialization), featuring exploration of a special problem in an area of graduate study.
Prerequisite(s): CSM 564

CSM586 Principled Negotiation
Hours 3
An in-depth study of principled, interest-based negotiation, which replaces adversarial approaches with problem-solving. Students formulate a personal strategy of thoughtful introspection with the goal of satisfying interests on all sides of a conflict and strengthening relationships among conflict partners.
CSM590 Spec Prob Consmr Affairs
Hours 2-6
No description available

CSM591 Spec Prob Cons/Fam Econ
Hours 3
This course gives the graduate student the opportunity to work directly with a professor in the graduate program to explore a problem related to technology in Consumer Sciences.

CSM592 Prob Fam Fin Plan Couns
Hours 2-6
No description available

CSM593 Special Problems in Technology
Hours 3
This course is open to qualified graduate students who will study special problems in technology.

CSM599 Thesis Research
Hours 1-6
No description available

CSM650 Outcomes Research in Population Health
Hours 3
This course examines the methods utilized in the design, implementation, and evaluation of research studies implemented in a healthcare setting. In this course, you will explore various research designs that can be used to evaluate studies with outcomes at the individual and organizational level. Both naturalistic (or observational) and experimental designed will be covered throughout the course. Various analytic approaches that are appropriate to examine the design, implementation, and evaluation of studies in the medical setting will be applied. Furthermore, students will be expected to develop a research protocol that demonstrates the mastery of core competencies obtained throughout the semester.

Consumer Conflict Management Certificate

This 15-credit hour certificate program teaches ways to manage consumer, workplace, and personal conflict through the use of effective communication, emotional intelligence skills, and cooperative problem solving. From a foundation in conflict theory, students learn strategies to prevent, reduce, and resolve conflict with the goal of preserving, and in many cases improving, relationships. All 15 hours required for the certificate are offered online and may be applied toward a 30-hour Master of Science in Consumer Sciences or General Human Environmental Sciences.

Prospective certificate students are admitted by The University of Alabama Graduate School and must meet all Graduate School admission policies and deadlines.

The required (3 credit hour) courses for the certificate are as follows:

Total Hours 15

Master's Degree Option

You may apply all 15 hours of coursework from the graduate certificate in Consumer Conflict Management toward the Master of Science degree in Human Environmental Sciences (General Studies). To complete the master course of study, you would need to take only 9 additional hours of coursework from the area of Consumer Conflict Mediation, Management, & Negotiation in addition to 3 hours of Research Methods and 3 hours of Practicum/Capstone Experience for a total of 30 hours.

Consumer Sciences, MS

The Master of Science in Consumer Sciences is a 30-credit-hour degree program that offers advanced study in two complementary concentration areas.

Consumer Economics Concentration

The Consumer Economics concentration offers an applied microeconomics approach to understanding consumers in home and market environments. This concentration prepares students to continue study in a doctoral program or employment in a research-oriented setting investigating consumer decision-making, personal finance, and related family and consumer policy. This research-oriented concentration requires the successful completion of a thesis.
Family Financial Planning and Counseling Concentration

The Family Financial Planning and Counseling concentration focuses on the knowledge and skills necessary for a career in financial planning and related careers. The curriculum fulfills the educational requirements to sit for the CFP® certification exam that leads to the CERTIFIED FINANCIAL PLANNER™ certification registered with the Certified Financial Planner Board of Standards, Inc. Students who successfully complete the concentration may sit for the CFP® certification exam that leads to the CERTIFIED FINANCIAL PLANNER™ certification. The concentration also fulfills the educational requirements to sit for the Accredited Financial Counselor® exam offered by the Association for Financial Counseling and Planning Education®. Successful completion of a capstone project, practicum, or portfolio is required.

Concentration Requirements

21 Hours

Students graduating from this program must complete a culminating experience. Students in Consumer Economics complete a thesis (6 credit hours) and a comprehensive exam. Students in Family Financial Planning and Counseling may choose from a capstone project (0-3 credit hours), a practicum (0-3 credit hours), or a comprehensive exam. Students’ plans are approved and supervised by their graduate committee and/or program director.

Electives in area of specialization of which 3 hours may be a practicum

Total Hours 21

Department of Health Science

- Health Studies (MA) (p. 556)
- Health Education & Promotion (MPH) (p. 550)
- Health Education & Promotion (PhD) (p. 551)

[object Object]
HHE506 Tech Research In Health
Hours 3
Designed to acquaint the student with the types of research and the methods and materials necessary for scientific inquiry; includes development of a research proposal, with emphasis on form and style.

HHE512 Advanced Foundations of Public Health
Hours 3
This course provides foundational knowledge in the profession and science of public health. Course content also addresses factors related to human health, examines public health and health care systems, and explores emerging research and application areas in the field.

HHE515 Advanced Foundations of Health Promotion
Hours 3
Open to graduate students in all divisions of the University. Designed to provide understanding pertaining to advances in the health sciences.

HHE520 Theories of Health Behavior
Hours 3
Designed to review research literature regarding health behavior and to analyze various models developed to explain health behavior.
Prerequisite(s): HHE 515
Prerequisite(s) with concurrency: HHE 515

HHE521 Basic Epidemiology
Hours 3
A course for students in health-related fields. The basic epidemiologic approach is developed; principles and methods are learned through readings (text and published studies), lectures, discussions, and the preparation of a research design by each student.

HHE526 Biostatistics
Hours 3
A course in statistical methods and concepts particularly appropriate for biomedical research and health-related subjects. Topics include descriptive statistics, probability, parametric and nonparametric procedures for one-group and two-group problems, contingency tables, and computer applications.

HHE530 Health Promotion Techniques
Hours 3
Study of current health promotional techniques and programs, designed to facilitate health behavioral change. Emphasis on review of scientific literature concerning the development, implementation, and evaluation of health promotion schemes.
Prerequisite(s): HHE 515
Prerequisite(s) with concurrency: HHE 515 and HHE 565 and HHE 520

HHE542 Pract Issues Behavrl Medicine
Hours 3
Lectures and readings examine behaviors compromising overall health status, such as tobacco use, noncompliance; and behavioral aspects of medical conditions, such as heart disease, cancer, pain. Topics include bioethics, racial/ethnic disparities, and rural mental health. ONLY Rural Medical Scholars may register.

HHE565 Planning Health Promotion Programs
Hours 3
Study of planning and evaluation methods and procedures for health education and promotion programs; emphasis on review of current scientific literature.
Prerequisite(s): HHE 515 Advanced In Health Promotion HHE 520 Health Behavior HHE 530 Health Promotion Techniq
Prerequisite(s) with concurrency: HHE 506 and HHE 566

HHE566 Program Evaluation in Health Promotion
Hours 3
Process, impact and outcome evaluation methods used to effectively evaluate health education/health promotion programs in the community, medical care, school and work site are reviewed.
Prerequisite(s): HHE 515 HHE 520 HHE 530
Prerequisite(s) with concurrency: HHE 506 and HHE 565

HHE584 Worksite Health Promotion Programs
Hours 3
Workplace health promotion program design, implementation, and evaluation that is grounded in health theory, evidence-based, and promotes health equity while addressing health care cost concerns.

HHE585 Internet Project
Hours 3
Provides for teaching laboratory, internship, and/or practicum experiences for students, according to individual needs and goals.

HHE586 Environmental Health Promotion
Hours 3
This course provides a careful study of the physical and human environment and its influence on health and disease. The course also examines implications for environmental health promotion.

HHE587 Health Disparities
Hours 3
The purpose of this project is to examine a case study detailing a unique cultural view/experience of the American health system. It also serves to provide health education and promotion strategies to engage diverse populations in interventions.

HHE588 Sexuality Education: Theory and Practice
Hours 3
Sexuality Education: Theory and Practice deals with contemporary issues in sexuality education in all settings. Issues include how sexuality education should be handled by parents, teachers, and community leaders; controversies surrounding sexuality education; pros and cons of various forms of sexuality education; and, the importance of understanding your own sexuality.

HHE589 Women and Health
Hours 3
The purpose of this course is to emphasize the importance of understanding women's experiences and life circumstances when planning, implementing and evaluating health programs or interventions.
HHE590 Cert Hlth Ed Specialist Study  
Hours 3  
Course is designed to help students develop and/or refine skills related to the planning, implementation, and evaluation of health education programs in various settings. Completion of the course is also intended to prepare students for the Certified Health Education Specialist examination.

HHE595 Workshop In Health  
Hours 3  
Advanced study of special topics in health education and health promotion.

HHE596 Independent Study  
Hours 1-6  
Designed to provide the opportunity for independent research in any area of health education.

HHE597 Clin Health Prom  
Hours 3  
Integration and application of the principles of health education and health promotion in the patient care setting.

Prerequisite(s): HHE 515 and HHE 520 and HHE 530 and and HHE 566 and HHE 565  
Prerequisite(s) with concurrency: HHE 566  

HHE598 Non-Thesis Research  
Hours 3  
Experimental or analytical investigation of health promotion problems.

HHE599 Thesis Research  
Hours 1-6  
Research study in a selected area of health promotion.

HHE602 Readings In Health  
Hours 3  
An independent readings course for doctoral students.

HHE603 Spec Projects In Healt  
Hours 3  
Experimental or analytical investigations of problems in health education. Arranged on an independent basis for doctoral students.

HHE604 Seminar In Health  
Hours 1-3  
Critical and emerging issues in health education and health promotion.

HHE605 Theor Sci Basis Hlth Edu  
Hours 3  
Examination of theoretical, scientific, historical, and philosophical issues that serve as a basis for health education and health promotion.

HHE606 Plan Admin Hlth Ed Prog  
Hours 3  
A comprehensive examination of models for planning health education and health promotion programs.

HHE607 Health Communictn Resrch  
Hours 3  
An examination of theoretical tenets and practical applications of health communication initiatives.

HHE667 Advanced Evaluation In Health Education and Health Promotion  
Hours 3  
This course provides an indepth analysis of evaluation and measurement techniques applied in health promotion and health education programs (HPE).

HHE685 Field & Lab Experience  
Hours 3-6  
Arranged on an independent basis for doctoral students. Participation and research in schools, communities, or work site settings.

HHE698 Research  
Hours 3  
Experimental or analytical investigation of problems in health.

HHE699 Dissertation Research  
Hours 1-12  
Design, research, and/or analytical investigation of a problem in the area of health to satisfy the dissertation requirement for the doctoral degree.

Health Education & Promotion, MPH  

The Department of Health Science offers a Master’s of Public Health (MPH) degree program in Health Education & Promotion. The program is offered both on campus and through a distance education format (online). The 42-credit-hour MPH program provides a high quality, student-oriented, and health-equity-focused curriculum developed to deliver core public health competencies that emphasize the application of health education and promotion. Designed for eventual Council on Education for Public Health (CEPH) accreditation, the curriculum offers education in the foundational areas of public health (health behavior, environmental health, epidemiology, biostatistics, and health services administration) and is tailored to train health promotion professionals to plan, implement, and evaluate programs to promote individual and population-based health. Upon program completion, students are eligible to take two national exams for professional certification: Certified Health
Education Specialist (CHES) exam and the Certified in Public Health (CPH) exam.

An applicant to the program should have a cumulative GPA of 3.0, or a GPA of 3.0 in the last 60 hours of coursework, or a GPA of 3.0 in a master’s degree program. The Graduate Record Examination or other standardized test is not required. Three letters of recommendation, a resume, and a statement of purpose should be submitted. Additional graduate school requirements may apply. Please see the Admission Criteria section of this catalog.

- HHE 588 Sex Ed: Theory & Practice
- HHE 589 Women and Health

Total Hours: 42

The M.P.H. program has only one additional required item for graduation: comprehensive examination or thesis.

**Comprehensive Examination --** After the completion of the required/core courses indicated in the previous table, students must successfully complete a comprehensive exam which would assess their mastery of the public health and health education & promotion competencies. Students are eligible to take the exam if they have attained a grade of “B” or higher in each of the required/core courses. The University requires that students be enrolled in at least one credit hour during the term the exam is taken.

**HHE 599 Thesis --** Students are not required to do a thesis; but they are exempt from taking the comprehensive exam if this option is taken. The thesis should demonstrate the student’s mastery of the public health and health education & promotion competencies. Students will be eligible to start a thesis if they have completed each required/core course and attained a grade of “B” or higher in each course. The University requires that students complete at least six credit hours of thesis research, which cannot be taken concurrently.

**Health Education & Promotion, Ph.D.**

The Doctor of Philosophy (Ph.D) degree is also offered, specializing in health education and health promotion. Candidates are mentored by faculty members and taught through courses that promote the development of skills in teaching, research, and health education promotion practice. For information, please contact the chair of the Department of Health Science, Box 870311, Tuscaloosa, AL 35487-0311.

Admission requirements specific to the program and in addition to those of the Graduate School, College and department include the following:

- A GPA of 3.0 overall (on a 4.0 scale), or in the last 60 hours in a bachelor-level program
- An acceptable GPA in a completed master’s degree program
- An acceptable score on the Graduate Record Examination
- A personal statement of applicable experiences, research interests, and career goals
- Three recommendation letters from faculty or other health professionals capable of judging the applicant’s ability to complete doctoral work

See the Admission Criteria section of this catalog for more information.

**Doctor of Philosophy**

Early in the graduate program, each student confers with a faculty adviser or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study is prepared and submitted to the Graduate School.

The PhD Plan of Study is available at the Graduate School website. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit for the doctoral degree; otherwise, a “hold” may be placed on future registration.

If later there are changes in the Plan of Study, the student simply submits an amended Plan to the Graduate School at the time that the form for Admission to Candidacy for Doctoral Degree is submitted. A department-approved Admission to Candidacy for the Doctoral Degree is submitted to the Graduate School as soon as possible after passing the comprehensive (preliminary) examination.

Doctoral students have a time limit of 7 years from the time of program admission. All Graduate School degree requirements (including details on Plan of Study and Admission to Candidacy) are listed below.

**Doctoral Degrees**

The University offers several types of doctorates, each of which is described below.

The Doctor of Philosophy (Ph.D) degree is regarded as the researcher’s degree. Program requirements include the acquisition of special skills for conducting independent, scholarly research of publishable quality. Requirements traditionally include a working knowledge of one or more foreign languages, but currently a number of foreign-language alternatives have been approved by departments. Through acquisition of these skills, PhD candidates demonstrate their potential for careers as
required for the completion of the EdD program. The student is required
to complete 60 semester hours in approved graduate courses beyond
the master's degree, or 90 semester hours of approved graduate courses,
and to defend a dissertation. The student must complete a minimum of
12 hours of dissertation research. In the College of Education (p. 380)
section of the Graduate Catalog, there are specific regulations governing
the EdD program.

Doctor of Philosophy Degree
The Doctor of Philosophy degree is granted on the basis of scholarly
proficiency, distinctive achievement in a special field, and capacity for
independent, original investigation. The first two criteria are tested in
coursework and a comprehensive examination, the last in a dissertation
in which the student must present clearly and effectively the results of
substantial research. A combination of these accomplishments, rather
than the mere accumulation of residence and course credits, is the
essential consideration in awarding the PhD degree. The PhD differs
from the EdD in a number of ways, including the fact that the PhD Plan
of Study and comprehensive examination demonstrate a higher-level
research focus, and there is a greater number of dissertation hours
and higher level of complexity and independent thought in a PhD-level
dissertation.

Field of specialization
A defined field of specialization is required of all candidates for the
Doctor of Philosophy degree. A minimum of 48 semester hours of non-
dissertation course credit is required. Candidates should consult their
departments or the appropriate section of this Catalog for additional
requirements. The doctoral course as a whole must be unified, and all its
parts must contribute to an organized program of study and research. In
addition, a student must complete a minimum of 24 hours of dissertation
research.

Research skill/language requirements
There is no universitywide foreign language/research skill requirement for
doctoral students; each college or department offering the PhD degree
may set its own requirements. This policy reaffirms the importance of
research skills and foreign languages in the highest academic
degree granted by American universities, but it also recognizes that the
departments offering the degrees are in the best position to determine
the number and nature of such requirements in the interests of their
students. For further information about PhD foreign language/research
skill requirements, students may contact their departments or the
Graduate School office 205-348-5921.

Interdisciplinary Studies
There is a PhD degree program in interdisciplinary studies, and it
is administered by the Graduate School. In addition to the general
requirements for the PhD degree, the program of study and the
supervisory committee for the prospective interdisciplinary studies
degree candidate must be approved by the dean of the Graduate School
before the student is admitted to the program. See Interdisciplinary
Studies (IDS) (p. 603) at the Graduate School's website for information
on prerequisites, admission procedures, course of study, and other
aspects of IDS programs.

Doctor of Education Degree
A minimum of two years of graduate study beyond the master's degree is
required for the completion of the EdD program. The student is required
to complete 60 semester hours in approved graduate courses beyond
the master's degree, or 90 semester hours of approved graduate courses,
and to defend a dissertation. The student must complete a minimum of
12 hours of dissertation research. In the College of Education (p. 380)
section of the Graduate Catalog, there are specific regulations governing
the EdD program.

Doctor of Musical Arts Degree
The DMA degree requires a minimum of 48 semester hours beyond
the Master of Music degree, plus recitals and other examinations as
determined by faculty of the School of Music. Specific requirements for
each major area are outlined in the School of Music (p. 206) section of
the Graduate Catalog.

Doctor of Nursing Practice
The Doctor of Nursing Practice (DNP) (p. 574) is a joint program offered
by the University of Alabama in Huntsville College of Nursing (UAHCON),
The University of Alabama at Birmingham School of Nursing (UABSON),
and The University of Alabama Capstone College of Nursing (UACCN).
The DNP is a practice-focused degree that is detailed in the Nursing
section of this Catalog.

Admission to Doctoral Degree Programs
Admission to any doctoral program is limited to students whose
scholastic records show distinct promise of success in doctoral study.
Admission to the Graduate School and the earning of a master's degree
from The University of Alabama does not guarantee acceptance into a
doctoral program. Students in doubt about their acceptance into doctoral
programs should consult with departmental advisors and the Graduate
School, which makes the final decision about admission. A department
can terminate a student's doctoral admission if there is documented
unsatisfactory academic or other progress toward completion of the
degree.

Residency Requirements
The University of Alabama recognizes that doctoral students should
be immersed in advanced study and inquiry, interact extensively
and meaningfully with faculty and peers, engage with the academic
community in their field, and have access to the educational resources
of the University. To achieve these goals, a minimum of 50 percent of
coursework hours to be counted in a student's doctoral program must
be from The University of Alabama (exclusive of dissertation research
hours and subject to the Graduate Catalog's Transfer of Credit policies).
Additionally, 100 percent of dissertation credit hours must be from The
University of Alabama. Diverse academic traditions, rapidly changing
instructional modalities, and new student populations are acknowledged
and accommodated with this policy.

Graduate Credit
A student must be admitted to the Graduate School and must register
as a graduate student in order to receive graduate credit. Approval for
graduate registration must be obtained from program advisors prior to
registration.

Graduate Credit for Noncredit Experiences
All course credit used toward a UA graduate degree must be taught at
the graduate level. No graduate credit may be earned by correspondence
study or for experiential learning not conducted under the direct
supervision of graduate faculty of The University of Alabama. UA does
not offer graduate credit for noncredit workshops, seminars, continuing
education experiences, professional development, internships, work/life
experience, and so forth.
Transfer of Credit

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a "B" grade or better may be transferred. The student must have attained an overall graduate GPA of "B" or better on all graduate work attempted. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.

2. PhD Programs Only: A student holding an earned, in-field master’s degree and working in the field or a related field since earning the degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a "B" overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. For departments participating in this program, the use of this option must be indicated on the Plan of Study.

To participate in Option 2, the Plan of Study must be submitted during the first semester of enrollment. If any coursework from the in-field or related-field master’s degree was earned more than six years prior to the date of admission, the graduate program director or department head/chair must submit to the Graduate School for evaluation a Field-Related Employment Since Earning Master’s Degree form with the student’s CV and a PhD Plan of Study.

Consideration of transfer of credit or the acceptance of an earned master’s degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the penultimate semester or the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department’s graduate coordinator regarding your department’s transfer policy.

Each department wanting its doctoral students to be able to choose Option 2 needs to "opt in" to this option by informing the graduate dean in writing that they wish to be among the approved departments.

Time Limits

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master’s, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period (not seven years) prior to admission to the doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree. Revalidation (recertification) of any expired course credit is not an option.

Time Limits Extension Request

Only under compelling circumstances beyond the student’s control a student may petition for a one-semester extension to the seven-year time limit (or eight-year time limit for the selected programs noted above). The Graduate Council approved the following steps to request an extension:

- To begin the process, the student petitions the department head. In the petition the student
  a. describes the compelling circumstances,
  b. briefly describes the current status of the dissertation, then
  c. includes a timeline showing each important remaining step in the completion of the dissertation. The last step and date in the timeline are submission of the successfully defended dissertation on or before the published final date for submission of dissertations for the requested extension semester.

- If the department head supports the petition, it is forwarded to the college dean.

- If the college dean supports the petition, it is sent to the graduate dean.

- If the graduate dean or his designee approves the extension, it will not require the student to validate any out-of-date UA or transfer courses previously approved for the plan of study.

- If a student fails to complete all degree requirements within the time limit for the student’s doctoral program or within a one-semester extension approved as noted above, the student will be dropped (suspended) from the doctoral program. To complete a doctoral degree, the student would have to reapply for admission and be admitted by the department and Graduate School. Graduate Council policies do not provide the option for a student failing to complete within the time limit to revalidate (recertify) either UA or transfer courses completed more than six years prior to the date of admission. Thus, a readmitted student would be able to apply to the new admission only those courses approved by the department and Graduate School and completed within the six years (18 fall, spring, and summer semesters) prior to the new admission.

Repeating Courses When Given an Extension

When requests are made for extensions of the doctoral time limits, and it is deemed that an out-of-date course is integral to the degree program, the college dean may request permission of the Graduate School for such
a course to be repeated. In this case, both grades are used in calculation of the GPA.

Plan of Study
Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School.

The PhD Plan of Study and DMA Plan of Study are available at the Graduate School website. The Plan of Study for other doctoral programs (EdD, DNP) are available from the student’s department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a “hold” may be placed on future registrations.

An amended Plan of Study (if needed) must be submitted to the Graduate School when the student submits the form for Admission to Candidacy for Doctoral Degree.

Preliminary or Comprehensive Examination
A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after

- any foreign language/research skill requirements are met (PhD students only);
- two full years of graduate study are completed; and
- the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student’s supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student’s research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Admission to Candidacy
The requirements for advancing to candidacy include passing the qualifying (major or preliminary) examination; completion of all coursework as listed on the approved program of study; receiving departmental approval of the dissertation subject (although some departments require the defense of a dissertation proposal and/or writing one or more preliminary sections of the dissertation as well); and having the committee recommend the student for Admission to Candidacy for the Doctoral Degree. The completed candidacy form is submitted to the Graduate School well in advance of the final semester.

Continuous Dissertation or Document Registration
Once a student has met the requirements for admission to candidacy, received approval for the dissertation research proposal, or initiated enrollment in 699 (dissertation research for a doctoral degree), the student must pursue completion of the dissertation without interruption by enrolling each fall and spring semester of the academic year for at least 3 hours of dissertation research. Summer enrollment for 699 Dissertation Research is expected if the student is working on the dissertation and using any University facilities or resources, including faculty time, but the only time summer registration is required for dissertation research (3 hours minimum) is when a doctoral student is graduating in August or defending the dissertation during the summer semester. This is true whether or not the student has formally submitted an Application for Admission to Candidacy.

Each PhD student must have completed a minimum of 24 hours of such dissertation work upon completion of the degree. The amount of dissertation research for which a student enrolls in any given semester should be commensurate with the progress a student is expected to make on the dissertation, as well as reflective of the extent to which University facilities and faculty time are invested in the proposed activities.

Dissertation Proposal
The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction giving an overview and stating the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal’s format with respect to such things as the length of the introduction and detail of the review of the literature.

Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

Dissertation
A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. Early in the process, the subject of the dissertation must be approved by the dissertation committee of the major department or division and by the dean of the Graduate School.

A dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. The committee shall have not fewer than five members, all of whom are appointed by the dean of the Graduate School. The graduate dean’s approval of the proposed dissertation committee is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the form for Appointment/Change of a Doctoral Dissertation Committee.

All members of a dissertation committee must be members of the UA Graduate Faculty. The committee chair must be a full member of the Graduate Faculty, as described in the Catalog’s section on Qualifications of the Graduate Faculty (p. 34). One member must be from outside the student’s major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student’s dissertation committee.

The final oral dissertation defense is the culminating experience in the doctoral program. As such, all members of the dissertation committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in
person unless extraordinary circumstances dictate the need for virtual attendance.

The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations. Graduate School deadlines, including each semester’s dissertation deadline, are available at the Graduate School’s homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research. If certain conditions are met for the student’s final semester, the student may qualify to enroll for fewer than 3 hours of 699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester. This exception applies only to students who registered for at least 3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below:

### Final-Semester Dissertation (699) Minimum Registration Hours

<table>
<thead>
<tr>
<th>When was the completed electronic dissertation submitted to ProQuest/the Graduate School?</th>

<tr>
<td>After 4:45 p.m. on the last-possible day for instructors to post grades for the semester before the student’s final semester, but before 4:45 p.m. on the last-possible day to register or add a course for the student’s final semester (both dates published in the University Academic Calendar)</td>
<td>1</td>
</tr>
<tr>
<td>After 4:45 p.m. on the last-possible day to register or add a course for the student’s final semester (date published in the University Academic Calendar)</td>
<td>3</td>
</tr>
</tbody>
</table>

"Completed" means submitted at ProQuest after being successfully defended; being carefully edited following the defense meeting; and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. At the time of ProQuest submission, the student also must submit the Survey of Earned Doctorates through the NORC website.

1 International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see “USCIS” section under “Minimum Hours—Other Policies and Regulatory Bodies” on page 3 of this policy.

2 The University Calendar is available at the Academics tab of the website of the University Registrar.

### Article-Style Dissertations

This approach is intended for doctoral students whose dissertation will consist of a number of related manuscripts or articles that represent independent research or creative activity. It is an option available only to students in certain fields in which the faculty have received Graduate Council approval from the Graduate Council. A complete list of these fields is below:

- Accountancy
- Aerospace Engineering and Mechanics
- Applied Statistics
- Biological Sciences
- Chemical Engineering
- Chemistry
- Civil Engineering
- Computer Science
- Economics
- Education (all departments)
- Electrical and Computer Engineering
- Finance
- Geological Sciences
- Health Education and Promotion
- Management
- Management Science
- Marketing
- Mechanical Engineering
- Metallurgical and Materials Engineering
- Physics
- Psychology

Article-style dissertations must be based upon research completed while the student is enrolled at The University of Alabama. For each article used, the student must be the first author, or equivalent, as defined by the discipline.

As with traditional dissertations, the article-style dissertation must be the student’s original idea. It must be a unified work and include a sequence of articles of publishable quality around a cohesive theme, with a comprehensive review of literature demonstrating an in-depth understanding of the unifying framework.

- In article-style dissertations there will be introductory material to describe the studies, show how they are related, and explain their significance;
- connecting language to bridge each study to the next; and
- a summary making clear the importance of the studies, integrating the major findings, and discussing the implications for the overall topic.

These components do not have to be separate sections or chapters. They may be parts of the manuscripts or may be accomplished in an abstract.

All parts of both traditional and article-style dissertations must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline’s style manual require deviation. Students considering the article-style approach should contact the Graduate
School before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the date of the required final oral examination.

**Electronic submission of dissertations:** August 15, 2009, is the date when electronic submission began to be required and paper submission no longer was accepted. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

**Protection of Human Subjects for Research**
Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. The University's IRB approval form is available at the IRB website.

**Final Examinations**
When the dissertation has been completed, the candidate will be given a final oral examination by a committee of not fewer than five members, one of whom must be from outside the student's major department or, for students in the College of Education, outside the student's area (not program), and appointed by the dean of the Graduate School. This examination will focus primarily on the candidate's research work, as embodied in the dissertation, and the field in which the dissertation lies, but it may encompass the complete program for the degree. The results of the examination must be reported to the Office of the Graduate School at least six weeks before the commencement at which the degree is to be conferred.

**Application for Graduation**
Each candidate for a doctoral degree must submit an Application for Degree via myBama not later than the last day to register or add a course of the semester or the first term of the summer session in which requirements for the degree are to be completed. That day is published for each semester at the website of the University Registrar.

**Clearing the Academic Record for Commencement**
At least one week before commencement, the candidate's record must have been cleared for graduation.

**Attendance at Commencement**
A candidate for a doctoral degree must be present at a scheduled commencement to receive the diploma and hood, unless excused by the graduate dean.

**Withholding or Withdrawing an Advanced Degree**
The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.
**Graduate Credit**

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

**Graduate Credit for Noncredit Experiences**

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

**Transfer of Credit**

Courses of full graduate-level credit earned in a regionally accredited institution where a student was enrolled in the graduate school may be submitted for review for inclusion in a master’s degree program. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama. Acceptance of credit requires the approval of the student’s advisory committee and the dean of the Graduate School. Credit will not be accepted for transfer from any institution at which the student failed to achieve a “B” average on all graduate work attempted. Only courses in which a student earned a “B” grade or better may be transferred.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

A student initiates at the Graduate School’s website a Request for Transfer of Graduate Credit earned at another institution. It is also the student’s responsibility to assure that the Graduate School receives an official transcript of the credit requested for transfer, well in advance of the final semester.

With the approval of the student’s department and the dean of the Graduate School, the greater of 12 hours or 25 percent of the required coursework for a master’s degree may be transferred from another institution. All credit toward the master’s degree, including transfer credit, must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the master’s degree is to be awarded. Revalidation (recertification) of graduate credits that must have been earned during the six years (18 fall, spring, and summer semesters) is to be awarded. Revalidation (recertification) of graduate credits that will be more than 18 semesters old at the time of UA master’s program completion is not an option.

Please note that some departments allow fewer than 12 hours of graduate transfer credit. Be sure to check with your department’s graduate coordinator regarding your department’s transfer policy.

**400-Level Courses**

A maximum of 6 semester hours of 400-level course credit may be accepted for a master’s degree program, but only if a form for Approval of 400-Level Course Work for Master’s Credit is approved by the Graduate School prior to the semester in which the 400-level coursework will be taken.

**Time Limit**

All requirements for the master’s degree must be completed during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. There is no provision for an extension of the time limit beyond six years for master’s students.

**Admission to Candidacy**

During the 2013-2014 academic year, the Graduate Council eliminated the master’s candidacy requirement. Departments may monitor master’s candidacy if they wish, but the Graduate School does not monitor it and will not accept master’s candidacy forms. Doctoral candidacy is not affected and remains an important doctoral program requirement.

**Thesis**

A thesis evidencing research capacity, independent thought, and the ability to interpret materials is required of all master’s degree candidates who pursue Plan I. The subject chosen must be in the major field and must be approved by the graduate committee of the major department or school and by the head of the student’s major department or division.

The final oral thesis defense is the culminating experience in the master’s program. As such, all members of the thesis committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

**Article Style vs. Journal Format**

**Article Style.**

At the doctoral level, “article-style dissertations” are unified works that include several distinct but related studies of research or creative activity, each of which is of publishable quality. The University does not permit an “article-style thesis” to be presented for a master’s degree.

**Journal Format.**

A “journal-format thesis” is acceptable. Such a thesis follows the format of a particular journal in which the student and advisor want the thesis to be published. To prepare a journal-format thesis, the student uses the journal’s “information for authors” or similarly titled guidelines in conjunction with the Graduate School’s Student Guide to Preparing Electronic Theses and Dissertations.

A thesis committee must consist of at least three members appointed by the dean of the Graduate School. A form for Appointment or Change of Master’s Thesis Committee is used to request that the graduate dean appoint a thesis committee. The request normally is made as soon as the successful defense of the thesis proposal has been completed.

All members of a thesis committee must be members of the Graduate Faculty. The Committee Chair must be a full or associate member of the Graduate Faculty. One member must be from outside the student’s major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business, or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student’s thesis committee. Unless there are extraordinary circumstances meriting approval by the graduate dean before the final oral defense of the thesis, all members of the thesis committee must attend the defense.

The candidate must give members of the examining committee a minimum of two weeks to read the thesis before the date of the final oral examination. A final oral examination is required of all students completing a thesis. All members of the thesis committee must be members of the UA graduate faculty and must attend the final oral examination unless there are extraordinary circumstances warranting the graduate dean’s approval of the absence prior to the defense meeting.
As of August 15, 2009, all theses are submitted electronically rather than on paper. See the Graduate School’s homepage for a link to information on Electronic Theses and Dissertations (ETD) for details.

Theses must comply with the regulations set out in A Student Guide to Preparing Electronic Theses and Dissertations, available on the Graduate School’s website. Approval of the thesis by the graduate dean is necessary before graduation.

The thesis should be completed, if possible, while the student is in residence at the University. To request permission to complete a thesis in absentia, the student must, before leaving the University, submit a satisfactory outline of the thesis, as well as evidence that adequate facilities are available where the work will be done, to the head of the student’s major department.

Protection of Human Subjects for Research
Scientific research involving human subjects has produced substantial benefits for society, but it also can pose troubling ethical questions. The mission of the University’s Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research. In the case of thesis research that involves the use of human subjects in any way, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research.

Comprehensive Examinations
In addition to the regular course examinations, a final comprehensive examination representing a “culminating” or “capstone” experience for a degree is required of all candidates for the master’s degree (except for those candidates pursuing the Master of Accountancy, the Master of Business Administration, the Master of Library and Information Studies, the Master of Social Work, and the Master of Tax Accounting). The comprehensive examination is a culminating experience in which the student is expected to integrate prior learning. Each department, with approval of the Graduate Council, determines the most appropriate format. The various exams may consist of one or more of the following:

- a written and/or oral examination based on the content of the degree program;
- a thesis and final oral defense;
- a course requiring interpretation and integration of information from previous courses;
- a research paper, a “policy and practice” paper, or equivalent experience;
- a public performance or exhibition along with a contextualizing paper; and/or
- a practicum or internship.

If the comprehensive exam requirement is met with option 1 and/or 2 above, then the examining committee for comprehensive examinations must consist of at least three members of the graduate faculty from that department and appointed by the dean of the Graduate School. The examination must be given at least six weeks before the date of graduation (two weeks before for Plan II) and reported promptly to the dean of the Graduate School on appropriate forms. A final report, on the Master’s/EdS Examination Form is on the Graduate School website. The form should be submitted when all examinations are completed. A student may take the final oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Application for Graduation
Each candidate for a master’s degree must apply for graduation through myBama no later than the registration period for the semester or the first session of the summer term in which requirements for the degree are to be completed.

Second Master’s Degree
Six (6) semester hours of eligible credit from one master’s degree at The University of Alabama may be applied to the requirements for a second master’s degree, but only if the department of the second master’s agrees to the courses in the plan of study. Any hours from the previous master’s degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded. **Please note that if a student double counts six hours between two master’s degrees, no hours may double count toward any additional master’s degrees.

Department of Human Development and Family Studies
The General Studies Human Environmental Sciences (MS) (p. 566) focused area of study in human development and family studies provides students with the theoretical foundation and research skills necessary to pursue doctoral work and for advanced employment in a wide variety of occupations serving children, adults, and families.

HD500 Lifespan Human Development
Hours 3
This course will advance students’ knowledge of the theories and research in human development across the lifespan. Major areas of study include: developmental theory and physical, cognitive, social and emotional development.

HD501 Child Development
Hours 3
Covers principles of growth and development, chief areas of concern in the field, and supporting research.

HD510 Family Policy
Hours 3
The course will examine state of the family, trends and implications for family policy. The process of policy formation, implementation, evaluation and advocacy will be reviewed.

HD512 Adult Development
Hours 3
Theories of and research on development throughout adulthood; young adulthood, middle years and aging are presented.

HD525 Adv Preschool Dev & Curriculum
Hours 3
This course is designed for students to understand, design, implement and evaluate appropriate curricular practices for preschool children. Developmental theories and current issues in early childhood education are examined.
HD535 Parent/Child Relationship  
Hours 3  
Theories and research on parent/child relationships and an examination of how the parent/child relationship influences aspects of child development. Basic models of parent education and parent involvement are also examined.

HD540 Couple and Marital Therapy  
Hours 3  
This course provides students an introduction to clinical work with couples. An overview of three major approaches to couples therapy are included. In the course, students are encouraged to develop intervention skills related to these approaches and to think about working with couples of diverse backgrounds.

Prerequisite(s): na  
Prerequisite(s) with concurrency: na

HD545 Addiction and the Family  
Hours 3  
This course is an examination of the impact of substance abuse and addiction on the family as well as the influence of familial factors and family dynamics on addiction and the process of recovery.

HD550 Hospitalz Child & Youth  
Hours 3  
The developmental and psychological theories involved in the practice of child life in health care settings.

HD551 Loss And Bereavement  
Hours 3  
Provides students with a general overview of the grief processes as they impact children and families. Examines issues surrounding children’s grief/bereavement and studies issues surrounding complicated mourning.

HD556 Theories Family Studies  
Hours 3  
Study of interaction within the family, with emphasis on historical changes, major issues, marriage success and family strengths, and family processes such as communication and conflict patterns. A focus on ethnic and racial family forms is also included.

HD562 Dynamics Of Family Reltn  
Hours 3  
Study of interaction within the family, with emphasis on historical changes, major issues, marriage success and family strengths, and family processes such as communication and conflict patterns. A focus on ethnic and racial family forms is also included.

HD567 Pract Marriage Family Therapy  
Hours 3  
Provides students with preliminary supervised experience in a professional setting.

HD568 Pract I Marriage Family Thery  
Hours 3  
Provides students with supervised practice in marriage and family therapy.

HD576 Sem Human Sexuality  
Hours 3  
Discussion and analysis of underlying issues in human sexuality research.

HD580 Children and Divorce  
Hours 3  
Theory and research regarding effects of parental divorce on children’s cognitive and social-personality development.

HD591 Sp Prob Hum Dev Fam Stdy  
Hours 1-6  
Provides an opportunity to pursue special needs and interests. Students work primarily on their own, but under supervision.

HD598 Research Practicum  
Hours 1-6  
Participation in a cooperative faculty/student research project related to human development.

HD599 Thesis Research  
Hours 1-6  
Integration of theory and research related to infant behavior and development.

HD601 Advanced Child Development  
Hours 3  
Advances student’s knowledge of the theories and research in child development. Major areas of study include: developmental theory and physical, cognitive and social development.

HD602 Adv Infant Development  
Hours 3  
Examination of theoretical bases for behavior in infancy, and review of research literature on attachment behavior and various topics of major concern.

HD603 Advanced Adolescent Development  
Hours 3  
Covers biological, cognitive, social-emotional, and moral development of adolescents in school, home, and community settings.

HD631 Readings Human Developmt  
Hours 3  
With an interdisciplinary approach to issues and concerns in life-span development, the course examines theory and research on selected topics.

HD640 Couple and Sex Therapy  
Hours 3  
This course is designed to introduce students to the diverse and complex dynamic of clinical work with couples. The course will provide an overview of two evidenced-based approaches to couples therapy (Gottman Method Couples Therapy & Integrative Behavioral Couples Therapy), and special issues related to couples therapy, sex therapy and infidelity. Throughout the course, students will develop intervention skills related to these approaches, and skills related to working with couples of diverse backgrounds.
HD641 Ethics and Professional Issues in Marriage and Family Therapy
Hours 3
This course is designed to examine in-depth the America Association for Marriage and Family Therapy's Code of Ethics as the primary guide to the ethical practice of Marriage and Family Therapists. Students will explore the legal, ethical, and professional issues affecting therapists in various practice settings. A major emphasis will be on students’ development of their own process for ethical decision-making.
Prerequisite(s): HD 567

HD645 Cultural Diversity in Marriage and Family Therapy
Hours 3
This course explores areas of cultural diversity relevant to the practice of marriage and family therapy. Learning to respond in a culturally sensitive manner and recognizing contextual and systemic dynamics as related to establishing productive therapeutic alliance and delivering successful intervention are included.

HD664 Family Therapy
Hours 3
Examination and application of Family Therapy methodological and theoretical counseling principles. Emphasis is on helping families overcome stresses and develop strategies in response to normative and non-normative life events.

HD665 Advanced Family Therapy
Hours 3
Theoretical underpinnings of emotionally focused therapy (EFT), narrative therapy, and experiential family therapy are presented. Students will become competent in the conceptualization and application of these models to individuals, couples, and families.
Prerequisite(s): HD 664, Family Therapy

HD667 Pract II Marriage Family Ther
Hours 3
Advanced supervised practice in marriage and family therapy.
Prerequisite(s): HD 567 and HD 568

HD668 Intern Marriage Family Therapy
Hours 1-6
Supervised field experience in an appropriate job setting in marriage and family therapy.

HD670 Internship in Child Life
Hours 1-12
Internship for students in the Child Life concentration. Permission of the instructor.
Prerequisite(s): Permission of the instructor.

HD689 Practicum Human Developm
Hours 3-6
Experience with human development in classroom teaching or agency settings.

HD699 Dissertation Research
Hours 1-12
Integration of theory and research in a guided research project.

Department of Human Nutrition and Hospitality Management

- Programs
  - Human Nutrition, MS (p. 563)
  - Human Nutrition, PhD (p. 564)

NHM530 Advanced Nutrition Counseling
Hours 3
Focuses on advanced skills in nutrition counseling that incorporates behavioral theory and motivational interviewing.
Prerequisite(s): HES 509: Research methods; open to human nutrition majors only.

NHM550 Advanced Community Nutrition I
Hours 3
Focuses on principles, problems, and programs in community nutrition with an emphasis on community needs assessment.
Prerequisite(s): None.
NHM551 Advanced Community Nutrition II
Hours 3
Explores the techniques and strategies used in community nutrition; focuses on facilitation of community interventions, development of community partnerships and collaborative programs.
Prerequisite(s): NHM 550

NHM555 Maternal and Infant Nutrition
Hours 3
This course will focus on the scientific evidence that supports nutrition recommendations that result in optimal health for mothers and their infants. Methods of assessing nutritional status are included. The impact of insecurity and obesity on the nutritional status of mothers and their infants will be discussed.

NHM556 Child and Adolescent Nutrition
Hours 3
Discussion of the scientific evidence that supports nutrition recommendations that result in optimal health for young children and adolescents. Explores determinants of nutritional status and public health strategies for prevention of prevalent nutritional concerns.
Prerequisite(s): NHM 555

NHM557 Childhood Obesity
Hours 3
Focuses on the physiological, genetic, environmental, and behavioral factors that predispose children and adolescents to obesity; explores the clinical and public health strategies for treatment and prevention.

NHM558 Nutrition in the Prevention and Treatment of Chronic Disease
Hours 3
Evidence-based solutions in the prevention and treatment of the most prevalent nutrition-related chronic diseases are discussed. Current research is translated into health promotion and disease prevention strategies and plans.
Prerequisite(s): HES 509

NHM561 Advanced Vitamins and Minerals Metabolism
Hours 3
Lectures and reports on the physiological functions, metabolism, and interpretation of current research in vitamins and minerals.

NHM562 Metabolism of Energy Nutrients
Hours 3
In-depth discussion of carbohydrates, lipids, and protein metabolism. Discussion and interpretation of recently published research in peer-reviewed journals.

NHM564 Nutrition in Interprofessional Practice
Hours 1
The focus of this course is to prepare clinicians to work in interprofessional practice teams to meet the complex and multidimensional needs of Veterans and rural populations, with a special emphasis on the effects of multiple chronic conditions.
Prerequisite(s): NHM 566, NHM 567, or other similar MNT-oriented advanced course, RD status preferred. Admission by permission of Instructor only.

NHM555 ID Mgmt of Chronic Disease
Hours 2
The focus of this course is to train clinicians to work in interprofessional practice teams to meet the complex and multidimensional needs of patients with multiple chronic conditions living in rural areas. Instructor permission only.
Prerequisite(s): NHM 564

NHM566 Adv Clinical Nutrition
Hours 3
Critical review of the physiological basis for nutritional management in the prevention and/or treatment of diseases of the cardiovascular, gastrointestinal, endocrine, hepatic, and renal systems.

NHM567 Nutr Support Criticl Ill
Hours 3
Methods of assessing nutritional requirements of the critically ill patient and of delivering and monitoring enteral and parenteral nutrition are presented.

NHM568 Nutrition for the Older Adult
Hours 3
Methods of assessing nutritional requirements and a review of nutrition and disease topics specifically relevant to the care of the older adult.

NHM569 Integrat Food System Mgt
Hours 3
Current problems in food systems management are presented, with emphasis on theories of management and integration of management functions.

NHM590 Special Prob Nutrition
Hours 1-6
Instructor permission required.
Prerequisite(s): Instructor permission required.

NHM591 Spec Prob Food Science
Hours 3-6
No description available

NHM598 Non-Thesis Research
Hours 3
Experimental or analytical investigation of a food or nutrition-related issue. This course may be the capstone experience for the masters degree under Plan II and should be the last course the student takes prior to graduating.

NHM599 Thesis Research
Hours 1-6
Faculty mentored development of graduate thesis research.

NHM601 Contemporary Research in Translational Nutrition Science
Hours 3
This course will explore two fast-developing topics in the field of nutrition science: nutrigenomics and the gut microbiome. Students will become familiar with core concepts related to these areas in order to critically evaluate emerging research related to both.
NHM602 Methods in Integrative Nutrition Assessment
Hours 3
Analytical methodologies routine to nutrition assessments are discussed and implemented in accordance with standard research protocols in a lab setting.

NHM603 Nutrition Intervention
Hours 3
This course focuses on developing competence in the planning, design, and execution of randomized clinical trials involving nutrition-focused behavioral interventions.
Prerequisite(s): NHM 601 NHM 602

NHM610 Nutrition and Health Disparities
Hours 3
This course is designed to explore health disparities in minority populations, societal factors that impact their health and dietary intake, the differing needs and metabolism of nutrients by population, and educational techniques and healthcare management strategies to maximize the nutritional health of minority populations.

NHM611 Nutritional Neuroscience
Hours 3
This course teaches the molecular mechanisms at work in brain cells, and how intracellular events influence physiological and pathological processes in the brain. This course also covers the relationship between nutrients and neurological disorders and the various nutritional approaches to improve brain function will be discussed using recent publications.

NHM625 Nutritional Epidemiology
Hours 3
This course is intended for graduate students in health-related professions. Principles of epidemiology are discussed and their application to nutrition. This course provides information on research methods to assess exposure through collection of dietary and biological data, evaluate quality of these data, conduct appropriate analyses, and draw valid conclusions.

NHM635 Adv Prac. in Post Sec. Diet Ed
Hours 3
Focuses on developing Competency in Learning system design, with special emphasis on dietetics education at the college level.

NHM648 SecioDay Analysis Survey Data
Hours 3
An applied seminar in the secondary analysis of survey data.

NHM690 Doctoral Studies Seminar
Hours 1
The purpose of this course is to provide doctoral students with information and skills needed for successful doctoral study and an independent research career.

NHM691 Grant Writing for Translational Nutrition Research
Hours 3
Grant writing for translational nutrition research aimed at extending healthy life and reducing the burdens of chronic disease.

NHM692 Special Topics in Nutrition
Hours 3
In-depth understanding of sub-disciplines of food and nutrition that are fundamentals of nutritional sciences and the basic research philosophy of structure-function relationships in food and nutrition research.

NHM695 Interpretation of Nutrition Research
Hours 3
This course covers research methodology in nutrition research, and the evaluation of current nutrition research through the systematic review process.

NHM698 Non-Dissertation Research
Hours 1-15
Participation in a cooperative faculty-student research project related to nutrition or food science.

NHM699 Dissertation Research
Hours 1-12
Design, research, and/or analytical investigation of a problem in the area of nutrition to satisfy the dissertation requirement for the doctoral degree.

RHM521 Hospitality Law and Risk Management
Hours 3
Exploration of legal problems facing the hospitality industry. Legal cases related to restaurants, hotels, and meeting facilities are examined. Concerns and problem-solving for issues of risk management are explored.

RHM570 Leaders Mgt Hospitality Indust
Hours 3
An examination of contemporary leadership and management theories and practices used in the hospitality industry.

RHM574 Resources Mgt Hospitality Oper
Hours 3
Exploration of financial tools and techniques used in making effective managerial, business and operational decisions in hospitality organizations.

RHM575 Hospitality Operations Analysis
Hours 3
This course will focus on the application of financial management tools used to assist managers in the hospitality industry. Financial concepts will be examined as they relate to management decision making. Emphasis will be on interpreting financial data and communicating results to operation managers. Students should have completed an undergraduate course in Accounting or Finance prior to registering for this course.

RHM576 Strategic Management in Hospitality and Tourism
Hours 3
Formulation, development, and implementation of strategic management in the hospitality and tourism industry.
Prerequisite(s): None
The University of Alabama 2018-2019 563

RHM588 Current Trends Food System Mgt
Hours 3
An exploration of a variety of issues of importance to effective management of food service operations. Topics vary to meet students' interests and issues facing the food service industry.

RHM592 Special Topics in RHM
Hours 3-6
Problems related to the operations of hospitality organizations such as hotel, restaurants, clubs and conventions and meeting management facilities.

RHM596 Seminar Hospitality Management
Hours 3
Discussion, reading, and exploration of operational issues related to the hospitality industry.

RHM598 Non-Thesis Research
Hours 3
Experimental or analytical investigation of a topic in restaurant, hotel, or meeting management.
Prerequisite(s): HES 509

RHM599 Thesis Research
Hours 1-6
Faculty-mentored development of graduate thesis research.
Prerequisite(s): HES 509

Human Nutrition, MS
The Master of Science in Human Nutrition is a 30 credit-hour program designed to prepare nutrition professionals to practice dietetics at an advanced level and/or to pursue doctoral study. The program develops research skills, stimulates independent thought, and provides up-to-date knowledge in food and nutrition. Applicants can choose to pursue the major without a concentration, or can select the Community Nutrition or Clinical Nutrition concentrations to provide a more in-depth study of their chosen area. The program is designed for the registered dietitian but can be completed by a dietetic intern or student with a bachelor's degree in nutrition or another discipline who has met the listed prerequisites.

Distance Education
The master's degree is available on campus or through distance education. The degree requirements are the same, regardless of where it is completed. For more information on the distance option, contact nutritionbydistance@ches.ua.edu

Application Deadline: Applications are accepted on a continuing basis.

Additional Information: For more information, refer to the program website at http://www.nhm.ches.ua.edu/masters-in-human-nutrition.html

Direct additional questions to the director of the master's program in human nutrition, Dr. Tiffany Hylton at tmhylton@ches.ua.edu or 205-348-6973.

Human Nutrition, Ph.D.

The PhD in human nutrition is a three-year, 74-credit-hour program designed to align with the goals and objectives of the National Institutes of Health’s National Center for Advancing Translational Sciences (NCATS). As such, the program supports the training and development of researchers and leaders in the field of nutrition by focusing on developing the skills needed to perform bench-to-bedside-to-community research. Graduates of the PhD in human nutrition will be experts in nutrition research methodologies and translational nutrition, thereby efficiently advancing the field of nutrition through research to improve human health.

In accordance with the goals of the National Institutes of Health NCATS to implement and promote translational science approaches that foster collaborative bench-to-bedside-to-community approaches, a student who has completed this doctoral program in human nutrition will demonstrate mastery of:

1) Translational nutrition – Demonstrate proficiency in nutrition techniques that are integrated across discrete areas of nutrition research methodologies into a cohesive research agenda that moves nutrition research from the laboratory to the patient/community.

2) Communication - Effectively communicate nutrition information, evidencing the ability to evaluate and interpret current research for presentation to the academic, scientific, and/or the lay community.

3) Nutrition research practice – Demonstrate an understanding of relevant laboratory analyses methodologies, metabolic assessment techniques, and statistical research methodologies appropriate for developing strong, competitive research proposals.

4) Independent research – Demonstrate the ability to support an independent career in research by successfully developing and implementing a research protocol, gathering data to effectively test the hypothesis (or hypotheses), and analyzing and interpreting the data.

5) Effective educators - Demonstrate skills of effective classroom presentation of nutrition-related information.

Application Deadline: April 1. Admission decisions for Fall term will be made in mid-April.

Contact Information: Before applying, it is recommended that you contact the director of the PhD Program in Human Nutrition, Dr. Linda Knol, at lknol@ches.ua.edu or 205-348-8129.

For additional information, please visit the program webpage at http://www.nhm.ches.ua.edu/phd-in-human-nutrition.html

Requirements for Admission:

Students may enter the program with either a bachelor’s or master’s degree in nutrition or a master’s degree in a closely nutrition-related field.

Requirements for admission to the Ph.D. in human nutrition will be:

- A completed application, including a Statement of Purpose
- A current resume or curriculum vitae
- 3 letters of recommendation from faculty or other health professionals capable of judging the applicant’s ability to complete graduate work.
- Test scores:
  - If a student has previously completed a Master’s degree prior to beginning the Doctoral program and maintained a graduate GPA ≥3.5, their application will be considered without the need to submit a GRE score.
  - Students who have previously completed a Master’s degree prior to beginning the Doctoral program with a graduate GPA of 3.3-3.49 may be considered for admission providing they also have a GRE score of ≥300. Upon admission, these students would need to receive permission to continue after the successful completion of 12 graduate hours.
• Students with a Bachelor’s degree will need to submit GRE scores. Minimum requirement for admission is a ≥300 on the GRE.

• If an applicant does not have a previous degree in nutrition, minimum prerequisite course work would include NHM 558 Nutrition in the Prevention and Treatment of Chronic Disease, NHM 561 Adv. Vitamins and Minerals, and NHM 562 Metabolism of Energy Nutrients. These would need to be completed prior to beginning the Ph.D. Nutrition Core coursework and would be applied towards completion of their nutrition electives. The sequencing of course offerings will be structured such that taking these prerequisites courses will not increase time to graduation nor will they require additional burden or heavier academic loads on the students in order to achieve a timely graduation.

• Additionally, if a student is admitted without having previously completed a Master’s degree, they will need to complete HES 509 Research Methods. The sequencing of course offerings will be structured such that taking prerequisites course(s) will not increase time to graduation nor will they require additional burden or heavier academic loads on the students in order to achieve a timely graduation.

Coursework
The Ph.D. in human nutrition requires completion of 74 graduate hours, including 17 hours of nutrition core classes, 12 hours of statistics, 9 hours of nutrition electives, 12 hours of nondissertation research, and 24 hours of dissertation research.

• Students with a Master of Science degree in Human Environmental Sciences (M.S.H.E.S.) with an area of study in human nutrition from the University of Alabama may use the courses taken for the M.S.H.E.S. degree towards up to 9 hours of nutrition coursework in the Ph.D. program.

• Up to 12 hours of equivalent graduate nutrition coursework may be transferred in from a comparable Doctoral program to count towards completion of the Doctoral program requirements, providing those hours were not used towards completion of a degree at that institution.

Comprehensive Examination
By the end of the fifth semester in residence (not including summer terms) students must successfully complete a comprehensive candidacy exam. This written comprehensive examination is required of all candidates for the Ph.D. degree. The core comprehensive exam will be offered on the second Thursday of January and the second Thursday of June each year. This exam should be prepared for by individual study expanding on the content covered in four core courses: NHM 601 Contemp Research Nutrition Sci, NHM 602 Methods Integrat Nutr Assess, NHM 603 Nutrition Intervention, and NHM 625 Nutritional Epidemiology. The exam must be passed unconditionally before the student can defend his/her proposal and be advanced to candidacy.

Prior to taking the exam, students must have completed their core course requirements, and at least 75% of their other didactic course work. We recommend that students take their comprehensive exams when they have completed the core course requirements. Students should NOT assume that “A” level performance in their coursework is adequate preparation for the comprehensive exam. Students must be registered for at least one semester hour of graduate work during the semester(s) in which the comprehensive exams are taken.

The exam is written and graded by the graduate faculty in the Doctoral program. Grading is performed in a blinded fashion, with each section being graded by the graduate faculty who taught the course. Each of the four sections is graded as “passed” or “failed”. If any sections earn a score of “failed”, the student will be required to meet with the PhD program coordinator to go over the feedback from the grader(s). The student has two weeks from this meeting to prepare for a retake of the sections that did not earn a “pass”. Sections that were not passed on the initial examination can only be retaken once. If a student fails a section for the second time, they will be dismissed from the program per University Graduate School protocol.

The Comprehensive Exam will cover material outlined in the following core courses:
NHM 601 Contemp Research Nutrition Sci
NHM 602 Methods Integrat Nutr Assess
NHM 603 Nutrition Intervention
NHM 625 Nutritional Epidemiology

Doctoral Dissertation
The Doctoral dissertation is designed to provide students with a significant research experience and the ability to demonstrate their mastery of research design, implementation, and knowledge dissemination. Once students have successfully completed academic coursework and their comprehensive exams, they may then identify a dissertation committee, register for dissertation hours, and present their dissertation proposal. The Doctoral dissertation committee should include a minimum of five graduate faculty members with at least one committee member from outside of the home department. This committee will work with the student to develop an appropriate timeline and to ensure the student meets all University standards for documentation and research protocols appropriate for their respective department, college, and graduate school.

The Doctoral dissertation requires the completion of 24 hours of dissertation credit. Each student will work closely with his/her Doctoral program chair and his/her Doctoral dissertation committee in the development of a dissertation proposal. Upon completion of the dissertation research, a draft of the written dissertation is to be submitted no later than 2 weeks before the planned oral dissertation defense. Notice of this defense is to be posted throughout the college and will be announced via e-mail to faculty and currently enrolled graduate students. The student’s committee will be in attendance, as well as any faculty or students from the University who may wish to attend.

General Studies Human Environmental Sciences, M.S.

The General Studies in HES offers the Master of Science in Human Environmental Sciences with the following areas of study:

- Consumer Conflict Management, Negotiation, and Mediation (graduate certificate available)
- Consumer Quality Management
- General Studies
- Interactive Technology
- Hospitality Management

See the Admission Criteria section of this catalog for more information.

Program Requirements

Clothing and Textiles

The area of study in clothing and textiles provides preparation for careers in higher education, business and industry and government services, and for admission to doctoral programs in clothing, textiles, and related fields. The area of study is designed to stimulate independent thought and develop skills in problem solving, creativity and research methods. Individualized programs of study are planned to develop professional competence in the student's area of interest.

Students applying for admission to the area of study in clothing and textiles please refer to the requirements for admission detailed in an earlier section of this catalog and should visit the Human Development and Family Studies website. All applicants must submit test scores from either the Graduate Record Examination or the Miller Analogies Test in support of the application. To graduate from master’s programs in the Department of Human Development and Family Studies, students must maintain a "B" average in the courses related to the area of study.

Additional Information

Six semester hours of eligible credit from one master’s degree at The University of Alabama may be applied to the requirements for a second master’s degree, but only if the department of the second master’s agrees to the courses in the plan of study. Any hours from the previous master’s degree must have been earned during the six years (18 fall, spring, and summer semesters) immediately preceding the date on which the second degree is to be awarded.

Rural Community Health, MS

The ultimate purpose of the program is to prepare students to be community health leaders in rural Alabama as health care providers.
The immediate purposes of the program are to teach 1) principles of rural public health as a basis for community health leadership, 2) characteristics of rural health concerns, and 3) approaches to biomedical science study through biochemistry and other science courses while 4) providing avenues for students to maintain close rural community ties and identities and 5) to form a supportive peer group. This program targets two groups of students:

- Rural Medical Scholars (RMS), established in 1996 by The University of Alabama School of Medicine (UASOM) to recruit students who grew up in rural Alabama who desire to practice primary care medicine in rural Alabama. RMS apply to UASOM, go through a special interview/selection process and enter a RMS 5-year track of study leading to the MD degree. For the first year, RMS spend a year on the Tuscaloosa campus in the General Studies in Human Environmental Sciences program with a set of courses related to rural community health. (Note: This proposal requests that the curriculum be formally recognized as a Master of Science in Rural Community Health.) Following this year, RMS then complete two years of pre-clinical study at UASOM in Birmingham. RMS then return to Tuscaloosa for two years of clinical medicine training in the College of Community Health Sciences (CCHS) (UASOM – Tuscaloosa Campus). After completing the MD degree, RMS enter residency training in the specialty of their choice.

- Rural Community Health Scholars (RCHS), students who exhibit a desire to be rural health care providers (not necessarily physicians), but are not eligible for the RMS program either because they did not grow up in rural Alabama or they have academic (GPA or MCAT) deficiencies or both. Most of these students use the Master of Science degree as a bridge to a health professional school (medical, osteopathic, physician assistant, nursing, physical therapy, public health, doctor of philosophy, etc.) by demonstrating their ability to handle graduate-level studies and improving admission test scores. Some RCHS enter the job market after completing the Master of Science degree as public health workers or as high school science teachers.

This program directly contributes to The University of Alabama’s mission “To advance the ... social condition of the people of the State ...” by helping prepare health professionals for the underserved rural areas of Alabama.

The academic requirement for admission as RMS is an MCAT score of 495 or higher or an ACT score of 24 or higher and an undergraduate GPA of 3.2 or higher. For RCHS the undergraduate GPA must be 3.0 or higher; otherwise a qualifying GRE score is required. The non-thesis research takes the place of a comprehensive exam. Graduate GPA requirements are set by the UA Graduate School.

The program includes two concentrations: the Rural Medical Scholars and the Rural Community Health Scholars. The concentrations provide some of the tools necessary for future rural Alabama physicians (Rural Medical Scholars) and other rural health care providers (Rural Community Health Scholars). The courses in the concentrations prepare students to lead in the development and maintenance of community health center practices and other health care practices.

**Required for ALL Rural Community Health Students**

**Non-thesis Research Description:** HHE 598 Non-Thesis Research is to be a culminating exercise, expressing knowledge and methods learned during the Rural Medical Scholars/Rural Community Health Scholars/Master’s degree program of study. It will provide evidence to program faculty that principles and topics learned throughout the curriculum are expressed in reports of the experience. The experience will be in the form of a research study.

Students might, for example:

- State a rural health issue that their study addresses. This statement should include an explanation of how this topic caught their interest and of their own background relative to this interest.
- Explain what they did to study the issue - Contextual literature review (and interviews) to place the issue in context of broader rural health concerns, to explain essential facts known about the issue, and to express what needs to be known in order to address the issue in rural Alabama; Collection of data (qualitative and/or quantitative) in a rural community to study the issue as it concerns that community, to learn how it operates in that community, and to learn about the resources that are present to influence the issue; Focused literature review (and interviews) to learn how such an issue has been addressed in other locales and how this might inform a local effort.
- Describe how the information collected was sorted through, analyzed, or considered and summarize the key findings.
- Provide a conclusion about the issue in the community and recommendation about how to address it.
- Discuss the ramifications of addressing the problem in the community, if it could be further applied across rural Alabama, and, if so, what would it mean for Alabama’s rural health.

During the review of the student experiences, by verbal and/or written report, we would expect to find evidence that students have a concept of overall rural health needs, understand the limits of their study methods and their findings, and appreciate the local realities related to addressing a rural health concern.

**Capstone College of Nursing**

The Capstone College of Nursing offers the following:
Nursing Courses

NUR501 Theoretical Models for Advanced Nursing Practice with Rural Populations
Hours 3
This course is intended to advance the role of theory in knowledge development and its relationship to nursing research, practice, and administration. Students will develop critical theoretical analytical skills using selected grand and middle range theories within the discipline of nursing and theoretical work from other disciplines. Specifically, the content will examine the development of nursing theory, including relevant nursing theories such as rural nursing theory, complexity theory, synergy theory, adult learning theories, among others. Theory is understood as essential to nursing science and based on culturally competencies and ethical principles.
Prerequisite(s): Admission to MSN Program
Prerequisite(s) with concurrency: NUR 529 and NUR 503

NUR502 Issues in Community Health for Rural Populations
Hours 2
Students will examine selected issues that affect community health care for rural populations for nursing roles in case management or as a clinical nurse leader. The organization and financing of health care for rural populations will receive considerable attention. The advanced practice nurse case manager or clinical nurse leader student will gain understanding of the development of health care policy and the ethical, political, economic, sociocultural, and technological forces influencing the delivery of care.

NUR503 Nursing Informatics in Healthcare
Hours 3
This required course focuses on the ethical management of data, information, knowledge, and technology to communicate and deliver safe quality healthcare within and across various healthcare settings. This course incorporates the concepts of nursing science, computer science and information science with information technology tools commonly found in practice. Students are introduced to the nursing informatics specialty and the use of technology to augment nursing care delivery and patient safety.
Prerequisite(s): Admission to MSN Program
Prerequisite(s) with concurrency: NUR 501 and NUR 529

NUR504 Rural Health Inter-Professional
Hours 2
The focus is on working with inter-professional educational teams to meet the complex and multidimensional needs of Veterans and rural populations.
Prerequisite(s): none

NUR505 Advanced Health Assessment
Hours 3
This course will assist the graduate nursing student to further develop health assessment skills for obtaining and recording a systematic health history as well as advanced holistic health assessment of individuals across the life span.
Prerequisite(s): Admission to MSN Program
Prerequisite(s) with concurrency: NUR 501 and NUR 503 and NUR 529

NUR509 Evolution of Palliative Care and the Impact on Multiple Chronic Conditions
Hours 3
An introduction to the nation’s changing healthcare environment and the importance of integrating palliative care principles into primary care. The topics include a review of the complex healthcare environment in the United States as related to managing patients with serious illness and/or Multiple Chronic Conditions (MCCs). Specifically, this includes an overview of the current barriers preventing palliative care access and an analysis of the financial impact of multiple chronic disease and patient outcomes. This course concentrates on exploring how interprofessional palliative care strategies can be employed in primary care settings in order to improve patient outcomes.

NUR510 Basic Concepts of Teaching Diabetes Self-Management Techniques
Hours 3
This online elective course is open to any graduate student in the health or social sciences. The course focuses on: Diabetes Self-Management Techniques (DSMT) and instructs the provider in what manner to impart information that has immediate application for people living with diabetes. The course focuses on application of clinical guidelines for exercise and fitness, nutrition and diet, and the techniques, products, and strategies that help patients learn diabetes self-management techniques that empower them to take charge of their well-being and live healthier lives.
Prerequisite(s): Premission by Instructor
NUR511 Advanced Practice Nursing: Issues in the Care of Older Adults  
Hours 3  
This is a elective graduate nursing course. The focus of this course is to delve into multiple issues of concern for all older adults and their families. By exploring the greatly varied expectations for well and complicated aging, the student will develop an appreciation for the vast array of issues affecting older adults and the multiple transitions they experience.

NUR513 Special Topics  
Hours 1-4  
This course focuses on selected MSN topics under the sponsorship of a nursing faculty member with relevant expertise.

NUR516 Advanced Diabetes Management: An interdisciplinary approach across the lifespan  
Hours 3  
This online elective course is open to any graduate student in the health or social sciences. The course focuses on the primary, secondary, and tertiary prevention and management of diabetes mellitus offering expanded content suitable to students pursuing graduate study in nursing, medicine, nutrition, and other social sciences. Building on the basic and advanced science and clinical management courses a multi-disciplinary approach is offered for the prevention of pre-diabetes, metabolic syndrome, type 2 diabetes, management of both types 1 and 2 diabetes mellitus across the lifespan. Special emphasis is placed on the prevention and management of the complications and co-morbid conditions potentially resulting from diabetes mellitus.

Prerequisite(s): PHL 241 OR PHL 242 OR PHL 243

NUR517 Graduate Independent Study  
Hours 1-4  
No description available

NUR518 Social Media for Healthcare  
Hours 3  
This elective course focuses on the use of social media programs and applications within the healthcare setting. This course will equip healthcare providers with the knowledge and skills needed to effectively use social media within their professional settings. Students will be introduced to social media literacy, social media software, and health 2.0. Also, students will discuss guidelines related to social media use within the healthcare setting.

NUR520 Evidence-Based Practice Role and Processes for Case Manager  
Hours 4  
This course includes the professional role of the nurse case manager with rural populations across the lifespan. Emphasis is on the influence of nurse case managers on person(s) outcomes at the systems level. Students will assess complex person(s) demands; plan coordinated, multidisciplinary, evidence-based collaborative approaches to person(s) care; and appraise strategies for evaluation of person(s) outcomes.

Prerequisite(s): NUR 501 and NUR 503 and NUR 505 and NUR 521

Prerequisite(s) with concurrency: NUR 581 and CHS 520 and NUR 522

NUR521 Advanced Pharmacology  
Hours 3  
This course will assist the graduate nursing student to further develop knowledge of evidence-based clinical pharmacology. Course content will include basic principles of pharmacology as they apply to drug therapy across the lifespan. A prototype approach will be used to present content covering selected drugs affecting the peripheral nervous system, central nervous system, cardiovascular system, renal system, endocrine system, immune system, musculoskeletal system, respiratory system, gastrointestinal system, and chemotherapy for infection and cancer.

Prerequisite(s): Admission to MSN Program

Prerequisite(s) with concurrency: NUR 501 and NUR 503 and NUR 529

NUR522 Human Relations Management  
W  
Hours 3  
This required course focuses on establishing relationships with person(s) and families, group dynamics, team building, leadership and management skills, negotiation, human diversity in health and illness, conflict management, and rural health issues relevant for advanced nursing roles of the nurse case manager (NCM), clinical nurse leader (CNL), and nurse practitioner (NP) student. This course carries "W" designation ONLY for the RN/BSN/MSN. It is required for the RN/BSN/MSN students to meet the university's core curriculum requirements for writing (W).

Prerequisite(s): NUR 505

Writing

NUR524 Legal and Ethical Issues in Healthcare  
Hours 3  
This course deals with recognition and analysis of the legal and ethical issues facing healthcare professionals and administrators. Building on theories and processes from business, medicine, nursing and other disciplines, students will develop a systematic approach to resolving ethical and legal conflicts.

NUR525 Evidence-Based Practice Role and Processes for the CNL  
Hours 4  
This course describes the professional role of the clinical nurse leader (CNL) with rural populations across the life span. Emphasis is on the influence of the CNL on person(s) outcomes at both the microsystem level. Students will assess complex person(s) demands, plan coordinated, multidisciplinary, evidence-based collaborative approaches to person(s) care, and appraise strategies for evaluation of person(s) outcomes.

Prerequisite(s): NUR 501 NUR 503 NUR 505 NUR 521

Prerequisite(s) with concurrency: CHS 520 and NUR 581 and NUR 522

NUR526 Evidence-Based Practice Roles and Processes for Nurse Practitioners  
Hours 4  
This course includes the professional role of the nurse practitioner with rural populations across the lifespan. Emphasis is on the influence of nurse practitioners on outcomes at the systems level related to rural populations. Students will assess complex demands; plan coordinated, multidisciplinary, evidence-based collaborative approaches to care; and appraise strategies for evaluation of outcomes.

Prerequisite(s): NUR 501, NUR 503, NUR 505, and NUR 521
NUR527 Evidence-Based Practice Roles and Processes for Nurse Administrators
Hours 4
This course explores the professional role of the nurse administrator. Emphasis is on the influence of nurse administrator on outcomes at the systems level and as related to rural healthcare systems and populations. Students will assess complex system and healthcare facility demands; plan coordinated, multidisciplinary, evidence-based collaborative approaches to systems of care at the administrative level; and appraise strategies for evaluation of outcomes related to or affected by the nurse administrator role.
Prerequisite(s): NUR 501 and NUR 503
Prerequisite(s) with concurrency: NUR 522 and CHS 520 and NUR 581 and NUR 537 and or by permit

NUR529 Advanced Pathophysiology
Hours 3
This course will explore the biologic basis of disease at the cellular, organ and system level with an emphasis on applications for health professionals. It is a required course in the MSN curriculum of the Capstone College of Nursing and may be taken as an elective by graduate biology majors with an interest in health professions based on space available.
Prerequisite(s): Admission to MSN Program
Prerequisite(s) with concurrency: NUR 501 and NUR 503

NUR530 Case Management Practicum
Hours 3,6
This course focuses on the application of the clinical nurse leader's functions of assessing, planning, intervening, monitoring, and evaluating health care in rural communities. Emphasis is placed on implementing a coordinated, evidence-based, interdisciplinary, collaborative, integrated, and cost effective approach to health care with rural populations. Web-based conferences will assist students in the exploration and application of case management issues in self-selected clinical experiences.
Prerequisite(s): NUR 520
Prerequisite(s) with concurrency: NUR 580 and NUR 502

NUR531 Nursing Faculty Roles and Responsibilities
Hours 3
This online course will provide an introduction to the roles and responsibilities of nursing faculty. This course will prepare students to participate in the processes of designing, implementing, and monitoring a nursing curriculum. This course will include roles and responsibilities of faculty in teaching, scholarship, service, and practice.

NUR532 Instructional Media for Nursing Education
Hours 3
This course will provide students with an overview of instructional technology and media that can be used in undergraduate and graduate level instruction in nursing education programs. This course will provide students with skills to begin on site and online instruction. It will explore the use of computers, software, models, simulators, and other instructional media.
Prerequisite(s): AIL 600 and AIL 602
Prerequisite(s) with concurrency: AIL 600 and AIL 602

NUR533 Inquiry into the Cuban Healthcare System
Hours 3
The purpose of this foreign travel experience course is to provide students with firsthand knowledge of the healthcare system in Cuba. Students will visit facilities and community organizations that support the health of individuals and communities. In addition, students will have the opportunity to visit key points of historic interest to further their understanding and develop an increased cultural awareness of Cuban life.

NUR535 Clinical Immersion Experience
Hours 3,6
This course focuses on the application of the clinical nurse leader's functions of assessing, planning, intervening, monitoring, and evaluating health care in rural communities. Emphasis is placed on implementing a coordinated, evidence-based, interdisciplinary, collaborative, integrated, and cost effective approach to health care with rural populations. Web-based conferences will assist students in the exploration and application of care management issues in self-selected clinical experiences.
Prerequisite(s): NUR 525
Prerequisite(s) with concurrency: NUR 580 and NUR 502

NUR537 Nurse Administrator: Practicum I
Hours 4
This course provides the opportunity to experience the role of nurse administrator. An individualized nursing administration practicum in a specific area of clinical emphasis is chosen by the student, and monitored by the faculty and clinical preceptor. Competencies that govern the role of the nurse administrator are explored in depth. Students focus on the context for enacting the role of nurse administrator in a healthcare delivery system, and how rurality and related concepts may affect this role. Students engage in a reflective discussion of nursing administration issues and experiences in the didactic portion of this course. This course requires completion of 180 hours of clinical practicum experience.
Prerequisite(s): NUR 501 and NUR 503
Prerequisite(s) with concurrency: NUR 502 and NUR 527 and Or by permit

NUR538 Nurse Administrator: Practicum II
Hours 4
This course was designed as the second part of a two part nurse administrator practicum series. It will address core competencies of the nurse administrator through one hour of didactic material and three hours of clinical practicum. Students will have an intensive clinical immersion experience that fully embraces the various roles, functions and expectations of the successful nurse administrator in today's dynamic healthcare environment. The clinical preceptor experience established in NUR 537: Nurse Administrator Practicum I will be continued as students will have the opportunity to build upon previously learned concepts to fully integrate and apply them in practice. Students will be expected to complete 180 clock hours of relevant clinical practicum experience with an approved preceptor.
Prerequisite(s): NUR 501, NUR 502, NUR 503, NUR 527, and NUR 537
NUR540 Nurse Educator Practicum
Hours 3-6
This course focuses on the application of the nurse educator’s functions of assessing, planning, intervening, monitoring, and evaluating nursing education in the academic environment. Emphasis is placed on implementing a coordinated, interdisciplinary, collaborative, technologically appropriate and integrated approach to nursing curriculum, design, implementation and evaluation. Web-based conferences will assist students in the exploration and application of teaching and learning issues in self-selected academic experiences.
Prerequisite(s): NUR 531 and NUR 532
Prerequisite(s) with concurrency: NUR 531 and NUR 532

NUR580 Fiscal Resource Management
Hours 3
This course addresses principles of fiscal resources management and their application to case management or clinical nurse leader role. Concepts include cost analysis, budgeting, contract development, financial aspects of program development and evaluation, and cost accounting and tracking for rural populations.
Prerequisite(s): CHS 520 and NUR 581
Prerequisite(s) with concurrency: NUR 505

NUR581 Research and Statistics for Health Professional
Hours 3
This course prepares students to evaluate research methods, designs, instruments, and statistics used in health research. Research ethics, outcomes research, and evidence-based practice are explored. Students will critique research literature and prepare a research overview relevant to their practice area.
Prerequisite(s): NUR 501 and NUR 503 and NUR 529
Prerequisite(s) with concurrency: CHS 520

NUR582 Psychiatric Treatment Modalities
Hours 2
This course provides a theoretical basis to help the nurse practitioner student determine, select, implement, and evaluate different types of psychiatric treatment modalities for persons across the lifespan, who are experiencing a psychiatric illness. Admission in Nurse Practitioner concentration.
Prerequisite(s): Admission in Nurse Practitioner Concentration
Prerequisite(s) with concurrency: NUR 585

NUR585 Psychiatric Mental Health Nurse Practitioner I
Hours 4
In this course, the student will learn how to critically appraise theoretical approaches for psychotherapeutic interventions with adult patients and families in rural areas. This course provides a theoretical basis for advanced practice in Psychiatric Mental Health Nursing. This course will also provide the student with an understanding of the dynamics, epidemiology, and treatment of selected psychopathology, specifically focused on the adult patient. In addition, the role of the PMHNP in the assessment, diagnosis, and treatment of adult patients with mental disorders will be explored. Students must complete 150 clinical rotation hours providing psychopharmacotherapeutic and psychotherapeutic interventions to adults and families within the semester in which the course is taken.
Prerequisite(s) with concurrency: NUR 586

NUR586 Family Nurse Practitioner I
Hours 4
This course provides a theoretical and evidenced based foundation for advanced practice as a Family Nurse Practitioner (FNP). The focus is on identifying and managing common acute, episodic and multiple chronic conditions in the adult client. Health promotion and disease prevention strategies for the adult are emphasized. Nurse Practitioner role functions in primary care are explored through clinical experiences with diverse rural populations. Students must complete 150 clinical rotation hours working with adults and families within the semester in which the course is taken.
Prerequisite(s) with concurrency: NUR 585

NUR587 Psychiatric Mental Health Nurse Practitioner II
Hours 4
Provides the student with an understanding of the treatment of selected psychopathology. The role of the advanced psychiatric mental health nurse practitioner in the assessment, diagnosis, and treatment of child/adolescent (birth to age 17) patients and families in rural settings will also be explored. This course will also examine treatment modalities for advanced practice psychiatric mental health nursing, specifically with children and adolescents. In addition, this course will provide advanced knowledge of psychobiological information in conjunction with the use of psychopharmacological and psychotherapeutic interventions with child/adolescent patients. Students must complete 150 clinical rotation hours working with children and families within the semester in which the course is taken.
Prerequisite(s): NUR 585 and NUR 586
Prerequisite(s) with concurrency: NUR 588
NUR588 Family Nurse Practitioner II
Hours 4
This course provides a theoretical and evidenced based foundation for advanced practice as a Family Nurse Practitioner (FNP) caring for women and children. The focus is on identifying and managing common acute, episodic, and multiple chronic conditions experienced by women and children. Health promotion and disease prevention strategies for women and children are emphasized. Nurse Practitioner role functions in primary care are explored through clinical experiences with diverse rural populations. Students must complete 150 clinical rotation hours within the semester in which the course is taken# 70 hours in Pediatrics and 80 hours in OB/GYN.
Prerequisite(s): NUR 585 and NUR 586
Prerequisite(s) with concurrency: NUR 587

NUR589 Psychiatric Mental Health Nurse Practitioner Residency
Hours 3
Provide the nurse practitioner student with the opportunity to completely immerse in the role of the Psychiatric Mental Health Nurse Practitioner (PMHNP). Students will engage in the practice, management, and treatment of rural children, adolescents, adults and/or geriatric individuals and families experiencing mental health needs. The student will demonstrate the ability to utilize psychopharmacological and psychotherapeutic (individual, family and group) interventions in a wide range of clinical settings. Students must complete 225 psychiatric mental health clinical rotation hours treating patients across the lifespan while offering opportunities for board certification exam preparation.
Prerequisite(s): NUR 585
Prerequisite(s) with concurrency: NUR 587

NUR590 Family Nurse Practitioner Residency
Hours 3
Provide the student with the opportunity to completely immerse in the role of the Family Nurse Practitioner. Students will engage in the practice, management, and treatment of rural individuals and families experiencing primary care needs. Students must complete 225 clinical rotation hours in primary care treating patients across the lifespan.
Prerequisite(s): NUR 586 and NUR 588

NUR599 Master's Thesis
Hours 3-6
This course is designed to assist the student in selecting a foundational area of inquiry or phenomenon of interest, and creating original scholarship written under the direction of the faculty advisor. It is expected that the project will culminate in the production of a research product (thesis) that evidences originality, appropriate organization, clarity of purpose, critical analysis, and accuracy and completeness of documentation. The work shall involve an analysis or study related to a professional nursing phenomenon of interest such as, but not limited to: direct patient care concerns, systems level quality improvement, healthcare policy, or nursing administration.

NUR620 Curriculum Theory & Practice
Hours 3
This is primarily an online, web-based course. It critically examines historical and contemporary discourses necessary to understand curriculum as a synergetic field of study and an area of professional practice. Factors related to organizing curriculum will be considered based on analysis, interpretation and synthesis of contextual data. Students will determine directions, outcomes, and goals for curriculum and course design. Methods for curriculum evaluation and a dashboard for successful implementation will be emphasized. Students will demonstrate their ability to develop and critique curriculum in the context of instruction through reflection, observation, documentation, and descriptive analysis and to relate ethical, moral, and social justice concerns to curriculum practice.
Prerequisite(s): NUR 531

NUR696 Doctoral Seminar in Research
Hours 3
Students are expected to utilize knowledge from quantitative methodology and statistics in this course. The seminar will provide students with opportunities to synthesize knowledge gained in this and other courses in order to address topics of for research in nursing education.

NUR700 Clinical Data Management and Analysis
Hours 3
This required course provides students with the knowledge base to understand, collect, manage, and measure clinical data. Students will explore data collection and management processes, levels of measurement, basic statistics, and measurement for improvement in order to effectively use clinical data. Data entry exercises employed through analytical tools and statistical software packages will allow the students practice and apply the basic data management and analysis skills needed for the evaluation of clinical data and evidence-based practice.
Prerequisite(s): Admission to DNP Program
Prerequisite(s) with concurrency: NUR 701

NUR701 Writing for Publication
Hours 3
This course concerns the development of skills in writing, editing, and preparing manuscripts for publication from initial idea to submission of a publishable manuscript. The course emphasizes a writing process that encourages productivity and collegial peer review. Legal and ethical aspects of authorship prepare students for responsible practices expected of scholars. Students should have mastered basic writing skills, e.g., grammar, syntax, and computer skills, prior to enrolling in this course.
Prerequisite(s): Admission to DNP Program
Prerequisite(s) with concurrency: NUR 701

NUR713 Special Topics
Hours 1-4
This course focuses on selected DNP topics under the sponsorship of a graduate nursing faculty member with relevant expertise.
The University of Alabama 2018-2019  573
NUR742 Program Evaluation and Methods
Hours 3
The purpose of this course is to synthesize knowledge related to translational/implementation science models and strategies to improve health outcomes. The emphasis in the course is the use of program evaluation as a strategic planning tool to achieve positive changes in health status, to initiate quality improvement, to engage in risk anticipation, management and to facilitate organizational and system level changes.
Prerequisite(s): NUR 700 NUR 729 NUR 743

NUR743 Evidence Based Practice Strategies
Hours 3
NUR 743 is a required core Doctor of Nursing Practice Program course, which expands on foundational evidence-based practice concepts to refine a problem statement and derive a searchable and answerable clinical question. Content includes conducting a systematic review of the literature to guide the selection of methods, strategies, tools and metrics needed to complete a successful scholarly project. The course also addresses targeted strategies for disseminating evidence associated with scholarly projects.
Prerequisite(s): NUR 731 NUR 729

Doctor of Nursing Practice (DNP)
The DNP is a practice doctorate in nursing which prepares graduates to function at the highest level of nursing practice. Entry into the program is available every fall. Graduates of the DNP program focus on providing care with an emphasis on improving quality and access to underserved and diverse populations. Graduates employ abilities and skills in these areas to advocate for reasonable, rational, and data-driven health regulations, standards, and practices; sustain collaborative and strategic relationships; promote innovative, effective health care programs; and form partnerships with diverse groups to address health disparities.
Two pathways to the DNP degree are available, post-baccalaureate and post-master’s. The post-baccalaureate pathway admits BSN-prepared nurses to the DNP program with three concentrations: Family Nurse Practitioner (FNP), Psychiatric Mental Health Nurse Practitioner (PMHNP), or dual nurse practitioner specialization in Psychiatric Mental Health and Family Nurse Practitioner and is currently available to Alabama, Florida, Georgia, and Mississippi residents only. The post-master’s DNP pathway admits advanced practice nurses (nurse practitioners, nurse anesthetists, nurse midwives, and clinical nurse specialists) and nurse executives. Certification in one of the roles listed is required prior to completing 12 credit hours in the program.

3.0 grade point average, based on a 4.0 grading scale

Admission Requirements for the Post-Baccalaureate to Doctor of Nursing Practice Pathway
Admission requirements are consistent with those of the Graduate School. Applicants for the Post-Baccalaureate to Doctor of Nursing Practice (DNP) pathway will be considered on a competitive basis.
The following are requirements for admission:

1. For unconditional admission, a grade point average of at least 3.0 overall (based on a 4.0 grading scale) and 3.0 for the last 60 semester hours of undergraduate work is required.
2. Baccalaureate degree in nursing from a school of nursing that is both regionally and CCNE or CNEA accredited.
3. Current unencumbered RN licensure in Alabama, Florida, Georgia, or Mississippi.
4. Final admission is contingent upon drug and background screen results that are deemed acceptable by appropriate University officials.

Admission Requirements for the Post-Master's to Doctor of Nursing Practice Pathway
Admission requirements are consistent with those of the Graduate School. Applicants for the Post-Master’s to Doctor of Nursing Practice (DNP) pathway will be considered on a competitive basis. The following are requirements for admission:

1. A 3.0 grade point average, based on a 4.0 system in a completed graduate degree.
2. Master’s degree in nursing in an advanced nursing practice area from a regionally and CCNE or CNEA accredited school of nursing.
3. Advanced practice national certification or eligibility to sit for advanced practice national certification, and must pass certification exam prior to completing 12 credit hours of DNP coursework. Students who are not yet certified will only be considered for conditional admission.
4. Current unencumbered RN licensure in a state approved for admission. Click Here to view the states from which the College of Nursing accepts applications for admission.

5. Final admission is contingent upon drug and background screen results that are deemed acceptable by appropriate University officials.

See the Admission Criteria section of this catalog for more information.

The Doctor of Nursing Practice degree will be awarded to the student who has met the following requirements:

- GPA of 3.0 or higher
- good standing at the time of graduation
- successful completion of the scholarly project
- successful completion of the required coursework and scholarly project hours/ practice immersion experience
- attendance at one (1) DNP Intensive during program

**Transfer of Credit**

Acceptable graduate credit, earned in a regionally and CCNE or CNEA accredited institution in which the student was enrolled in the graduate school, may be transferred and applied to the requirements for a doctoral degree. Only credit that was earned during the six-year period (18 fall, spring, and summer semesters) preceding admission to the DNP program may be considered for transfer. Evaluation of credit for transfer will not be made until the student has enrolled in the Graduate School of The University of Alabama. Credit will not be accepted from any institution at which the student failed to achieve a “B” average on all graduate work attempted. A student initiates at the Office of the Graduate School the request for evaluation of graduate credit obtained at another institution. The student must also ensure that the Office of the Graduate School has an official (not faxed or copied) transcript of the credit involved. With the approval of the student’s department and the Dean of the Graduate School, may be transferred and applied to the requirements for a doctoral degree. Only credit that was earned during the six-year period (18 fall, spring, and summer semesters) prior to the date of the student’s admission to the DNP program has been earned no more than six years (18 consecutive fall, spring, and summer semesters) preceding admission to the DNP program.

**Clinical Hours for Degree Completion**

A minimum of 1000 post-baccalaureate practice hours are required for completion of the DNP degree. Students who do not have sufficient clinical hours will be required to complete additional clinical hours as determined by the Assistant Dean of the Graduate Programs prior to the beginning of DNP courses. In such cases, 60 clinical hours are the equivalent of 1 semester credit hour.

**Time limit for doctoral study**

Doctoral programs of study may include appropriate coursework that has been earned no more than six years (18 consecutive fall, spring, and summer semesters) prior to the date of the student’s admission to the doctoral program. All degree requirements must be completed within seven years (21 consecutive fall, spring, and summer semesters) of the date of the student’s admission to the doctoral program.

**Residency/Immersion**

The DNP program has a practice-based residency/practice immersion experience. The student fulfills the experience requirement while satisfactorily completing the practice-focused, comprehensive, scholarly project in the final semester of the program. NUR 739 Scholarly Practice Project is a 7 credit hour course (420 clinical hours). Note that this is in addition to 120 hours of clinical time in NUR 738.

Additional information is in the Degree Requirements section below.

**Curriculum**

The Post-Master’s to DNP pathway can be completed in a minimum of five semesters of full-time study and a minimum eight semesters of part-time study.

**Post-Master’s to Doctor of Nursing Practice Pathway**

**Full-time Post-master’s to DNP Program of Study**

A minimum of 7 credit hours in NUR 739 Scholarly Practice Project is required to complete the Scholarly Project. If NUR 739 requirements are not satisfied by completion of 7 credit hours, then the student must enroll in subsequent semesters for at least 1 credit hour of NUR 739 until project completion/graduation. At least 1 hour of NUR 739 is required the semester the student will graduate.

**Family Nurse Practitioner Certificate**

Currently only residents of Alabama, Florida, Georgia, and Mississippi are eligible for the Nurse Practitioner certificate.

The nurse practitioner postgraduate certificate program builds on the graduate level nursing competencies and knowledge base. Nurses who are already prepared at either the master’s or doctorate level may apply for the postgraduate certificate program with advanced specialization as a family nurse practitioner. Students in the postgraduate certificate program will enroll in existing nurse practitioner population-focused courses, but they will not be required to complete master’s graduate nursing core courses, such as informatics or theory, or direct care core courses (e.g., advanced pathophysiology [across the lifespan], advanced health assessment [across the lifespan], and advanced pharmacology) if they were completed in a prior master’s or doctoral program.

**Admission Requirements for the Post-Graduate Certificate: Family Nurse Practitioner**

Admission requirements are consistent with those of the Graduate School. Applicants for the nurse practitioner post-graduate certificate will be considered on a competitive basis. Nurses who are interested in the nurse practitioner post-graduate certificate are encouraged to contact the Capstone College of Nursing (CCN) Graduate Recruitment and Retention Liaison.

Currently only residents of Alabama, Florida, Georgia, and Mississippi are eligible for the Nurse Practitioner certificate.

The following are requirements for admission:

- For unconditional admission, a grade point average of at least 3.0 overall (based on a 4.0 grading scale) and 3.0 for the last 60 semester hours of undergraduate work is required.
- Baccalaureate degree in nursing from a school of nursing that is both regionally and CCNE or CNEA accredited.
- Current unencumbered RN licensure in Alabama, Florida, Georgia, or Mississippi.
- Final admission is contingent upon drug and background screen results that are deemed acceptable by appropriate officials.

**Application for Certificate**

Candidates must apply in writing to the Senior Associate Dean for Academic Programs in the Capstone College of Nursing one semester before completion of certificate requirements is anticipated.

**Nursing Case Management Certificate**

Click here to view the states from which the Capstone College of Nursing currently accepts applications for admission.

The post-master’s certificate program in Nursing Case Management, which is based on the MSN program, is designed to prepare nurses to practice as case managers for rural populations. Nurses who are already prepared at the master’s level for roles such as nurse practitioners, clinical specialists, or nurse administrators and who need case management knowledge and expertise to enact the case manager role can apply for the post-master’s certificate program. Students in the post-master’s certificate program will enroll in the existing case management courses, but they will not be required to complete the nursing core courses, such as research and theory, if they were completed in the master’s program.

**Admission Requirements**

Admission requirements are consistent with those of the Graduate School. Applicants for the post-master’s certificate in Nursing Case Management will be considered on a competitive basis. Nurses who are interested in the Post-Masters Certificate in Nursing Case Management are encouraged to contact the Capstone College of Nursing (CCN) Graduate Recruitment and Retention Liaison.

The following are requirements for admission:

1. Master’s degree in nursing from a regionally and CCNE or CNEA accredited graduate program in nursing or a master’s degree in a health-related field with a baccalaureate degree in nursing from an accredited program.
2. For unconditional admission, a grade point average of at least 3.0 overall (based on a 4.0 grading scale) or 3.0 for the last 60 semester hours of graduate work is required.
3. For conditional admission, a grade point average of at least 2.5 overall (based on a 4.0 grading scale) for undergraduate work, and a
score of at least 300 on the GRE general test OR at least in the 40th percentile on the Miller Analogies Test (MAT) is required.

4. Current unencumbered RN licensure in the United States. Click here to view the states from which the Capstone College of Nursing currently accepts applications for admission.

5. Final admission is contingent upon drug and background screen results that are deemed acceptable by appropriate officials.

See the Admission Criteria section of this catalog for more information.

Total Hours: 16

The student’s transcript and portfolio will be assessed for the following courses or proven expertise. In the absence of transcript credit or expertise evidenced via the portfolio, the below courses must be completed.

Nursing, MSN

Since its inception, the graduate program has sought out excellent nurses in pursuit of advanced nursing education. Baccalaureate-prepared nurses have the option of multiple concentrations in the Master’s of Science in Nursing (MSN) program: Nurse Case Manager, Clinical Nurse Leader, Nurse Administrator, Family Nurse Practitioner, Psychiatric Mental Health Nurse Practitioner, and Dual Psychiatric Mental Health and Family Nurse Practitioner. A post-master’s certificate in Nursing Case Management is also available. In addition, there is a postgraduate certificate program with Family Nurse Practitioner and Psychiatric Mental Health Nurse Practitioner options. For the registered nurse (RN) who holds an associate degree in nursing and meets the required admission criteria, we offer an RN to BSN program (p. 932) with a pathway to the MSN program.

Admission Requirements

Applicants for the Master’s of Science in Nursing (MSN) degree program will be considered on a competitive basis. The following are requirements for admission into all graduate level nursing programs, but a complete description of Graduate School Admission Criteria (p. 11) is found in the Graduate Catalog.

The graduate faculty of the Capstone College of Nursing (CCN) has identified the skills and professional behaviors that are essential to pursue a course of study and to practice in Clinical Nurse Leader, Nurse Case Manager, Nurse Administrator, or Nurse Practitioner roles. These skills include but are not limited to the skills presented in The Essentials of Master’s Education in Nursing (2011), a publication of the American Association of Colleges of Nursing. If these skills and professional behaviors cannot be developed by the individual, either unassisted or with the dependable use of assistive devices, the faculty reserves the right to decline an individual’s admission or to disenroll the student from clinical courses. A copy of The Essentials of Master’s Education in Nursing (2011) is available upon request from the College’s Program Records Office.

Admission Requirements for Nurse Case Manager, Clinical Nurse Leader, and Nurse Administrator Concentrations

Admission requirements are consistent with those of the Graduate School. Applicants for the MSN Program will be considered on a competitive basis. Nurses who are interested in the Nurse Case Manager, Clinical Nurse Leader, and Nurse Administrator concentrations are encouraged to contact the Graduate Recruitment and Retention Liaison.

The following are requirements for admission:

- For unconditional admission, a grade point average of at least 3.0 overall (based on a 4.0 grading scale) or 3.0 for the last 60 semester hours of undergraduate work is required.
- For conditional admission, a grade point average of at least 2.5 overall (based on a 4.0 grading scale) for undergraduate work, and a score of at least 300 on the revised Graduate Record Exam (GRE) OR at least in the 40th percentile on the Miller Analogies Test (MAT) is required.
- Baccalaureate degree in nursing from a school of nursing that is both regionally and CCNE or CNEA accredited.
- Current unencumbered RN licensure in the United States.
- Final admission is contingent upon drug and background screen results that are deemed acceptable by appropriate officials.

Admission Requirements for Nurse Practitioner Concentrations

Admission requirements are consistent with those of the Graduate School. Applicants for the MSN Program will be considered on a competitive basis. Nurses who are interested in the Nurse Practitioner Concentrations are encouraged to contact the Graduate Recruitment and Retention Liaison.

Currently only residents of Alabama, Florida, Georgia, and Mississippi are eligible for the Nurse Practitioner concentrations.

The following are requirements for admission:
The Capstone College of Nursing offers the distance-based MSN program with all courses offered online. The Nurse Case Manager concentration prepares nurses to assume leadership positions in health care administration and to coordinate and administer case management services at the macrosystems level. Case management has been defined as a "collaborative process which assesses, plans, implements, coordinates, monitors and evaluates options and services to meet an individual's health needs through communication and available resources to promote quality, cost-effective outcomes." 1 Graduates of this program will be able to practice in a variety of settings, assuming leadership positions in health care organizations.

Note: This program requires a clinical practicum (540 practicum hours) and it is the student's responsibility to identify a site with an appropriate clinical preceptor. Prior to the clinical practicum the student will start the process of obtaining a CCN Letter of Agreement (LOA) or a Clinical Affiliation Agreement with the agency. No clinical practice will take place until the student has been notified by CCN of approval.

Degree Requirements
The MSN degree will be awarded to the student who has met the following requirements:

• GPA of 3.0 or higher
• Good standing at the time of graduation
• Successful completion of the required coursework

Students may choose to complete a thesis as described below:

Thesis option
A thesis is original research conducted by one student and directed by a graduate committee. The student is awarded six semester hours of thesis credit for a successfully completed thesis. An oral public defense of the thesis is required. The thesis must conform to the guidelines of the Graduate School.

Curriculum
The MSN program with a Nurse Case Manager concentration can be completed in one year of full-time study or two or more years of part-time study.

Master's of Science in Nursing Program: Clinical Nurse Leader

Click here to view the states from which the Capstone College of Nursing currently accepts applications for admission.

The Capstone College of Nursing offers the distance-based MSN Program with all courses offered online. The Clinical Nurse Leader (CNL) is a master's prepared generalist, accountable for clinical and health care environmental outcomes. The CNL functions at the microsystem level; oversees care coordination of a distinct group of patients; serves as a
resource for clinical decision making, and serves as a lateral integrator of care. The CNL puts evidence-based practice into action, collects and evaluates patient outcomes, assesses cohort risk and has the decision-making authority to change care plans when necessary.

This clinician functions as part of an interprofessional team by communicating, planning and implementing care directly with other health care professionals. The CNL is a leader in the health care delivery system across all settings in which health care is delivered. Upon certification, the CNL may assume this role in a variety of health care settings.

**Note:** This program requires a clinical immersion (540 clinical immersion hours) and it is the student's responsibility to identify a site with an appropriate clinical preceptor. Prior to the clinical immersion the student will start the process of obtaining a CCN Letter of Agreement (LOA) or a Clinical Affiliation Agreement with the agency. No clinical practice will take place until the student has been notified by CCN of approval.

### Degree Requirements

The MSN degree will be awarded to the student who has met the following requirements:

- GPA of 3.0 or higher
- Good standing at the time of graduation
- Successful completion of the required coursework

Students may choose to complete a thesis as described below:

#### Thesis option

A thesis is original research conducted by one student and directed by a graduate committee. The student is awarded six semester hours of thesis credit for a successfully completed thesis. An oral public defense of the thesis is required. The thesis must conform to the guidelines of the Graduate School.

### Curriculum

The MSN program with a CNL concentration can be completed in one year of full-time study or two or more years of part-time study.

### Master's of Science in Nursing Program: Nurse Practitioner Concentrations

*Click here to view the states from which the Capstone College of Nursing currently accepts applications for admission.*

**NOTE:** Currently, only baccalaureate prepared registered nurses who are residents of Alabama, Florida, Georgia, and Mississippi are eligible for admission to Nurse Practitioner (NP) concentrations.

The Capstone College of Nursing (CCN) offers the online MSN degree with the following NP concentrations: Family Nurse Practitioner, Psychiatric Mental Health Nurse Practitioner, and Dual Psychiatric Mental Health and Family Nurse Practitioner. Students complete coursework online and attend two on-campus sessions during their program of study. Students are expected to find clinical sites and preceptors; however, CCN will assist students with this process to secure a CCN Letter of Agreement (LOA) or Clinical Affiliation Agreement with the healthcare agency. No clinical practice will take place until the student has been notified by CCN of approval.

Nurse Practitioners are health promotion and disease prevention experts who manage and diagnose acute and chronic illnesses. Nurse Practitioners provide quality, safe, cost-effective care. Services provided by NPs include, assessing, diagnosing, treating, and managing patients’ health care needs.

### Degree Requirements

The MSN degree will be awarded to the student who has met the following requirements:

- GPA of 3.0 or higher
- Good standing at the time of graduation
- Successful completion of the required coursework
Students may choose to complete a thesis as described below:

**Thesis option**
A thesis is original research conducted by one student and directed by a graduate committee. The student is awarded six semester hours of thesis credit for a successfully completed thesis. An oral public defense of the thesis is required. The thesis must conform to the guidelines of the Graduate School.

**Curriculum**
The MSN Program with a Nurse Practitioner concentration can be completed in two years or less of full-time study.

### Master's of Science in Nursing: Nurse Administrator

**Click here to view the states from which the Capstone College of Nursing currently accepts applications for admission.**

The Capstone College of Nursing offers the distance-based MSN program with all courses offered online. The Nurse Administrator concentration is intended to prepare a nurse leader by providing advanced education in health care finance, shared governance, and emerging leader competencies. Nurse administrators manage several departments or entire organizations. Nurse administrators hold a variety of executive level positions, including director of nursing services, clinical coordinator, and chief nurse executive. They oversee several departments and report directly to senior leadership. A nurse administrator concentrates primarily on policy and organizational operations issues such as nursing shortages and spends a majority of time attending meetings, preparing reports, and developing programs and policies to ensure safety and high quality nursing care. Nurse administrators are less likely to deal directly with patients or family members, instead supervising mid-level managers and working with fellow members of the senior leadership team.

**Note:** This program requires a clinical practicum (540 clinical practicum hours) and it is the student's responsibility to identify a site with an appropriate clinical preceptor. Prior to the clinical practicum, the student will start the process of obtaining a CCN Letter of Agreement (LOA) or a Clinical Affiliation Agreement with the agency. No clinical practice will take place until the student has been notified by CCN of approval.

#### Degree Requirements

The MSN degree will be awarded to the student who has met the following requirements:

- GPA of 3.0 or higher
- Good standing at the time of graduation
- Successful completion of the required coursework

Students may choose to complete a thesis as described below:

#### Thesis option

A thesis is original research conducted by one student and directed by a graduate committee. The student is awarded six semester hours of thesis credit for a successfully completed thesis. An oral public defense of the thesis is required. The thesis must conform to the guidelines of the Graduate School.

#### Curriculum

The MSN program with a Nurse Administrator concentration can be completed in one year of full-time study or two years of part-time study.

Psychiatric Mental Health Nurse Practitioner Certificate

Currently only residents of Alabama, Florida, Georgia, and Mississippi are eligible for the Nurse Practitioner certificate.

The nurse practitioner postgraduate certificate program builds on the graduate level nursing competencies and knowledge base. Nurses who are already prepared at either the master’s or doctorate level may apply for the postgraduate certificate program with advanced specialization as a psychiatric mental health nurse practitioner. Students in the postgraduate certificate program will enroll in existing nurse practitioner population-focused courses, but they will not be required to complete master’s graduate nursing core courses, such as informatics or theory, or direct care core courses (e.g., advanced pathophysiology [across the lifespan], advanced health assessment [across the lifespan], and

1 These courses require a field placement component and it is the student’s responsibility to secure a site for the field placement.
advanced pharmacology) if they were completed in a prior master’s or doctoral program.

Admission Requirements for the Postgraduate Certificate: Psychiatric Mental Health Nurse Practitioner

Admission requirements are consistent with those of the Graduate School. Applicants for the nurse practitioner postgraduate certificate will be considered on a competitive basis. Nurses who are interested in the nurse practitioner postgraduate certificate are encouraged to contact the Capstone College of Nursing (CCN) Graduate Recruitment and Retention Liaison.

Currently only residents of Alabama, Florida, Georgia and Mississippi are eligible for the Nurse Practitioner certificate.

The following are requirements for admission:

- For unconditional admission, a grade point average of at least 3.0 overall (based on a 4.0 grading scale) and 3.0 for the last 60 semester hours of undergraduate work is required.
- Baccalaureate degree in nursing from a school of nursing that is both regionally, and CCNE or CNEA accredited.
- Current unencumbered RN licensure in Alabama, Florida, Georgia, or Mississippi.
- Final admission is contingent upon drug and background screen results that are deemed acceptable by appropriate officials.

Application for Certificate

Candidates must apply in writing to the Senior Associate Dean for Academic Programs in the Capstone College of Nursing one semester before completion of certificate requirements is anticipated.

School of Social Work

Degree Programs

Social Work, MSW (p. 588)

The School of Social Work offers a Master of Social Work and two coordinated degree programs. The MSW/MPH is offered in coordination with UAB Public Health. The MSW/JD is offered in coordination with The University of Alabama Law School. More information can be found at the Social Work, MSW page (link above).

Social Work, PhD (p. 596)

The PhD program may be pursued concurrently with the MSW program.

Admission Requirements

Regular Admission

An applicant whose credentials meet both of the following minimum requirements may be considered for regular admission:

1. **GPA requirement:** The applicant must have an undergraduate grade point average of 3.0 overall, 3.0 for the last 60 semester hours in a degree program, or 3.0 for a completed graduate degree program.
2. **GPA Standards:** All applicants must have at least a 2.5 (on a 4.0 scale) overall GPA.
3. **Entrance exam score requirement:** If the undergraduate grade point average is below a 3.0 for both the overall AND last 60 hours, the School of Social Work requires submission of test scores. The applicant must have a 300 on the GRE test or a score at the 50th percentile on the MAT. Admission test scores must be less than five years old. An applicant who wishes to be nominated by his or her department for a Graduate Council Fellowship is strongly encouraged to submit a score on the Graduate Record Examination (GRE) General Test or entrance examination appropriate to the graduate program of interest.

Please note no academic credit, course waivers, or credit for field practicum shall be granted for life experience or previous work experience.

International Admission Requirements

International Student Admission

International students must meet the Graduate School’s requirements for admission (see above), including the equivalent of a four-year bachelor’s degree from an accredited institution.

**Test Scores:** A student whose first language is not English must submit an official score report for the Test of English as a Foreign Language (TOEFL), the Pearson test of English (PTE), or must have earned a degree from an accredited U.S. college or university within the past 3 years.

1. **TOEFL minimum score is a 550 on the paper-based test or a 79 on the internet-based test.**
2. **IELTS minimum score for admission is a 6.5.**
3. **PTE minimum score for admission is a 59.**

Note: Scores must be less than two years old at the time of intended initial enrollment at The University of Alabama.

Please note no academic credit, course waivers, or credit for field practicum shall be granted for life experience or previous work experience.
Program Options: 42 credit hour or 60 credit hour

Advanced Standing (42 credit hour)

- Students holding a Bachelor of Social Work degree from a CSWE accredited institution.
- Admission requires a "B" average or better in all professional foundation Social Work courses including field education, with no more than one "C" in upper level Social Work courses.
- Offered Spring and Summer terms only

Two Year (60 credit hour)

- Students who hold a bachelors degree from a regionally accredited institution.
- Students who do not meet Advanced Standing criteria must apply to the 60 hour program.
- Offered Summer and Fall terms only

Applicants can find more information on program deadlines and application instructions on the School of Social Work website.

Application Fee

The application fee is $60 for U.S. citizens and permanent residents and $75 for international students. The application fee is waived for the following groups:

1. Veterans and current members of the US military (please send Angela Abrams (ayabrams@ua.edu) your DD 214 or current assignment orders as appropriate).
2. Ronald E. McNair Postbaccalaureate Achievement Program students (please contact Angela Abrams (ayabrams@ua.edu) for more details).
3. University of Alabama undergraduates applying to a graduate program in the same subject area. To qualify for this application fee waiver a student must have no time break between the undergraduate and graduate program and have an overall GPA of 3.0 or greater.
4. Applicants who have previously enrolled in Graduate School at The University of Alabama.

Applicants interested in transferring graduate credit to the MSW program from another institution or graduate program must make a formal request after admission to the program. The request is initiated in the Graduate School with the form for Request for Transfer of Graduate Credit. Please note the School of Social Work allows a maximum of 9 hours of transfer work for the 42 hour program and a maximum of 12 hours of transfer work for the 60 hour program upon approval by the program director.

Applicants can find Application Instructions on the School of Social Work website.

Students will have an opportunity to apply for field in both the BSW and MSW programs. We place students using a holistic perspective. Not only do we consider input from students, but we also consult with faculty, advisors, and the Field Committee.

Most students have many questions about practicum. The Field Office is always available to answer questions you may have. If there is anything that is unclear or if you have specific questions regarding your situation, do not hesitate to contact the Field Office.

Field Education Links

Student Information
Washington, D.C Program
SW510 Human Behav Social Envir I  
Hours 3  
Critical concepts, theories, and research related to human biopsychosocial development across the life span; human development and behavior in the environmental contexts of family, groups, organizations, and communities; and the impact of human diversity on human development and behavior. This course is part of a two course sequence and focuses on earlier stages of human development from conception through adolescence.

SW511 Human Behav Social Envir II  
Hours 2  
This course introduces students to an overarching conceptual framework and selected theories for understanding human behavior across the life course. This course is part of a two-course sequence and focuses on the later stages of human development from young adulthood to advanced old age.

Prerequisite(s): SW 510

SW513 Social Work Practice in Health Care  
Hours 3  
This course prepares students for advanced social work practice in health care settings. Using the Life Course Perspective, health and health care issues relevant to health care social work are addressed.

Prerequisite(s): Set 1 (60 hour) SW 500, SW 510, SW 511, SW 534, SW 540, SW 541, SW 542, SW 570 -OR- Set 2 (Advanced) SW 570, SW 577, SW 578, SW 579

SW514 Chem Depend Knowledge Interven  
Hours 3  
This survey course introduces students to major theories of substance use, information concerning the physiological and psychological consequences of this use, and information concerning the effects of this use on families and communities. Selected state, international, and federal policies regarding the control of drugs are reviewed. The course includes an overview of several models of prevention and intervention, with specific attention being paid to their application to special populations such as the homeless, clients from different cultures, and clients of different sexual orientations.

Prerequisite(s): Set 1 (60 hour) SW 500, SW 510, SW 511, SW 534, SW 540, SW 541, SW 542, SW 570 -OR- Set 2 (Advanced) SW 570, SW 577, SW 578, SW 579

SW515 Psychopathology  
Hours 3  
Presents diagnostic criteria used in recognition and treatment of mental disorders, and theory and research on the etiology of these disorders.

Prerequisite(s): Set 1 SW 500, SW 510, SW 511, SW 534, SW 540, SW 541, SW 542, SW 570 -OR- Set 2 (Advanced) SW 570, SW 577, SW 578, SW 579

SW523 Family Preservation  
Hours 3  
Overview of family preservation theory and practice. Students demonstrate skills with high risk children and families in their home setting.

Prerequisite(s): Set 1 (60 hour) SW 500, SW 510, SW 511, SW 534, SW 540, SW 541, SW 542, SW 570 -OR- Set 2 (Advanced Standing) SW 570, SW 577, SW 578, SW 579

SW525 Evaluation Research  
Hours 3  
Students learn to design a practice or program evaluation project, demonstrating the link between designing and conducting research and the practice of social work.

Prerequisite(s): Set 1 (60 hour) SW 500, SW 510, SW 511, SW 534, SW 540, SW 541, SW 542, SW 570 -OR- Set 2 (Advanced) SW 570, SW 577, SW 578, SW 579

SW526 "Isms" & Advocacy In Social Work  
Hours 3  
Introduction to various forms of oppression, social injustice, and advocacy to prevent and intervene.

Prerequisite(s): Set 1 (60 Hour) SW 500, SW 510, SW 511, SW 534, SW 540, SW 541, SW 542, SW 570 -OR- Set 2 (Advanced) SW 570, SW 577, SW 578, SW 579

SW528 Spirituality In Social Work Practice  
Hours 3  
Provides an overview of major issues relevant to spiritually sensitive social work practice with emphasis on the role of spirituality in interventions.

Prerequisite(s): Set 1 (60 Hour) SW 500, SW 510, SW 511, SW 534, SW 540, SW 541, SW 542, SW 570 -OR- Set 2 (Advanced) SW 570, SW 577, SW 578, SW 579

SW529 Advanced Clinical Social Work Practice  
Hours 3  
The course provides advanced level information about the application of selected theoretical frameworks and models of practice, assessment strategies and techniques, the formulation of treatment plans, practice interventions, and practice evaluation.

Prerequisite(s): Set 1 (60 Hour) SW 500, SW 510, SW 511, SW 534, SW 540, SW 541, SW 542, SW 570 -OR- Set 2 (Advanced) SW 570, SW 577, SW 578, SW 579

SW532 Social Work Practice with Adults in Mental Health  
Hours 1-3  
This course emphasizes evidence-based practice models and methods of intervention for effective social work practice with adults experiencing mental health problems.

Prerequisite(s): SW590 or (SW570 and SW577 and SW578 and SW579)

SW533 Models and Methods of Gerontological Social Work Practice  
Hours 1-3  
Focuses on evidence-based practice models and methods of social work intervention with older persons and their families.

Prerequisite(s): SW590 or (SW570 and SW577 and SW578 and SW579)

SW534 Integrative Seminar  
Hours 1  
Integration of foundation course content and field education.

Prerequisite(s): SW 500 and SW 510 and SW 540. Corequisite: SW 590

Prerequisite(s) with concurrency: SW 511 and SW 570 and SW 541 and SW 542
SW536 Social Service Program and Agency Administration  
Hours 3  
Students learn selected theoretical frameworks and apply the knowledge and skills for administration of social service programs and agencies.
Prerequisite(s): Set 1 (60 Hour) SW 500, SW 510, SW 511, SW 534, SW 540, SW 541, SW 542, SW 570 -OR- Set 2 (Advanced) SW 570, SW 577, SW 578, SW 579

SW537 Forensic Social Work  
Hours 3  
This course is designed to provide students with the knowledge and critical thinking skills necessary for specialized practice in the area of forensic social work.
Prerequisite(s): Set 1 (60 Hour) SW 500, SW 510, SW 511, SW 534, SW 540, SW 541, SW 542, SW 570 -OR- Set 2 (Advanced) SW 570, SW 577, SW 578, SW 579

SW540 SW Practice with Individuals and Families  
Hours 1-3  
Theory and practice of social work with individuals and families are explored.
Prerequisite(s) with concurrency: SW 510

SW541 Sw Practice With Groups  
Hours 1-3  
The course provides a framework for systematic study of components and issues involved in the practice of social work with groups.
Prerequisite(s) with concurrency: SW 510

SW542 Social Work Practice with Communities  
Hours 1-3  
Exploration of theories of social work practice for intervention at the community level, including selected macro-models of practice, and community practice within human-service organizations.
Prerequisite(s): SW 510 With Concurrency
Prerequisite(s) with concurrency: SW 510

SW549 Crisis Intervention  
Hours 3  
Focuses on treatment theories and models of intervention that provide a focused approach to the client in crisis.
Prerequisite(s): Set 1 (60 hour) SW 500, SW 510, SW 511, SW 534, SW 540, SW 541, SW 542, SW 570 -Or- SW 570, SW 577, SW 578, SW 579

SW553 Independent Study  
Hours 1-6  
Independent learning experience, under faculty direction, with a contract for an outcome such as a publishable research document.
Prerequisite(s): SW 500,SW 510, SW 511, SW 534, SW 540, SW 541, SW 542, SW 570, SW 577, SW 578, SW 579

SW557 Selected Topics in Social Work Practice  
Hours 3  
Intensive study of an area of or specific approach to social work practice. Topics vary from semester to semester. May be repeated.

SW559 Pediatric Pulmonary Health Care  
Hours 3  
Introduces social work students to pediatric pulmonary diseases and to research literature in this area of health care. Offered according to demand.

SW564 SW Practice in Child and Adolescent Mental Health  
Hours 1-3  
This course emphasizes evidence-based practice models and methods of intervention for effective social work practice with children, adolescents, and their families experiencing mental health problems.
Prerequisite(s): SW590 or (SW570 and SW577 and SW578 and SW579)

SW565 Social Work Practice in Child Welfare and Family Services  
Hours 1-3  
This course emphasizes evidence-based practice models of intervention for effective social work practice in child welfare and family services settings.
Prerequisite(s): SW590 or (SW570 and SW577 and SW578 and SW579)

SW570 Research-Informed Practice  
Hours 3  
This is the first course in a two-course sequence that is designed to enable students to engage in research-informed practice. The MSW themes of evidence-based practice and critical thinking are emphasized in this course. Graduate standing with admission to the MSW Program. With special permission of the Program Chair, graduate students outside the School of Social Work may take this course.

SW576 Intermediate Research  
Hours 3  
Prepares the student to engage in research at a level of sophistication and complexity appropriate for entry in the second-year research course.

SW577 Human Development and Social Systems  
Hours 3  
Provides students with instruction in the major psychological and sociological theories of human behavior that support and enhance social work practice.

SW578 Social Welfare Policy and Delivery Systems  
Hours 3  
Prepares advanced standing students for second-year policy and policy-related courses.

SW579 Social Work Practice  
Hours 1-3  
Designed to provide a foundation for social work practice with individuals, families, groups, and communities, in preparation for second-year practice courses.
SW585 Geriatric Care Management  
Hours 3  
The primary purpose of this course is to provide social workers interested in geriatric care management with the skills and knowledge needed to help prepare and empower family members in meeting the long term care needs of older adults and people with disabilities. The instructor for this course will offer evidenced-based information about how to conduct a care giving assessment and intervention with special attention to the complexities of the current long term care industry in the U.S. and to the many resources available to help care givers at the local and national level. This course provides specialized, yet practical, information designed to help families successfully meet the challenges of filial responsibility and other forms of care giving associated with disability. The specific tasks of care giving are organized into four categories: medical; legal-insurance-financial; family-social; and spiritual-emotional. Each task reflects a real life challenge that potentially comprises an important aspect of a care recipient’s long term care plan. The model of care giving used in this course underscores the importance of timely professional consultation and the supreme value of proactive preparation that values and honors the preferences of aging parents and family members with disabilities.  
Prerequisite(s): Set 1 (60 Hour) SW 500, SW 510, SW 511, SW 534, SW 540, SW 541, SW 542, SW 570 -OR- Set 2 (Advanced) SW 570, SW 577, SW 578, SW 579  

SW589 Social Work Practice in End-Of-Life Care  
Hours 3  
This course provides students with an understanding of the practical and emotional aspects of providing social work services to people who are dying and their families.  

SW590 Field Education I  
Hours 3-9  
Planned field experience in human service programs.  
Prerequisite(s): SW 500, SW 510, SW 540, SW 541, and SW 542  
Prerequisite(s) with concurrency: SW 511, SW 534, SW 570  

SW595 Field Education II  
Hours 3-9  
Placements are individualized according to each student’s concentration, career interest, and educational needs. The time requirements are the same as for SW 590.  
Prerequisite(s): Set 1 (60 hour) (SW532 AND SW533) OR (SW564 AND SW565) AND SW 500, and SW 510, and SW 570, and SW 540, and SW 541, and SW 542, and SW 501cc, and SW 525cc -OR- Set 2 (Advanced) (SW532 AND SW533) OR (SW564 AND SW565) AND SW 570, and SW 577, and SW 578, and SW 579, and SW 501cc, and SW 525cc  
Prerequisite(s) with concurrency: SW 501 and SW 525 and SW 501 and SW 525  

SW600 Soc Work & Welfare State  
Hours 3  
Introduction to needs and opportunities for research in social welfare policy and its implementation, past and present. Examination of the development of the welfare state and current research on social welfare policy and its implementation.  

SW601 Seminar in Doctoral Education  
Hours 1  
Provides students with an introduction to the PhD program, expectations for doctoral-level study, and familiarity with faculty and their research interests.  

SW605 Social Work Education  
Hours 3  
Focuses on the history, current structure, pedagogical theories, and contemporary issues important to social work educators.  
Prerequisite(s): SW 601  

SW620 Social Work Research I  
Hours 3  
Examination of some of the key theoretical issues of qualitative and quantitative social science research and the basic processes of theory formulation and knowledge building.  

SW621 Social Work Research II  
Hours 3  
Continuation of SW 620. Prepares students to design and carry out quantitative, qualitative, and multi-method research appropriate and adequate for answering social work research questions. Focuses on research design, sampling, data collection and analysis, and dissemination of results and conclusions.  
Prerequisite(s): SW 620  

SW622 Instrumentn & Measment  
Hours 3  
Focuses on the theoretical foundations of observation and measurement in social research and on the practical skills for measuring social phenomena, including assessment of the psychometric properties of research instruments and the design of reliable and valid instruments.  

SW623 Sem Qualitative Research  
Hours 3  
Advanced study of key concepts in qualitative research, with applications for social work practice research and evaluation.  

SW626 Seminar in Mixed Methods Research  
Hours 3  
The purpose of this course is to provide in-depth study of mixed methods research to graduate students who are already familiar with quantitative and qualitative research. An introductory phase of the course consists of defining mixed methods research and describing the history and foundations of this form of research. We will then examine the types of mixed methods designs available and discuss the process of research as it relates to each of these designs.  
Prerequisite(s): Completion of SW621 and SW623, or permission of the instructor.  

SW628 Research Practicum  
Hours 3  
Development of a social work research proposal, including the conceptualization of the research question, review of pertinent literature, project administration, arrangements for community collaboration, and IRB approval. Participation in ongoing research under faculty supervision.
SW629 Sp Top Sw Research Method
Hours 3
Study of an advanced quantitative or qualitative method, approach, or technique with emphasis on knowledge-building applications of the method, approach, or technique.

SW640 Concepts Of Practice
Hours 3
Components of social work practice theory, including historical forces shaping conceptualizations of practice, the ideological and epistemological assumptions of both normative and empirical conceptualizations of practice, and the contributions of science and other approaches to knowledge and skill building.

SW648 Sp Top Sel Prof Issues
Hours 3
Integrative seminar on special topics.

SW660 Independent Study
Hours 3
Prerequisite: Completion of the doctoral core courses or permission of the instructor.

SW697 Post-MSW Practice Experience
Hours 6-9
This course provides students in the social work Ph.D. program who hold an MSW the opportunity to obtain practice experience in an educationally and MSW-supervised environment. Students will work up to 20 hours per week in agencies with UA SSW field-office-approved social work supervision. (If students are seeking licensure in addition to post-MSW practice experience, students should be sure to attain appropriate supervision.).
Prerequisite(s): Holding an MSW degree. Completion of at least the first year of doctoral program coursework (22 doctoral program credits).

SW698 Non-Dissertn Research
Hours 1-9
No description available

SW699 Dissertation Research
Hours 1-15
No description available

Social Work, MSW

MSW Program
The mission of the Master of Social Work program at The University of Alabama School of Social Work is to prepare advanced scholar practitioners to improve the lives of individuals and families, enhance community well-being, and advocate for policies that support systemic change.

Graduates of the MSW program will be able to:

• Deliver evidence-based social work practice to diverse client systems.
• Advocate for vulnerable populations at the individual, group, and community levels.
• Engage in culturally competent advanced social work practice with diverse groups.
• Analyze, formulate, and influence organizational and government policies.
• Apply social work values and ethics to practice.

Curriculum
The MSW program is fully accredited by the Council on Social Work Education. The curriculum follows the curriculum policy requirements of the Council on Social Work Education and provides a balanced, integrated approach that includes a professional foundation and a choice of concentrations. The professional foundation curriculum taken the first year consists of coursework in the following:

• Social work practice. This area of the curriculum is designed to provide practice knowledge and competencies in working with individuals, groups, families, communities, and organizations.
• Human behavior and the social environment. This area of the curriculum helps the student to understand the whole person and the process of growth, change, adaptation, social functioning, and dysfunction of the environmental context, including family, groups, formal organizations, and communities. Courses in this area cover prenatal stages through the process of aging.
• Social welfare policy and services. This area of the curriculum is designed to help the student identify, appraise, analyze, and understand social change in its dynamic perspectives; the role and responsibility of social work as a profession in influencing social policy; and the delivery of service to individuals and society.
• Research methods. This area of the curriculum is designed to help the student understand social work and related research and the use of research for the improvement of services to individuals, groups, organizations, and communities.
• Field education. This area of the curriculum provides opportunities for students to integrate and apply knowledge, skills, and values in social work practice context.

MSW Curriculum Themes
The MSW program emphasizes the following five themes underpinning the foundation and the concentration year objectives:

• Life Course Perspective: Social workers understand that the growth and development of individuals, families, groups, organizations, and communities are influenced by a range of psychological, social, historical, political, and economic factors. The interaction of these factors with life events and life transitions contribute to the subsequent outcomes. This theme also serves as the conceptual framework for the entire MSW curriculum.
• Valuing Diversity: Social workers value and work respectfully with people who are different from themselves.
• Critical and Reflective Thinking: Critical and reflective thinking that challenges assumptions, and that is based on evidence to arrive at creative solutions, is the basis for competent social work practice.
• Evidence-Based Practice: Social workers favor interventions with demonstrated effectiveness. They are prepared to carefully evaluate practice and program outcomes.
• Services to the Poor and Underserved: Alabama’s poor and underserved receive social services primarily from public and non-
profit social service agencies. Social workers must be prepared to practice in these contexts and to challenge social injustice.

**MSW Program Foundation Objectives**

Foundation Year MSW students will demonstrate the ability to:

- Apply critical thinking skills within the context of professional social work practice.
- Understand the value base of the profession and its ethical standards and principles, and practice accordingly.
- Practice without discrimination and with respect, knowledge, and skills related to clients’ age, class, color, culture, disability, ethnicity, family structure, gender, marital status, national origin, race, religion, sex, and sexual orientation.
- Understand the forms and mechanisms of oppression and discrimination and apply strategies of advocacy and social change that advance social and economic justice.
- Understand and interpret the history of the social work profession and its contemporary structures and issues.
- Apply the knowledge and skills of generalist social work perspective to practice with systems of all sizes.
- Use theoretical frameworks supported by empirical evidence to understand individual development and behavior across the life span and the interactions among individuals and between individuals and families, groups, organizations, and communities.
- Analyze, formulate, and influence social policies.
- Evaluate research studies, apply research findings to practice, and evaluate their own practice interventions.
- Use communications skills differentially across client populations, colleagues, and communities.
- Use supervision and consultation appropriate to social work practice.
- Function within the structure of organizations and service delivery systems and seek necessary organizational change.

**Concentration Objectives**

In professional social work intervention with children, youth, and their families, or adults and their families, students will demonstrate:

- The ability to effectively apply selected models and methods of advanced social work practice, consistent with social work values and ethics, with an emphasis in public and non-profit social services.
- The ability to use reflectively the theoretical approaches and knowledge bases underlying their practice with particular attention to the life course perspective.
- The ability to evaluate their own practice.
- The ability to analyze the impact of social welfare policies on clients and practice situations.
- The ability to practice in ways that are culturally and gender appropriate with low-income persons and with those who have experienced social and economic injustice.

The School of Social Work offers a Master of Social Work and two coordinated degree programs. The MSW/MPH is offered in coordination with UAB Public Health. The MSW/JD is offered in coordination with The University of Alabama Law School.

**Admission Requirements to the School of Social Work**

**Regular Admission**

An applicant whose credentials meet both of the following minimum requirements may be considered for regular admission:

1. **GPA requirement**: The applicant must have an undergraduate grade point average of 3.0 overall, 3.0 for the last 60 semester hours in a degree program, or 3.0 for a completed graduate degree program.

2. **GPA Standard**: All applicants must have at least a 2.5 (on a 4.0 scale) overall GPA.

3. **Entrance exam score requirement**: If the undergraduate grade point average is below a 3.0 for both the overall AND last 60 hours, the School of Social Work requires submission of test scores. The applicant must have a 300 on the GRE test or a score at the 50th percentile on the MAT. Admission test scores must be less than five years old. An applicant who wishes to be nominated by his or her department for a Graduate Council Fellowship is strongly encouraged to submit a score on the Graduate Record Examination (GRE) General Test or entrance examination appropriate to the graduate program of interest.

**Please note no academic credit, course waivers, or credit for field practicum shall be granted for life experience or previous work experience.**

**International Admission Requirements**

**International Student Admission**

International students must meet the Graduate School’s requirements for admission (see above), including the equivalent of a four-year bachelor’s degree from an accredited institution.

**Test Scores**: A students whose first language is not English must submit an official score report for the Test of English as a Foreign Language (TOEFL), the Pearson test of English (PTE), or must have earned a degree from an accredited U.S. college or university within the past 3 years.

1. TOEFL minimum score is a 550 on the paper-based test or a 79 on the internet-based test.
2. IELTS minimum score for admission is a 6.5.
3. PTE minimum score for admission is a 59.

**Note**: Scores must be less than two years old at the time of intended initial enrollment at The University of Alabama.
Please note no academic credit, course waivers, or credit for field practicum shall be granted for life experience or previous work experience.

Degree Requirements
The master of social work (MSW) degree will be awarded to the student who has met the following requirements:

• Successful completion of 60 hours of approved courses including field education or 42 hours for students admitted with advanced standing
• Evidence of the capacity to perform in all aspects of the student’s educational program at a satisfactory and responsible level, as judged by the faculty, and promise of further professional development (see the Master’s Degree Program Student Handbook for further details)
• Students are expected to demonstrate writing proficiency at a graduate level. Writing skills may be evaluated through specialized assignments in foundation or advanced-standing courses, or through a proficiency examination. The student may be required to attend tutorial sessions until proficiency is demonstrated.

Time Limit Requirement
All requirements for the master’s degree must be completed during the six year or 18 semesters (fall, spring, and summer semesters) immediately preceding the date on which the degree is to be awarded. There is no provision for an extension of the time limit beyond 6 years for the master’s students.

Program Options: 42 credit hour or 60 credit hour
Advanced Standing (42 credit hour)
• Students holding a Bachelor of Social Work degree from a CSWE accredited institution.
• Admission requires a "B" average or better in all professional foundation Social Work courses including field education, with no more than one "C" in upper level Social Work courses.
• Offered Spring and Summer terms only

Two Year (60 credit hour)
• Students who hold a bachelors degree from a regionally accredited institution.
• Students who do not meet Advanced Standing criteria must apply to 60 hour program.
• Offered Summer and Fall terms only

Applicants can find more information on program deadlines and application instructions on the School of Social Work website.

Application Fee
The application fee is $65 for U.S. citizens and permanent residents and $80 for international students. The application fee is waived for the following groups:

1. Veterans and current members of the US military (please send Angela Abrams (ayabrams@ua.edu) your DD 214 or current assignment orders as appropriate).
2. Ronald E. McNair Postbaccalaureate Achievement Program students (please contact Angela Abrams (ayabrams@ua.edu) for more details).
3. University of Alabama undergraduates applying to a graduate program in the same subject area. To qualify for this application fee waiver a student must have no time break between the undergraduate and graduate program and have an overall GPA of 3.0 or greater.
4. Applicants who have previously enrolled in Graduate School at The University of Alabama.

Applicants interested in transferring graduate credit to the MSW program from another institution or graduate program must make a formal request after admission to the program. The request is initiated in the Graduate School with the form for Request for Transfer Credit Form. Please note the School of Social Work allows a maximum of 9 hours of transfer work for the 42 hour program and a maximum of 12 hours of transfer work for the 60 hour program upon approval by the program director.

Applicants can find Application Instructions on the School of Social Work website.

MSW Program Requirements
Advanced-Standing Program Curriculum - Master of Social Work (MSW)
The Advanced-Standing Program is a 42-credit-hour program for only those who hold a CSWE-accredited BSW. It can be completed in three semesters when pursued full-time. Advanced-standing students fulfill professional foundation requirements by successfully completing 'bridge' courses typically offered in the spring or summer before beginning the concentration year.

Coursework is offered in two formats, campus or primarily online. Note: the primarily online format requires face-to-face skills labs held on selected Saturdays at regionally convenient locations.

Advanced Standing Curriculum - campus and distance learner (spring or summer start)

60 Credit Hour Program* Curriculum - Master of Social Work (MSW)

The 60-credit-hour program is for those who currently do not hold a CSWE-accredited BSW. It can be completed in two years when pursued full-time. Coursework is offered in two formats, campus or primarily online. Note: the primarily online format requires face-to-face skills labs held on selected Saturdays at regionally convenient locations across Alabama.

*Summer start two year program is online only; fall start is online or on campus

### MSW/MPH Coordinated Degree

The University of Alabama School of Social Work in Tuscaloosa and The University of Alabama at Birmingham School of Public Health jointly offer an MSW/MPH coordinated degree program designed for people with career goals in community-oriented health services for families and children.

Students who are interested in this coordinated degree should separately apply to UA’s MSW program and to the Department of Health Care Organization and Policy at The University of Alabama-Birmingham School of Public Health for admission to the MPH Program.

Students are required to first secure admission to our MSW Program and, at the end of the first semester, apply separately to the Department of Health Care Organization and Policy for the MPH Program at the UAB School of Public Health. Acceptance in the MSW program does not automatically ensure acceptance into the MPH program and vice versa. Students attend classes in Tuscaloosa and Birmingham.

For UAB curriculum guides and admission requirements please visit their website at University of Alabama at Birmingham School of Public Health.

### Advanced-Standing Coordinated degree - MSW/MPH

The Advanced-Standing Program is a 42-credit-hour program for only those who hold a CSWE-accredited BSW. It can be completed in three semesters when pursued full-time. Advanced-standing students fulfill professional foundation requirements by successfully completing 'bridge' courses typically offered in the spring or summer before beginning the concentration year.

Coursework is offered in two formats, campus or primarily online. Note: the primarily online format requires face-to-face skills labs held on selected Saturdays at regionally convenient locations.

**MSW/JD Coordinated Degree Program**

The Master of Social Work/Juris Doctorate Degree Program is coordinated between the School of Social Work and The Law School.

The goal is to offer comprehensive preparation to individuals interested in becoming leaders in their communities, their state, or the nation, as well as leaders in promoting and enhancing social justice and individual well-being, through interventions, advocacy, organizational management, and public policy. Students acquire knowledge of social work and law strategies that can improve the lives of individuals and groups, by understanding forensic social work, the justice system, domestic violence, child protection, human rights, and more.

Before being classified as a MSW/JD coordinated degree student, applicants must be accepted in the School of Law and then the MSW program. Separate admission to each program is required. Admission requirements for the coordinated degree program are exactly the same as those currently established for the MSW program and the JD program separately. All normal prerequisites for both programs must be met.

**Completion Requirements**

UA’s Advanced-Standing MSW program requires 42 hours of coursework; the 2-year MSW program requires 60 hours. Students in the dual-enrollment MSW/JD complete in the Law School the 9 hours of electives currently required for the MSW degree (and currently specified as “MSW electives”).

The JD program requires at least 90 hours of coursework, of which 6 hours may be fulfilled with approved courses offered outside the Law School. The JD is a cohort-based program completed over 3-4 years. Dually enrolled MSW/JD students will be required to complete 9 hours of MSW courses as part of the 90 hours constituting study for the JD.

In all, the coordinated degree program requires 114 credit hours for students admitted with advanced standing by the MSW Admission Committee, or 132 credit hours for students admitted without advanced standing.

**Comprehensive Examinations/Capstone Experiences**

For MSW students, the required field education practicum is the Capstone experience. At the conclusion of their studies, all MSW students complete one required field education practicum. An additional field education practicum is required of students in the 60-credit-hour MSW Program, to be taken after they complete 15 credit hours of MSW prerequisites. In each field education practicum required, an MSW student must demonstrate successful integration and application of the knowledge, skills, and values learned both in class and from the practicum instructor, employing these as he or she delivers social services in a practice situation. A formal evaluation of the MSW student’s performance serves as the final evaluation in each field education practicum.

The JD program has no mandatory exam or Capstone experience.

**Time Limit**

Per Graduate School regulations and ABA Standards, students in the coordinated degree program are allowed no more than 6 years, from the time of matriculation, to complete all requirements for the coordinated degrees.

**Both Degrees Confirmed in same Commencement**

Both degrees are conferred during a single commencement exercise, once all degree requirements have been met. Neither degree will be granted until both degrees are earned, except in cases in which a student formally withdraws from the coordinated degree program.

**Discontinuation of One of the degrees**

If a student enrolled in the coordinated degree program were to discontinue enrollment in the program and continue seeking only one degree (MSW or JD), the student would have to meet the full requirements of that degree.

**Coordinated Degree Requirements**

Students in the MSW/JD Coordinated Degree Program must complete all the required MSW courses necessary for the degree; they may complete their elective requirements (currently nine credit hours) in the Law School.

**Law electives approved to count towards the MSW**

SW 565  SW Pract Child Welfare Fam Serv

The coordinated degree program requires 114 credit hours for students admitted as MSW advanced standing and 132 credit hours for students admitted as MSW 60 credit hour.

Challenge Examinations
The master of social work program permits admitted MSW students to demonstrate a mastery of specific course content areas by passing a challenge examination. Challenges are permitted in the areas of policy, research, and human behavior. Thus, students in the advanced program may request to challenge SW 576 Intermediate Research, SW 577 Human Develop & Social Systems, and/or SW 578 Social Welfare Policy. Students in either the Saturday program or the weekday program may request to challenge SW 500 Social Welfare Policy; SW 510 Human Behav Social Envr; and/or SW 570 Research-Informed Practice. A student who successfully challenges a course will be permitted to take a substitute course in lieu of the required foundation course. The degree-hour requirements remain the same.

Field Education Placement Procedures
The major objective in the placement process is to match the student with the field education setting that offers the best potential for promoting the student’s professional development. The School is responsive to personal factors related to location of placements and specific agencies, but it cannot assure an assignment tailored to personal situations. In accepting admission to the School and registering in the MSW program, the student has agreed to accept field education placements assigned by the School of Social Work.

Students who are employees of organizations that meet the School’s criteria for field education agencies and that agree to the School’s requirements may apply to the Field Education Coordinator to arrange a placement with that agency as one of the required field education experiences.

Field education placements are available in the Tuscaloosa area and throughout the state. Students are responsible for arranging transportation and paying any expenses related to field education. Students may not enroll in field education unless they have completed the required courses for the year in which they are enrolled, or unless they are concurrently enrolled in those courses. A student who has a grade of "I" on his or her record will not be allowed to enroll in field education.

A student who is unable to meet minimum standards in field education may be dropped from field education at any time. A student dropped from field education is also discontinued from other courses requiring concurrent enrollment in field education.

Washington, D.C., Placements
The MSW program provides the opportunity for students to complete the second-year field education requirement and other specific program requirements in Washington, D.C. These placements offer special opportunities to obtain field education experience not ordinarily available in Alabama.

Electives
All students must complete 9 hours of electives. Electives may be taken any time after the completion of bridge or foundation year courses.

Electives may include, if openings exist, required courses from the other concentration. If an emphasis in Program and Agency Administration is desired, two of the three electives must include SW 506 Planning & Prog Development and SW 536 Social Service Prog Agency Adm.

Second-Year Concentrations
The curriculum stresses specialized knowledge; the ability to understand complex theories, methods, and models of social work practice; and the ability to apply knowledge and skills differentially in the process of selecting alternatives in all levels of practice. The purpose of the second, or concentration, year of the social work curriculum is the preparation of social workers for advanced practice in one of two concentrations: Social Work with Children Adolescents, and their Families or Social Work with Adults and their Families. An emphasis on Program Planning and Administration (PAA) is available with either of the concentrations. The concentration year is built on a liberal arts perspective and professional foundation content, with particular emphasis on populations at risk.

Each concentration includes two required courses, the opportunity for three electives (which can be courses from other concentrations), and a field education placement related to the concentration. Two other courses are required during the second or concentration year: SW 525 Evaluation Research and SW 501 Soc Welfare Adv Pol Analysis. Students have the opportunity, in collaboration with their academic advisors and depending on course availability, to tailor their concentrations to reflect their own preferences. An emphasis in Program and Agency Administration in either concentration requires that students complete:

1. SW 506 Planning & Prog Development,
2. SW 536 Social Service Prog Agency Adm, and
3. a field education placement that provides and opportunity to implement the knowledge gained in these two courses.

The School reserves the right to alter the concentration requirements as necessary.

Introduction
The University of Alabama, Graduate School, 102 Rose Administration Building, Box 870118, Tuscaloosa, AL 35487-0118; 205-348-5921; email: gradschool@ua.edu; or visit the website of the Graduate School. This catalog is produced by the Graduate School. Although the publisher of this catalog has made every reasonable effort to attain factual accuracy herein, no responsibility is assumed for editorial or clerical errors or error occasioned by honest mistake. All information contained in this catalog
is subject to change by the appropriate officials of The University of Alabama without prior notice. Although this catalog intends to reflect any current policies or rules of The Board of Trustees of The University of Alabama referred to or incorporated herein, users are cautioned that changes or additions to policies or rules may have become effective since the publication of this material. In the event of such a conflict, the current statements of board policy contained in the official minutes and manual of rules, bylaws, and guidelines shall prevail.

Equal Opportunity in Education and Employment

UA complies with applicable laws prohibiting discrimination, harassment, and retaliation, including but not limited to Titles VI and VII of the Civil Rights Act of 1964, the Age Discrimination in Employment Act, Executive Order 11246, Title IX of the Education Amendments of 1972, Sections 503 and 504 of the Rehabilitation Act of 1973, the Vietnam Era Veterans’ Adjustment Assistance Act, as amended by the Jobs for Veterans Act of 2002 (VEVRAA), the Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA), the Age Discrimination Act of 1975, the Americans with Disabilities Act (ADA) of 1990, the ADA Amendments Act of 2008, and the Genetic Information Nondiscrimination Act of 2008. Consistent with those laws and UA’s Sexual Misconduct, Harassment and other policies, UA prohibits discrimination on the basis of genetic or family medical history information, race, color, religion, national origin, sex, sexual orientation, gender identity, gender expression, pregnancy, age, disability, protected veteran status, or any other legally protected basis in admission or access to, or treatment of employment in, its programs and services. These prohibitions against discrimination apply to recruitment, application, selection, hiring, appointment, transfer, demotion, promotion, tenure, job assignments, classification, compensation, benefits, leaves of absence, sick leave or any other leaves, job training and development, tuition assistance, participation in UA-sponsored educational, social, and recreational programs, discharge, layoff, and/or any other term, condition or privilege of employment. Inquiries or concerns regarding UA’s Title IX or gender-related compliance may be directed to UA’s Title IX Coordinator, Ms. Beth Howard, 107 Burke Hall West, Box 870300, Tuscaloosa, AL 35487-0300, 205-348-5496, ghoward@ua.edu. All other inquiries and concerns related to discrimination, harassment, or retaliation, except those regarding Section 1557 of the Affordable Care Act, may be directed to Dr. Gwendolyn Hood, University Compliance Officer and Director of the Office of Equal Opportunity Programs, 107 Burke Hall West, Box 870300, Tuscaloosa, AL 35487-0300, 205-348-5855 (Voice), 205-348-5573 (TDD), ghood@aalan.ua.edu.

Campus Security Report

Each year, The University of Alabama publishes the UA Annual Campus Security and Fire Safety Report. It contains crime and fire statistics for the three most recent calendar years. It also details UA security policies and procedures. The Campus Security Report is provided in accordance with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act and is available online to view or print at police.ua.edu. The Alabama Department of Public Safety, a state agency, also provides an online listing of sex offenders currently registered with the state. This listing is available on the Alabama Department of Public Safety website at dps.alabama.gov. For information regarding the enrollment or employment of registered sex offenders at The University of Alabama, or to request a printed copy of the Campus Security Report, write The University of Alabama, University Police, Community Services Division, Attention: Clery Compliance Officer, Box 870180, Tuscaloosa, AL 35487-0180; or email ua.police@ua.edu.

Social Work, Ph.D.

PhD Program

The purpose of this program is to prepare graduates for scholarly roles by advancing their knowledge about theory and increasing their skills in research methods, and the critical evaluation of social work policies and practice.

The PhD program builds on a base of professional knowledge and practice in social work. It provides all students with advanced knowledge of research, social policy, and practice theory. In addition to the grounding in research methods, the program offers students the opportunity to develop a comprehensive understanding of a selected area of concentration and, through the dissertation, contribute to knowledge development in that area. Students take electives in an area of personal interest. As soon as they enter the program, students are assigned to a PhD faculty advisor for program planning and guidance.

The program is notable among social work doctoral programs for the range and depth of its research foundation courses and electives. Exceptional opportunities are available for students interested in research in mental health, aging, and child welfare. There are opportunities for international experiences as well as for collaboration with the Center for Mental Health and Aging, the Institute for Rural Health Research, the Institute for Social Science Research, and the Youth Services Institute, with other colleges and departments of the University; and with various units of The University of Alabama at Birmingham (UAB).

Time Limit

All PhD degree requirements must be completed in the 7 years (21 consecutive fall, spring, and summer semesters) after admission.

Obtaining Information

Inquiries about the program and requests for application materials should be to: The University of Alabama School of Social Work, PhD Program Office, Box 870314, Tuscaloosa, AL 35487-0314; telephone 205-348-6528; bsmitzh2@sw.ua.edu.

Financial Aid

Financial aid commonly takes the form of graduate teaching or research assistantships, special grants or fellowships, student loans, and/or part-time employment.

Some additional scholarships are available from the School of Social Work including the Ben Avis Orcutt and Leslie J. Shellhase endowed scholarships, and the Social Work Board of Friends Summer Scholarships, which are administered by the PhD program. For more information on financial aid from other sources, visit the Financial Aid website.

Admission Requirements

Graduate School Admission Requirements

The Graduate School determines eligibility for regular or conditional admission, primarily on the basis of standardized test scores and previous academic record. Successful applicants must meet the minimum admission requirements of the Graduate School, which follow.
• a grade point average (GPA) of at least 3.0 on a 4.0 scale (overall) or a GPA of at least 3.0 for the last 60 hours of the previous degree program, or 3.0 for a completed graduate degree program.

• an acceptable score on an appropriate entrance examination as set by the department or school.

An applicant may be considered for conditional admission if he or she has a GPA of 2.5 overall and an acceptable score on the appropriate admission examination, or a GPA of 3.0 and less than the minimum score on the admission examination.

See the Admission Criteria section of this catalog for more information.

**PhD Program Admission Requirements**

Once the application is complete, it is sent to the PhD program office in the School of Social Work for evaluation. Listed below are the requirements for unconditional admission to the social work PhD program.

• A master’s degree in social work (MSW) from a program accredited by the Council on Social Work Education (CSWE) or simultaneous application to the UA concurrent MSW/PhD program.

• Applicants who will not have an MSW before entering the program must submit GRE scores. Scores exceeding 300 (combined verbal and quantitative) are required for unconditional admission. In addition, the faculty will consider the score on the analytical writing section of the GRE together with the essay submitted to the School of Social Work as part of the application.

• Applicants from non-English speaking countries must submit evidence of English language proficiency by means of a Test of English as a Foreign Language (TOEFL) score of at least 79 on the internet-based TOEFL, or a score of at least 6.5 on the International English Language Testing System (IELTS).

• Letters from three references, one of whom must be a university professor or social work scholar who has personal knowledge of the applicant’s intellectual and scholarly abilities. If the applicant has earned the MSW degree, at least one letter should be from a former instructor in the applicant’s MSW program.

• A statement of purpose indicating the reasons the applicant wishes to pursue a PhD in social work and indicating the applicant’s research interests.

• Evidence of scholarly ability, supported by evidence the applicant supplies (e.g., a paper published in a journal or presented at a conference or workshop, a design of a service program or a research proposal, and/or a course syllabus written by the applicant).

Members of the PhD Program Committee review the application materials and a recommendation is made to the Graduate School, which formally notifies the applicant of the admission decision. Applicants seeking admission to the program who do not meet the above requirements are considered on an individual basis. If an applicant desires such consideration, he or she should file all application materials as directed above. In addition to the materials required of all students, he or she should file, along with the School of Social Work application form, a petition for exemption from one or more requirements. The petition should state the requirement from which exemption is sought and should provide information supporting the petition. After the file is complete and referred to the PhD program by the Graduate School, the applicant may be invited to schedule an interview with the program director or other member of the admissions committee, in order to assess individually the applicant’s qualifications for doctoral studies in social work. A summary of this interview and the petition for an exception will be made available to the Admissions Committee for consideration prior to its decision regarding an admissions recommendation.

If seeking exemption from the requirements, the applicant should be aware that he or she may be required to register for courses other than the standard curriculum, including courses at the MSW level. The amount and type of such work may be decided by the Admissions Committee before admission and/or by the applicant’s academic advisor after admission.

**Additional Program Admission Requirements**

In addition to the above program requirements, it is recommended that the applicant also possess a minimum of two years of employment in social work after earning the MSW degree.

Some schools of social work require two years of post-MSW practice experience for admission to the social work PhD program. In this program, post-MSW practice experience is highly recommended but not required. There are advantages to having post-MSW practice experience prior to matriculation in a PhD program. Students with the MSW and practice experience will have more context from which to interpret and apply the content of social work core courses. In addition, post-MSW practice experience will permit the applicant, under current CSWE accreditation standards, to engage in the full range of teaching and advising assignments at accredited schools of social work. Thus, the applicant will have a competitive advantage in the job market over someone who does not have post-MSW practice experience.

Concurrent Enrollment in the MSW and PhD Degrees Programs

The University of Alabama School of Social Work offers an MSW/PhD concurrent program for exceptional individuals who hold, or are candidates for, bachelor’s degrees who have strong academic credentials and aptitude for academic careers in social work. Such individuals may be admitted simultaneously to the MSW and PhD programs and work on both degrees concurrently, following a strict, rigorous curriculum. Those admitted to the concurrent program will complete all current requirements for the PhD degree. Specific required PhD coursework will be applied to specific MSW degree requirements, reducing the number of semester hours required for the MSW and PhD degrees by 12 hours typically. The MSW degree will be awarded when all requirements for the MSW are completed, and the student will continue to work on the PhD requirements.

Successful applicants must exceed the minimum admission requirements of the Graduate School and the School of Social Work MSW and PhD programs.

**PhD Degree Requirements**

**Curriculum**

The Social Work Ph.D Program requires 49 hours of course work. Specific requirements are as follows:

• Thirty-one semester hours of core social work courses, including a one-credit seminar, five courses in substantive areas and six courses in research methodology.

• Twelve semester hours in an elective area taken outside of the School of Social Work.

• A statistical research competency demonstrated by successful completion of approved statistics two-course sequence.

• A dissertation showing the student’s ability to conduct independent research that adds to the knowledge of the profession (includes a minimum of 24 hours of dissertation credit).
These requirements are minimum standards. Additional work may be required, depending on the student's preparation and career interests. Doctoral study must be completed within seven years.

Residency Requirements

The minimum period in which the Ph.D degree can be earned is three academic years of full-time graduate study (or the equivalent in a set of shorter segments). Both the fall and spring semesters of either the second or third academic year of study must be spent in continuous residence as a full-time student (as an alternative, the full-time residence may be completed by full-time enrollment during a summer session, including both summer terms, preceded or followed by a regular semester). Full-time residence study is defined as an academic load of 9 semester hours or more during a period when the student's principal activity is academic work.

Admission to Candidacy.

A department-approved Admission to Candidacy for the Doctoral Degree form is submitted to the Graduate School as soon as possible after passing the comprehensive (preliminary) examination.

Additional information on Plan of Study, Residency, Admission to Candidacy, and all other degree requirements is in the Degree Requirements section of this catalog.

Doctoral Degrees

The University offers several types of doctorates, each of which is described below.

The Doctor of Philosophy (Ph.D) degree is regarded as the researcher’s degree. Program requirements include the acquisition of special skills for conducting independent, scholarly research of publishable quality. Requirements traditionally include a working knowledge of one or more foreign languages, but currently a number of foreign-language alternatives have been approved by departments. Through acquisition of these skills, Ph.D candidates demonstrate their potential for careers as independent, publishing scholars. Refer to departmental sections of this Catalog for details on foreign-language requirements or alternatives.

The minimum period in which a doctoral degree can be earned is three full academic years of graduate study after completion of a baccalaureate degree, although in most disciplines the period is longer. Graduate teaching assistants (GTA) or graduate research assistants (GRA) whose work assignments are 10 hours per week (i.e. the equivalent of 3 semester hours) or more should expect to take more than the minimum period of 3 academic years to earn a doctoral degree. The only exception to the three-year minimum is the practice-focused DNP.

Doctor of Philosophy Degree

The Doctor of Philosophy degree is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and capacity for independent, original investigation. The first two criteria are tested in coursework and a comprehensive examination, the last in a dissertation in which the student must present clearly and effectively the results of substantial research. A combination of these accomplishments, rather than the mere accumulation of residence and course credits, is the essential consideration in awarding the PhD degree. The PhD differs from the EdD in a number of ways, including the fact that the PhD Plan of Study and comprehensive examination demonstrate a higher-level research focus, and there is a greater number of dissertation hours and higher level of complexity and independent thought in a PhD-level dissertation.

Field of specialization

A defined field of specialization is required of all candidates for the Doctor of Philosophy degree. A minimum of 48 semester hours of non-dissertation course credit is required. Candidates should consult their departments or the appropriate section of this Catalog for additional requirements. The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of 24 hours of dissertation research.

Research skill/language requirements

There is no universitywide foreign language/research skill requirement for doctoral students; each college or department offering the PhD degree may set its own requirements. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further information about PhD foreign language/research skill requirements, students may contact their departments or the Graduate School office 205-348-5921.

Interdisciplinary Studies

There is a PhD degree program in interdisciplinary studies, and it is administered by the Graduate School. In addition to the general requirements for the PhD degree, the program of study and the supervisory committee for the prospective interdisciplinary studies degree candidate must be approved by the dean of the Graduate School before the student is admitted to the program. See Interdisciplinary Studies (IDS) (p. 603) at the Graduate School’s website for information on prerequisites, admission procedures, course of study, and other aspects of IDS programs.

Doctor of Education Degree

A minimum of two years of graduate study beyond the master’s degree is required for the completion of the EdD program. The student is required
to complete 60 semester hours in approved graduate courses beyond the master’s degree, or 90 semester hours of approved graduate courses, and to defend a dissertation. The student must complete a minimum of 12 hours of dissertation research. In the College of Education (p. 380) section of the Graduate Catalog, there are specific regulations governing the EdD program.

**Doctor of Musical Arts Degree**

The DMA. degree requires a minimum of 48 semester hours beyond the Master of Music degree, plus recitals and other examinations as determined by faculty of the School of Music. Specific requirements for each major area are outlined in the School of Music (p. 206) section of the Graduate Catalog.

**Doctor of Nursing Practice**

The Doctor of Nursing Practice (DNP) (p. 574) is a joint program offered by the University of Alabama in Huntsville College of Nursing (UAHCON), the University of Alabama at Birmingham School of Nursing (UABSON), and The University of Alabama Capstone College of Nursing (UACCN). The DNP is a practice-focused degree that is detailed in the Nursing section of this Catalog.

**Admission to Doctoral Degree Programs**

Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study. Admission to the Graduate School and the earning of a master’s degree from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student’s doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.

**Residency Requirements**

The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student’s doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog’s Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

**Graduate Credit**

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

**Graduate Credit for Noncredit Experiences**

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

**Transfer of Credit**

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a “B” grade or better may be transferred. The student must have attained an overall graduate GPA of “B” or better on all graduate work attempted. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.

2. PhD Programs Only: A student holding an earned, in-field master’s degree and working in the field or a related field since earning the degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a “B” overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. For departments participating in this program, the use of this option must be indicated on the Plan of Study.

To participate in Option 2, the Plan of Study must be submitted during the first semester of enrollment. If any coursework from the in-field or related-field master’s degree was earned more than six years prior to the date of admission, the graduate program director or department head/chair must submit to the Graduate School for evaluation a Field-Related Employment Since Earning Master’s Degree form with the student’s CV and a PhD Plan of Study.

Consideration of transfer of credit or the acceptance of an earned master’s degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the penultimate semester or the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department’s graduate coordinator regarding your department’s transfer policy.
Each department wanting its doctoral students to be able to choose Option 2 needs to “opt in” to this option by informing the graduate dean in writing that they wish to be among the approved departments.

**Time Limits**

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master’s, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period (not seven years) prior to admission to the doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree. Revalidation (recertification) of any expired course credit is not an option.

**Time Limits Extension Request**

Only under compelling circumstances beyond the student’s control a student may petition for a one-semester extension to the seven-year time limit (or eight-year time limit for the selected programs noted above). The Graduate Council approved the following steps to request an extension:

- To begin the process, the student petitions the department head. In the petition the student
  a. describes the compelling circumstances,
  b. briefly describes the current status of the dissertation, then
  c. includes a timeline showing each important remaining step in the completion of the dissertation. The last step and date in the timeline are submission of the successfully defended dissertation on or before the published final date for submission of dissertations for the requested extension semester.

- If the department head supports the petition, it is forwarded to the Graduate Council.
- If the college dean supports the petition, it is sent to the Graduate Council.
- If the graduate dean or his designee approves the extension, it will not require the student to validate any out-of-date UA or transfer courses previously approved for the plan of study.
- If a student fails to complete all degree requirements within the time limit for the student’s doctoral program or within a one-semester extension approved as noted above, the student will be dropped (suspended) from the doctoral program. To complete a doctoral degree, the student would have to reapply for admission and be admitted by the department and Graduate School. Graduate Council policies do not provide the option for a student failing to complete within the time limit to revalidate (recertify) either UA or transfer courses completed more than six years prior to the date of admission. Thus, a readmitted student would be able to apply to the new admission only those courses approved by the department and Graduate School and completed within the six years (18 fall, spring, and summer semesters) prior to the new admission.

**Repeating Courses When Given an Extension**

When requests are made for extensions of the doctoral time limits, and it is deemed that an out-of-date course is integral to the degree program, the college dean may request permission of the Graduate School for such a course to be repeated. In this case, both grades are used in calculation of the GPA.

**Plan of Study**

Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School.

The PhD Plan of Study and DMA Plan of Study are available at the Graduate School website. The Plan of Study for other doctoral programs (EdD, DNP) are available from the student’s department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a “hold” may be placed on future registrations.

An amended Plan of Study (if needed) must be submitted to the Graduate School when the student submits the form for Admission to Candidacy for Doctoral Degree.

**Preliminary or Comprehensive Examination**

A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after

- any foreign language/research skill requirements are met (PhD students only);
- two full years of graduate study are completed; and
- the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student’s supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student’s research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

**Admission to Candidacy**

The requirements for advancing to candidacy include passing the qualifying (major or preliminary) examination; completion of all coursework as listed on the approved program of study; receiving departmental approval of the dissertation subject (although some departments require the defense of a dissertation proposal and/or writing one or more preliminary sections of the dissertation as well); and having the committee recommend the student for Admission to Candidacy for the Doctoral Degree. The completed candidacy form is submitted to the Graduate School well in advance of the final semester.

**Continuous Dissertation or Document Registration**

Once a student has met the requirements for admission to candidacy, received approval for the dissertation research proposal, or initiated enrollment in 699 (dissertation research for a doctoral degree), the student must pursue completion of the dissertation without interruption by enrolling each fall and spring semester of the academic year for at least 3 hours of dissertation research. Summer enrollment for 699 Dissertation Research is expected if the student is working on the dissertation and using any University facilities or resources, including faculty time, but the only time summer registration is required for dissertation research (3 hours minimum) is when a doctoral student is
Dissertation Proposal
The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction giving an overview and stating the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal’s format with respect to such things as the length of the introduction and detail of the review of the literature.

Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

Dissertation
A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. Early in the process, the subject of the dissertation must be approved by the dissertation committee of the major department or division and by the dean of the Graduate School.

A dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. The committee shall have no fewer than five members, all of whom are appointed by the dean of the Graduate School. The graduate dean’s approval of the proposed dissertation committee is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the form for Appointment/Change of a Dissertation Committee.

All members of a dissertation committee must be members of the UA Graduate Faculty. The committee chair must be a full member of the Graduate Faculty, as described in the Catalog’s section on Qualifications of the Graduate Faculty (p. 34). One member must be from outside the student’s major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student’s dissertation committee.

The final oral dissertation defense is the culminating experience in the doctoral program. As such, all members of the dissertation committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations. Graduate School deadlines, including each semester’s dissertation deadline, are available at the Graduate School’s homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research. If certain conditions are met for the student’s final semester, the student may qualify to enroll for fewer than 3 hours of 699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester. This exception applies only to students who registered for at least 3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below:

Final-Semester Dissertation (699) Minimum Registration Hours

<table>
<thead>

<tr>
<td>After 4:45 p.m. on the last-possible day to register or add a course for the student’s final semester (date published in the University Academic Calendar)</td>
<td>3</td>
</tr>
</tbody>
</table>

"Completed" means submitted at ProQuest after being successfully defended; being carefully edited following the defense meeting; and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. At the time of ProQuest submission, the student also must submit the Survey of Earned Doctorates through the NORC website.

1 International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see “USCIS” section under “Minimum Hours—Other Policies and Regulatory Bodies” on page 3 of this policy.
Article-Style Dissertations

This approach is intended for doctoral students whose dissertation will consist of a number of related manuscripts or articles that represent independent research or creative activity. It is an option available only to students in certain fields in which the faculty have received Graduate Council approval from the Graduate Council. A complete list of these fields is below:

- Accountancy
- Aerospace Engineering and Mechanics
- Applied Statistics
- Biological Sciences
- Chemical Engineering
- Chemistry
- Civil Engineering
- Computer Science
- Economics
- Education (all departments)
- Electrical and Computer Engineering
- Finance
- Geological Sciences
- Health Education and Promotion
- Management
- Management Science
- Marketing
- Mechanical Engineering
- Metallurgical and Materials Engineering
- Physics
- Psychology

Article-style dissertations must be based upon research completed while the student is enrolled at The University of Alabama. For each article used, the student must be the first author, or equivalent, as defined by the discipline.

As with traditional dissertations, the article-style dissertation must be the student’s original idea. It must be a unified work and include a sequence of articles of publishable quality around a cohesive theme, with a comprehensive review of literature demonstrating an in-depth understanding of the unifying framework.

- In article-style dissertations there will be introductory material to describe the studies, show how they are related, and explain their significance;
- connecting language to bridge each study to the next; and
- a summary making clear the importance of the studies, integrating the major findings, and discussing the implications for the overall topic.

These components do not have to be separate sections or chapters. They may be parts of the manuscripts or may be accomplished in an abstract.

All parts of both traditional and article-style dissertations must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline’s style manual require deviation. Students considering the article-style approach should contact the Graduate School before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the date of the required final oral examination.

Electronic submission of dissertations: August 15, 2009, is the date when electronic submission began to be required and paper submission no longer was accepted. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. The University's IRB approval form is available at the IRB website.

Final Examinations

When the dissertation has been completed, the candidate will be given a final oral examination by a committee of not fewer than five members, one of whom must be from outside the student's major department or, for students in the College of Education, outside the student's area (not program), and appointed by the dean of the Graduate School. This examination will focus primarily on the candidate's research work, as embodied in the dissertation, and the field in which the dissertation lies, but it may encompass the complete program for the degree. The results of the examination must be reported to the Office of the Graduate School at least six weeks before the commencement at which the degree is to be conferred.

Application for Graduation

Each candidate for a doctoral degree must submit an Application for Degree via myBama not later than the last day to register or add a course of the semester or the first term of the summer session in which requirements for the degree are to be completed. That day is published for each semester at the website of the University Registrar.

Clearing the Academic Record for Commencement

At least one week before commencement, the candidate's record must have been cleared for graduation.

Attendance at Commencement

A candidate for a doctoral degree must be present at a scheduled commencement to receive the diploma and hood, unless excused by the graduate dean.

Withholding or Withdrawing an Advanced Degree

The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.

Interdisciplinary Studies, Ph.D.
Prerequisites for Admission
Prior to submitting an application to the Interdisciplinary Studies
Program, each prospective candidate must meet with the Assistant Dean
of the Graduate School.

Applicants must meet the following criteria:

1. A completed master’s degree or its equivalent from an accredited
   university.
2. GPA of 3.3 or higher. If the GPA is less than a 3.3, the admission test
   score must be exceptional.
3. Admission test scores at the 50 percentile or better on an appropriate
   entrance examination (e.g., GRE, GMAT, MAT).

Note: Interdisciplinary Ph.D. programs are not available to students who
have been unsuccessful in previous graduate work.

Application Requirements
The following must be submitted as part of the application:

1. Interdisciplinary PhD Committee Agreement Form: As part of the
   application process you are required to find five faculty members
   for your committee. All committee members must be members of
   the Graduate Faculty at The University of Alabama before formal
   appointment to the committee will be made by the Dean of the
   Graduate School. It is expected that the applicant’s Advisory
   Committee chair will have competence in the proposed major area(s)
   of study and has the time and willingness to devote to being an
   academic mentor for the student throughout the Ph.D. program. The
   committee chair and at least one additional committee member will
   have experience in directing and supervising doctoral-level research.
2. Advisor Signature Form: One of the faculty members on your
   committee will serve as your advisor. It is preferred that your advisor
   be selected from a department that offers doctoral degrees.
3. Home Department Request Form: It is hoped that a home department
   or program will include an IDS student in the intellectual-social life
   of the unit, e.g., department mailing lists, colloquia, social functions,
   etc. This department may also consider an IDS student for Graduate
   Teaching Assistant and Research Assistant appointments, and for
   office space.
4. Proposed Course Schedule Form: The student is responsible for
   convening a meeting with all committee members to discuss the
   proposed course schedule. Please see Course of Study for more
   details.
5. A one- to two-page statement of proposed research topic outlining
   the intended focus of research and the significance of the research to
   the integrated fields of study and the student’s professional goals. The
   prospectus must be signed by the Advisor/Chair of the student’s
   Advisory Committee.
6. A statement of purpose that includes reasons for pursuing the
   Interdisciplinary Studies Ph.D. and career goals. Your Statement of
   Purpose should clearly demonstrate how your professional goals are
   related to your intellectual pursuits.
7. Written explanation (signed by advisor/chair) explaining how
   residency requirements (two contiguous, full-time semesters) will be
   met.
8. Written explanation (signed by advisor/chair) explaining how the
   comprehensive examination requirement will be fulfilled. See Degree
   Progression for more details.
9. Completed application form and application fee.
10. Official transcripts from all colleges and universities that the student has attended.
11. Three letters of recommendation.
12. A resume.

Course of Study
The UA Graduate School requires that Interdisciplinary Studies Ph.D. students must complete a minimum of 48 hours of coursework. All students in the interdisciplinary PhD program must take AHE 591: Disciplinarity and American Higher Education (or its equivalent) during the first 3 semesters of coursework. The Interdisciplinary Ph.D. coursework should reflect two or more distinct academic areas, 24 hours of dissertation research, and a minimum of 15 hours in research methods or research theory and design. The majority of courses should be at the 600 level.

Prior to being admitted into the Ph.D. in Interdisciplinary Studies, the student must complete the Proposed Course Schedule Form. No later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree, he/she must submit a formal Ph.D. Plan of Study for Graduate School approval.

Typically transferred graduate courses may not be included in the student’s interdisciplinary Ph.D. proposed course schedule form. On rare occasions, with compelling justification, the Assistant Dean of the Graduate School may approve up to 6 hours of transferred courses. This petition must come from the Chair of the Advisory Committee and is subject to official evaluation by the Graduate School Registrar and approval by the Graduate Dean, per policies in the Graduate Catalog.

Degree Progression
Interdisciplinary Studies Ph.D. students must ensure that coursework is completed in a timely manner and that satisfactory progress is made towards completing all degree requirements (coursework, comprehensive exam, admission to candidacy, dissertation proposal, dissertation research, and final oral examination). All requirements must be completed within the time limits specified in the Graduate Catalog at the time of admission.

Progress Review
During each semester of the program, the student must meet with the Advisory Committee to review progress. At the end of the spring semester the student and his/her advisor should prepare an annual written summary of progress towards degree and submit to the Assistant Dean of the Graduate School.

Comprehensive Exam
The content and administration of the comprehensive exam are the responsibility of the Advisory/Dissertation committee and should be thoroughly discussed with the student prior to admission. Typically, the comprehensive examination is taken after the completion of all coursework. It is expected that the comprehensive examination for the Interdisciplinary Studies Ph.D. will be as rigorous and use the same general procedures as the doctoral exams in the departments in which coursework is taken. The specifics of the examination (including where the exam will be taken, the number of questions, the number of evaluators, the grading process, the process for reporting results to the student, etc.) should be detailed in the admission materials (see Admission Procedures). The Committee Advisor/Chair should inform the Graduate School Registrar of the results of the comprehensive exam.

Admission to Candidacy
When the Advisory Committee certifies to the Graduate School that the comprehensive exam has been passed and all other requirements set out in the Plan of Study (except the dissertation) have been satisfactorily completed, the Graduate School admits the student to candidacy.

Dissertation
The dissertation must be completed and defended within the time limits specified by the Graduate School at the time of admission. If human subjects are involved, the student and his/her advisor/committee are responsible for complying with the Institutional Review Board requirements before beginning research.

Final Oral Examination
The final oral exam for the Ph.D. is administered and evaluated by the Advisory Committee. The Graduate School should be notified of the date of the oral examination at least one month in advance. Final oral examinations are open to the University community, and a representative from the Graduate School may attend the oral examination.

Doctoral Degrees
The University offers several types of doctorates, each of which is described below.

The Doctor of Philosophy (PhD) degree is regarded as the researcher’s degree. Program requirements include the acquisition of special skills for conducting independent, scholarly research of publishable quality. Requirements traditionally include a working knowledge of one or more foreign languages, but currently a number of foreign-language alternatives have been approved by departments. Through acquisition of these skills, PhD candidates demonstrate their potential for careers as independent, publishing scholars. Refer to departmental sections of this Catalog for details on foreign-language requirements or alternatives.

The minimum period in which a doctoral degree can be earned is three full academic years of graduate study after completion of a baccalaureate degree, although in most disciplines the period is longer. Graduate teaching assistants (GTA) or graduate research assistants (GRA) whose work assignments are 10 hours per week (i.e. the equivalent of 3 semester hours) or more should expect to take more than the minimum period of 3 academic years to earn a doctoral degree. The only exception to the three-year minimum is the practice-focused DNP.

Doctor of Philosophy Degree
The Doctor of Philosophy degree is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and capacity for independent, original investigation. The first two criteria are tested in coursework and a comprehensive examination, the last in a dissertation in which the student must present clearly and effectively the results of substantial research. A combination of these accomplishments, rather than the mere accumulation of residence and course credits, is the essential consideration in awarding the PhD degree. The PhD differs from the EdD in a number of ways, including the fact that the PhD Plan of Study and comprehensive examination demonstrate a higher-level research focus, and there is a greater number of dissertation hours and higher level of complexity and independent thought in a PhD-level dissertation.
Field of specialization

A defined field of specialization is required of all candidates for the Doctor of Philosophy degree. A minimum of 48 semester hours of non-dissertation course credit is required. Candidates should consult their departments or the appropriate section of this Catalog for additional requirements. The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of 24 hours of dissertation research.

Research skill/language requirements

There is no universitywide foreign language/research skill requirement for doctoral students; each college or department offering the PhD degree may set its own requirements. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further information about PhD foreign language/research skill requirements, students may contact their departments or the Graduate School office 205-348-5921.

Interdisciplinary Studies

There is a PhD degree program in interdisciplinary studies, and it is administered by the Graduate School. In addition to the general requirements for the PhD degree, the program of study and the supervisory committee for the prospective interdisciplinary studies degree candidate must be approved by the dean of the Graduate School before the student is admitted to the program. See Interdisciplinary Studies (IDS) (p. 603) at the Graduate School’s website for information on prerequisites, admission procedures, course of study, and other aspects of IDS programs.

Doctor of Education Degree

A minimum of two years of graduate study beyond the master’s degree is required for the completion of the EdD program. The student is required to complete 60 semester hours in approved graduate courses beyond the master’s degree, or 90 semester hours of approved graduate courses, and to defend a dissertation. The student must complete a minimum of 12 hours of dissertation research. In the College of Education (p. 380) section of the Graduate Catalog, there are specific regulations governing the EdD program.

Doctor of Musical Arts Degree

The DMA degree requires a minimum of 48 semester hours beyond the Master of Music degree, plus recitals and other examinations as determined by faculty of the School of Music. Specific requirements for each major area are outlined in the School of Music (p. 206) section of the Graduate Catalog.

Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) (p. 574) is a joint program offered by the University of Alabama in Huntsville College of Nursing (UAHCON), the University of Alabama at Birmingham School of Nursing (UABSON), and The University of Alabama Capstone College of Nursing (UACCN). The DNP is a practice-focused degree that is detailed in the Nursing section of this Catalog.

Admission to Doctoral Degree Programs

Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study. Admission to the Graduate School and the earning of a master's degree from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student’s doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.

Residency Requirements

The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student's doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog’s Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a "B" grade or
better may be transferred. The student must have attained an overall graduate GPA of "B" or better on all graduate work attempted. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.

2. PhD Programs Only: A student holding an earned, in-field master's degree and working in the field or a related field since earning the degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a "B" overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. For departments participating in this program, the use of this option must be indicated on the Plan of Study.

To participate in Option 2, the Plan of Study must be submitted during the first semester of enrollment. If any coursework from the in-field or related-field master's degree was earned more than six years prior to the date of admission, the graduate program director or department head/chair must submit to the Graduate School for evaluation a Field-Related Employment Since Earning Master's Degree form with the student's CV and a PhD Plan of Study.

Consideration of transfer of credit or the acceptance of an earned master's degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the penultimate semester or the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department's graduate coordinator regarding your department's transfer policy.

Each department wanting its doctoral students to be able to choose Option 2 needs to "opt in" to this option by informing the graduate dean in writing that they wish to be among the approved departments.

Time Limits
All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering the doctoral program with a baccalaureate, not master's, degree).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period (not seven years) prior to admission to the doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree. Revalidation (recertification) of any expired course credit is not an option.

Time Limits Extension Request
Only under compelling circumstances beyond the student's control a student may petition for a one-semester extension to the seven-year time limit (or eight-year time limit for the selected programs noted above). The Graduate Council approved the following steps to request an extension:

- To begin the process, the student petitions the department head. In the petition the student describes the compelling circumstances, briefly describes the current status of the dissertation, then includes a timeline showing each important remaining step in the completion of the dissertation. The last step and date in the timeline are submission of the successfully defended dissertation on or before the published final date for submission of dissertations for the requested extension semester.

- If the department head supports the petition, it is forwarded to the college dean.
- If the college dean supports the petition, it is sent to the graduate dean.
- If the graduate dean or his designee approves the extension, it will not require the student to validate any out-of-date UA or transfer courses previously approved for the plan of study.
- If a student fails to complete all degree requirements within the time limit for the student's doctoral program or within a one-semester extension approved as noted above, the student will be dropped (suspended) from the doctoral program. To complete a doctoral degree, the student would have to reapply for admission and be admitted by the department and Graduate School. Graduate Council policies do not provide the option for a student failing to complete within the time limit to revalidate (recertify) either UA or transfer courses completed more than six years prior to the date of admission. Thus, a readmitted student would be able to apply to the new admission only those courses approved by the department and Graduate School and completed within the six years (18 fall, spring, and summer semesters) prior to the new admission.

Repeating Courses When Given an Extension
When requests are made for extensions of the doctoral time limits, and it is deemed that an out-of-date course is integral to the degree program, the college dean may request permission of the Graduate School for such a course to be repeated. In this case, both grades are used in calculation of the GPA.

Plan of Study
Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School.

The PhD Plan of Study and DMA Plan of Study are available at the Graduate School website. The Plan of Study for other doctoral programs (EdD, DNP) are available from the student's department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a "hold" may be placed on future registrations.

An amended Plan of Study (if needed) must be submitted to the Graduate School when the student submits the form for Admission to Candidacy for Doctoral Degree.

Preliminary or Comprehensive Examination
A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after

- any foreign language/research skill requirements are met (PhD students only);
- two full years of graduate study are completed; and
• the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student's supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student's research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice. Failing the examination twice results in dismissal from the degree program and the Graduate School.

Admission to Candidacy

The requirements for advancing to candidacy include passing the qualifying (major or preliminary) examination; completion of all coursework as listed on the approved program of study; receiving departmental approval of the dissertation subject (although some departments require the defense of a dissertation proposal and/or writing one or more preliminary sections of the dissertation as well); and having the committee recommend the student for Admission to Candidacy for the Doctoral Degree. The completed candidacy form is submitted to the Graduate School well in advance of the final semester.

Continuous Dissertation or Document Registration

Once a student has met the requirements for admission to candidacy, received approval for the dissertation research proposal, or initiated enrollment in 699 (dissertation research for a doctoral degree), the student must pursue completion of the dissertation without interruption by enrolling each fall and spring semester of the academic year for at least 3 hours of dissertation research. Summer enrollment for 699 Dissertation Research is expected if the student is working on the dissertation and using any University facilities or resources, including faculty time, but the only time summer registration is required for dissertation research (3 hours minimum) is when a doctoral student is graduating in August or defending the dissertation during the summer semester. This is true whether or not the student has formally submitted an Application for Admission to Candidacy.

Each PhD student must have completed a minimum of 24 hours of such dissertation work upon completion of the degree. The amount of dissertation research for which a student enrolls in any given semester should be commensurate with the progress a student is expected to make on the dissertation, as well as reflective of the extent to which University facilities and faculty time are invested in the proposed activities.

Dissertation Proposal

The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction giving an overview and stating the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal's format with respect to such things as the length of the introduction and detail of the review of the literature.

Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

Dissertation

A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. Early in the process, the subject of the dissertation must be approved by the dissertation committee of the major department or division and by the dean of the Graduate School.

A dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. The committee shall have no fewer than five members, all of whom are appointed by the dean of the Graduate School. The graduate dean's approval of the proposed dissertation committee is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the form for Appointment/Change of a Doctoral Dissertation Committee.

All members of a dissertation committee must be members of the UA Graduate Faculty. The committee chair must be a full member of the Graduate Faculty, as described in the Catalog's section on Qualifications of the Graduate Faculty (p. 34). One member must be from outside the student's major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business or industry), the graduate dean needs to appoint that member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student's dissertation committee.

The final oral dissertation defense is the culminating experience in the doctoral program. As such, all members of the dissertation committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations. Graduate School deadlines, including each semester's dissertation deadline, are available at the Graduate School's homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research. If certain conditions are met for the student's final semester, the student may qualify to enroll for fewer than 3 hours of 699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester. This exception applies only to students who registered for at least 3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below:
Final-Semester Dissertation (699) Minimum Registration Hours

<table>
<thead>
<tr>
<th>When was the *completed electronic dissertation submitted to ProQuest/the Graduate School?</th>
<th>Minimum hours of 699 registration required in the final semester</th>
</tr>
</thead>
<tbody>
<tr>

<td>After 4:45 p.m. on the last-possible day for instructors to post grades for the semester before the student's final semester, but before 4:45 p.m. on the last-possible day to register or add a course for the student's final semester (both dates published in the University Academic Calendar)</td>
<td>1</td>
</tr>
<tr>
<td>After 4:45 p.m. on the last-possible day to register or add a course for the student's final semester (date published in the University Academic Calendar)</td>
<td>3</td>
</tr>
</tbody>
</table>

"Completed" means submitted at ProQuest after being successfully defended; being carefully edited following the defense meeting; and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. At the time of ProQuest submission, the student also must submit the Survey of Earned Members, department chairperson, and graduate dean at the University. The student's final semester begins at 12:01 a.m. on the first day of the semester. The 4:45 p.m. closure for instructors to post grades is the last-possible day for instructors to post grades for the semester before the student's final semester (date published in the University Academic Calendar).

1 International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see "USCIS" section under "Minimum Hours—Other Policies and Regulatory Bodies" on page 3 of this policy.

2 The University Calendar is available at the Academics tab of the website of the University Registrar.

Article-Style Dissertations

This approach is intended for doctoral students whose dissertation will consist of a number of related manuscripts or articles that represent independent research or creative activity. It is an option available only to students in certain fields in which the faculty have received Graduate Council approval from the Graduate Council. A complete list of these fields is below:

- Accountancy
- Aerospace Engineering and Mechanics
- Applied Statistics
- Biological Sciences
- Chemical Engineering
- Chemistry
- Civil Engineering
- Computer Science
- Economics
- Education (all departments)
- Electrical and Computer Engineering
- Finance
- Geological Sciences
- Health Education and Promotion
- Management
- Management Science
- Marketing
- Mechanical Engineering
- Metallurgical and Materials Engineering
- Physics
- Psychology

For article-style dissertations, research must be divided into a minimum of two weeks to read the dissertation before the date of the required final oral examination.

Electronic submission of dissertations: August 15, 2009, is the date when electronic submission began to be required and paper submission no longer was accepted. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

Protection of Human Subjects for Research

Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University's Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Subjects Review Board.
Research Review Committee to obtain approval for the planned research. The University’s IRB approval form is available at the IRB website.

Final Examinations
When the dissertation has been completed, the candidate will be given a final oral examination by a committee of not fewer than five members, one of whom must be from outside the student’s major department or, for students in the College of Education, outside the student’s area (not program), and appointed by the dean of the Graduate School. This examination will focus primarily on the candidate’s research work, as embodied in the dissertation, and the field in which the dissertation lies, but it may encompass the complete program for the degree. The results of the examination must be reported to the Office of the Graduate School at least six weeks before the commencement at which the degree is to be conferred.

Application for Graduation
Each candidate for a doctoral degree must submit an Application for Degree via myBama not later than the last day to register or add a course of the semester or the first term of the summer session in which requirements for the degree are to be completed. That day is published for each semester at the website of the University Registrar.

Clearing the Academic Record for Commencement
At least one week before commencement, the candidate’s record must have been cleared for graduation.

Attendance at Commencement
A candidate for a doctoral degree must be present at a scheduled commencement to receive the diploma and hood, unless excused by the graduate dean.

Withholding or Withdrawing an Advanced Degree
The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.

Materials Science (MTLS)
The University of Alabama (UA), The University of Alabama at Birmingham (UAB), and The University of Alabama in Huntsville (UAH) offer a joint interdisciplinary program leading to a doctor of philosophy degree in materials science. The PhD program in materials science is coordinated by the Tricampus Materials Science Coordinating Committee. On each campus, the program is administered by the Campus Materials Science Program Committee.

For practical purposes, students will matriculate at a single campus. Once the student chooses a campus, that campus becomes the home campus, and the student’s records will be managed by the graduate school on that campus. However, once registered at one campus, a student is free to pursue, with minimum barriers, coursework or research opportunities at the other University of Alabama System campuses. Some courses may require travel to the other campuses, alternately some courses are offered online.

At all three universities, the interdisciplinary PhD program in materials science draws on various colleges and academic divisions. At UA, the program is supported by departments in both the College of Arts and Sciences and the College of Engineering. At UAB, the Schools of Medicine, Dentistry, and Optometry are involved, as are the School of Engineering and the School of Natural Science and Mathematics. At UAH, the College of Engineering and the College of Science participate in the program. The degree awarded to each successful candidate is the PhD Degree in Materials Science.

Materials Science, Ph.D.
Admission Requirements
In order to qualify for regular admission to the doctoral program, a student must have satisfied the following minimum requirements common to all three universities:

- A bachelor’s degree (or its equivalent) from an accredited college or university in engineering or one of the physical sciences
- “B”-level scholarship, either overall or for the last 60 semester hours of undergraduate and graduate credit
- A minimum score of 1000 on the Graduate Record Examination general test
- A TOEFL score greater than 550 (or the equivalent on other acceptable language examinations), for international students
- Letters of reference
An applicant whose scholastic record reveals a deficiency in one of the first three categories above may, upon recommendation of the Campus Materials Science Program Committee chairperson (on the campus to which the student has applied) and with approval of the respective graduate dean, be admitted on a provisional basis, as provided in graduate school regulations at each campus. However, that student must follow the appropriate graduate school’s policies in achieving regularly admitted status prior to taking Program Examination I (the examination on core material).

Additional information is in the Admission Criteria section of this catalog.
See the Admission Criteria section of this catalog for more information.

Advisement
Prior to a student’s admission to the program, the student will usually discuss (perhaps via email) possible research areas with one or more faculty members. If the student is admitted to the program, the letter of admission will designate a faculty member as the tentative dissertation advisor. The advisor and/or research area can be changed during the course of study if it appears beneficial to the student, with the approval of the Campus Materials Science Program Committee.

The advisor will assist the student in program planning and other academic matters. The letter of admission will also designate one of the participating departments as the tentative home department (normally the department of the tentative advisor), and state whether the student will be financially supported by a Materials Science Program assistantship (some students have support from outside the program instead.)

A graduate supervisory committee will be appointed for the PhD student as soon as he or she passes Program Examination I and a research project is selected. The student and the advisor are responsible for recommending supervisory committee members, which must then be approved by the Campus Coordinator. Members of the committee will normally be selected from participating faculty in the Materials Science Program from the three campuses involved. Exceptions must be approved by the Campus Coordinator. The graduate committee normally includes the research advisor (as chairperson) and at least four other members. The graduate committee members are selected based on the student’s academic interests and area of research. At least one of the committee members is from the student’s research area at one of the other UA campuses, and another is from a department other than the home department on the home campus. The graduate committee is charged with supervision and approval of the student’s research and course of study toward the completion of all requirements leading to the degree.

Campus Materials Science Program Committee
This committee administers the program on each campus. Coordination encompasses some functions that are usually handled by a single-discipline department. The Campus Materials Science Program Committee is chaired by the campus program coordinator, who acts as director or chairperson for the program.

Degree Requirements
Qualifying, Comprehensive, and Other Program Examinations
Program Examination I covers the program’s core material. The core is divided into three topic areas:

1. structure and properties;
2. characterization and testing; and
3. thermodynamics and processing.

Program Examination I qualifies the student to enter the advanced program. It is administered simultaneously system-wide by the Tricampus Coordinating Committee, at pre-announced dates, at least once per year (sometimes once per semester). The individual campus program committees will solicit input from the faculty and assist in preparing and grading the system-wide examination. The student may choose to take two or all three parts of Program Examination I at a sitting (unless only one part remains to be taken). It is expected that a student must make at least one attempt to pass the exam during the first two years of study. All parts of the examination must be completed within a total of three years, or by the fourth administration of the exam if this occurs later than three years after admission. Failure to pass all parts of the examination after this time disqualifies a student from the PhD program.

Program Examination II includes a comprehensive examination covering material in the student’s specialization, as well as a dissertation proposal defense. This examination is normally taken near the end of formal coursework and is prepared, administered, and graded by the student’s graduate supervisory committee. The last exam is an oral exam, the dissertation defense, which also is administered by the graduate supervisory committee.

A Student Handbook describing the details of Program Examinations and other aspects of the Program is on the Program’s UA Campus website.

Candidacy and Dissertation Requirements
Admission to candidacy for the doctoral degree is contingent upon the successful completion of Program Examinations I and II (which includes the successful presentation of a dissertation research proposal.) Normally, a student is considered eligible to take Program Examination II when all of the required coursework has been completed. A department-approved Admission to Candidacy for the Doctoral Degree is submitted to the Graduate School as soon as possible after passing the program exams. See the Degree Requirements section of this catalog for details on plan of study, admission to candidacy, and all other degree requirements. After being admitted to candidacy, the student must complete the remaining requirements for the degree, the main requirement being the doctoral research and dissertation. A minimum of 48 credit hours of graduate coursework and 24 hours of dissertation research are required. These courses may be in any department, but the course program must be worked out in consultation with the advisor and approved by the dissertation committee. A maximum of 24 of the 48 coursework hours may be transferred from another institution, subject to approval. The Request for Transfer of Graduate Credit is on the Graduate School’s website. Credits in materials-related courses earned toward a master’s degree at The University of Alabama may be applied to the doctoral degree.
**Residency Requirement**

The minimum period in which the doctoral degree can be earned is three full academic years of graduate study. The student must spend the final or penultimate academic year in continuous residence as a full-time graduate student at one of the campuses.

**Time Limits**

All requirements for the doctoral degree must be completed within a period of seven years of the date of admission.

For additional residence, time limits and degree requirements information, see the Degree Requirements section of this catalog.

**Doctoral Degrees**

The University offers several types of doctorates, each of which is described below.

The Doctor of Philosophy (PhD) degree is regarded as the researcher's degree. Program requirements include the acquisition of special skills for conducting independent, scholarly research of publishable quality. Requirements traditionally include a working knowledge of one or more foreign languages, but currently a number of foreign-language alternatives have been approved by departments. Through acquisition of these skills, PhD candidates demonstrate their potential for careers as independent, publishing scholars. Refer to departmental sections of this Catalog for details on foreign-language requirements or alternatives.

The minimum period in which a doctoral degree can be earned is three full academic years of graduate study after completion of a baccalaureate degree, although in most disciplines the period is longer. Graduate teaching assistants (GTA) or graduate research assistants (GRA) whose work assignments are 10 hours per week (i.e. the equivalent of 3 semester hours) or more should expect to take more than the minimum period of 3 academic years to earn a doctoral degree. The only exception to the three-year minimum is the practice-focused DNP.

**Doctor of Philosophy Degree**

The Doctor of Philosophy degree is granted on the basis of scholarly proficiency, distinctive achievement in a special field, and capacity for independent, original investigation. The first two criteria are tested in coursework and a comprehensive examination, the last in a dissertation in which the student must present clearly and effectively the results of substantial research. A combination of these accomplishments, rather than the mere accumulation of residence and course credits, is the essential consideration in awarding the PhD degree. The PhD differs from the EdD in a number of ways, including the fact that the PhD Plan of Study and comprehensive examination demonstrate a higher-level research focus, and there is a greater number of dissertation hours and higher level of complexity and independent thought in a PhD-level dissertation.

**Field of specialization**

A defined field of specialization is required of all candidates for the Doctor of Philosophy degree. A minimum of 48 semester hours of non-dissertation course credit is required. Candidates should consult their departments or the appropriate section of this Catalog for additional requirements. The doctoral course as a whole must be unified, and all its parts must contribute to an organized program of study and research. In addition, a student must complete a minimum of 24 hours of dissertation research.

**Research skill/language requirements**

There is no universitywide foreign language/research skill requirement for doctoral students; each college or department offering the PhD degree may set its own requirements. This policy reaffirms the importance of research skills and foreign languages in the highest academic degree granted by American universities, but it also recognizes that the departments offering the degrees are in the best position to determine the number and nature of such requirements in the interests of their students. For further information about PhD foreign language/research skill requirements, students may contact their departments or the Graduate School office 205-348-5921.

**Interdisciplinary Studies**

There is a PhD degree program in interdisciplinary studies, and it is administered by the Graduate School. In addition to the general requirements for the PhD degree, the program of study and the supervisory committee for the prospective interdisciplinary studies degree candidate must be approved by the dean of the Graduate School before the student is admitted to the program. See Interdisciplinary Studies (IDS) (p. 603) at the Graduate School's website for information on prerequisites, admission procedures, course of study, and other aspects of IDS programs.

**Doctor of Education Degree**

A minimum of two years of graduate study beyond the master's degree is required for the completion of the EdD program. The student is required to complete 60 semester hours in approved graduate courses beyond the master's degree, or 90 semester hours of approved graduate courses, and to defend a dissertation. The student must complete a minimum of 12 hours of dissertation research. In the College of Education (p. 380) section of the Graduate Catalog, there are specific regulations governing the EdD program.

**Doctor of Musical Arts Degree**

The DMA. degree requires a minimum of 48 semester hours beyond the Master of Music degree, plus recitals and other examinations as determined by faculty of the School of Music. Specific requirements for each major area are outlined in the School of Music (p. 206) section of the Graduate Catalog.

**Doctor of Nursing Practice**

The Doctor of Nursing Practice (DNP) (p. 574) is a joint program offered by the University of Alabama in Huntsville College of Nursing (UAHCON), the University of Alabama at Birmingham School of Nursing (UABSON), and The University of Alabama Capstone College of Nursing (UACCN).

The DNP is a practice-focused degree that is detailed in the Nursing section of this Catalog.

**Admission to Doctoral Degree Programs**

Admission to any doctoral program is limited to students whose scholastic records show distinct promise of success in doctoral study. Admission to the Graduate School and the earning of a master's degree from The University of Alabama does not guarantee acceptance into a doctoral program. Students in doubt about their acceptance into doctoral programs should consult with departmental advisors and the Graduate School, which makes the final decision about admission. A department may terminate a student's doctoral admission if there is documented unsatisfactory academic or other progress toward completion of the degree.
Residency Requirements

The University of Alabama recognizes that doctoral students should be immersed in advanced study and inquiry, interact extensively and meaningfully with faculty and peers, engage with the academic community in their field, and have access to the educational resources of the University. To achieve these goals, a minimum of 50 percent of coursework hours to be counted in a student’s doctoral program must be from The University of Alabama (exclusive of dissertation research hours and subject to the Graduate Catalog’s Transfer of Credit policies). Additionally, 100 percent of dissertation credit hours must be from The University of Alabama. Diverse academic traditions, rapidly changing instructional modalities, and new student populations are acknowledged and accommodated with this policy.

Graduate Credit

A student must be admitted to the Graduate School and must register as a graduate student in order to receive graduate credit. Approval for graduate registration must be obtained from program advisors prior to registration.

Graduate Credit for Noncredit Experiences

All course credit used toward a UA graduate degree must be taught at the graduate level. No graduate credit may be earned by correspondence study or for experiential learning not conducted under the direct supervision of graduate faculty of The University of Alabama. UA does not offer graduate credit for noncredit workshops, seminars, continuing education experiences, professional development, internships, work/life experience, and so forth.

Transfer of Credit

Graduate credit earned in the field of the doctoral degree from a regionally accredited institution in which the student was enrolled in the graduate school of that university may be considered for transfer and applied towards the requirements for a doctoral degree if approved by the department and the Graduate School. Evaluation of credit for transfer will not be made until after the student has enrolled in the Graduate School of The University of Alabama.

In some cases, foreign educational credentials may not meet the Graduate School’s criteria for transfer of credit. It may be necessary for students in this situation to secure an evaluation of their credentials from World Education Services Inc. (WES), an external foreign credential evaluation service. Additional information on their services can be found at their website.

There are two options for possible transfer of graduate credit at the doctoral level.

1. All doctoral programs: Up to one-half of the required coursework (exclusive of dissertation research hours) for a doctoral degree may be transferred from another institution if the credit was in-field and was earned during the six-year period (18 fall, spring and summer semesters) preceding the semester of admission to the UA doctoral program. Revalidation (recertification) of credits more than 18 semesters old at the time of admission to a doctoral program is not an option. Only courses in which a student earned a “B” grade or better may be transferred. The student must have attained an overall graduate GPA of “B” or better on all graduate work attempted. Under this option, a Request for Transfer of Graduate Credit form must be submitted to and approved by the Graduate School.

2. PhD Programs Only: A student holding an earned, in-field master’s degree and working in the field or a related field since earning the degree may request approval for up to 24 hours of credit to be applied to the PhD. To do this, the student must have earned at least a "B" overall graduate GPA from the awarding institution. If approved for transfer, these hours would count toward the minimum 48 coursework hours required for the PhD degree. For departments participating in this program, the use of this option must be indicated on the Plan of Study.

To participate in Option 2, the Plan of Study must be submitted during the first semester of enrollment. If any coursework from the in-field or related-field master’s degree was earned more than six years prior to the date of admission, the graduate program director or department head/chair must submit to the Graduate School for evaluation a Field-Related Employment Since Earning Master’s Degree form with the student’s CV and a PhD Plan of Study.

Consideration of transfer of credit or the acceptance of an earned master’s degree as credit toward a PhD program is subject to a final decision by the Graduate School. In either case the student must ensure that the Graduate School has an official transcript of all credit involved. This will ensure that the student and advisor are fully aware of course hours needed when submitting the required Plan of Study, which must be submitted by the time the student completes 30 hours of transfer plus UA coursework. Planning to transfer courses in the penultimate semester or the final semester typically will delay graduation.

Please note that some departments allow fewer than 24 hours of graduate transfer credit. Be sure to check with your department's graduate coordinator regarding your department's transfer policy.

Each department wanting its doctoral students to be able to choose Option 2 needs to "opt in" to this option by informing the graduate dean in writing that they wish to be among the approved departments.

Time Limits

All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering a doctoral program, with the following specific exception approved by the Graduate Council). All requirements for the doctoral degree must be completed within nine years (27 fall, spring, and summer semesters) following admission to the doctoral program, with the following specific exception approved by the Graduate Council: Modern Languages and Classics (ten years if entering a doctoral program, with the following specific exception approved by the Graduate Council).

Previous graduate credit may be applied to the doctoral degree if the credit was earned during the six-year period (not seven years) prior to admission to the doctoral program or accepted by the Graduate School as part of Option 2. Such credit must be identified clearly on the Outline of PhD Program (Plan of Study) and requires Graduate School approval. Only those students graduating within the time limit for their doctoral program may apply previously approved graduate credit to the doctoral degree. Revalidation (recertification) of any expired course credit is not an option.

Time Limits Extension Request

Only under compelling circumstances beyond the student’s control a student may petition for a one-semester extension to the seven-year time limit (or eight-year time limit for the selected programs noted above). The Graduate Council approved the following steps to request an extension:

- To begin the process, the student petitions the department head. In the petition the student describes the compelling circumstances,
  - briefly describes the current status of the dissertation, then
  - includes a timeline showing each important remaining step in the completion of the dissertation. The last step and date in the timeline are submission of the successfully defended dissertation on or before the published final date for submission of dissertations for the requested extension semester.
• If the department head supports the petition, it is forwarded to the college dean.
• If the college dean supports the petition, it is sent to the graduate dean.
• If the graduate dean or his designee approves the extension, it will not require the student to validate any out-of-date UA or transfer courses previously approved for the plan of study.
• If a student fails to complete all degree requirements within the time limit for the student’s doctoral program or within a one-semester extension approved as noted above, the student will be dropped (suspended) from the doctoral program. To complete a doctoral degree, the student would have to reapply for admission and be admitted by the department and Graduate School. Graduate Council policies do not provide the option for a student failing to complete within the time limit to revalidate (recertify) either UA or transfer courses completed more than six years prior to the date of admission. Thus, a readmitted student would be able to apply to the new admission only those courses approved by the department and Graduate School and completed within the six years (18 fall, spring, and summer semesters) prior to the new admission.

Repeating Courses When Given an Extension
When requests are made for extensions of the doctoral time limits, and it is deemed that an out-of-date course is integral to the degree program, the college dean may request permission of the Graduate School for such a course to be repeated. In this case, both grades are used in calculation of the GPA.

Plan of Study
Early in the graduate program, each student must confer with the appropriate departmental advisor or major professor to select courses, discuss when and by which method the doctoral residency requirement will be completed, discuss research interests, and so forth. Then a Plan of Study must be prepared and submitted to the Graduate School.

The PhD Plan of Study and DMA Plan of Study are available at the Graduate School website. The Plan of Study for other doctoral programs (EdD, DNP) are available from the student’s department, college, or school. All doctoral students must have a completed Plan of Study approved by the Graduate School no later than the semester during which the student will complete 30 semester hours of UA and/or transfer credit toward the doctoral degree. Otherwise, a “hold” may be placed on future registrations.

An amended Plan of Study (if needed) must be submitted to the Graduate School when the student submits the form for Admission to Candidacy for Doctoral Degree.

Preliminary or Comprehensive Examination
A preliminary or comprehensive qualifying examination is required of all doctoral candidates. This examination is given after
• any foreign language/research skill requirements are met (PhD students only);
• two full years of graduate study are completed; and
• the supervisory committee deems the student to have adequate preparation in the major and minor fields of study.

The examination is conducted by the student’s supervisory committee or other committee established in the program area. Whereas one of the purposes of the preliminary examination is to determine the student’s research competence to begin work on a dissertation, the examination should be completed at least nine months before the degree is to be awarded. A student may take the oral or written examination only twice.

Failing the examination twice results in dismissal from the degree program and the Graduate School.

Admission to Candidacy
The requirements for advancing to candidacy include passing the qualifying (major or preliminary) examination; completion of all coursework as listed on the approved program of study; receiving departmental approval of the dissertation subject (although some departments require the defense of a dissertation proposal and/or writing one or more preliminary sections of the dissertation as well); and having the committee recommend the student for Admission to Candidacy for the Doctoral Degree. The completed candidacy form is submitted to the Graduate School well in advance of the final semester.

Continuous Dissertation or Document Registration
Once a student has met the requirements for admission to candidacy, received approval for the dissertation research proposal, or initiated enrollment in 699 (dissertation research for a doctoral degree), the student must pursue completion of the dissertation without interruption by enrolling each fall and spring semester of the academic year for at least 3 hours of dissertation research. Summer enrollment for 699 Dissertation Research is expected if the student is working on the dissertation and using any University facilities or resources, including faculty time, but the only time summer registration is required for dissertation research (3 hours minimum) is when a doctoral student is graduating in August or defending the dissertation during the summer semester. This is true whether or not the student has formally submitted an Application for Admission to Candidacy.

Each PhD student must have completed a minimum of 24 hours of dissertation work upon completion of the degree. The amount of dissertation research for which a student enrolls in any given semester should be commensurate with the progress a student is expected to make on the dissertation, as well as reflective of the extent to which University facilities and faculty time are invested in the proposed activities.

Dissertation Proposal
The dissertation proposal aims to show the appropriateness, manageability, and significance of the projected research. The student formally presents the written proposal to the dissertation committee and defends it in a meeting with the committee. The proposal normally includes an introduction giving an overview and stating the significance of the proposed research, review of the literature, and methodology. Departments determine the details of the dissertation proposal’s format with respect to such things as the length of the introduction and detail of the review of the literature.

Once the student and dissertation chair have developed a proposal, and the graduate dean has approved the dissertation committee, the student schedules the dissertation proposal meeting that includes all committee members. The student cannot propose a dissertation and have its final defense in the same semester.

Dissertation
A dissertation showing the ability to conduct independent research and skill in organization, writing, and presentation must be prepared on a topic in the major field. It must constitute an original contribution to knowledge. Early in the process, the subject of the dissertation must be approved by the dissertation committee of the major department or division and by the dean of the Graduate School.

A dissertation committee, with the director of the dissertation as its chairperson, supervises the preparation of the dissertation. The
committee shall have not fewer than five members, all of whom are appointed by the dean of the Graduate School. The graduate dean’s approval of the proposed dissertation committee is expected to be obtained before significant progress is made on the dissertation—typically just before or just after the dissertation proposal meeting. For this purpose, the student submits the form for Appointment/Change of a Doctoral Dissertation Committee.

All members of a dissertation committee must be members of the UA Graduate Faculty. The committee chair must be a full member of the Graduate Faculty, as described in the Catalog’s section on Qualifications of the Graduate Faculty (p. 34). One member must be from outside the student’s major department. If the outside member is not a full or associate member of the UA Graduate Faculty (e.g., a highly qualified person from another university, a business or industry), the graduate dean needs to appoint a member by approving Temporary Graduate Faculty status for the specific purpose of serving on the student’s dissertation committee.

The final oral dissertation defense is the culminating experience in the doctoral program. As such, all members of the dissertation committee are expected to attend and participate in real time. Virtual attendance via interactive video or teleconference is permitted for off-campus external committee members, but Tuscaloosa campus faculty should attend in person unless extraordinary circumstances dictate the need for virtual attendance.

The dissertation must comply with the regulations in A Student Guide to Preparing Electronic Theses and Dissertations. Graduate School deadlines, including each semester’s dissertation deadline, are available at the Graduate School’s homepage. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

The Catalog section on Continuous Dissertation Registration for Doctoral Students states that once a student qualifies for doctoral candidacy, the student must enroll each semester for at least 3 hours of dissertation (699) research. If certain conditions are met for the student’s final semester, the student may qualify to enroll for fewer than 3 hours of 699 dissertation research. A zero-hour or one-hour 699 registration is permitted only in the final semester. This exception applies only to students who registered for at least 3 hours of dissertation (699) research in the preceding semester and only under the conditions described in the table below:

### Final-Semester Dissertation (699) Minimum Registration Hours

<table>
<thead>
<tr>
<th>When was the *completed electronic dissertation submitted to ProQuest/the Graduate School?</th>
<th>Minimum hours of 699 registration required in the final semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>By 4:45 p.m. on the last-possible day for instructors to post grades for the semester before the student’s final semester (date published in the <em>University Academic Calendar)</em></td>
<td>0</td>
</tr>
</tbody>
</table>

After 4:45 p.m. on the last-possible 1 day for instructors to post grades for the semester before the student’s final semester, but before 4:45 p.m. on the last-possible day to register or add a course for the student’s final semester (both dates published in the University Academic Calendar)

After 4:45 p.m. on the last-possible 3 day to register or add a course for the student’s final semester (date published in the University Academic Calendar)

*Completed* means submitted at ProQuest after being successfully defended; being carefully edited following the defense meeting; and having the Committee Acceptance Form (CAF) signed by all committee members, department chairperson, and graduate dean. At the time of ProQuest submission, the student also must submit the Survey of Earned Doctorates through the NORC website.

1 International students on F-1 or J-1 student visas are not permitted to use the zero-credit hour exception above as the basis of maintaining minimum enrollment requirements as active students. Please see “USCIS” section under “Minimum Hours–Other Policies and Regulatory Bodies” on page 3 of this policy.

2 The University Calendar is available at the Academics tab of the website of the University Registrar.

### Article-Style Dissertations

This approach is intended for doctoral students whose dissertation will consist of a number of related manuscripts or articles that represent independent research or creative activity. It is an option available only to students in certain fields in which the faculty have received Graduate Council approval from the Graduate Council. A complete list of these fields is below:

- Accountancy
- Aerospace Engineering and Mechanics
- Applied Statistics
- Biological Sciences
- Chemical Engineering
- Chemistry
- Civil Engineering
- Computer Science
- Economics
- Education (all departments)
- Electrical and Computer Engineering
- Finance
- Geological Sciences
- Health Education and Promotion
- Management
- Management Science
- Marketing
- Mechanical Engineering
- Metallurgical and Materials Engineering
- Physics
- Psychology
Article-style dissertations must be based upon research completed while the student is enrolled at The University of Alabama. For each article used, the student must be the first author, or equivalent, as defined by the discipline.

As with traditional dissertations, the article-style dissertation must be the student’s original idea. It must be a unified work and include a sequence of articles of publishable quality around a cohesive theme, with a comprehensive review of literature demonstrating an in-depth understanding of the unifying framework.

- In article-style dissertations there will be introductory material to describe the studies, show how they are related, and explain their significance;
- connecting language to bridge each study to the next; and
- a summary making clear the importance of the studies, integrating the major findings, and discussing the implications for the overall topic.

These components do not have to be separate sections or chapters. They may be parts of the manuscripts or may be accomplished in an abstract.

All parts of both traditional and article-style dissertations must conform to the provisions set forth in A Student Guide to Preparing Electronic Theses and Dissertations, except when the circumstances of a specific project or discipline’s style manual require deviation. Students considering the article-style approach should contact the Graduate School before beginning their work if they have questions concerning specific problems or deviations from traditional procedure.

All doctoral candidates must give members of the dissertation committee a minimum of two weeks to read the dissertation before the date of the required final oral examination.

Electronic submission of dissertations: August 15, 2009, is the date when electronic submission began to be required and paper submission no longer was accepted. Consult the ETD website for details of ETD submission, including information on what needs to be submitted to the Graduate School. The graduate dean must approve the dissertation before the student can be cleared for graduation.

Protection of Human Subjects for Research
Scientific research involving human subjects has produced substantial benefits for society, but it also has significant ethical questions. The mission of the University’s Institutional Review Board (IRB) for Protection of Human Subjects is to ensure that research involving human subjects is conducted ethically. University and federal policies require that review and approval to use human subjects in research precede the research, no matter how great or small the involvement of the human subjects. In the case of dissertation research that involves the use of human subjects, the principal investigator is responsible for contacting the college Human Research Review Committee to obtain approval for the planned research. The University’s IRB approval form is available at the IRB website.

Final Examinations
When the dissertation has been completed, the candidate will be given a final oral examination by a committee of not fewer than five members, one of whom must be from outside the student’s major department or, for students in the College of Education, outside the student’s area (not program), and appointed by the dean of the Graduate School. This examination will focus primarily on the candidate’s research work, as embodied in the dissertation, and the field in which the dissertation lies, but it may encompass the complete program for the degree. The results of the examination must be reported to the Office of the Graduate School at least six weeks before the commencement at which the degree is to be conferred.

Application for Graduation
Each candidate for a doctoral degree must submit an Application for Degree via myBama not later than the last day to register or add a course of the semester or the first term of the summer session in which requirements for the degree are to be completed. That day is published for each semester at the website of the University Registrar.

Clearing the Academic Record for Commencement
At least one week before commencement, the candidate’s record must have been cleared for graduation.

Attendance at Commencement
A candidate for a doctoral degree must be present at a scheduled commencement to receive the diploma and hood, unless excused by the graduate dean.

Withholding or Withdrawing an Advanced Degree
The University of Alabama reserves the right to withhold or withdraw an advanced degree on the recommendation of the graduate faculty.

About the University

Our Mission
The University of Alabama will advance the intellectual and social condition of the people of the state, the nation, and the world through the creation, translation, and dissemination of knowledge with an emphasis on quality programs in the areas of teaching, research, and service.

Our Vision
The University of Alabama will be known as the university of choice for the best and brightest students in Alabama, and all students who seek exceptional educational opportunities. The University of Alabama will be a student-centered research university and an academic community united in its commitment to enhance the quality of life for all Alabamians and the citizens of the nation and the world.

Our Strategic Goals
The goals identified here are pillars of our Strategic Plan. They are designed to be high-level in nature and are built on the assumption that campus units will base their planning efforts on this overarching strategic plan. Some of the strategies necessary to facilitate the University’s plan are college and department based, while others are Universitywide initiatives.

• Provide a premier undergraduate and graduate education that offers a global perspective and is characterized by outstanding teaching, high-quality scholarship, and distinctive curricular and co-curricular programs.
• Increase the University’s productivity and innovation in research, scholarship, and creative activities that impact economic and societal development.
• Enrich our learning and work environment by providing an accepting, inclusive community that attracts and supports a diverse faculty, staff, and student body.
• Provide opportunities and resources that facilitate work-life balance and enhance the recruitment and retention of outstanding faculty and staff.

Location
The University of Alabama is located in Tuscaloosa, a city with a metropolitan population of approximately 98,000 in the west-central part of the state. The post office address of The University of Alabama is Tuscaloosa, AL 35487. University grounds include more than 1,000 acres. The University maintains a center in Gadsden and a governmental relations office in Montgomery. Separate campuses of the University have been established in Birmingham and Huntsville. These campuses are known as The University of Alabama at Birmingham and The University of Alabama in Huntsville.

• University of Alabama Press
• University Writing Center

Accreditation
The University of Alabama is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award baccalaureate, masters, educational specialist, and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097 or call 404-679-4500 for questions about the accreditation of The University of Alabama.

In addition, selected programs have been accredited by the AASCB International-The Association to Advance Collegiate Schools of Business; ABET, Inc.-Accrediting Board for Engineering and Technology; Accrediting Council on Education in Journalism and Mass Communication; American Association of Family and Consumer Sciences; American Bar Association; American Library Association; Alabama State Department of Education; Alabama State Board of Health; Accrediting Council for Graduate Medical Education; American Psychological Association; American Speech Language-Hearing Association; Association of University Programs in Health Administration; Commission on Accreditation of Athletic Training Education Programs; Commission on Accreditation for Dietetics Education; Commission on Collegiate
Nursing Education; Commission on English Language Program Accreditation; Council on Social Work Education; Council for Interior Design Accreditation; Council for Accreditation of Counseling and Related Education Programs; Council on Rehabilitation Education; Liaison Committee for Medical Education; National Association of School Psychologists; National Association of Schools of Art and Design; National Association of Schools of Music; National Association of Schools of Dance; National Association of Schools of Theatre; and the National Council for Accreditation of Teacher Education.

History of the University
1818-1820
In 1818, the federal government authorized Alabama Territory to set aside a township for the establishment of a "seminary of learning." Alabama was admitted to the Union on March 2, 1819, and a second township was added to the grant. On December 18, 1820, the seminary was officially established and named "The University of the State of Alabama."

1827
Tuscaloosa, then the state’s capital, was chosen as the University’s home.

1831
On April 12, inaugural ceremonies were held, and on April 18 the first students began to enroll. By May 28, 52 students had enrolled. The campus consisted of seven buildings: two faculty houses, two dormitories, the laboratory, the hotel (now Gorgas House) and the Rotunda.

1837
The University of Alabama became the first in the state to offer engineering classes. It was one of the first five in the nation to do so and one of the few to have continuously maintained accreditation since national accreditation began in 1936.

1841
President’s Mansion was completed. Its first occupant, Basil Manly, was the University president from 1837 to 1855.

Total University enrollment: 63

1850
Alabama Alpha chapter of Phi Beta Kappa established.

1851
Total University enrollment: 126

1859
Medical College branch of the University opened in Mobile.

1860
The University of Alabama became a military school — martial departmental and disciplinary systems established.

1861
Total University enrollment: 154

1865
Union troops spared only seven of the buildings on the UA campus. Of the principal buildings remaining today, the President’s Mansion and its outbuildings still serve as the president’s on-campus residence. The other buildings have new uses. Gorgas House — at different times the dining hall, faculty residence and campus hotel — now serves as a museum. The Roundhouse, then a sentry box for cadets and later a place for records storage, is a campus historical landmark. The Observatory, now Maxwell Hall, is home to the Computer-Based Honors Program.

1868
The Medical College reopens in Mobile.

1871
During the Reconstruction era, a reorganized University opened to students.

Total University enrollment: 107

1872
The School of Law was established.

1881-82
Antecedents of the UA College of Engineering were established with the offering of a formal, two-year course of study in civil engineering under the aegis of applied mathematics in 1837. The College of Engineering was established in 1909 with the opening of B.B. Comer Hall.

Total University enrollment: 154

1891
Total University enrollment: 167

1892
The University’s first football team assembled — the "Thin Red Line" that later became the "Crimson Tide."

1893
The first female students enrolled for the fall semester at the University. This was due in large part to the successful lobbying of the UA board of trustees by Julia S. Tutwiler. Tutwiler, then president of the Livingston Normal College for Girls, was a lifelong advocate of women’s rights to be self-supporting members of society.

1894
The student newspaper, The Crimson White, makes its first appearance.

1901
Total University enrollment: 396

1903
In March, the Alabama Legislature decreed that, after 30 years of student protest, the military system of organization at the University be abandoned.

1904
A summer school for teachers began in response to a need for better public education in Alabama, becoming the School of Education in 1909. The College of Education was established in 1929.

1906
At the University’s diamond jubilee celebration, President John William Abercrombie presented to the board of trustees his plans for the Greater University fund-raising campaign, thus ensuring that the state legislature would no longer be the primary source for financing the University’s growth.

1909
To meet the demands for specific training in two professions, the College of Engineering and the School of Education were established. Formerly
part of the liberal arts disciplines, these new offspring would function independently of the now-reorganized College of Arts and Sciences.

1910
The Alabama Museum of Natural History in Smith Hall was dedicated. Smith Hall served as a geological museum for the University's growing collections and still houses the Museum today.

1911
Total University enrollment: 571

1912
Dr. George Denny became University president; the campus consisted of 652 students and nine principal buildings. His presidency began an era of unprecedented physical and enrollment growth. When he retired in 1936, there were more than 5,000 students and 23 major buildings which now form the central core of the modern campus.

1914-15
The University band was organized.

1919
The School of Commerce was founded. It became the College of Commerce and Business Administration in 1929. It was renamed the Culverhouse College of Commerce and Business Administration in 1997. In 2013, the name was shortened to the Culverhouse College of Business.

1920
The Medical College moved from Mobile to Tuscaloosa.

1921
Total University enrollment: 2,134

1924
The Graduate School was officially established.

1929
Denny Chimes was dedicated. Named for Dr. George H. Denny, president of the University from 1912 to 1936.

1931
The School of Home Economics was officially established. It became the College of Human Environmental Sciences in 1987.

Total University enrollment: 4,639

1939
Moundville Archaeological Park and its museum opened to the public.

1941
Total University enrollment: 4,921

1945
The Medical College moved from Tuscaloosa to Birmingham.
The University Press was formed.

1948
Introduction of doctoral programs was authorized; first doctorates awarded in 1952.

1951
Total University enrollment: 5,269

1956
The University of Alabama’s first African-American student, Atherine J. Lucy, was admitted. She was expelled three days later "for her own safety" in response to threats from a mob. In 1992, Atherine Lucy Foster graduated from the University with a master’s degree in education. That same day, her daughter, Grazia Foster, graduated with a bachelor’s degree in corporate finance.

1961
Total University enrollment: 8,257

1963
The first sustained enrollment of African-American students at UA — Vivian J. Malone and James A. Hood — was achieved. Vivian Malone graduated in 1965. James Hood returned to campus in 1995 and received a PhD in interdisciplinary studies in 1997.

1965
The School of Social Work was established.

1968
The Computer-Based Honors Program, in which undergraduate students apply computer technology to research in a wide range of fields, was established.

1969
The Graduate School of Library Service was established by act of the Alabama Legislature. It became the School of Library and Information Studies in 1989. The School merged with the College of Communication in 1997 to become the College of Communication and Information Sciences.

1970
New College was established to allow students to pursue individualized courses of study while maintaining the academic standards of the University.

1971
The College of Community Health Sciences was established.

Total University enrollment: 13,055

1973
The School of Communication was established. It became the College of Communication in 1988 and, when it merged with the School of Information Sciences, was renamed the College of Communication and Information Sciences in 1997.

1976
The Capstone College of Nursing was established.

1981
The University celebrates its sesquicentennial.

Total University enrollment: 16,388

1983
The College of Continuing Studies was established. In the 1970s it was called Extended Services, then the Division of Continuing Education.

1985
The MFA Program in Book Arts, with specializations in printing and binding, was established within the School of Library and Information
Studies. It was one of only three in the country to offer such an MFA, and the only one do so within the context of a library school.

1986
The University Honors Program was established.
The University’s computerized library card catalog, AMELIA, became available for use.

1991
Total University enrollment: 19,366

1994
The Stallings Center opened as the new home of the RISE Program.

1996
The Blount Undergraduate Initiative was established (first freshman class accepted in 1999).

1998
The Second Capital Campaign was concluded, having raised a total amount of $224 million in gifts and pledges.
International Honors Program was established.
Modeled on UA’s RISE Program, the RISE School of Dallas, Texas, opened.
Renovation of Bryant-Denny Stadium was completed, increasing capacity to 82,000.

1999
The Student Services Center was completed.
Renovation of Sewell-Thomas Baseball Field to a capacity of 6,000 seats began.
First freshman class accepted in Blount Undergraduate Initiative. Parker-Adams Hall serves as its temporary headquarters.

2000
English major Bradley Tuggle from Decatur, Ala., named UA’s 15th Rhodes Scholar.
Historic Barnard Hall rededicated as Oliver-Barnard Hall, the first of two Blount Undergraduate Initiative academic houses.
Construction of 1,500-seat UA Softball Complex completed.
Blount Living-Learning Center opens to its first resident class.
Construction of Alabama Institute for Manufacturing Excellence (AIME) completed.
Morgan Auditorium reopens after $1 million renovation, the first since its construction in 1911.

2001
UA alumnus Lt. Col. Jim Kelly pilots a Discovery space shuttle mission.
For the third consecutive year, the UA School of Law ranked among the best in the nation, according to U.S. News & World Report.
UA and Auburn University form the "Alabama-Auburn Alliance" to support fair funding of higher education.
Tide Navigator, a Web-based registration system that is the first of its kind in the United States, debuts with incoming freshmen.
Total University Enrollment: 19,633

2002
Crimson Tradition Fund established with $10 million gift by Paul Bryant Jr.
UA named one of the top 50 public universities in the nation by U.S. News & World Report for 2003.
UA student Kana Ellis of Northport, Ala., selected as the first recipient of the Honors Student of the Year Award by the National Collegiate Honors Council (NCHC).
College of Community Health Sciences breaks ground for its $12.6 million facility, designed to consolidate all services and operations of the Tuscaloosa medical campus.

2003
Greensboro East High School, in collaboration with UA, became the first high school in Alabama to establish a state-of-the-art Math Technology Learning Center.
Five students from UA named to the 2003 USA Today All-USA College Academic Team. UA students garnered the most awards of any college or university, claiming five of 83 spots on the list.
UA recognized 40 "pioneers" during three days of events to commemorate the 40th anniversary of Gov. George C. Wallace's "stand in the schoolhouse door." Opening Doors, 1963-2003
UA named one of the top 50 public universities in the nation by U.S. News & World Report for 2004.
UA senior Rob Davis selected as one of three 2003 Portz Scholars in the National Collegiate Honors Council's competition for outstanding undergraduate Honors papers.
Total University Enrollment: 20,333

2004
University Medical Center, UA's new multi-specialty clinic and home of the College of Community Health Sciences, opened on May 11.
UA named one of the top 50 public universities in the nation by U.S. News & World Report for 2005.
Total University Enrollment: 20,969

2005
Five UA students named to the 2005 USA Today All-USA College Academic Team, the most of any school in the nation. UA's three-year total of 14 also tops all other colleges and universities.

2008
Seven UA students named to the 2008 USA Today All-USA College Academic Team, the most of any school in the nation. UA's total of 31 tops all other colleges and universities.
Total University Enrollment: 27,052

2009
 UA is ranked 10th in the nation among public universities in the enrollment of National Merit Scholars for the 2009 freshman class.
Total University enrollment: 28,807
2010

UA is ranked 6th in the nation among public universities in the enrollment of National Merit Scholars for the fall 2010 freshman class.

With a record of 10 students named to USA Today's 2010 All-USA College Academic Team, UA leads the nation in placing students on the national team, having placed a total of 46 students on the team since 2003.

Total University enrollment: 30,232

2011

UA scores a perfect four out of four with Goldwater Scholars in 2011 as all four UA students who applied were named recipients of the elite academic award. In all, UA has claimed a total of 34 Goldwater Scholars in the past 25 years.

The 2011 entering freshman class, at 5,772 students, is the largest in UA history and includes 1,614 students who had a 4.0 or higher high school grade point average. The freshman class also included 181 National Merit Scholars, ranking the University second in the nation among public universities in the enrollment of National Merit Scholars.

Total University enrollment: 31,747

2012

Named among the top 50 public universities in the nation by U.S. News and World Report's annual college listing for more than a decade, UA ranks 31st among public universities, its highest ranking ever, for 2012.

The 2012 entering freshman class, at 6,397 students, is the largest and best qualified in UA history and includes 239 National Merit Scholars.

UA's debate and forensics program wins its 19th national debate championship.

Three UA students are named Goldwater Scholars and one is named a Truman Scholar, increasing UA's totals for the last 25 years to 37 Goldwater Scholars and eight Truman Scholars.

Total University enrollment: 33,602

2014

Enrollment at The University of Alabama reached a record high 36,155 students.

The freshman class included 6,856 students, a 5.8 percent increase over the previous fall.

The freshman class had an average ACT score of 26.1, the highest in UA history, and included 135 National Merit Scholars and 20 National Achievement Scholars.

2015

The University of Alabama reached a record high of 37,100 for fall 2015. The entering freshman class, at 7,211 students, was the largest and best qualified in UA history.

More than one-third of the freshman class scored 30 or higher on the ACT, placing them in the top 5 percent of students taking the ACT.

Currently, The School of Law is ranked 28th among all law schools in the nation for 2016. The School of Library and Information Studies is ranked 18th nationally in the latest rankings for library schools. PRWeek Magazine has recognized the public relations program in The University of Alabama's College of Communication and Information Sciences as one of the top five programs in the nation six times. In addition, U.S. News and World Report ranks The University of Alabama’s Manderson Online Business Master’s programs 12th in the nation.

Academic Regulations

Office of the University Registrar

The University of Alabama has long subscribed to the ethical principles for confidentiality of student records that are recommended by the American Association of Collegiate Registrars and Admissions Officers. Following passage of the Family Education and Privacy Act of 1974 (the Buckley Amendments) and as amended, the University established policies and procedures to implement that legislation. The statement of these policies can be accessed online at registrar.ua.edu/academics-policies/ferpa.

For more information, contact The University of Alabama, Office of the University Registrar, 206 Student Services Center, Box 870134, Tuscaloosa, AL 35487-0134; email registrar@ua.edu; or visit registrar.ua.edu.

Academic Policies

Academic Bankruptcy

Academic bankruptcy involves a student's request to retroactively withdraw from one academic term of study because of extreme personal, emotional, or financial circumstances so devastating that it was impossible for the student to perform academically at a level approximating the usual record of achievement. Read more. (p. 625)

Academic Second Opportunity

A student who has been separated from The University of Alabama for at least three academic years may petition the dean of his or her college to apply for readmission through Academic Second Opportunity. Read more. (p. 625)

Credit by Examination

Credit by examination and credit for several types of out-of-class experiences are recognized by The University of Alabama. Read more. (p. 626)

Scholastic Progress Standard, Academic Status, Warning, and Suspension

In order to monitor students' progress toward the baccalaureate degree, The University of Alabama employs the Scholastic Progress Standard (SPS). Read more. (p. 625)

Student-Athlete Satisfactory Progress

A student-athlete who has completed at least one academic year in residence at The University of Alabama shall be required to satisfy minimum academic progress requirements for continuing athletic eligibility. Read more. (p. 630)

Transfer Credit

This policy statement adheres to the guidelines set forth in the Joint Statement on the Transfer and Award of Credit developed by the American Association of Collegiate Registrars and Admissions Officers (AACRAO), American Council on Education (ACE), and the Council for Higher Education Accreditation (CHEA). Read more. (p. 630)
Transfers Within the University
A student registered in an undergraduate division of The University of Alabama who has earned fewer than 45 semester hours may transfer to another undergraduate division. Read more. (p. 633)

Withdrawal
A student may withdraw from or drop an individual course until the end of the tenth week of a fall or spring semester, the second week of Interim session, the third week of a five-week summer session or the fourth week of a 10-week session. After this period, students are expected to maintain their course loads. Read more. (p. 633)

Academic Bankruptcy
Academic bankruptcy involves a student’s request to retroactively withdraw from one academic term of study because of extreme personal, emotional, or financial circumstances so devastating that it was impossible for the student to perform academically at a level approximating the usual record of achievement. The summer sessions are considered one academic term. The following specific regulations apply to any petition for academic bankruptcy:

- Only currently enrolled students are eligible to request academic bankruptcy.
- Academic bankruptcy is never granted for the academic term in which the student is currently enrolled, nor for the previous academic term.
- Academic bankruptcy is only granted for coursework completed during an academic term at The University of Alabama. Transfer and placement credits are not eligible for academic bankruptcy.
- Petitions must be filed prior to graduation.
- No more than one petition for academic bankruptcy may be approved during the student’s academic career at The University of Alabama.
- If the petition is approved, the grades for all courses taken during the academic term in question will be recorded as “W” (Withdrawn).
- The application for academic bankruptcy is filed in the dean’s office of the academic division in which the student is enrolled. Once a student has been enrolled in an academic division for two terms, that division has the authority to grant academic bankruptcy for a term in which the student was enrolled in another academic division.

Academic Second Opportunity
A student who has been separated from The University of Alabama for at least three academic years may petition the dean of his or her college to apply for readmission through Academic Second Opportunity. The petition must be received in the dean’s office prior to the last day of class for the semester in which the student returns to the University. If the petition is approved, the student will be readmitted regardless of previous scholastic performance, unless separation from the University resulted from academic misconduct. In cases of academic misconduct, readmission will be reviewed by the academic dean (or his or her designee) for the school or college in which readmission is sought.

If the application for Academic Second Opportunity is accepted, all previous academic work remains on the student’s permanent record, but the grades for previous work are not used in computing the GPA. Grades of "C" or higher earned during previous college attendance are computed as "passing hours" (P) and may be applied to major program, distribution, and graduation requirements. Grades of "D" earned during previous college attendance may not be applied to major program, distribution, or graduation requirements. These grade modifications are only applicable to coursework completed during an academic term at The University of Alabama. Transfer and placement credits are not eligible for Academic Second Opportunity.

The student then pursues his or her academic program with no University of Alabama GPA, and thereafter is subject to the conditions of warning, probation, and dismissal that govern all students. Once invoked, Academic Second Opportunity cannot be revoked and it may be awarded only once and may not be awarded retroactively. Students who are awarded Academic Second Opportunity are excluded from candidacy for the Latin honors designations of cum laude, magna cum laude, and summa cum laude. These honors may also be referred to as University Honors.

A student who has a degree from another institution but was previously a student at UA or who has a degree from UA is not eligible for consideration.

Scholastic Progress Standard, Academic Status, Warning and Suspension
The University of Alabama expects all students who enroll to make progress toward the completion of degree requirements. The University reviews each student’s academic record at the end of each major semester (fall or spring) to determine academic status. The following academic standards for continued enrollment at The University of Alabama apply to all students as they progress toward graduation.

Scholastic Progress Standard
In order to monitor students’ progress toward the baccalaureate or undergraduate degree and determine academic status, The University of Alabama employs the Scholastic Progress Standard (SPS). The SPS sets the minimum required cumulative University of Alabama (institutional) grade point average (GPA), which is calculated based only on credit hours earned at The University of Alabama, for freshman, sophomore, junior, and senior students. For example, applying the SPS formula set forth below, a student who has earned 75 overall credit hours (50 UA credit hours and 25 transfer credit hours) is classified as a junior, which means the student must have a cumulative UA GPA—based only on the 50 credit hours earned at UA—of 1.90 or higher to satisfy SPS. Students are advised that these are minimum GPA requirements for continuing at the University; to meet divisional graduation requirements, higher GPAs may be needed.

University of Alabama GPAs are computed on the following grades: "A," "B," "C," "D," "F," or "I" and any pluses or minuses that appear on the record. In computing a GPA, an "I" counts as an "F" until replaced by an earned grade. A grade of "NC," "P," or "W" does not enter into the computation.

Academic Status

Academic status at The University of Alabama is determined at the end of each term of enrollment (fall, spring, and summer) on the basis of The University of Alabama cumulative GPA and number of overall credit hours earned (Scholastic Progress Standard). Academic status governs a student’s enrollment status and governs any condition(s) associated with re-enrollment or eligibility for enrollment.

There are four categories of academic status at The University of Alabama: good standing, academic warning, one-term suspension, and indefinite suspension.

Good Standing - Students will be in good standing, and continue in good standing, when their University of Alabama cumulative GPA is 2.00 or higher.

Academic Warning - Students will be placed on academic warning if their cumulative GPA at UA falls below 2.0 but a student’s status is within the appropriate Scholastic Progress Standard (SPS) parameters (for example, a student with 45 overall credit hours earned with a 1.90 cumulative GPA at UA will be placed on academic warning).

The purpose of academic warning is to alert students to improve their academic performance and encourage their use of available appropriate academic support.

Students placed on academic warning must meet with their current divisional academic advisor(s) within the time period specified by the student’s college or school.

Academic warning does not restrict students’ ability to register at UA but does govern a requirement to be advised.

One-Term Academic Suspension – Students previously placed on Academic Warning (UA GPA of less than 2.00) who do not earn the required minimum University of Alabama cumulative GPA based on Scholastic Progress Standard will be placed on one-term academic suspension. No student may be placed on academic suspension who has not spent the prior term of enrollment on Academic Warning. Students placed on one-term academic suspension will be on academic leave during the next major term (fall or spring).

The one-term academic suspension will be marked on the student’s permanent academic transcript. After students sit out for one major semester (fall or spring) they will automatically be eligible for enrollment for the next term. Students returning from a one-term academic suspension must meet with their current divisional academic advisor(s) within the time period specified by the student’s college or school.

Individual colleges and programs may set academic continuation parameters for their specific programs.

Indefinite Academic Suspension - Students will be placed on indefinite academic suspension if they fall below the required minimum University of Alabama cumulative GPA designated by the Scholastic Progress Standard after being reinstated from the one-term academic suspension. No student may be placed on indefinite academic suspension who has not previously been on one-term academic suspension. A student on indefinite academic suspension will be on academic leave for an indefinite period of time but a minimum of one academic year. (See summer enrollment option below.) Following the minimum academic leave, permission to return to UA may be reviewed by the college or school designee where the student was previously enrolled.

Individual colleges and programs may set academic continuation parameters for their specific programs.

Summer Enrollment Option

Students placed on one-term or indefinite academic suspension are eligible to enroll in summer courses at The University of Alabama during the summer term immediately following their suspension. (For example, a student on indefinite academic suspension after the fall term is not eligible to enroll in the spring term but is eligible for the summer term). If students earn grades sufficient to lift their required minimum UA cumulative GPA to or above the appropriate level set by the Scholastic Progress Standard during the summer term after being placed on academic suspension, students will earn reinstatement for the fall term.

Appeal of Suspension Status

A petition to waive the academic rules related to academic suspension will not normally be considered until the student has been absent from The University of Alabama for the designated time period (one major term, i.e. fall or spring semester) for a one-term suspension and one academic year (both fall and spring) for an indefinite suspension. Students may be reinstated only upon the approval of the college or school in which they were last enrolled. A favorable decision by the college or school designee is unlikely without academic leave from the University.

Returning After Indefinite Suspension

After the required minimum academic leave of one year, students may re-enter The University of Alabama after a favorable action by the school or college designee in which the student was last enrolled. After being absent from UA for one academic year (both fall and spring), students must appeal to the school or college for reinstatement at least 30 days prior to the term in which they wish to enroll. It is strongly recommended that students meet with an academic advisor to develop a plan for returning from suspension before they appeal to return.

Readmission

A student who has been absent from The University of Alabama for one year or more must apply for readmission to UA in addition to appealing to the school or college for reinstatement. The opportunity to seek readmission is merely that: a student has no right to readmission and has no reasonable expectation of a right to readmission or re-enrollment. All students seeking readmission are subject to relevant eligibility criteria, rules, and regulations associated with admission/readmission that are applicable at the time the student seeks readmission.

Credit by Examination

Credit by examination and credit for several types of out-of-class experiences are recognized by The University of Alabama. Credits can be earned through satisfactory completion of one of the standardized national exams including, but not limited to, the Advanced Placement (AP) program, the College Level Examination Program (CLEP), the International Baccalaureate (IB) program, as well as the General Certificate of Education (GCE) Advanced and Advanced Subsidiary Level exams.

Credit hours earned by examination and/or out-of-class experiences are not considered University of Alabama institutional coursework, and therefore may not be applied towards fulfillment of:

- the minimum of 50 percent of the coursework required to earn a bachelor’s degree at The University of Alabama that must be earned at a bachelor’s degree-granting institution (four-year college or university)
- the minimum of 25 percent of the coursework required for the degree that must be earned at The University of Alabama
Courses numbered 197 indicate lower-level elective credit. Some colleges or degree programs may not allow 197 elective credit to complete degree requirements. Students should contact their college of enrollment for details.

Courses determined not to have a direct University of Alabama equivalent but deemed worthy of core credit will be indicated as TRGS followed by the corresponding core designation. The student's college of enrollment will have to grant an exception or substitution if the course should be applied to the major and/or minor.

1 Decision based on review of portfolio by Department of Art and Art History

**Student-Athlete Satisfactory Progress**

A student-athlete who has completed at least one academic year in residence at The University of Alabama shall be required to satisfy minimum academic progress requirements for continuing athletic eligibility. In addition to the stated academic requirements for continued enrollment at The University of Alabama, a student-athlete must satisfy the academic progress requirements of the Southeastern Conference and of the National Collegiate Athletic Association in order to remain eligible for athletics-related financial aid and for practice and participation in varsity sports. A student-athlete should visit Alabama Athletics Compliance for more information.

**Transfer Credit**

The University of Alabama accepts transfer work from postsecondary institutions that are fully accredited by regional accrediting agencies.
Incoming transfer coursework will be evaluated against the current University of Alabama catalog at the time the transcript is received. A University of Alabama equivalent course, discipline-specific elective, or general elective will be assigned based on comparability of the course content.

**General Transfer Credit Policy**

**Accreditation**

1. Collegiate work will be considered for transfer credit from postsecondary institutions that offer the baccalaureate degree or associate's degree leading to the baccalaureate degree and are fully accredited by one of the six regional accrediting associations below. Institutions that have been granted official candidacy status by a regional accrediting association will be accorded conditional acceptance for the coursework until full accreditation is granted.
   - Middle States Commission on Higher Education
   - Higher Learning Commission
   - New England Association of Schools and Colleges, Commission on Institutions of Higher Education
   - Northwest Commission on Colleges and Universities
   - Southern Association of Colleges and Universities
   - Western Association of Schools and Colleges
2. Collegiate work from postsecondary institutions not fully accredited by regional accrediting associations will be considered for transfer credit only when approval is recommended by the dean of the student’s college of enrollment. Approval must be sought by the student via written petition to the dean.
   - If the work is approved for transfer, the credit will be accepted on a provisional basis.
   - Provisional credit will be applied as appropriate to the student’s degree if an average of “C” or higher is earned for a year of academic work as a full-time student.
   - In the case of the part-time student, a “C” average or higher must be earned for work completed from the time of initial enrollment through the semester (summer included) in which a total of at least 24 semester hours of work is completed at The University of Alabama.
   - A student who transfers within The University of Alabama will have provisional credit applied as appropriate to the curriculum of the college into which the student transfers.
3. Collegiate work will be considered for transfer credit for courses completed at colleges and universities outside of the United States which are accredited or approved by the Ministry of Education (or other appropriate governmental agency) of the country in which they are located. Students seeking transfer credit from international institutions are required to submit a course-by-course evaluation completed by a National Association of Credential Evaluation Services (NACES) accredited organization. A list of current NACES member organizations can be found at http://www.naces.org/members.html.

**Transferability, Equivalency, and Applicability**

1. Transferability refers to the conditions under which the University accepts credit from other postsecondary institutions for inclusion in the student’s record. The Office of the University Registrar (OUR) is responsible for determining transferability.
2. Equivalency entails equating transfer credit, both in hours and content, to University of Alabama coursework. Lower-level equivalencies will be determined by transfer credit evaluators in OUR. Upper-level equivalencies will be determined by the college/school which houses the discipline.
3. Applicability of credit toward a degree refers to the prerogative of the academic divisions to count specific credit toward the fulfillment of a student’s degree requirements. The student’s college of enrollment is responsible for determining applicability.

**Governing Policies**

1. Transfer credit is generally awarded for academic credit earned at regionally accredited institutions or from institutions that are candidates for regional accreditation if the course credit was earned during the candidacy period.
2. The evaluation and award of transfer credit will be based on official transcripts. To be eligible for evaluation, coursework must appear on an official transcript from the institution that offered the coursework and initially conferred the credit in question.
3. The University of Alabama follows a semester calendar and awards credits earned in semester hours. Earned hours assigned to coursework completed at institutions on non-semester-based academic calendars will be converted and reported on The University of Alabama transcript as semester hours.
4. Credit granted by another institution for non-traditional experiences will not be accepted based on that institution’s transcript. To receive credit for non-traditional experiences (e.g. College Level Examination Program [CLEP], Advanced Placement [AP], International Baccalaureate [IB], General Certificate of Education [GCE] Advanced and Advanced Subsidiary Level Exams, military training, etc.), the student must present official documentation from the original provider of the non-traditional experience.
5. The following types of credit are not transferable and will not count toward a degree:
   - placement credit granted by another institution
   - remedial or developmental courses
   - technical courses
   - occupational, vocational, and some workforce courses from two-year institutions
   - courses classified as below freshman level by the originating institution
   - courses in religion that are doctrinal, confessional, or sectarian in nature
   - courses applying to a previously earned baccalaureate degree
6. Courses from two-year institutions transfer as lower-division (100- and 200-level courses) credit only. Undergraduate courses from four-year baccalaureate degree-granting institutions transfer at the same level, lower- or upper-division, as they were taken. Graduate level coursework may be transferred as undergraduate credit at the written request of the student and upon approval by the appropriate academic department.
7. Class standing is based on cumulative credit hours earned, not degrees. Students transferring to The University of Alabama with an associate’s degree will not automatically be granted junior standing.
8. In those instances when a student has repeated a course, all occurrences of the course, including grade, will be posted to The University of Alabama transcript. All grades count in the overall GPA, but earned hours will be awarded based on The University of Alabama repeat policy for the equivalent course. This policy can be found on the Grade and Grade Points page under “Repeat Course Policy.”
9. Courses in which a grade of "F" was earned are not applicable and will not count toward a degree. However, the course, hours, and grade are placed on The University of Alabama transcript and calculated in the overall GPA.

10. Courses for which a student has been awarded academic clemency, bankruptcy, forgiveness, etc. by the institution at which the courses were completed will not be posted to The University of Alabama transcript.

11. Students are required to submit official transcripts for all postsecondary institutions attended. All transferable work will be posted to The University of Alabama transcript. Students do not retain the right to pick or choose certain courses for transfer.

**Evaluation and Application of Transfer Credit**

**Core Curriculum/General Education**

Transfer courses that are determined not to have a direct University of Alabama equivalent but deemed worthy of core credit will be noted on the student’s transcript as follows:

- TRGS FC - Transfer Gen Stdy Fresh Comp
- TRGS FL - Transfer Gen Stdy Foreign Lang
- TRGS HU - Transfer Gen Stdy Humanities
- TRGS L - Transfer Gen Stdy Literature
- TRGS HI - Transfer Gen Stdy History
- TRGS SB - Transfer Gen Stdy Soc Behv Sci
- TRGS FA - Transfer Gen Stdy Fine Arts
- TRGS N - Transfer Gen Stdy Nat Sci
- TRGS MA - Transfer Gen Stdy Math
- TRGS C - Transfer Gen Stdy Comp Sci

The student’s college of enrollment will have to grant an exception or substitution if the course should be applied to the major and/or minor.

**Elective Credit**

Course numbers 197 and 397 indicate lower-level and upper-level elective credit, respectively. If, upon evaluation, a course is determined to have no direct University of Alabama equivalent but does fall under a discipline taught at The University of Alabama, the course will be awarded 197 or 397 credit in conjunction with the appropriate discipline prefix. The discipline prefix with the 197 or 397 course number indicates that the course is suitable for elective credit in that discipline.

If, upon evaluation, a course is determined to have no direct University of Alabama equivalent and does not fall under a discipline taught at The University of Alabama, the course will be awarded 197 or 397 credit in conjunction with a general elective credit (GEC) prefix.

Some colleges or degree programs may not allow 197 or 397 elective credit to complete degree requirements. Students should contact their college of enrollment for details.

**Applicability of Credit**

Transfer credit will be applied as appropriate to a student’s degree program. The authority to apply transfer credit toward degree requirements rests with the student’s college of enrollment.

Transferring between colleges within The University of Alabama will not affect the equivalencies established for a student’s transfer work, but may affect the applicability of the credit towards the new degree program.

Transferable courses with a grade of "D-" or above may apply to degree requirements unless a grade of "C-" is specifically required.

A minimum of a "C-" must be earned in English composition and introductory math courses to be applicable towards completion of degree requirements. Courses requiring a "C-" or better are: EN 101 English Composition, EN 102 English Composition, MATH 100 Intermediate Algebra, MATH 110 Finite Mathematics, MATH 112 Precalculus Algebra, MATH 113 Precalculus Trigonometry and MATH 115 Precalc Algebra & Trig. If a grade below a "C-" was earned in one of the aforementioned English composition or introductory math courses, the course will still be included on the student’s transcript and included in the calculation of the student’s higher education GPA.

A minimum of 50 percent of the coursework required to earn a baccalaureate degree at The University of Alabama must be earned at a baccalaureate degree-granting institution, and a minimum of 25 percent of the coursework required for the degree must be earned at The University of Alabama. Students should contact their college of enrollment for the specific number of hours required for their degree.

The policies and procedures for determining GPA and applying transfer credit are discussed in each college’s section of The University of Alabama Undergraduate Catalog.

**Evaluation of Credit from Non-Traditional Sources**

**Credit by Examination**

Credit by examination and credit for several types of out-of-class experiences are recognized by The University of Alabama. Credits can be earned through satisfactory completion of one of the standardized national exams including, but not limited to, the Advanced Placement (AP) (p. 626) program, the International Baccalaureate (IB) (p. 626) program, General Certificate of Education (GCE) Advanced and Advanced Subsidiary Level Exams (p. 626) and the College Level Examination Program (CLEP) (p. 626).

Credit hours earned by examination and/or out-of-class experiences are not considered UA institutional coursework, and therefore, may not be applied toward fulfillment of:

- The minimum of 50 percent of the coursework required to earn a bachelor’s degree at The University of Alabama that must be earned at a baccalaureate degree-granting institution (four-year college or university), and
- The minimum of 25 percent of the coursework required for the degree that must be earned at The University of Alabama.

**Study Abroad**

All University of Alabama students planning to do research, internships, or academic credit programs abroad will apply for study abroad through the Education Abroad office. Once admitted to a program, students are required to submit each planned course for approval through the online International Credit Approval for Study Abroad application. Each course will be evaluated and a University of Alabama equivalency will be determined and provided to the student. In the event a student changes courses while abroad, a new request for evaluation should be submitted. Any courses not pre-approved will be evaluated at the time a transcript is received and are not guaranteed to be accepted for credit by The University of Alabama.

When a transcript is received with work from a UA-affiliated study abroad program on an international transcript, the credit will be posted with pass/fail grades. A grade of "P" does not affect the GPA; however, a grade
of "F" is computed in the GPA. When a transcript is received with study abroad work that appears on a domestic transcript from an accredited and affiliated U.S. institution, it will be treated as standard transfer credit. The grade received on the domestic institution’s transcript will be posted to the student’s University of Alabama transcript and calculated into the overall GPA.

Courses taken through study abroad programs often cover content from a focused area of study related to the culture, history, and perspective of the country in which the experience takes place. For that reason, many study abroad courses will not have a direct UA equivalency. The authority to apply the credit awarded from study abroad toward degree requirements rests with the student’s college of enrollment.

Military Service
The American Council on Education (ACE) recognizes the educational value of military training and experience. ACE continuously evaluates military school courses and occupations and makes recommendations for college-level credit. ACE credit recommendations are present on the Joint Services Transcript (JST) of the military service member. The University of Alabama accepts military service records and will award credit for ACE recommendations in the associate and baccalaureate categories at both the lower and upper level. Recommendations for credit at the vocational level are not acceptable for credit at The University of Alabama. The University of Alabama does not award credit for military occupations or for courses with ACE recommendations that are considered technical in nature. While ACE recommendations that meet the aforementioned criteria will be considered for credit during the evaluation of the JST, they are not binding to the University. Duplicate credit recommendations will not be allowed. In most cases, credits will be awarded as elective credit.

Each service member will receive at least 4 hours of military science elective credit for military experience documented on the JST. Any additional credit awarded may be comprised of direct University of Alabama equivalencies, discipline-specific electives, physical education electives, or general electives after evaluation by The University of Alabama. A maximum of 6 semester hours of physical education credits and 6 semester hours of general elective credits will be awarded for educational experience in the military. Discipline-specific electives will only be considered for ACE recommendations of 2 or more semester hours. Military courses in which ACE has provided optional credit recommendations will be reviewed on a case-by-case basis to determine the appropriate credit. Military courses that have received an upper-level credit recommendation from ACE will receive elective credit only.

The authority to apply the credit awarded from military experience toward degree requirements rests with the student’s college of enrollment.

Other Non-Traditional Sources
Credit from other non-traditional sources including, but not limited to, independent study, workshops, field experiences, or internships will be considered for credit if documented on an official transcript from a regionally accredited institution.

Appeal Process
If a student disagrees with a transfer credit evaluation, the student must submit further information about the course in question in order to initiate an appeal of the evaluation. Supporting documentation can include, but is not limited to, a course outline, syllabus, or textbook. If a student disagrees with an evaluation of credit from a non-traditional source, the student must submit further written information about the training including number of hours of the training, information about the training source, accreditation, etc., in order to initiate an appeal of the evaluation.

The Office of the University Registrar, in coordination with the academic discipline, will consider amending the original evaluation if, after review of supporting documentation, a change is warranted.

Transfers Within the University
A student registered in an undergraduate division of The University of Alabama who has earned fewer than 45 semester hours may transfer to another undergraduate division. A student who has earned 45 or more semester hours may transfer to another undergraduate division according to the rules established by the division to which he or she is applying. Credit will be given for courses in which a passing grade has been earned, provided the courses transferred are appropriate to the new curriculum. Credits accepted for graduation are determined by the academic division into which the transfer is made. Check the DegreeWorks audit at myBama.ua.edu to determine how credit is being applied in the new program of study.

Changes in the student’s major(s) and minor(s) must be registered with the new academic division immediately following the transfer. Transfers between academic divisions will not be permitted once the registration process has been completed for a given term. At the discretion of the school or college concerned, a student may, upon entering another division of the University, petition to discard all credit previously earned. This recourse is limited to students who have attempted no more than 20 semester credit hours.

Withdrawal
A student may withdraw from or drop an individual course until the end of the tenth week of a fall or spring semester, the second week of Interim session, the third week of a five-week summer session, or the fourth week of a 10-week session. After this period, students are expected to maintain their course loads.

A student contemplating withdrawal from a course is strongly encouraged to contact his or her academic advisor before changing the schedule, as changes can result in delayed graduation. Also, dropping below full-time status may impact insurance (health and auto), financial aid, and scholarships. (Full-time status is 12 credit hours for undergraduate students, 9 credit hours for graduate students, and 10 credit hours for law students.)

A student may not withdraw from or drop individual courses in which penalty grades were assigned as a result of academic misconduct.

No permanent notation is made of a course that is dropped during the change-of-schedule period. A course dropped from the end of the change-of-schedule period to the end of the 10th week of a fall or spring semester, the end of the second week of Interim session, the end of the third week of a five-week summer session, or the end of the fourth week of a 10-week summer session is indicated on the student's permanent academic transcript with a grade of "W."

Important Note #1: Dropping an Interim session course does not result in a withdrawal from the University if the student is enrolled in a course or courses in any other summer session.

Important Note #2: After the Last Day to Drop with a W, a student must petition the college office for approval to withdraw or drop "for reasons beyond the student’s control." The presumption is that the student CANNOT withdraw without "extenuating circumstances," which must be documented. Specifically, the student cannot drop because he or she
isn't doing well in the class. Depending upon the term, the student had up to 10 weeks to make this judgment call. This note also applies to any retroactive withdrawal or drop.

Withdrawal from a Semester

A student may withdraw from a semester through the last day of classes (excluding final exam periods) in the fall, spring, and summer semesters following clearance by the Office of the University Registrar. A withdrawal from the semester occurs during summer term only if the student withdraws from all parts of the term. A semester withdrawal will not be processed if the student is enrolled in a part of a term that has concluded.

No notation of courses attempted is made on the permanent record of a student who withdraws from the semester during the change of schedule period (when a course can still be added). After the change of schedule period, a grade of "W" (withdrawn) is assigned for all courses in which the student was enrolled.

The withdrawal process is initiated online through the student's myBama account. The "Tuition and Other Expenses" (p. 912) section of this catalog provides information regarding the effects of withdrawal upon tuition and fee payments and financial aid.

Withdrawal When Called to Active Military Duty

For purposes of this section, active military duty means service, whether voluntary or involuntary, in the Armed Forces, including service by a member of the National Guard or Reserve, on active duty, active duty for training, or full-time National Guard duty under Federal authority, for a period of more than 30 consecutive days under a call or order to active duty of more than 30 consecutive days. A student who has been admitted to or who has been enrolled at The University of Alabama may request a withdrawal to fulfill a U.S. military obligation. The student should notify the Office of the University Registrar and provide documentation of his or her call to service, and submit notification whether or not the student intends to return to the University. Graduate students should also provide documentation to the Graduate School dean. Withdrawal is not contingent on the student's notification of intent to return to the University. The intent to return is used as information for future communication with the student.

A student returning from active military duty may be readmitted per the readmission provisions in the Higher Education Opportunity Act of 2008 (Section 484C of the HEA) and implementing regulations in 34 CFR Section 668.18. A student can be promptly readmitted, providing he or she withdrew to fulfill a U.S. military obligation, was not dishonorably discharged from the uniformed services, and the cumulative length of absence and of all previous absences from undergraduate studies due to military service did not exceed five years.

When a student is called to active military duty during an academic term, he or she may choose one of the following three options:

1. The student may request retroactive withdrawal to the beginning of the semester, with a full refund of tuition and fees.
2. If at least 75 percent of the term has been completed, the student may request that the faculty member assign a grade for the course based on the work completed. The final decision about grading is left to the faculty member.
3. If the faculty member assigns a grade of "I", the student will have a minimum of two weeks after returning to campus to complete the course requirement. Additional time may be granted if alternative arrangements are made with the faculty member, and provided the alternative arrangement is in compliance with Alabama CodeS3 31-12-3. This requires individuals be restored to the educational status he or she had prior to military duty, without the loss of academic credits earned, scholarships or grants awarded, or tuition and other fees paid prior to the commencement of military duty.

Spouses of service members called to active duty

A student who is the spouse of a service member called to active duty qualifies for the same withdrawal options that apply to service members. The student should notify the Office of the University Registrar and provide documentation of the call to service, and submit notification whether or not he or she intends to return to the University. Graduate students should also provide documentation to the Graduate School dean. Withdrawal is not contingent on the student's notification of intent to return to the University. The intent to return is used as information for future communication with the student.

Medical Withdrawal and Return to Campus

Policy

The Medical Withdrawal and Return to Campus policy of The University of Alabama establishes procedures to follow when a student suffers from a physical, emotional, or psychological condition that significantly impairs the student's ability to function successfully or safely as a student. The policy is primarily administered by the University's Student Health Center (SHC) according to the procedures described below.

Eligibility

Medical Withdrawals are voluntary. Eligibility for Medical Withdrawal is limited to students who have not taken a final exam or otherwise completed coursework for a final grade. The SHC shall request documentation from the dean of the division in which the student is enrolled to verify that the student either took no final exam(s) or otherwise completed coursework for a final grade for the semester/term in question; in addition, students are expected to affirm these conditions at the time of the request. Falsely attesting to the eligibility on the Student Request for Medical Withdrawal form is a violation of the Code of Student Conduct and may result in the revocation of a Medical Withdrawal and/or referral to the Office of Student Conduct.

Academic Impact

Medical Withdrawal, when approved, withdraws a student from all courses for a given semester/term. Students are not allowed to medically withdraw from individual courses. The only exception to this policy occurs when parts of a term within a semester have unique start and end dates. For example the summer semester at UA includes four separate parts (Interim Term, Summer I, Summer II, and full Summer Term). It would be possible, if approved, for a student to complete coursework in Summer I and to medically withdraw from Summer II. In this example, the student would not be medically withdrawn from the entire summer semester, but rather only from all courses for the Summer II.

Procedures

After appropriate SHC personnel have deemed a Medical Withdrawal request eligible for consideration, a designated SHC physician handles all Medical Withdrawal decisions on behalf of the University. The designated SHC physician, on behalf of the University and, where appropriate, in consultation with relevant University personnel, will conduct an
individualized assessment of the student’s situation before deciding to approve or deny the request and determining the effective date of the withdrawal. The effective date will be determined based on the circumstances associated with the student’s participation at UA and the medically related documentation. The designated physician’s decisions regarding Medical Withdrawal are final with no appeal rights. If approved, the SHC will notify the student and the Office of the University Registrar. Upon notification by the SHC, the University Registrar shall process the withdrawal and notify the student. If the request is denied, the SHC shall notify the student.

Medical Withdrawal Documentation

1. A student must fully and accurately complete the Student Request for Medical Withdrawal form (available at www.shc.ua.edu) and send the completed form by fax (205-348-7174), email (medwithdrawal@ua.edu) or if there is time by mail to The Student Health Center, Medical Withdrawal, 750 Peter Bryce Boulevard, Tuscaloosa, AL 35401.

2. A student must have a licensed medical provider (physician, nurse practitioner, or mental health professional) submit a completed Licensed Provider Recommendation for Medical Withdrawal form (available at www.shc.ua.edu) by fax (205-348-7174), email (medwithdrawal@ua.edu) or if there is time by mail to The Student Health Center, Medical Withdrawal, 750 Peter Bryce Boulevard, Tuscaloosa, AL 35401. The licensed medical provider shall be the one who is currently treating the student for the condition(s) prompting the withdrawal request and is responsible for obtaining permission from the student to provide the documentation and to discuss the medical conditions, if needed, with the appropriate University personnel. If the University, in its sole discretion, determines that an extraordinary or emergency situation exists, alternative documentation may be requested and considered.

3. A student may also attach to the student request form any further supportive documentation from faculty teaching the student’s currently enrolled courses, or if to support a retroactive withdrawal, from faculty who taught the student for the semester/term for which the withdrawal is requested.

4. In the event that the student’s medical condition so incapacitates the student that the student cannot act on his or her own behalf, the student’s parent or legal guardian should contact the Student Health Center at 205-348-7164 for further guidance.

Types of Medical Withdrawals

1. Regular Medical Withdrawal, within the current semester/term. A timely regular Medical Withdrawal request must be made before the close of business on the last day of classes of the semester in question. A timely withdrawal for the current semester requires a Student Request for Medical Withdrawal form submitted by the student and the Licensed Provider Recommendation for Medical Withdrawal form submitted by a licensed practitioner (forms available at www.shc.ua.edu). The student is encouraged to begin the medical withdrawal request process as soon as it becomes evident that a physical, emotional, or psychological condition significantly impairs the ability to function successfully or safely as a student. The designated SHC physician shall determine the effective date for the medical withdrawal based on the circumstances associated with the student’s participation at UA and medically related documentation. An approved Regular Medical Withdrawal requires the submission of the Licensed Provider Return to Campus (Medical Clearance) form as described below in the section Return to the University Following Medical Withdrawal as well as its approval by the SHC-designated physician.

2. Retroactive Medical Withdrawal. A timely withdrawal for a previous semester must be made within sixty (60) calendar days of the last day of classes for the semester/term for which the withdrawal is requested. The student must submit the Student Request for Medical Withdrawal form and the Licensed Provider Recommendation for Medical Withdrawal form (forms available at www.shc.ua.edu). For all approved Retroactive Medical Withdrawals, the effective date shall be the last day of classes for the semester/term in question. Also, if a student is seeking a retroactive medical withdrawal and is currently enrolled or intending to be enrolled or registered for an upcoming semester or term, then the student must also submit with the Licensed Provider Recommendation for Medical Withdrawal form a Licensed Provider Return to Campus (Medical Clearance) form. Failure to submit the Return to Campus form at the same time as the request for retroactive withdrawal will prevent the student’s request for retroactive medical withdrawal from being considered. Further, if such a student’s medical withdrawal is granted, but the submitted return to campus materials are insufficient to allow a return, the student will have the option to (1) retract the request for a retroactive Medical Withdrawal and remain registered/enrolled or (2) take a Medical Withdrawal for the previous and current semester or term in which they are enrolled. If the student selects the latter option, the student will still have to submit and have approved additional Return to Campus paperwork before being eligible to seek re-enrollment.

Medical Withdrawal Requests submitted outside of the semester in question, and beyond the required sixty (60) day deadline, must have clear, convincing, and extraordinary circumstances in order for the request to be considered. Extensive documentation (such as extended hospitalization and rehabilitation progression not met, etc.) must be submitted to the SHC and must be related to the reasons for the medical withdrawal and to the circumstances that prevented a timely request.

Handling of a Medical Withdrawal

Once a Medical Withdrawal has been approved, the withdrawal will proceed under these guidelines:

1. The Office of the University Registrar assigns a grade of “W” on the official transcript for effective dates that fall after the add/drop period for the semester.

2. All grades from the transcript, for the term in question, are completely removed when the Medical Withdrawal effective date falls within the add/ drop period for the semester.

3. The impact of an approved non-medical semester withdrawal (administrative withdrawal) for the same semester is addressed in the following way:

   1. If an approved non-medical withdrawal from an academic division predates the approved Medical Withdrawal effective date, the earlier date will be applied by the Office of the University Registrar.

   2. If the approved Medical Withdrawal effective date pre-dates an approved non-medical withdrawal, again, the earlier date will be applied by the Office of the University Registrar.

Return to the University Following Medical Withdrawal

When the Medical Withdrawal is approved, an SHC representative shall place a medical clearance hold on the student’s record. A medical clearance hold will remain in place until the appropriate medical documentation is received and a designated SHC physician approves release of the hold. If the hold is not removed by approximately one week prior to the start of classes for the term in question, all of the student’s
classes will be dropped for that term, regardless of whether or not an appeal is in process.

A student seeking to return following a Medical Withdrawal must provide appropriate medical documentation from a licensed physician, nurse practitioner, or mental health professional who is knowledgeable of the student’s full health history and has treated the student since the effective date of Medical Withdrawal. This medical documentation must indicate that it is appropriate and safe for the student to resume classes at the beginning of a specified semester/term. A completed Licensed Provider Recommendation for Return to Campus (Medical Clearance) form (available at www.shc.ua.edu) must be submitted to the Student Health Center, by fax (205-348-7174), email (medwithdrawal@ua.edu (medwithdraw@ua.edu)), or if time allows by mail to Student Health Center, Medical Withdrawal, 750 Peter Bryce Boulevard, Tuscaloosa, AL 35401.

Upon receipt of the required Licensed Provider Recommendation for Return to Campus (Medical Clearance) form and other appropriate medical documentation, a designated SHC physician, on behalf of the University and, where appropriate, in consultation with relevant University personnel, will conduct an individualized assessment of the returning student’s situation. The assessment will include reviewing materials submitted by the student or on the student’s behalf. During the process of reviewing a student’s request to return, if at the discretion of the SHC physician, a determination is made that the information provided by a treatment provider or student is incomplete, requires further explanation or clarification, or when there is a discrepancy between the medical information provided and other available information relating to the student, the student may be required to provide additional documentation and/or grant permission to the SHC to obtain further information about the student’s current condition. In extraordinary circumstances (e.g., concern exists about the medical provider’s credentials/assessment, etc.), the student may be asked to undergo, at their expense, additional evaluation or assessment to assist with the determination about readiness to return. All steps that the SHC may initiate as part of its individualized assessment are aimed at ensuring the student is ready to resume studies and be a successful member of the campus community.

Every effort will be made to respond to a student’s request for return within fourteen (14) calendar days of receipt of all requested or required materials. A longer response time may be caused by the inability to reach a student’s treatment provider, clinic closure during University holiday periods, or other extenuating circumstances.

If the decision is made to grant the student’s request to return and lift the medical clearance hold, relevant University personnel may contact the student to discuss or review a plan for sustained health. Recommendations for return shall, if applicable, include, but will not be limited to, ongoing treatment, accommodations, or other resources to help the student succeed.

If, at the discretion of the SHC physician, it is determined that the hold should remain in place because a student is not yet ready to return, the student will be advised in writing by letter or via email to their University account. A student may appeal that decision by submitting an appeal letter in writing to the SHC by email (medwithdrawal@ua.edu) or fax (205-348-7174) within fourteen (14) calendar days of receiving the SHC physician’s decision. A designated Appeal Team, which will consist of the executive director of the SHC, the director of Student Care & Wellness, and a designee of the provost, shall review the matter and make a final determination as to the student’s ability to return. Once the Appeal Team’s determination has been made, that decision is final and no further appeals are permitted.

A student registered for a future term and seeking a medical withdrawal will have a medical clearance hold placed on the student’s record, which will temporarily preserve the enrollment for that future term assuming all financial obligations are met. The student will have until one week prior to the start of the future term to have completed the protocol listed above and have the hold removed. The medical clearance form should be submitted one month prior to the first day of classes for the semester the student wishes to attend. The process normally takes about 14 working days, depending on the need for additional communication with the licensed provider.

If the medical clearance hold is lifted, the returning student may have additional holds on their record (e.g., conduct hold, financial hold, academic hold, etc.) that will need to be resolved through other areas of the University before the student may return. Additionally, to return, the student must meet any applicable admission and enrollment requirements of the University and of the school or college in which they wish to be enrolled.

Financial Impact of Medical Withdrawals
The purpose of this policy is to provide academic relief to the student, not financial relief. Please refer to Student Account Services policy for the financial impact of withdrawals at different stages in the semester (https://studentaccounts.ua.edu/financial-implications-of-withdrawal-impact-on-institutional-costs-and-charges/). Financial questions may also be directed to Student Account Services, 205-348-5350.

Other Options For Students When Medical Withdrawal is Not Appropriate
When Medical Withdrawal is not appropriate, the student is directed to the appropriate dean’s office student services area for other potential options.

Questions
Please call 205-348-7164 for clarification or more information.

Academic Records

Academic Calendar Year
For a list of all parts of term and important dates, please visit registrar.ua.edu/academiccalendar/.

Classification of Students
University of Alabama students are classified by credit hours earned. Read more. (p. 637)

Department, Program, and Course Alpha Symbols
Learn which symbol and division matches each department, program, or course. Read more. (p. 884)

Grades and Grade Points
A student’s overall grade point average (GPA) is comprised of all work completed at the collegiate level, including work completed at The University of Alabama as well as work completed at other postsecondary institutions and accepted for credit at The University of Alabama in accordance with the Transfer Credit Policy. Read more. (p. 885)
Honors
A dean's list of superior students is compiled and published at the close of each semester. Read more. (p. 888)

Official transcripts are issued by the Office of the University Registrar to recognized institutions and agencies that require these documents. Read more. (p. 889)

Academic Calendar Year
For a list of all parts of term and important dates, please visit registrar.ua.edu/academiccalendar/.

Classification of Students
University of Alabama students are classified as follows:

Undergraduate Students
- Freshman: 0-30 semester credit hours earned
- Sophomore: 31-60 semester credit hours earned
- Junior: 61-90 semester credit hours earned
- Senior: 91 or more semester credit hours earned

Law Students
- Second-year law student: 30 hours earned in law courses
- Third-year law student: 56 hours earned in law courses

Upper Division and Lower Division
Certain colleges and schools within the University recognize two enrollment categories, upper division and lower division. To progress from the lower division to the upper division in any college or school, the student must meet all requirements specified by that college or school. Admission to the lower division in a college or school does not guarantee progression to the upper division. Each student should consult academic advisors in the college or school of his or her enrollment to learn about the requirements for progression to the upper division.

Course Inventory
This page contains a listing of all active courses in The University of Alabama’s course inventory by College. Click on any tab above to view the course titles, credit hours, descriptions, and prerequisites.

College of Arts & Sciences Courses
AAST100 “Call and Response”
Hours 1
This course is designed to generate student interest and excitement in African American Studies by giving students opportunities to explore facets of African American cultural experiences. Following an interdisciplinary approach, this course will allow students to discover the rich diversity of African American cultural practices such as music, visual arts, literature, storytelling, dance, and religious practice. This course allows students at UA and UAB to experience the expertise of faculty from both institutions. It is also web-enhanced and has components on both UA’s and UAB’s BlackBoard systems for which UA and UAB students will access.

AAST201 Intro African Amer Study
SB
Hours 3
A basic outline of the diversity and complexity of the African-American experience in the United States: the early academic and social concerns of Black Studies advocates; the changes in the field's objectives that arise from its connections to contemporary social movements for Black Power, women's liberation and multiculturalism; and its major theoretical and critical debates.

Social and Behavioral Sciences
AAST202 African American Lives
Hours 3
A cultural approach to African American lives, exploring the role of the individual, biography, and narrative in African American history and culture.

AAST221 Contemporary In(queer)ies
Hours 3
In her essay “Queer and Now,” Eve Kosofsky Sedgwick offers a rumination on the political, epistemological and pedagogical imports of “queer” at that moment: “That’s one of the things that ‘queer’ can refer to: the open mesh of possibilities, gaps, overlaps, dissonances and resonances, lapses and excesses of meaning when the constituent elements of anyone’s gender, of anyone’s sexuality aren’t made (or can’t be made) to signify monolithically.” This 3 credit hour course, takes up Sedgwick's suggestion of the possibilities of “queer” to consider the development of queer theory, queer studies, and queer politics. Although this course is organized thematically across a number of disciplines, it also resists a kind of stringent categorization or segmentation- mirroring the energy that has characterized this interdisciplinary field. While paying attention to the seemingly endless possibilities associated with queer theory, this course is profoundly committed to as Sedgwick argues to keep “same-sex sexual expression at “the terms definitional center,” as not to “dematerialize any possibility of queerness itself.”.

AAST222 LGBTQ Histories
Hours 3
During the past decade, lesbian, gay, bisexual, transgender and queer (LGBTQ) Americans have achieved various forms of empowerment and visibility in the nation’s political, legal, social, and cultural arenas. However, LGBTQ persons continue to face various barriers to full equality and well-being including employment discrimination, high rates of homelessness among teens, violence, and inadequate access to health care. This 3 credit hour course places will focus on the events emergence of the last decade into a longer history of LGBTQ communities, visibility and politics that begins LGBTQ community in the late nineteenth 20th century and ends in the early twenty-first century. American Culture. During the semester, we will explore the historical development of LGBTQ identities, communities, politics, and cultural production. Together, we will analyze an array of materials including scholarly texts, oral histories, newspapers, films, photographs, art and political ephemera.
AAST225 Black Women’s Experiences in the South  
Hours 3  
Southern/Black/Woman. This demographic descriptor encompasses notable figures - Ida B. Wells, Bessie Smith, Condoleezza Rice, Beyoncé – and millions whose names and individual stories are often marginal to American memory and public policy. This course examines various aspects of Southern Black Women’s lives and labors, pain and pleasures, adventures and adversities from the nineteenth century to the present day. Students will analyze an array of materials including: memoirs/autobiographies, oral histories, secondary scholarship, census data, paintings, photographs, film, television and music. Using in-class activities, discussion and writing assignments, this course addresses one central question: What can the academic study of Black Women’s experiences in the South reveal about gender, race, class, and sexuality in the United States (past and present)?.

AAST226 Themes from Africa to America  
Hours 3  
An examination of the spread of religious life in the African America's emphasizing present institutions and practices; its African roots, its shape and function during slavery and its development from Emancipation to the present.

AAST249 African American Literature  
HU, L  
Hours 3  
Survey of African American literature from its earliest expressions to the present. In order to identify the aesthetics of the African American literary tradition, the course material includes spirituals, slave narratives, poetry, drama, autobiography, fiction, and nonfiction.  
Prerequisite(s): (Undergraduate level EN 101 with minimum Grade of C- and Undergraduate level EN 102 with minimum Grade of C-) OR (Undergraduate level EN 103 with minimum Grade of C- or Undergraduate level EN 104 with minimum Grade of C-) OR (Undergraduate level EN 120 with minimum Grade of C- and Undergraduate level EN 121 with minimum Grade of C-)

Humanities, Literature  
AAST302 The Black Church  
Hours 3  
A survey of mainstream Christian expressions of black spirituality as well as other forms of sacred collective consciousness. Study of local churches and theology is encouraged.

AAST303 Education Of Southern Blacks  
Hours 3  
A study of the “miseducation” of Africans in America. The course explores education for blacks from West Africa at the middle of the second millennium and early American society to the emergence of the separate school system of the 19th and 20th centuries.

AAST304 Civil War Still Lives': Race, Memory, and the Politics of Reunion  
Hours 3  
For over 150 years, the Civil War occupies a prominent place in our national memory and has served to both unite and divide Americans. This course will explore the various ways in which Americans have chosen to remember their civil war through reunions, monuments and memorials, histories, literature, film, museums as well as other forms of popular culture. We will examine how memory of the war changed over time as well as the political implications for Civil War memory, the nation, and identity in understanding both historical and contemporary debates.  
Prerequisite(s): None

AAST319 19th Century Black History  
Hours 3  
Role of black Americans in American life from the 17th century to the beginning of the 20th century, with emphasis on the institutions and events of the 1800s.

AAST320 20th Century Black History  
Hours 3  
The interrelationship of blacks and the industrial-urban environment of the United States.

AAST321 African American Folk Art  
Hours 3  
This course will focus on analysis of object, created by African Americans variously classified as folk, self-taught, outsider artists. Material will address African origins. American transformations of traditional arts and crafts.

AAST341 African American Art  
Hours 3  
An examination of the work of formally trained 20th century African American painters, sculptors, and photographers in relation to broader currents in the social and cultural history of the United States. Examines ways in which African American art has alternately reflected, shaped, and challenged such important historical events and currents as the Harlem Renaissance, the Great Depression, the Civil Rights and Black Power movements, the women’s movement, and contemporary identity politics. Also evaluates the contributions of selected artists in relation to such key art movements as Modernism, Social Realism, and Postmodernism.

AAST345 Topics African American Lit  
Hours 3  
A cross-genre survey of African American literature, historical events, and critical movements. Authors may include Frederick Douglass, Harriet Jacobs, Richard Wright, Zora Neale Hurston, Nella Larson, Langston Hughes, and Toni Morrison.

AAST350 Social Inequality  
Hours 3  
Analysis of inequities of wealth, power, and prestige; major theories of racial and cultural minorities; behavioral correlates of stratification; social mobility.

AAST352 Special Topics  
Hours 3  
An examination of selected African American topics. May be repeated for a maximum of 18 hours.
AAST401 Black Intellectual Thought
Hours 3
An upper level seminar designed to provide students with an in-depth study of major intellectual debates and movements that have shaped the politics, history and identities of the people of African descent in the United States and the African diaspora. The course will combine methodologies and concepts from multiple disciplines including, history, political theory, literature, women's studies, sociology, pyschology and philosophy.
Prerequisite(s): AAST 201 and AMS 201

AAST402 Special Topics
Hours 3-9
An examination of selected African American topics. May be repeated for a maximum of 9 hours.

AAST413 Communication & Diversity
W
Hours 3
Study and analysis of issues of diversity as they relate to groups in society and in communication fields. Emphasis is on the media's treatment of various groups in society. Writing proficiency within this discipline is required for a passing grade in this course.

Writing

AAST415 African American Rhetoric
W
Hours 3
A historical-critical investigation of African American public discourse from the Revolutionary era to the present, exploring rhetorical strategies for social change and building community. Writing proficiency within this discipline is required for a passing grade in this course.

Writing

AAST435 Black Feminism
Hours 3
This upper level undergraduate and graduate course exposes students to the key figures, texts and concepts that constitute black feminist thought.
Prerequisite(s): AAST 201 or WS 200

AAST436 Gender and Black Masculinity
Hours 3
This course will examine the socio-historical perceptions and constructions of Black masculinities in various regions and periods. We will also examine the social, political, and economic conditions of Black male life in the contemporary period and interrogate representations of Black men and boys in U.S. culture and society in relation to the broader politics of race, class, gender, and sexuality in the post-civil rights era. Specific attention will be paid to the history of ideas and approaches that have shaped and defined our understanding of Black males. You will be introduced to historical and socio-cultural circumstances that affect Black males and the diverse nature of Black culture. This course will also attempt to heighten awareness and sensitivity to the contemporary problems affecting Black males and thus help discover and evaluate social policies and programs geared towards Black males.

AAST488 Adv Study African American Lit
Hours 3
A special topics course that focuses on issues in African American literature.

AAST490 AAST Independent Study
Hours 1-6
Independent study on any subject pertaining to African-American studies, under the supervision of a professor in the chosen field and/or Director of the program.

AAST495 Special Topics
Hours 3
An examination of selected African American topics. May be repeated for a maximum of 18 hours.

AFS101 Leadership Laboratory
Hours 1
Leadership Laboratory (LLAB) is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Air Force second lieutenants and complement the AFROTC academic program. Provides an introduction to the military profession, including applications in leadership, drill and ceremony, customs and courtesies and communication service. This course is for first-year AFROTC cadets.

AFS102 Leadership Laboratory
Hours 1
Leadership Laboratory (LLAB) is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Air Force second lieutenants and complement the AFROTC academic program. Provides an introduction to the military profession, including applications in leadership, drill and ceremony, customs and courtesies and communication service. This course is for first-year AFROTC students/cadets.

AFS110 Foundations Of The Usaf
Hours 1
'The Foundations of the United States Air Force,' is a survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. Featured topics include: overview of ROTC, special programs offered through ROTC, mission and organization of the Air Force, brief history of the Air Force, introduction to leadership and leadership related issues, Air Force Core Values, Air Force officer opportunities, and an introduction to communication studies. AFS 101 Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.
AFS120 Foundations Of The Usaf
Hours 1

The Foundations of the United States Air Force is a survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. Featured topics include: overview of ROTC, special programs offered through ROTC, mission and organization of the Air Force, brief history of the Air Force, introduction to leadership and leadership related issues, Air Force Core Values, Air Force officer opportunities, and an introduction to communication studies. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

Prerequisite(s) with concurrency:

AFS201 Leadership Laboratory
Hours 1

Leadership Laboratory (LLAB) is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Air Force second lieutenants and complement the AFROTC academic program. Provides an introduction to the military profession, including applications in leadership, drill and ceremony, customs and courtesies and communication service. This course is for second-year AFROTC students/cadets.

AFS202 Leadership Laboratory
Hours 1

Leadership Laboratory (LLAB) is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Air Force second lieutenants and complement the AFROTC academic program. Provides an introduction to the military profession, including applications in leadership, drill and ceremony, customs and courtesies and communication service. This course is for second-year AFROTC students/cadets.

AFS230 Evolutn Of Us Air Power
Hours 1

A course designed to examine general aspects of air power from a historical perspective. The course covers the period from the first balloons and dirigibles to the space-age systems of the Global War on Terror. Historical examples are provided to show the development of Air Force core functions to demonstrate the evolution of what has become today's USAF. Furthermore, the course examines several fundamental truths associated with war in the third dimension, e.g., principles of war and tenets of air power. As a whole, this course provides the students with a knowledge-level understanding for the general employment of air power, from an institutional, doctrinal, and historical perspective. The course covers the period from the first balloons and dirigibles to the space-age systems of the Global War on Terror. Historical examples are provided to show the development of Air Force core functions to demonstrate the evolution of what has become today's USAF. Furthermore, the course examines several fundamental truths associated with war in the third dimension, e.g., principles of war and tenets of air power. As a whole, this course provides the students with a knowledge-level understanding for the general employment of air power, from an institutional, doctrinal, and historical perspective. In addition, what the students learned about the Air Force Core Values in AS100 will be reinforced through the use of operational examples, and they will complete several writing and briefing assignments to meet Air Force communication skills requirements. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AFS240 Evolutn Of Us Air Power
Hours 1

A course designed to examine general aspects of air power from a historical perspective. The course covers the period from the first balloons and dirigibles to the space-age systems of the Global War on Terror. Historical examples are provided to show the development of Air Force core functions to demonstrate the evolution of what has become today's USAF. Furthermore, the course examines several fundamental truths associated with war in the third dimension, e.g., principles of war and tenets of air power. As a whole, this course provides the students with a knowledge-level understanding for the general employment of air power, from an institutional, doctrinal, and historical perspective. In addition, what the students learned about the Air Force Core Values in AS100 will be reinforced through the use of operational examples, and they will complete several writing and briefing assignments to meet Air Force communication skills requirements. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

Prerequisite(s) with concurrency:

AFS301 Leadership Laboratory
Hours 1

Leadership Laboratory (LLAB) is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Air Force second lieutenants and complement the AFROTC academic program. Provides an introduction to the military profession, including applications in leadership, drill and ceremony, customs and courtesies and communication service. This course is for third-year AFROTC cadets.

AFS302 Leadership Laboratory
Hours 1

Leadership Laboratory (LLAB) is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Air Force second lieutenants and complement the AFROTC academic program. Provides an introduction to the military profession, including applications in leadership, drill and ceremony, customs and courtesies and communication service. This course is for third-year AFROTC cadets.

AFS350 USAF Leadership Studies
Hours 3

A study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. A mandatory. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles of this course. Students enrolled in AFS 350 and AFS 360 courses are AS 300-level cadets who are in their junior year of AFROTC program, unless approved otherwise.
AFS360 USAF Leadership Studies
Hours 3
A study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. A mandatory. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles of this course. Students enrolled in AFS 350 and AFS 360 courses are AS 300-level cadets who are in their junior year of AFROTC program, unless approved otherwise.

AFS401 Leadership Laboratory
Hours 1
Leadership Laboratory (LLAB) is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Air Force second lieutenants and complement the AFROTC academic program. Provides an introduction to the military profession, including applications in leadership, drill and ceremony, customs and courtesies and communication service. This course is for fourth-year AFROTC cadets.

AFS402 Leadership Laboratory
Hours 1
Leadership Laboratory (LLAB) is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Air Force second lieutenants and complement the AFROTC academic program. Provides an introduction to the military profession, including applications in leadership, drill and ceremony, customs and courtesies and communication service. This course is for fourth-year AFROTC cadets.

AFS470 National Security Affair
Hours 3
Examines the national security process, regional studies, advanced leadership ethics, and Air Force doctrine. Special topics of interest focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Within this structure, continued emphasis is given to refining communication skills. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles of this course. Students enrolled in AFS 470 and AFS 480 courses are AS 400-level cadets who are in their final academic year of AFROTC program, unless approved otherwise.

AMS100 Special Topics
Hours 1
Selected American topics for lower-division undergraduate students offered by American studies faculty members or supervised teaching assistants. Some examples include the following five-week, one-hour courses: African-American Star Athletes, Superbowl Ads, Stand Up Comedy, Disney’s America, and Why Eat Local?.

AMS101 Special Topics
Hours 1
Selected American topics for lower-division undergraduates offered by American Studies faculty members or supervised teaching assistants.

AMS102 Special Topics
Hours 1
Selected American topics for lower-division undergraduates offered by American Studies faculty members or supervised teaching assistants.

AMS103 Special Topics
Hours 1
Selected American topics for lower-division undergraduates offered by American Studies faculty members or supervised teaching assistants.

AMS104 Special Topics
Hours 1
Selected American topics for lower-division undergraduates offered by American Studies faculty members or supervised teaching assistants.

AMS105 Special Topics
Hours 1
Selected American topics for lower-division undergraduates offered by American Studies faculty members or supervised teaching assistants.

AMS106 Special Topics
Hours 1
Selected American topics for lower-division undergraduates offered by American Studies faculty members or supervised teaching assistants.
Humanities

AMS150 Introduction to American Studies: Arts and Values

**HU**

Hours 3

Exploration of the relation between the arts - popular, folk, and elite - and American culture in four selected periods: Victorian America, the '20s and '30s, World War II and the Postwar Era, and the '60s. Class presentations and discussions revolve around novels, movies, art, music, artifacts, and readings about the periods. This course is team taught by all the members of the American studies faculty. Offered fall semester.

Humanities

AMS151 Intro American Studies: World Nation & Region

**HU**

Hours 3

A broad survey of American culture formed by global, national, and regional influences. The first section, "World," looks at the United States as a product and shaper of international movements, ideas, and cultures from 1500 to the present. The second section, "Nation," examines the creation of a distinctly American identity between 1790 and 1890 that ultimately incorporated and reflected global issues. The third section, "Regions," focuses on the South and other regions as contributors to and consequences of national and global interactions. Team taught by the entire AMS faculty, lectures will include topics on film, music, literature, art, sports, and other cultural artifacts. Offered spring semester.

Humanities

AMS200 Special Topics Amer Stud

Hours 3

Selected American topics for lower-division undergraduate students offered by AMS faculty members or Americanists from related departments. Recent examples include The Asian-American Experience, The American Road, The Sporting Life, Baseball Since 1945, and Twilight Zone Culture. May be repeated for a maximum of 12 hours.

AMS201 Intro African Amer Study

**SB**

Hours 3

This course provides a basic outline of the diversity and complexity of the African American experience in the United States. It surveys the early academic and social concern of Black Studies advocates; the changes in the field's objectives that arise from its connections to contemporary social movements for Black Power, women's liberation, and multiculturalism; and its major theoretical and critical debates.

Social and Behavioral Sciences

AMS203 Introduction to Southern Studies

**HU**

Hours 3

This discussion-based course introduces students to major texts and interdisciplinary methodologies in the field of Southern Studies. Traversing epochs from before the Civil War until after the Civil Rights Movement, we will scrutinize the interplay between course materials (autobiographies, fictional texts, historical accounts, and films) and major political, cultural, and social forces influencing the region and the nation.

Humanities

AMS204 Introduction to Western American Studies

**HU**

Hours 3

A lecture/discussion course utilizing a biographical approach to the salient themes, issues, and episodes of the American West. Some of these lives are real, some of them imagined, and others are a little of each. All of them, however, reveal much about both region and nation and how each has changed over time.

Humanities

AMS205 Dirty Jobs

**HU**

Hours 3

This course explores jobs that get you "dirty." Work is one of the aspects that most shapes individual lives, and many lines of work are viewed as dangerous, dirty, or somehow unsavory by American society. This course uses films, TV shows, written narratives, and music to explore different types of "dirty" work in the United States.

Humanities

AMS206 Native American Studies

**HU**

Hours 3

There's a lot more to Native Americans than the first Thanksgiving, the Battle of the Little Bighorn, and casinos (although we'll discuss all those things too). This course will introduce you to the diversity of Native American societies, their histories, and their significant influence on American culture, contemporary U.S. policy, and law. We'll be examining everything from ancient archaeological artifacts to contemporary film and literature as we investigate the vital role of indigenous people in North America. As much as possible, we'll be directly engaging Native sources and voices as we explore the struggles over land, sovereignty, and culture that have shaped (and continue to shape) Native American lives.

Humanities

AMS208 Rock, Hip-Hop, and Country

Hours 3

This course will offer an introduction to popular music that young Americans used for two generations, to root their aesthetics, center their values, and test their ethical allegiances.

AMS222 Modern Gay America: Introduction to LGBTQ Histories

Hours 3

During the past decade, lesbian, gay, bisexual, transgender and queer (LGBTQ) Americans have achieved various forms of empowerment and visibility in the nation's political, legal, social, and cultural arenas. However, LGBTQ persons continue to face various barriers to full equality and well-being including employment discrimination, high rates of homelessness among teens, violence, and inadequate access to health care. This 3 credit hour course places the events of the last decade into a longer history of LGBTQ communities, visibility and politics that begins in the late nineteenth century and ends in the early twenty-first century. During the semester, we will explore the historical development of LGBTQ identities, communities, politics, and cultural production. Together, we will analyze an array of materials including scholarly texts, oral histories, newspapers, films, photographs, art and political ephemera.

Prerequisite(s): None
The University of Alabama 2018-2019

AMS231 Contemporary America

Hours 3

This course analyzes the changing nature of American values for the period dating from the 1970s through the 2000s by examining key developments in the everyday life patterns and cultural expressions of Americans in contexts that range from the local to the international. In doing so, we will draw connections between the economic and political contexts of these decades and contemporaneous works of creative expression and popular culture. This course also will serve as an introduction to the types of interdisciplinary research methods used in American Studies. Offered fall and spring semesters.*.

Humanities

AMS300 Special Topics

Hours 3

Selected American topics for advanced undergraduate students, offered by American Studies faculty members or Americanists from related departments. Recent examples include American Hobo Subculture, World War II and Modern Memory, Women’s Liberation Movement, Justice and Civil Society, Southern Sexual Cultures, and Cultures of American Slavery. May be repeated for a maximum of 12 hours.

Prerequisite(s): Six hours of Humanities and/or Social Sciences courses or permission of instructor.

AMS303 Education Of Southern Blacks

Hours 3

A study of the “miseducation” of Africans in America. The course explores education for blacks from West Africa at the middle of the second millennium and early American society to the emergence of the separate school system of the 19th and 20th centuries.

AMS310 The Latinx Experience

W

Hours 3

This course focuses on the history of people of Latin American descent (Latinas/os) living in the United States. Although we will examine communities comprised of people of Central and South American descent, the focus of this course will be on the four largest Latinx groups: those of Mexican, Puerto Rican, Cuban and Dominican descent. Students will become familiar with issues that have affected different Latinx populations in the United States: migration patterns, cultural interaction, community and cultural formation; and racial formations. We will also examine relations among Latinx and European immigrants, and consider the affects of US intervention and imperialism in Latin America on US Latinx communities. Lectures, readings, and films will explore connections between the past and the present and provide students a forum to express their own viewpoints on the legacy of this history.

Prerequisite(s): Six hours of Humanities and/or Social Sciences courses or permission of instructor.

Writing

AMS315 Work and Workers Since 1865

Hours 3

Examines the history of workers - men and women, paid and unpaid, of different racial and ethnic groups, in different regions of the United States - from 1865 to the present.

Prerequisite(s): Six hours of Humanities and/or Social Sciences courses or permission of instructor.

AMS316 Labor on Film

Hours 3

This course examines the ability of film to successfully portray the history of labor in the US and how present events and attitudes shape portrayals of past events.

Prerequisite(s): Six hours of Humanities and/or Social Sciences courses or permission of instructor.

AMS318 Amusement and Tourism in America

Hours 3

This course explores the centrality of amusement and tourism in defining the American pursuit of happiness. The course examines varied forms of leisure culture that emerged in the 19th century and exploded in popularity throughout the 20th century. By asserting connections between a wide range of amusement and tourist activities, the course provides a framework for understanding how Americans at play participate in a vibrant component of American social, economic, and aesthetic history.

Prerequisite(s): Six hours of Humanities and/or Social Sciences courses or permission of instructor.

AMS320 American Popular Humor

Hours 3

This course explores major writers, performers, works, and themes of American humor that have achieved enduring popularity among mass audiences. It examines the social and historical contexts that reverberate in humor produced in the United States and focuses on three persistently popular mediums: prose and performance; film; and the television situation comedy.

Prerequisite(s): Six hours of Humanities and/or Social Sciences courses or permission of instructor.

AMS321 African American Folk Art

Hours 3

An examination of the objects created by African Americans variously classified as “folk,” “self-taught,” and “outsider” artists. Course material will address the African origins and American transformations of traditional arts and crafts (architecture, pottery, iron work, and quilting) as well as the work of selected 20th-century artists in such media as painting, sculpture, and assemblage. Key concerns will include not only analysis and cultural/historical contextualization of these artists and their works but also political and theoretical debates with respect to issues of collection, modes of exhibition, and use of the above-listed classifications.

Prerequisite(s): Six hours of Humanities and/or Social Sciences courses or permission of instructor.
AMS323 Into the Wild: Nature and American Popular Imagination  
W  
Hours 3  
This course examines the often contentious and always passionate American relationship with “nature,” an idea as much as a physical reality. Students consider the varying ways that nature has been imagined over a wide range of time periods and through the lenses of various forms of creative expression and cultural practices. The course explores how our complex relationship with “nature” has influenced American culture at large, its history and mainstream values.  
Prerequisite(s): Six hours of Humanities and/or Social Sciences courses or permission of instructor.

AMS325 America West And 19th Century  
Hours 3  
Few things remained so central to the 19th American century experience as the West, a region to be explored, inhabited, and incorporated into an expanding urban-industrial society. From Lewis and Clark to Buffalo Bill, this lecture/discussion course examines the relationship between America and the West as it developed throughout the 19th century.  
Prerequisite(s): Six hours of Humanities and/or Social Sciences courses or permission of instructor.

AMS326 The Modern West  
Hours 3  
This lecture/discussion course examines the growth of the American West during the 20th century as both the embodiment of modernity and, as mythic imagination, an escape from the very modernity it represents.  
Prerequisite(s): Six hours of Humanities and/or Social Sciences courses or permission of instructor.

AMS327 The American Western  
Hours 3  
Since its creation toward the close of the 19th century, the western has been the most popular genre in American film history. No popular genre has generated anything like the kind of sustained attention, enthusiasm, interest, passion, anger, or debate as the American western. Which is the focus of the course: a chronological treatment of the on-going relationship between the western film and the meaning of modern America.  
Prerequisite(s): Six hours of Humanities and/or Social Sciences courses or permission of instructor.

AMS335 American Pop Music  
W  
Hours 3  
Recent scholarship has shifted popular music history from folk roots and rock rebellion to pop: commercial, accommodating, but no less fascinating amalgamations. This class will range from blackface minstrelsy in the 1800s to American Idol today, defining mainstreams rather than undergrounds. Pop music performed capitalism, but it also performed democracy. Sorting out that process will be the task.  
Prerequisite(s): Six Semester Hours of Humanities and/or Social Sciences or Instructor’s Permission.

AMS340 Women in the South  
W  
Hours 3  
What insights into American experience are afforded by reading nineteenth- and twentieth-century texts in which Southern women engage questions of gender, class, race, labor, and region? This class will explore fictional and nonfictional prose by and about Southern women in order to examine how historical, cultural, and sociopolitical factors have shaped the lives and writings of women in the South. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): Six Semester Hours of American Studies or Instructor’s Permission.

AMS341 African American Art  
Hours 3  
An examination of the work of formally trained 20th century African American painters, sculptors, and photographers in relation to broader currents in the social and cultural history of the United States. Examines ways in which African American art has alternately reflected, shaped, and challenged such important historical events and currents as the Harlem Renaissance, the Great Depression, the Civil Rights and Black Power movements, the Women’s Movement, and contemporary identity politics. Also evaluates the contributions of selected artists in relation to such key art movements as Modernism, Social Realism, and Postmodernism.  
Prerequisite(s): Six hours of Humanities and/or Social Sciences courses or permission of instructor.

AMS352 American Folklore  
Hours 3  
This course offers a survey of such genres of American folk culture expression as ghost stories, urban legends, foodways, music, and folk art—paying special attention to how these diverse forms of expression reflect and shape particular regional, ethnic, class, and gender identities. Course materials include ethnographic writing, sound recordings, film, and folklore scholarship. The course also will devote attention to the competing definitions of “folk” and “folklore” prevalent from the late 19th century to the present. Assignments will emphasize student collection and analysis of original folklore material.  
Prerequisite(s): 6 SH Humanities or Social Sciences or permission of instructor.

AMS367 The American Game  
Hours 3  
Lecture topics, readings, and classroom discussions will pursue major connections between baseball and American society from 1880 to the present: (1) the modernization of America and the rise of an urban, industrial game; (2) baseball and race; and (3) postwar America and baseball.  
Prerequisite(s): Six hours of Humanities and/or Social Sciences courses or permission of instructor.
Native American imagery is widespread in American culture, from butter packaging to sports mascots and from children’s picture books to epic films. These depictions have embedded ideas about American Indians—often romanticized, stereotyped, or just inaccurate ideas—in the imaginations of millions of readers and film-goers. In this course, we will examine representations of Native Americans in art, writing, film, music, and more, ranging from early encounters between Natives and newcomers to contemporary pop culture. We’ll consider continuities and changes in how Indians have been imagined by outsiders, while also exploring Native self-representation in the face of cultural appropriation and stereotyping. We’ll explore a variety of methods and sources as we reflect on the pervasiveness of ideas about, and images of, Natives in American culture.

Prerequisite(s): Six hours of Humanities and/or Social Sciences courses or permission of instructor.

Writing

AMS400 Internship
Hours 1-3

An internship opportunity that combines independent study and practical fieldwork experience focusing on a particular problem or topic related to American culture and experience. Examples are internships in archival fieldwork, material culture fieldwork, museum management, and sound recordings. Credits earned in this course are applicable to the major and minor in American studies but are not counted in 400-level requirement. May be repeated for a maximum of 6 hours.

AMS401 Black Intellectual Thought
Hours 3

An upper level seminar designed to provide students with an in-depth study of major intellectual debates and movements that have shaped the politics, history and identities of the people of African descent in the United States and the African diaspora. The course will combine methodologies and concepts from multiple disciplines including history, political theory, literature, women's studies, sociology, psychology and philosophy.

AMS402 Special Topics
Hours 3

Selected African American topics for advanced undergraduate students. May be repeated for a maximum of 12 hours.

AMS403 Honors Research - Ams

UH
Hours 3

Internship opportunity that combines guided and independent study with on- or off-campus research experience involving a particular methodological approach to American culture and experience. Examples are social science methods, oral history, original manuscript research, and technology.

University Honors

AMS405 Directed Study
Hours 1-3

May be repeated for a maximum of 6 hours.
AMS416 American Environmental Thought in a Global Context
W
Hours 3
Popular conceptions of nature hold extraordinary power in shaping our responses and policies toward both the geophysical world and built environments. This interdisciplinary course examines key concepts and controversies in American thought about nature since before colonization. Using accounts from various regions, the course explores evolving conceptions of nature and justice, competing claims about race and class, and changing institutional responses and remedies to environmental degradation in the context of global change. The course is highly interactive, inviting critical thinking about the human place in the physical world. We read and discuss ecological views as presented in colonial writings, slave narratives, Transcendentalist thought, Gilded Age preservationist and conservationist debates, and the work of Progressive Era occupational health specialists and ecologists. We give specific attention to twentieth century social movements for environmental public health, examining contemporary approaches, including eco-feminism, environmental justice, and sustainability.
Prerequisite(s): Permission of the instructor.
Writing

AMS420 Mark Twain’s America: America’s Mark Twain
Hours 3
This course employs the life, work, and times of America’s most celebrated author to examine American popular culture from the mid-nineteenth century to the present. In addition to exploring his major works and his times, the course considers his impact on popular culture to this day—from film adaptations of his work, to pop-culture references, to the traditions of American humor and cultural criticism.
Prerequisite(s): 9 SH Humanities/ and or Social Sciences courses or permission of instructor

AMS421 Writer & Artist in America
W
Hours 3
This course offers a comparative examination of responses by 20th century literary and visual artists to perceived social crises and challenges to American cultural values, such as sex in the early 20th century American city, working class struggles during the Great Depression, issues of atomic anxiety during the early years of the Cold War, the ethical dilemmas of the Vietnam War, the perils of the AIDS/HIV crisis, and the flourishing of contemporary consumer culture. The course also introduces several important movements in twentieth century American arts and letters, including Naturalism, Modernism, Social Realism, the Beat movement, Social Surrealism, and Postmodernism.
Prerequisite(s): 9 SH Humanities/ and or Social Sciences courses or permission of instructor
Writing

AMS422 Popular Culture in America
W
Hours 3
A selective survey and analysis of 20th century U.S. popular culture—particularly, comic books, fan culture, television, music, advertising, and sports. Examines ways in which popular culture has reflected and shaped aspects of American society such as gender ideologies, economics, race, class, and regional identity.
Prerequisite(s): 9 SH Humanities/ and Social Sciences courses or permission of instructor

AMS423 The Roots of American Music
W
Hours 3
This class surveys American music from ragtime, blues, and hillbilly to Broadway, Hollywood musicals, and swing jazz. Our focus will be on commercial mainstreams and democratic audiences – how selling sound led to different identities being expressed through taste and style. Race, gender, class, sexuality, age, technology, and the music business will all factor as we move from blackface minstrelsy in the 1800s to World War II. We will listen closely to several songs each week, connecting music to larger themes through primary and secondary sources, regular writing, and in-class discussion.
Prerequisite(s): 9 SH Humanities/ and or Social Sciences courses or permission of instructor.
Writing

AMS429 America between the Wars
W
Hours 3
Explores first two decades of America’s "Modern Times" (1919-1941) when Americans redefined themselves and their society embracing and debating (sometimes hotly) old beliefs, new conceptions, and the implications of a machine-driven, modern-mass society. Writing proficiency within this discipline is required for a passing grade in this course.
Prerequisite(s): 9 SH Humanities/ and or Social Sciences courses or permission of instructor
Writing

AMS430 Special Topics
Hours 3
Selected American topics for advanced undergraduate majors in American studies, offered by American Studies faculty members or Americanists from related departments. May be repeated for a maximum of 6 hours.
Prerequisite(s): Nine Semester Hours of humanities or social science courses or Instructor’s Permission
AMS439 Urban Spaces: The Nature of Cities  
W  
Hours 3  
This interdisciplinary social science course provides an introduction to the cultural and physical ecology of cities, focusing primarily on urbanization in the United States from the late 19th century to the present. Course readings include classical scholars in urbanism and urban design. Contemporary urban environmental histories explore population shifts and land use along the urban gradient from the suburbs to urban centers, with attention to water, sewer, and transportation infrastructure, pollution, and urban sprawl. Writing proficiency within this discipline is required for a passing grade in this course.

Writing

AMS445 The "Good War"  
W  
Hours 3  
Examination of selected topics from the American experience during the Second World War. Topics include the Homefront, the Holocaust, race relations, the emergence of American air power, and the impact of the war on American memory and postwar American society. Writing proficiency within this discipline is required for a passing grade in this course.

Prerequisite(s): 9 SH Humanities/ and or Social Sciences courses or permission of instructor.

Writing

AMS446 Gender and Environment  
W  
Hours 3  
This course examines histories of concepts of nature and gender, philosophies of eco-feminism, and accounts of gender-based efforts for environmental reform. Texts include histories of environmental concepts and reform campaigns, broadly conceived, including slave narratives, accounts of experiences in the women's club movement, the conservation movement, and Progressive Era occupational and public health reform, along with more well-known twentieth century nature writers, contemporary scholars, and activists. Particular attention is paid to women whose identities are defined in part by their status as immigrants, women of color, or in other marginalized categories. Case studies explore global environmental reform as well as U.S. experiences. Writing proficiency within this discipline is required for a passing grade in this course.

Writing

AMS450 (En)gendering Black History: Black Feminist Thought and Action in American History  
Hours 3  
In the Zora Neale Hurston classic, Their Eyes Were Watching God, the protagonist's (Janie) grandmother described the gender and racial norms that dictated their lived experiences as women and racial minorities under the Jim Crow regime. This class places the experiences and expressions of black women like Janie and her grandmother at the center of scholarly and pedagogical explorations of black feminist thought and action. Beginning with black women’s responses to legal racialized chattel slavery in the nineteenth century and ending in the early twenty-first century, we will examine how black women in the United States articulate(d) politicized understandings of and responses to interlocking oppressions including racism, sexism, patriarchy, heterosexism, classism, etc. This interdisciplinary course will also examine African American gender and sexual politics, interactions between black women and the state, moments of coalition and conflict between black and white women, as well as the diverse nature of black feminist thought.

AMS460 Race & Ethnicity in US Labor  
Hours 3  
This course is designed to familiarize students with the important topics, themes, and methodologies in the study of race and ethnicity in U.S. labor. Throughout the semester, the class will examine the lives of working women and men and their roles in the social, political, and economic development of the United States. The class will analyze the roll of gender, race, and ethnicity at home and in the workplace and examine how scholars have studied the people, events and institutions in this field.

Prerequisite(s): Nine Semester Hours of American Studies Courses or Instructor’s Permission

AMS465 Fictions of American Identity  
W  
Hours 3  
An examination of American literature and culture from before the Civil War until after the Civil Rights Movement. Representations of American experience in essays, novels, poems, short stories, social reformist tracts, and the visual arts will be studied in the context of social and political debates over slavery, national identity, women's roles, immigration and assimilation, social mobility, urbanization, sexual mores, consumer culture, and race relations. Writing proficiency within this discipline is required for a passing grade in this course.

Prerequisite(s): 9 SH Humanities/ and or Social Sciences courses or permission of instructor.

Writing
AMS470 Natives and Newcomers: Cross-Cultural Encounters in Early America  
W  
Hours 3  
The colonization efforts of European empires in the early modern period led to cross-cultural encounters between societies previously unfamiliar with one another, introducing each of them to unfamiliar ideas, cultures, political systems, and landscapes and changing their lives in profound ways. This course explores the complex interactions between Native American, European, and African peoples in North America, with a particular focus on the region that is currently the Southeastern United States. Such cross-cultural contact could result in valuable collaborations, deep misunderstandings, violence, or contests for power. How were interactions with unfamiliar peoples described and understood by Native Americans, Europeans, and African peoples in North America? How did the circulation of peoples and cultures shape ideas about ‘America’ and ‘Americaness’? Is ‘encounter’ a single event, or a long process? This course meets a college core writing requirement; a demonstration of writing proficiency is required for a passing grade in this course.  
Prerequisite(s): Nine hours of American Studies Courses or permission of instructor.  

Writing  
AMS480 Democracy in America  
Hours 3  
Throughout the first half of the nineteenth century, Americans prided themselves on their democratic politics, industrial progress, science and technology, religious faiths, capitalist tendencies, and control over nature. No other person captured the essence of American society and manners more than the French aristocrat, Alex de Tocqueville, who traveled to the United States in the 1830s and published his famous work, Democracy in America. Using Tocqueville’s observations as well as fiction, autobiography, painting, politics, and more, this course explores how ordinary Americans presented themselves as a democratic people from 1800 to 1865.  
Prerequisite(s): Nine semester hours of American Studies Courses or Instructor’s permission  

AMS492 American Topic Seminar  
Hours 3  
Study of special topics within the American cultural experience. Recent examples include American Thought, Sports in American Life, American Perspectives on the Environment, the Civil Rights Movement, the Picture Press, Music and Ethnicity, the Politics of Culture, Regionalism, Homelessness in America, American Autobiography, American Monuments, Southern Popular Culture, Politics and Culture, Historical Memory, America by Design, Women in America, Race in America, 19th-Century Popular Culture, and Disasters in America.  
Prerequisite(s): Nine semester hours of American Studies Courses or Instructor’s permission  

ANT100 Intro To Anthropology  
SB  
Hours 3  
This course introduces students to the subfields of anthropology and demonstrates the benefits of a holistic approach to understanding globalization, multiculturalism, and cultural diversity. The concepts of evolution, human prehistory, language, and culture are explored as well as the diversity of human cultural patterns, including variations in marriage, kinship, and religion. SB Credit.  
Social and Behavioral Sciences  

ANT102 Intro to Cultural Anthropology  
SB  
Hours 3  
An introduction to the discipline of cultural anthropology, the branch of anthropology that examines the rules and behaviors of contemporary human cultures. The course will demonstrate the importance of a holistic approach to understanding human diversity, and compare and contrast the various developments cultures use to tackle the universal problems of human living. SB Credit.  
Social and Behavioral Sciences  

ANT103 Discoveries In Archaeology  
SB  
Hours 3  
This course examines the major archaeological discoveries of the last two centuries that have led to significant insight about the nature of human organization. Not only will some of the broader cultural patterns in human prehistory be explored such as the origins of writing, religion, art, calendar systems, agriculture, and cities, but we will also learn about several remarkable archaeological sites and phenomena, including Stonehenge, the pyramids of Egypt, upper Paleolithic cave paintings, Machu Picchu and many other impressive achievements of the past.  
Social and Behavioral Sciences  

ANT106 Native Peoples of North America  
SB  
Hours 3  
Comprehensive overview of the prehistory, history, and modern day cultural diversity of Native Americans throughout North America. Historical and technological developments of different native groups are explored including changes as a result of European contact and the more recent attempts to revitalize Native American culture.  
Social and Behavioral Sciences  

ANT107 Intro to Archaeology  
Hours 3  
Overview of the methods archaeologists use to study prehistoric cultures and an introduction to the study of human culture over the past two million years.  

ANT113 Indians Of Deep South  
Hours 3  
Introduction to the Native Americans of Alabama and their nearby neighbors. Focuses on describing and explaining lifeways of indigenous peoples using ethnographic, ethnohistoric, and archaeological studies.
ANT150 Evolution for Everyone  
Hours 3
This course is designed to open students minds to what evolution is and how it applies to all life. Toward that end, we will view lectures given by evolutionary scholars from varied institutions and disciplines.

Social and Behavioral Sciences

ANT208 Anthropology of Sex  
Hours 3
This course is an introduction to human sexuality from a biocultural perspective with emphasis on sexual diversity and pluralism and psychosexual evolution. It traces the evolution of human sociosexual behavior, including human sexual physiology, preproductive strategies; contemporary courtship, mating and marital patterns; gender differences in the brain and behavior; and sexual and social emotions. It compares the sexuality of humans to non-humans, especially to that of other primates. It also discusses human sexuality from the perspective of different cultures throughout the world. Among other topics, the course will address the psychobiocultural dimensions and implications of attraction, fidelity sex techniques, gender, incest, homosexuality and transsexuality and sexually transmitted diseases.

ANT210 Language and Culture  
Hours 3
Human activity in its linguistic, cultural, and social contexts; interrelationships between culture and natural language; and the influences of language and culture on thought and behavior.

Social and Behavioral Sciences

ANT215 Anthropology in Movies and Fiction  
Hours 3
Compares portrayals of anthropologists and core anthropological issues in movies and fiction to anthropological perspectives and scholarship.

ANT216 Ethnographic Cinema  
Hours 3
This course is a survey of the history of ethnographic cinema. Students in this class will learn this history by viewing important ethnographic films and by discussing and critiquing the visual representation of culture and society in anthropology.

ANT217 Peoples of Asia  
Hours 3
This discussion-based course explores the anthropology of Asia, with a different topical focus each semester. These foci include diverse subjects of anthropological study (marriage, class mobility, labor, masculinity, politics, medicine, freedom). Over the course of the semester, students will pay special attention to how these subjects are shaped by the circulation of social movements and globalizing forces like production and consumption, global media, and human rights discourses. In so doing, this course will raise questions about the relationships between theory, epistemology and method as they pertain to the anthropology of Asia, and to anthropology more generally.

ANT250 Issues in Anthropology  
Hours 3
This course is a flexible listing designed to cover specific topics in anthropology not already offered through an existing course. It is similar to ANT 450 Problems in Anthropology, but allows students with less exposure to ANT or the particular issues addressed an opportunity to learn more at a more introductory level.

ANT261 South American Archaeology  
Hours 3
At the time of European contact, chroniclers who visited South America wrote in awe of its diversity of peoples and cultures, its sheer richness of natural resources, its wealth, monuments, and urban centers, and its technological achievements. Indeed, South America witnessed the development of social complexity early in prehistory, a prehistory that includes the rise and fall of state-level societies, kingdoms, and empires—all without the use of writing and such inventions as the wheel. In this class, we will examine how the history of South America is situated within the history of humankind as a whole. We will survey the region’s cultural history, beginning with the peopling of South America in the Pleistocene epoch and ending with the impact of European colonization on native peoples in the Andes, Amazonian, and the Caribbean. We will learn about the role that archaeology is uniquely capable of playing in bringing to light the continent’s fascinating past and learn about the material culture and biological/environmental factors that make the region singular in comparison to other culture-areas of the world.

ANT262 UA Excavations at Vergina, Greece  
Hours 3
This is a collaborative project between the University of Alabama (UA) and Aristotle University—Thessaloniki (AUTh). For two weeks each summer students will participate in ongoing excavations at the world-famous Vergina site, home of Philip II of Macedon, father of Alexander the Great.

Prerequisite(s): ANT 107 and CL 323, and approval by instructor (s). The course is only open to UA undergraduates.

ANT265 Glyphs: Ancient Maya Language and Culture  
Hours 3
This course covers the basics of ancient Maya writing and art. It explores myths, history, and tales of life at the courts of lords and nobles, who wrote and spoke in “divine glyphs”. The course begins with an overview of Maya glyphs and its historical and cultural contexts. After a section on the fundamentals of the script, each week will combine a discussion of the grammar of Hieroglyphic Mayan with lectures on a range of topics from tags and texts on drinking cups to parallels between Pre-Columbian, Colonial, and present-day Maya literatures. The lectures will be accompanied by practical exercises and quizzes. The course does not require any prior knowledge of Mayan languages or glyphs. No training in drawing or epigraphy is necessary.

ANT269 Field Archaeology  
Hours 6-12
In this course students and the supervising archaeologists work together as a research team on an archaeological excavation. Students learn basic excavation techniques and skills: how to identify, map, measure, recover, record, and process archaeological data. At the conclusion of the course, students will have excavation experience and insights into the archaeological research process.
ANT270 Intro to Biological Anthropology
N
Hours 4
An introduction to human evolution, biological variation, and adaptation, from the deep past to the present, with a special focus on the biocultural foundations of human nature. Students will become familiar with cutting edge evidence from the fossil record and molecular biology about our origins and prehistory, and how humans today respond to our widely varying physical and social environments.

Natural Science

ANT275 Race, Ethnicity Human, and Variation
Hours 3
Historical and contemporary perspectives on human biological diversity, including the concepts of race, ethnicity, adaptation, and some of the social implications of these views.

ANT311 Population, Health & Human Origin
Hours 3
Focuses on the relationships among human ecology, population growth, health and disease, and adaptation in modern and prehistoric societies. Explores the origins of infectious diseases, emphasizing the principles of epidemiology and evolution of pathogens.
Prerequisite(s): ANT 270

ANT312 Non-Human Primates
Hours 3
This course is an introductory survey of the world's living non-human primates. The focus is on the taxonomy, anatomy, behavior, ecology and cognition of our closest living relatives. It is intended both as a starting point for further coursework in primate behavior and as a survey course for non-science students.
Prerequisite(s): ANT 100 or ANT 270 or permission of the instructor.

ANT317 Anth-Modern Life
Hours 3
Application of anthropological theories and findings to selected issues and problems of living in complex industrialized societies. Offered according to demand.
Prerequisite(s): ANT 100 or ANT 102

ANT318 Ancient Cities and Empires
Hours 3
A comparative study of ancient cities and empires with examples from the Old and New Worlds.
Prerequisite(s): ANT 100 or ANT 103 or ANT 107

ANT319 Ancient New World Civilization
W
Hours 3
An introduction to the ancient civilizations of Mesoamerica and South America. Explores the development of economic and political institutions as well as hieroglyphic texts, art styles, and religious rites.
Prerequisite(s): ANT 107 or permission of the instructor.

ANT322 Anthropological Perspectives on Complementary/Alternative & Integrative Medicine
Hours 3
This course offers students a broad understanding of Complementary/Alternative (CAM) & Integrative Medicine (IM), including a basic appreciation of the multiple existing modalities and healthcare philosophies that draw together diverse healing traditions and perspectives on the person in innovative forms of clinical practice. We will not only learn the various existing definitions of "integration" in healthcare, but we will also examine the ways in which IM is being researched in medicine and beyond, and the implications of such research for both mainstream and alternative clinical practice. The course focuses especially on CAM/IM in the US, but also includes perspectives on CAM/IM as it has developed in Europe, Asia, and Africa. Students will thus develop an anthropological perspective on the socio-cultural, political, and economic context of multiple forms of CAM/IM.
Prerequisite(s): ANT 102

ANT368 Southeastern Archaeology
Hours 3
Origin and development of pre-Columbian and early historic cultures of the Southeast. Offered according to demand.
Prerequisite(s): ANT 107

ANT401 Theory and Method in Linguistic Anthropology
Hours 3
Scientific study of natural language, phonology, grammar, lexicon, meaning and the role of linguistics in anthropological research.
Prerequisite(s): ANT 210

ANT402 Gender, Ethnicity, and Health
W
Hours 3
Explores the gendered, ethnic, cultural, and class dimensions that underlie the patterning of disease and illness worldwide, with attention to the long-term health effects of racism, sexism and poverty. Topics include reproductive and sexual health, obesity, body image, HIV/AIDS, mental illness, homelessness, and more.
Prerequisite(s): Either ANT 100 or ANT 102 & 3 additional hours, or consent of instructor.

Writing

ANT405 Culture, Mind, and Behavior
W
Hours 3
An examination of how culture influences individual thought, emotion, and behavior, and how culture is shaped by individual psychology. Topics include: models of culture; culture and visual perception; culture and personality; culture and mental health; as well as other topics.
Prerequisite(s): ANT 102

Writing

ANT408 Ancient Mexican Civilization
Hours 3
Survey of the origins and development of ancient civilizations in Mexico.
Prerequisite(s): ANT 107
ANT409 Ancient Maya Civilization  
Hours 3  
Ancient Maya civilizations in Mexico and Central America from the earliest inhabitants until the Spanish Conquest.  
Prerequisite(s): ANT 107

ANT410 Ethnography of Communication  
Hours 3  
Students in this course will learn to use the concepts and methods of ethnography of communication by developing and carrying out a research project on language and social interaction. You will learn how social interaction is organized, how to document and study it, and how to address such evidence to anthropological and applied problems. The goal for the course will be for each student to produce a report based on their research and for the work to be of sufficient substance, quality, and intellectual and/or applied significance, that it would be an ideal submission for the UA Undergraduate Research & Creativity Conference in the following semester. Students will finish the course with a critical and sophisticated understanding of how social interaction works in a variety of contexts.  
Prerequisite(s): ANT 401 or ANT 210 or permission from instructor

ANT411 Culture, Health, & Healing  
W  
Hours 3  
A cross-cultural overview of medical systems, and the health, illness, and healing experiences within them. Patients and healers will be studied through the lens of etiology, help seeking, diagnosis and treatment. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): Either ANT 100 or ANT 102 & 3 additional hours, or consent of instructor.  
Writing

ANT412 Peoples of Europe  
W  
Hours 3  
A review of selected aspects of the customs, social systems, and cultures of European societies. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): ANT 102  
Writing

ANT413 Peoples of Latin Amer  
W  
Hours 3  
A review of selected aspects of Latin American social systems and cultures. Topics include social structure, ethnicity, economics, material culture, gender roles, religion, sports, and political systems. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): Either ANT 100 or ANT 102 & 3 additional hours, or consent of instructor.  
Writing

ANT418 Dev Non-West Cultures  
Hours 3  
Theoretical and descriptive study of social change and development in non-Western societies. Major emphasis is placed on the effects of change on indigenous institutions. Both ethnographic and theoretical literature are examined.

ANT419 Myth, Ritual, And Magic  
W  
Hours 3  
Survey of the anthropological literature on religion, including such topics as myth, ritual, magic, witchcraft, totemism, shamanism, and trance states. Offered according to demand. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): ANT 102 or REL 100  
Writing

ANT421 Ethnography  
W  
Hours 3  
Ethnography is a hallmark of anthropology. It is at once a theoretical approach, set of methods, and style of writing. This course highlights ethnographic theory, methods for collecting ethnographic material, and techniques for writing about culture by reading exemplary texts, discussing key concepts, and practicing various methods. Each student will develop an ethnographic project that involves fieldwork, data analysis, and writing. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): 12 hrs of Anthropology or permission from instructor  
Writing

ANT424 Cultural Resource Management  
Hours 3  
This course is an overview of Cultural Resource Management archaeology, including the historical background and development of the field, the legal and regulatory framework to CRM archaeology, the methodologies and techniques employed, and how the legislative requirements are implemented at the federal, state, and local levels. Students will learn how to craft and submit proposals, develop and manage budgets, design and implement fieldwork, conduct and supervise data analysis, and how to author and submit reports. Upon completion of this course, students will be prepared for entering a career in CRM archaeology.  
Prerequisite(s): ANT 107

ANT426 Archaeology of East North America  
Hours 3  
Examination of the origins and developments of pre-Columbian and early historic cultures of eastern North America.  
Prerequisite(s): ANT 107
ANT428 North American Archaeology

Hours 3

This course is an introduction to the archaeology of North America, from initial colonization of the continent by hunter-gatherers, to the arrival of European explorers. We begin with an examination of the theories and debates concerning the arrival of humans in the New World. The remaining majority of the course will be an in-depth examination of prehistoric archaeological developments in the major culture areas of North America.

Prerequisite(s): ANT 107 and 6 hrs of additional anthropology classes or permission of the instructor.

ANT431 Readings In Anth

Hours 1-3

Honors readings for seniors and graduate students. Offered with permission of instructor only. May be repeated for a maximum of 6 hours.

Prerequisite(s): 6 hours of ANT courses

ANT438 Anthropology of Art

Hours 3

The course views the art that societies past and present produce; it explores culture, creativity, and human beings' distinctive compulsion to make decorative objects.

Prerequisite(s): At least 6 hours of ANT courses, including ANT 102; OR permission of instructor

ANT439 Topics Anthropology Religion

Hours 3

An examination of contemporary issues and topics in the anthropology of religion.

Prerequisite(s): ANT 102

ANT440 Culture

W

Hours 3

A selective review of past and contemporary concepts, theories, and methodological approaches adopted by cultural anthropologists. Writing proficiency within this discipline is required for a passing grade in this course.

Prerequisite(s): ANT 102

Writing

ANT441 Documenting Justice I

Hours 3

Interdisciplinary course in ethnographic filmmaking, focusing particularly on analyzing the many dimensions of culture and social experience. Students produce a short documentary film on a story of justice or injustice in Alabama. Application and permission of instructor required.

Prerequisite(s): 6 hours of ANT courses

ANT442 Documenting Justice II

Hours 3

Continuation of ANT 441.

Prerequisite(s): ANT 441

ANT444 Anthropology and Cemeteries

W

Hours 3

Using approaches developed in the discipline of anthropology and, more particularly, in the subfield of archaeology, an exploration of the different ways in which local cemeteries can yield information on cultural, societal, and historical matters. Writing proficiency within this discipline is required for a passing grade in this course.

Prerequisite(s): ANT 107

ANT445 Historical Archaeology

Hours 3

This course is a survey of the method and theory of the discipline of historical archaeology. Focusing particularly on the historical archaeology of North America, this course reviews the development of the field, considers the related fields of colonial archaeology and the archaeology of the contemporary, and examines what distinguishes historical archaeology within the broader discipline.

Prerequisite(s): ANT 107

ANT446 Anthropology and Museums

W

Hours 3

Examines the historical connections between anthropology and natural history museums in the United States. Explores the present operation of such museums and develops exhibits based on collection studies.

Prerequisite(s): ANT 107

Writing

ANT447 Ancient Andean Civilizations

Hours 3

The Andes is a region of geographic and environmental extremes that witnessed the early rise of complex societies long before the Inca Empire. In this course, we examine the prehispanic cultures that resided in this region—from the peopling of South America to the aftermath of Spanish Conquest.

Prerequisite(s): ANT 103 or ANT 107
ANT465 Lithic Analysis
Hours 3
Introduction to the basics of analysis of stone tools, their manufacture, and their use by means of microscopic and macroscopic approaches.
Prerequisite(s): ANT 107

ANT466 Laboratory Methods Archaeology
Hours 3
This class is a "hands-on" course in archaeological laboratory methods and most useful for anthropology majors/minors. Students will read about different kinds of analyses, and then put theory into practice by classifying and analyzing prehistoric artifacts. Students will learn how to build interpretations of the past by using artifact assemblages, how to discriminate between reliable and less reliable information, and collaborate in group activities.
Prerequisite(s): ANT 103 or ANT 107

ANT468 Ceramics for the Archaeologist
Hours 3
Ceramics are the most ubiquitous and variable materials on many archaeological sites and, as such, they offer archaeologists a vast amount of information about the past. In this class, we approach ceramics from the perspective of research questions, and investigate how analytical techniques can help address them. The class also has a large practical component. Students will conduct analyses on collections and present their findings at the end of the class. This course is meant to provide a framework for developing hypotheses, methods and skills directly applicable to senior projects, MA theses, and Ph.D. dissertations.
Prerequisite(s): This is a course about archaeological research, therefore, it is restricted to undergraduates that have ceramic collections that they want to study as part of a senior or honor thesis. Undergraduate prerequisites for this course include 1) permission of the instructor, 2) 12 hours in anthropology, and 3) ANT 107 "Introduction to Archaeology

ANT471 Fossil Humans and Evolution
Hours 3
Survey of the discoveries, methods, and theories that provide the background for modern research in macroevolution. Offered according to demand.
Prerequisite(s): ANT 270
Prerequisite(s) with concurrency: banner sync

ANT473 Human Osteology
Hours 4
Detailed introduction to human osteology emphasizing the identification of fragmentary remains and the criteria for determination of age, sex, and race. Two hours-lecture, two hours-laboratory. Offered according to demand.
Prerequisite(s): ANT 270, and a "C" average.

ANT474 Neuroanthropology
Hours 3
This course provides an introduction to evolutionary and biocultural approaches within anthropology to the central and peripheral nervous systems and their interconnections. Topics include the evolution of the brain; how culture and social structure shape the brain, its development, and its activity; and anthropological perspectives on connections among culture, behavior, brain, mind, and body.
Prerequisite(s): ANT 270 or BSC 300 or PY 413

ANT475 Biology, Culture, and Evolution
W
Hours 3
An introduction to the biocultural and evolutionary bases of human adaptability. Writing proficiency within this discipline is required for a passing grade in this course.
Prerequisite(s): ANT 270
Writing

ANT476 Nutritional Anthropology
W
Hours 3
An introduction to anthropological inquiries in nutrition—including food habits, food systems, dietary variability, and food movements—from a cross-cultural perspective. Writing proficiency within the discipline is required for a passing grade in this course.
Prerequisite(s): ANT 102
Writing

ANT478 Anthropology of Human Development
Hours 3
Health culturally competent socialized adults and mature physical forms arise from a developmental process with evolutionary, biological, social and cultural dimensions. We survey child/human development from an anthropological perspective, considering interactions across levels of analysis from genes to culture.
Prerequisite(s): ANT 100 OR ANT 270

ANT479 Human Paleopathology
Hours 3
Course investigates skeletal pathology and trauma. Topics included: 1. Understanding disease processes, 2. Distinguishing accidental and violent trauma on bone, 3. Recognizing the following conditions in skeletal remains: congenital anomalies, circulatory disorders, joint diseases, infectious diseases, metabolic diseases, skeletal dysplasias, neoplastic conditions, diseases of the dentition and other conditions. Students will inventory, evaluate and analyze sets of human skeletal remains for pathology and trauma and complete final reports on those remains.
Prerequisite(s): ANT 270
ANT480 Advanced Evolutionary Studies & Big Questions
Hours 3
This course is the capstone to the Evolutionary Studies minor and should be taken in the final semester of the program. This course meets in conjunction with "Evolution for Everyone," the minor introductory course to the minor, to revisit the basic principles and application of evolutionary theory. These courses are team-taught by faculty from around the University and integrate the Alabama Lectures of Life's Evolution series, so they are likely to be different for you in both iterations. The course will review applications of evolutionary theory in the natural, social, and applied sciences and in the humanities. Additionally, you will conduct or complete a culminating project during the first half of the semester. During the second half of the semester, you will present this to the class and submit an article based on your project for publication in a peer-reviewed science journal.
Prerequisite(s): ANT 150; BSC 220; & ANT 270, PHL 380 OR GEO 102

ANT481 Anthropology is Elementary: Teaching Anthropology in Primary and Secondary Settings
Hours 3
This course is an introduction to teaching anthropology at the primary and secondary levels. It is a service-learning course, which means that all students will serve as instructors in a local anthropology course offered in the Tuscaloosa area. This course will expose students to applied anthropology through teaching the anthropological perspective via an activity-based four-subfield curriculum in conjunction with local elementary schools, after-school programs, or similar community partners. These programs will be taught by teams, and each student will be responsible for attending weekly course meetings, developing curricular material and implementing it in a classroom setting, and co-teaching with other students.
Prerequisite(s): ANT 270

ARB101 Elementary Arabic
FL
Hours 4
Students will learn the spoken and written language of Modern Standard Arabic. This course is intended for students with NO PRIOR KNOWLEDGE of Arabic. Native speakers or near native speakers of the language are NOT allowed to enroll. Any students with background knowledge of this language must see the program director BEFORE enrolling.
Foreign Language

ARB102 Elementary Arabic
FL
Hours 4
Course is a continuation of ARB 101. Students will learn the spoken and written language. Native speakers or near native speakers of the language are NOT allowed to enroll.
Prerequisite(s): ARB 101
Foreign Language

ARB201 Intermediate Arabic
Hours 3
Continuation of Arabic language on the intermediate level. Students who already have basics of Arabic speaking, writing and reading will develop their skills further. The class meets three hours per week. Native speakers or near native speakers of the language are NOT allowed to enroll.
Prerequisite(s): ARB 102

ARB202 Intermediate Arabic
Hours 3
Continuation of ARB 201. Emphasis is on the development of reading skills and writing proficiency. Not repeatable without the permission of the CLC director. Native speakers or near native speakers of the language are NOT allowed to enroll.
Prerequisite(s): ARB 201

ARB260 The Arabian Nights
Hours 3
This course introduces students to the Arabian Nights (One Thousand and One Nights) in translation. The Arabian Nights are a collection of stories framed in one story narrated by Shahrazad. The narratives are a mixed potion of magic, love, fear, and death. This course will discuss the history of the tales as well as the different translations, in addition to the socio-cultural concepts of antagonists and protagonist forces, such as magic spells and the Jinni. The students will cover a variety of tales: Sinbad, Ali Baba, and Aladdin. The course will also examine the Islamic context in the Arabian Nights. Taught in English.
Prerequisite(s): None

ARB301 Third-year Arabic
Hours 3
Study of contemporary Arabic language and culture. This course is intended for students who have already taken ARB 202. Native speakers or near native speakers of the language are NOT allowed to enroll. This course will emphasize the development of practical communicative ability in Arabic along with cultural knowledge of Arabic speaking countries.
Prerequisite(s): ARB 202

ARH151 Intro to Visual Arts
FA
Hours 3
Not applicable to the studio or art history majors or minors. Introduction to the appreciation of art through an examination of the nature, themes, and purposes of art, the exploration of visual arts media and methods; and a survey of art history and artistic masterpieces.
Fine Arts

ARH252 Survey of Art I
FA
Hours 3
Survey of major examples of painting, sculpture, and architecture from the prehistoric through the medieval periods.
Fine Arts
ARH253 Survey Of Art II  
**FA**  
Hours 3  
Survey of major examples of painting, sculpture, and architecture from the Renaissance through the modern periods.  
Fine Arts

ARH254 Survey Of Art III  
**FA**  
Hours 3  
Survey of major examples of painting, sculpture, and the applied arts of India, China, Korea, Japan, and Southeast Asia.  
Fine Arts

ARH291 Special Projects  
Hours 3  
This number is used for special projects determined by the instructor or for independent research projects proposed by students. In the latter case, the project must be approved by a sponsoring faculty member and the department chairperson. May be repeated for a maximum of 6 hours.

ARH351 Ancient Art  
Hours 3  
A survey of the contributions of Egypt, Greece, and Rome to the development of Western architecture, sculpture, and painting.  
Prerequisite(s): ARH 252

ARH352 Early Christian Byzantine Art  
Hours 3  
This course focuses on major monuments of painting, sculpture, and architecture, as well as wider visual culture, produced in the Early Christian West and the Byzantine Empire 312-1453 CE. Attention will be paid to major styles/developments with reference to relevant social, political, religious, historical and technical issues.  
Prerequisite(s): ARH 252

ARH358 Islamic Art and Architecture  
Hours 3  
A survey of the material and artistic products of the Islamic world, from the seventh to seventeenth centuries.  
Prerequisite(s): 6 hours of 200 level Art History courses or permission of the instructor.

ARH360 Early Medieval Art  
Hours 3  
This course focuses on major monuments of painting, sculpture, and architecture, as well as wider visual culture, produced in Western Europe between 500-1150 CE. Beginning with backward glances at Roman traditions, special attention is focused on works of art representative of major styles/developments during the focus period with reference to relevant social, political, religious, historical and technical issues.  
Prerequisite(s): ARH 252

ARH361 Late Medieval Art  
**W**  
Hours 3  
This course examines the wealth of visual and material cultures of Europe and the broader Mediterranean from roughly 1200-1450. Materials considered will include sculpture, architecture, painting and manuscripts, as well as metal work and enamels, ivories, textiles, and portable objects from both European and non-Western cultures. Objects and monuments will be explored within their relevant social, political, religious, cultural and historical contexts.  
Prerequisite(s): 6 hours of 200 level Art History courses or permission of the instructor.

ARH362 Medieval Art  
Hours 3  
This course examines the wealth of visual and material cultures of Europe and the broader Mediterranean from roughly 1000-1250. Materials considered will include sculpture, architecture, painting and manuscripts, as well as metal work and enamels, ivories, textiles, and portable objects from both European and non-Western cultures. Various course themes may include the natures of religious and devotional art; the intersections between faith and power; the influence of non-Western societies and artworks on Western medieval culture; and the various roles of art in medieval societies. Objects and monuments will be explored within their relevant social, political, religious, cultural and historical contexts.  
Prerequisite(s): 6 hours of 200 level Art History courses or permission of the instructor.

ARH363 Masterpieces Of Spanish Art  
Hours 3  
Selected monuments of peninsular Spanish art from the prehistoric period to the contemporary period.

ARH365 Northern Renaissance Art  
Hours 3  
This course provides students with a survey of painting, sculpture and architecture produced in Northern Europe (France, Flanders, Germany, England) between 1350 and 1600, concentrating on knowledge of major monuments and artists. Beginning with backward glances at the fourteenth century, attention will be focused on developments and major themes important to study of the period (including relations between North and South, the status of the artist, and the impact of religious change on works of art), thus encouraging students to have a long-range view of the traditions behind the focus works.  
Prerequisite(s): 6 hours of 200 level Art History courses or permission of the instructor

ARH367 Art Patronage Florence  
Hours 3  
Survey of the art of Florence emphasizing the artists and the patrons, such as the religious orders, guilds, and private families who created the Renaissance style in painting, sculpture, and architecture.
**ARH368 Early Renaissance Art**  
Hours 3  
This course provides students with a survey of painting, sculpture and architecture during the early Italian Renaissance in major city centers, concentrating on knowledge of major monuments and artists. Attention will be focused on fourteenth-century traditions, fifteenth-century developments, and major themes important to study of the period (technical innovations, the inheritance and influence of antiquity, the status of the artist, religious and political symbolism, the requirements of patrons and the market, and the impact of social conditions and historical events).  
Prerequisite(s): ARH 253

**ARH369 Later Italian Renaissance Art**  
Hours 3  
This course provides students with a survey of painting, sculpture and architecture in the later Italian Renaissance (c. 1480-1580) in major city centers, concentrating on knowledge of major monuments and artists. Beginning with backward glances at the fifteenth century, attention will be focused on sixteenth-century developments and major themes important to study of the period (including Mannerism, the status of the artist, and the impact of religious change on works of art), thus encouraging students to have a long-range view of the traditions behind the focus works.  
Prerequisite(s): 6 hours of 200 level Art History courses or permission of the instructor.

**ARH371 Baroque Art South Europe**  
W  
Hours 3  
This course provides a survey of Southern Baroque painting, architecture, and sculpture, focusing primarily on Italian and Spanish art produced between 1600-1700. A variety of genres are addressed including Christian and mythological works, portraiture, still-life, and landscape. Issues considered include the impact of the Counter Reformation on artistic production; patronage; gender; classicism and naturalism; and the status of artists. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): 6 hours of 200 level Art History courses or permission of the instructor.

**ARH373 Baroque Art North Europe**  
W  
Hours 3  
Survey of the art of 17th-century Belgium, Holland, and France.  
Prerequisite(s): 6 Hours of 200 Level Art History Classes

**ARH374 Art of the American South**  
Hours 3  
Painting, sculpture, and decorative arts from the colonial period to the twentieth century.  
Prerequisite(s): ARH 253

**ARH375 Nineteenth Century Art**  
Hours 3  
Painting and sculpture from the Neoclassical through the Post-Impressionist periods.  
Prerequisite(s): ARH 253

**ARH376 American Architecture**  
Hours 3  
American architecture from the colonial period to the 20th century.

**ARH377 American Art before 1815**  
W  
Hours 3  
A study of American Art and visual and material culture before 1815. Writing proficiency within this discipline is required for a passing grade in this course.  
Writing

**ARH378 Art of the African Diaspora**  
W  
Hours 3  
This course examines the artistic, material, and visual cultures of the African diaspora. Various geographic regions and historical periods will be covered. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): 6 hours of 200 level Art History courses or permission of the instructor.

**ARH379 American Art: 1815-1880**  
W  
Hours 3  
A study of American Art and visual and material culture from the 1815 to 1880. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): 6 Hours of ARH 200 level courses or by permission of the instructor

**ARH380 American Art: 1880-1945**  
Hours 3  
A study of American Art and visual and material culture from the 1880 to 1945.  
Prerequisite(s): ARH 253

**ARH381 Art Since World War II**  
Hours 3  
Modernist and postmodernist art and architecture from the mid-20th century to the present.  
Prerequisite(s): ARH 253

**ARH385 Early 20th Century Art**  
Hours 3  
Painting and sculpture from Impressionism to World War II.  
Prerequisite(s): ARH 253
ARH388 African American Art  
*W*  
Hours 3  
This class will focus on the creative production, contemporary reception, and critical interpretation of African American art from the colonial period to the present—an examination that intersects inexorably with studies in American art, material culture, Modernism, and post-colonialism (among a host of other fields and disciplines.) So, while visual representations of and by African Americans provide the content for this course, the broader methodological and theoretical issues they raise are applicable to images, objects, and structures from a variety of cultures and civilizations. Indeed, this course will engage at least three general themes central to art historical and visual cultural studies generally: 1. Cultural encounters within colonial contexts; 2. Constructions of “race” and “blackness” within the African diaspora; and 3. Conceptualizations of “Modernism” in 20th-21st centuries. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): ARH 253  
Writing

ARH400 Photographic Discourse  
*W*  
Hours 3  
Study of the history of photography, with a particular emphasis on photographic culture and reproduction. Writing proficiency (within this discipline) is required for a passing grade in this course.  
Prerequisite(s): 6 hours of 200-level and 3 hours of 300-level Art History courses. Total 9 hours Art History required.  
Writing

ARH402 Paul R. Jones Collection of American Art K-12 Program  
Hours 3  
This program is designed to offer graduate and undergraduate students the opportunity to conduct interdisciplinary community engagement activities via with the College of Arts and Sciences’s Paul R. Jones Collection of American Art (PRJCAA). Central to this course is student use of the PRJCAA to engage K-12 pupils and their teachers in the Tuscaloosa area. Students will learn about the PRJCAA including its content, mission, and goals. They will also begin investigating foundational readings in community engagement scholarship. To join this class, students must complete an application and interview process. This course does not meet at regularly scheduled class times during the day and much of course itself is conducted off-site at a school within the Tuscaloosa City School system. Students must undergo a mandatory (state required) background check before starting the program.  
Prerequisite(s): Permission of the Instructor

ARH455 Topics In Asian Art  
*W*  
Hours 3  
This seminar course will examine the rich and varied tradition of Buddhist art in Asia by focusing on the artistic products of India, China, Korea, Japan, Southeast Asia, Tibet, and Nepal. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): 9 hours of 200 or 300 level Art History courses or permission of the instructor.  
Writing

ARH456 The Arts Of Buddhism  
Hours 3  
Major movements and styles inherent in the artistic products of India, China, Japan, Southeast Asia, Tibet, and Nepal. Prerequisite(s): 6 hours of 200 level Art History courses or permission of the instructor.

ARH461 Topics in Medieval Art  
*W*  
Hours 3  
Selected topics in the art and architecture of the Middle Ages. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): 9 hours of 200 or 300 level Art History courses or permission of the instructor  
Writing

ARH467 Topics Renaissance and Baroque Art  
*W*  
Hours 3  
This course provides students with an in-depth study of a specific issue or theme in Renaissance or Baroque Art. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): 9 hours of 200 or 300 level Art History courses or permission of the instructor

ARH477 Topics in American Art  
*W*  
Hours 3  
Study of a selected theme in American art or architecture. May be repeated for a maximum of 9 hours. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): One of the following courses: ARH 374 or 375 or 376 or 377 or 378 or 379 or 380 or 388 or 389 or 390 and 6 additional hours of 200 or 300-level art history courses or permission of the instructor.

ARH481 Topics 20th Century Art  
*W*  
Hours 3  
This course surveys various aesthetic theories that have informed art production from the early 1980s to the present day. We will approach this wide array of material through attention to specific themes and/or various critically defined paradigms and apply these themes/paradigms to various subjects and media areas including institutional critique, popular culture, painting, sculpture, performance, installation, and video. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): 9 hours of 200 or 300 level Art History courses or permission of the instructor.

Writing
ARH488 Topics in African American Art
W
Hours 3
In this course we will study the politics of representation (and the relationship between the image and ideology) in African American photography from the 1840s to the present. Aesthetics, gender, class, the impact of slavery, lynching, colonialism, neocolonialism, and globalization on the arts, as well as issues of memory, identity, subjectivity, historical “truth,” and race, will be explored in relation to African American photographers. We will consider the production, distribution, consumption, and archiving of these visual texts, as well as the materiality and mass replication of the photographic artifact, and examine various genres of visual texts, from the social documentary to portraiture to art photography. As we analyze the photography of Jules Lion, A.P. Bedou, Louis Agasiz, James VanDerZee, Gordon Parks, Carrie Mae Weems, and Latoya Ruby Frazier, among others, we will consider to what extent photographs comment upon or subvert racial identities and social hierarchies, what role the camera plays in protest movements, and whether one, as Audre Lorde asks, can ever dismantle the master’s house with the master’s tools. Writing proficiency within this discipline is required for a passing grade in this course.
Prerequisite(s): One of the following courses: ARH 374 or 375 or 376 or 377 or 378 or 380 or 388 and 6 additional hours of 200 or 300 level art history courses or permission of the instructor.

Writing

ARH490 Theories and Methods of Art History
W
Hours 3
This seminar examines the disciplinary foundations, historiography, and major issues of art history and explores the various methodological approaches used in the field. It investigates the ways in which the methods and theories of art history contribute to our understanding of history, aesthetics, and social practices through art objects. Students will explore the methodologies employed by art historians and evaluate – as scholars, readers, and writers – complex issues and a range of scholarship. Class time will center on verbal communications, including student-led discussions of assigned readings and oral presentations. Writing proficiency within this discipline is required for a passing grade in this course.
Prerequisite(s): 15 hours of ARH courses or permission of the instructor

Writing

ARH491 Independent Studies
Hours 3
This number is used for special projects determined by the instructor or for independent research projects proposed by students. In the latter case, the project must be approved by a sponsoring faculty member and the department chairperson. May be repeated for a maximum of 6 hours.
Prerequisite(s): Permission of the instructor is required.

ART110 Drawing I
Hours 3
Basic studio course concerned with comprehension of visual concepts and development of skills through exposure to drawing media.

ART120 Drawing II
Continuation of Drawing I with emphasis on creative development of visual ideas using traditional and experimental techniques and media.
Prerequisite(s): ART 110

ART212 Ceramics
Completion of ART 110, ART 130, and ART 131 is recommended before taking this course. Exploration of ceramics media and processes with emphasis on the development of individual concepts.

ART214 Introduction to Graphic Design
An introduction to skills and techniques used in graphic design, problems in visual priorities, and development of idea generation skills.
Prerequisite(s): ART 130
Prerequisite(s) with concurrency: ART 210

ART216 Painting
An introductory course designed to strengthen the individual student's awareness of the history and techniques of the craft of painting while exposing the student to contemporary styles and ideas of painting.
Prerequisite(s): ART 110 or ART 130

ART218 Photography
Study of photography and photographic processes employed as creative media. Basic black-and-white processing and printing.
Prerequisite(s): ART 110 or ART 130

ART220 Printmaking
Survey of printmaking processes including intaglio, relief, screen print, and lithography.
Prerequisite(s): ART 110 or ART 130
ART222 Sculpture
Hours 3
Introduction to basic sculptural skills - including plaster, wood, aluminum casting, direct construction, and various mixed materials and techniques - with emphasis on craftsmanship, content, and idea development.
Prerequisite(s): ART 131 OR permission from the instructor

ART224 Introduction To Digital Art I
Hours 3
An introduction to computer-based art making, digital literacy, image processing, and digital printing.
Prerequisite(s): ART 110 or ART 130

ART302 Color Theory & Application
Hours 3
Course focuses on both analytical and intuitive understanding and application of color.
Prerequisite(s): ART 110 or ART 130

ART305 Aqueous Media
Hours 3
Course focuses on contemporary styles, concepts, and ideas regarding the use of wet media.
Prerequisite(s): ART 210 or ART 216 or ART 220

ART309 Navigating The Art World
W
Hours 3
The theory and history of the art institutions that shape artists’ careers and practical strategies for sustainable creative opportunities beyond the degree. Writing proficiency within this discipline is required for a passing grade in this course.
Prerequisite(s): ART 110 and ART 210 and ART 130 and ART 131 Plus any two from the following list: ART 212 or ART 216 or ART 218 or ART 220 or ART 224 C- or higher required

Writing

ART310 Life Drawing
Hours 3
Individual exploration of figurative forms in a variety of drawing media and processes.
Prerequisite(s): ART 110, ART 130, and ART 210 or permission of the instructor.

ART311 Figurative Modeling
Hours 3
Course offers students a chance to explore figurative ceramic modeling and sculpting as it relates to representing a likeness. Topics will vary as course is repeated for credit.

ART312 Ceramics
Hours 3
Emphasis is on individual approaches to media, methods, and activities.
Prerequisite(s): ART 212

ART313 Ceramics
Hours 3
Emphasis is on individual approaches to media, methods, and activities. Topics will vary as course is repeated for credit.
Prerequisite(s): ART 312

ART314 Typography
Hours 3
Further development of design methods and processes including typography, image processing, visual communication, and digital design production.
Prerequisite(s): ART 214 or ART 224

ART315 Digital Layout and Production
Hours 3
Further development of design methods and processes including grids, page layout, visual communication, and digital design production.
Prerequisite(s): ART 214 or ART 224

ART316 Painting Composition
Hours 3
The applied study of pictorial manipulation through color and design principles.
Prerequisite(s): ART 216

ART317 Painting Concepts
Hours 3
A course designed to increase understanding of subject, meaning and context with the objective of making the transition between guided assignments and personal pursuits.
Prerequisite(s): ART 305 or 316, or by permission of the instructor.

ART318 Photography
Hours 3
Emphasis is on individual approaches to media, methods, and activities.
Prerequisite(s): ART 218

ART319 Photography
Hours 3
Emphasis is on individual approaches to media, methods, and activities.
Prerequisite(s): ART 318

ART320 Printmaking: Intaglio & Relief
Hours 3
Further exploration of intaglio and relief processes, including a review of basic techniques, grounds, printing in color, printing multiple plates or blocks, and medium/large format printing. Assignments emphasize both technical and conceptual development. Topics will vary as course is repeated for credit.
Prerequisite(s): ART 220 or ART 210 or permission of the instructor
ART321 Printmaking: Lithography  
Hours 3  
This course explores traditional and experimental approaches to stone and plate lithography. Students will make a series of lithographs using a variety of approaches, matrices, and drawing materials. Assignments emphasize both technical and conceptual development. Topics will vary as course is repeated for credit.  
Prerequisite(s): ART 220 or ART 210 or permission of the instructor

ART322 Sculpture  
Hours 3  
Introduction to advanced sculptural thinking and problem solving with assignments geared toward the development of skills and abilities in working with a range of materials and techniques. Emphasis is focused on developing craftsmanship and content as applied to the making of objects.  
Prerequisite(s): ART 222

ART323 Sculpture  
Hours 3  
Continued development of 3-D thinking and technical skills through assignments addressing a variety of materials and processes, including physics in three dimensions, the illustration of intangible thoughts with physical objects, the relevance of self to sculpture, and an examination of personal aesthetic. Topics will vary as course is repeated for credit.  
Prerequisite(s): ART 131 and ART 222 and ART 322

ART324 Intermediate Digital Art  
Hours 3  
Projects allow for individual approaches and further development of digital art methods and processes.  
Prerequisite(s): ART 224

ART325 Printmaking: Monoprint/Monotype  
Hours 3  
This course examines printmaking through the lens of painting, including the vocabulary, materials, and techniques of painting with acrylics or oils. Students will use drawing and brushwork techniques to establish images on a variety of printable matrices, using a variety of printmaking processes. Assignments emphasize experimentation, collaboration, and exploring the creative process. Topics will vary as course is repeated for credit.  
Prerequisite(s): ART 220 or ART 216 or permission of the instructor

ART326 Video Art and Animation  
Hours 3  
Students will explore contemporary structure of narrative (and conversely the non-narrative) by creating, producing, and sharing stories using computer-based tools.  
Prerequisite(s): ART 224

ART328 Digital Phototography  
Hours 3  
This course will cover all aspects of digital photography from picture-making to output. There will be a survey of contemporary photo / digital artists to stimulate ideas, discussion and practice across numerous conceptual themes. Students will learn best practices for building and managing files that will drive top-quality output. All elements of traditional (scanning) and RAW workflow will be considered from acquisition through editing and output. Aesthetically, these skills will be put into practice in through the creation of refined and realized artworks. There will be critiques to facilitate the creative process. The semester will culminate in the production of a final portfolio.  
Prerequisite(s): ART 218 or ART 224

ART329 Printmaking: Photo-based Processes  
Hours 3  
This course examines printmaking through the lens of photography, including the vocabulary, materials, and techniques of the analog and digital photograph. Students will create work using a variety of light sensitive printmaking processes. Assignments emphasize both technical and conceptual development. Topics will vary as course is repeated for credit.  
Prerequisite(s): ART 220 or ART 218 or ART 224 or permission of the instructor

ART334 Branding & Identity Systems  
Hours 3  
An intermediate course developing design skills used in the creation and production of printed materials for visual communications with an emphasis on logos, identity systems, stationery sets, advertising, and promotional materials.  
Prerequisite(s): ART 214 and ART 314

ART335 Publication Design  
Hours 3  
An intermediate course developing design skills used in the production of printed materials for visual communications with an emphasis on both digital and printed newsletters, magazines, and annual reports.  
Prerequisite(s): ART 214, ART 314, and ART 315

ART338 Photographic Studio Lighting  
Hours 3  
The course will present essential skills in photographic studio lighting. Both natural and artificial light sources will be explored for producing aesthetically and conceptually engaging artworks. A wide range of applications will be explored including still life, portraiture, classic lighting problems, and open creative projects. Experimentation and improvisation is highly encouraged. Topics will reference both historical precedents and contemporary practices. The course will culminate with a portfolio of work.  
Prerequisite(s): ART 218 or ART 328 or permission of the instructor.
ART344 Concepts in Drawing
Hours 3
This course covers drawing at the intermediate level, including media, form, content, and theory. This course emphasizes personal direction. This course is designed to encourage student investigation into experimental drawing and contemporary art practices. All topics will be devoted to promoting individual student creativity, mastery of drawing means and techniques, and a further understanding of graphic concerns.
Prerequisite(s): ART 110, and ART 210 OR by permission of the instructor.

ART380 Art Museum Practices
Hours 3
An overview of art museum practices. Students acquire informed perspectives on the general operations, strategies, policies, and practices inherent in a small art museum.

ART406 Independent Studies
Hours 1-6
Students may make proposals for projects not taught in the regular curriculum. Proposals must be approved by a sponsoring faculty member and the department chairperson.

ART408 Special Projects
Hours 3-6
This course is designed to focus on a variety of topics in Studio Art that are not regularly offered within the Studio Arts curriculum. Topics will vary on media chosen form ceramics, digital media, drawing, painting, photography, printmaking, and sculpture. The course can be taken for a maximum of 6 hours.

ART410 Drawing Seminar
Hours 3
Self-directed studio practice overseen by the instructor. The student works toward creating a consistent and conceptually sound body of work that investigates contemporary and traditional definitions of drawing. Topics will vary as course is repeated for credit.
Prerequisite(s): ART 110, ART 210, ART 310, ART 344, and ART 444 or by permission of the instructor.

ART412 Ceramics
Hours 3-6
Directed studio practices overseen by the instructor and designed to enhance the student's understanding of advanced ceramics concepts and techniques.
Prerequisite(s): ART 212 and ART 312 and ART 313

ART414 Graphic Design
Hours 3-6
Preparation of a graphic design portfolio. Enrollment for 4, 5, or 6 hours requires permission of the instructor. May be repeated for a maximum of 12 hours.
Prerequisite(s): ART 314 or ART 315

ART415 Graphic Design Practicum
Hours 3
Partnering agencies with design apprentices for hands-on training. Students are required to work no less than 10 hours per week.
Prerequisite(s): ART 414

ART416 Advanced Painting Seminar
Hours 3-6
Self-directed studio practice overseen by the instructor. The student is expected to work toward creating a consistent and conceptually sound body of work. Enrollment for 4, 5, or 6 hours requires permission of the instructor. May be repeated for a maximum of 12 hours.
Prerequisite(s): ART 317

ART418 Advanced Photography
Hours 3
Emphasis on individual approaches to advanced photographic practice (analog or digital) resulting in a cohesive body of work suitable for exhibition. May be repeated for a maximum of 12 hours.
Prerequisite(s): ART 318 or ART 328 or permission of the instructor.

ART420 Printmaking
Hours 3-6
Emphasis on individual approaches resulting in a cohesive body of work suitable for exhibition. Enrollment for 4, 5, or 6 hours requires permission of the instructor. May be repeated for a maximum of 12 hours.
Prerequisite(s): ART 320 and ART 321

ART422 Sculpture
Hours 3-6
Development of work and thought at an advanced level in preparation for completion of the BA or BFA degree. Graduating semester includes a BA or BFA thesis exhibition accompanied by a written thesis requirement.
Prerequisite(s): ART 222 and ART 322 and ART 323

ART424 Advanced Digital Media
Hours 3
Special topics in digital media. Enrollment for 4, 5, or 6 hours requires permission of the instructor. May be repeated for a maximum of 12 hours.
Prerequisite(s): ART 324 or ART 326

ART428 Advanced Digital Photography
Hours 3
The course will expand upon digital skills for the photographer / digital artist presented in Art 328. This course presents technical, aesthetic and conceptual concerns at an advanced level. Content will be delivered through lecture, demonstrations, workshops, and experiential learning. The primary emphasis is on student-driven production of fully realized artworks. There will be regular critiques to facilitate the creative process. There will be a survey of contemporary photo / digital artists to stimulate ideas, discussion and practices across numerous conceptual themes. The semester will culminate in the production of a final portfolio and works presented for exhibition. Topics will vary as course is repeated for credit.
Prerequisite(s): ART 328

ART434 Illustration
Hours 3
Conceptual approaches, materials and techniques used to solve problems in illustration, emphasizing developing rendering skills in both traditional and digital mediums.
Prerequisite(s) with concurrency: ART 315
ART435 Web Design
Hours 3
An introduction to interactive applications. This course provides instruction in innovative, artistic design and development of visual communication skills related to interactive applications.
Prerequisite(s) with concurrency: ART 335

ART444 Advanced Concepts in Drawing
Hours 3
This course covers drawing at the advanced level, including media, form, content, and theory. This course emphasizes personal direction. This course is designed to encourage student investigation into experimental drawing and contemporary art practices. All topics will be devoted to promoting individual student creativity, mastery of drawing means and techniques, and a further understanding of graphic concerns.
Prerequisite(s): ART 110, ART 210, ART 310, ART344 or by permission of the instructor.

ART498 Studio Capstone
W
Hours 3
The Capstone is an interdisciplinary course that represents the culmination of the Studio Art program at The University! Of Alabama. Focusing on issues pertaining professional practices, this course is designed to assist students as they leave the university and prepare for the next step in their education and/or in their lives as professional artists and producers of culture. The course would focus on development of a written statement, production of promotional materials, refining of verbal skills in the discussion of work and various other skills in the development of professional practices. Writing proficiency within this discipline is required for a passing grade in this course.
Prerequisite(s): Students must have permission from the Instructor and have completed a minimum of 60 hours in Art and Art History course work.
Writing

ART499 Senior Thesis
Hours 3,6
This course focuses on the development of an independent thesis project of a body of creative work in the area of the primary concentration and is restricted to BFA studio art majors with senior standing. The thesis must be publicly exhibited. The course can be taken for a maximum of 6 hours.
Prerequisite(s): Students must have permission from the Instructor and have completed a minimum of 60 hours in ART and/or ARH course work. Senior Thesis is designed to be taken during the final semester of study for the B.F.A. degree.

AS100 EC Continuous Enrollment
Hours 0
Used as a course designation for all students enrolled in Early College.

AS101 Freshman Compass Course: Arts & Sciences
FCMP
Hours 1-2
An orientation course designed to introduce students to the University and the College of Arts and Sciences and to assist in academic planning. Open to freshmen. May be repeated for a maximum of 4 hours. Pass/fail.
Freshman Compass

AS102 Compass: Arts & Sciences
FCMP
Hours 1
Prerequisite(s): AS 101
Freshman Compass

AS220 Medieval and Early Modern Studies (MEMES) Colloquium
Hours 3
This course introduces students to the multiple disciplines involved in the study of the medieval and early modern and the broad issues, methods, and areas of study in the field via readings and interactions with participating faculty through guest lectures and related activities.

AS299 Junior Seminar
Hours 1
Seminar for premedical, prelaw, and undecided juniors and seniors.

AY101 Intro To Astronomy
N
Hours 3
This course surveys the development of our current understanding of the Universe, including our Solar System, exoplanets, stars and stellar evolution (including white dwarfs, neutron stars, black holes, and supernovae), galaxies and cosmology (dark matter, dark energy, the Big Bang, the accelerating universe, supermassive black holes), and life in the Universe. NOTE: If the student plans to apply AY 101 toward satisfaction of the N requirement of the University Core Curriculum, AY 102 must also be taken.
Natural Science

AY102 Intro Astronomy Lab
N
Hours 1
This laboratory course involves indoor hands-on activities interpreting stellar spectra, stellar luminosity-temperature diagrams, celestial spheres, and astronomical imagery of the Moon, stars (including the Sun), star clusters, nebulae, galaxies, and galaxy clusters. NOTE: If the student plans to apply AY 102 toward satisfaction of the N requirement of the University Core Curriculum, AY 101 must also be taken.
Natural Science
AY155 Life in the Universe
Hours 3
This course is a survey of the new and rapidly-developing interdisciplinary science of astrobiology, accessible to the non-science major. Using the tools of astronomy, biology, geology, and chemistry, we will explore some of the biggest questions ever asked: How did life start on the Earth? Did life start elsewhere in our solar system, and elsewhere in our galaxy? Are we alone in the Universe? If there is life on other planets, how would we recognize it? Using the example of the history of life on Earth, we will explore locations in our solar system to gather evidence of whether life could have started, and could currently thrive in those locations. We will then broaden our scope to explore possibilities of life on planets orbiting other stars in our galaxy (and beyond) by summarizing what has been learned recently from surveys of planets orbiting other stars, in the Search for Extra Terrestrial Intelligence.

AY203 Observational Astronomy
N
Hours 2
In this course students learn to observe and record images and spectra of planets, stars, nebulae, and galaxies using portable telescopes on campus, the 16-inch telescope of the campus observatory, telescopes located in the darker skies at Moundville, and observatory telescopes in Arizona and Chile by internet control. Both indoor exercises and observing projects are undertaken. Students should normally have completed AY101 or a more advanced astronomy course; people concurrently enrolled in AY101 or AY204 can be admitted with the permission of the instructor NOTE: If the student plans to apply AY 203 toward satisfaction of the N requirement of the University Core Curriculum, AY 204 must also be taken.
Prerequisite(s): MATH 113 or MATH 115 or MATH 125 or MATH 145
Natural Science

AY204 Solar System Astronomy
N
Hours 3
This course provides (1) a discussion of orbital mechanics and of the interior structure, surface features, atmosphere, and origin of the sun, planets, and solar system; (2) an understanding of the detection techniques and current census of extrasolar planets; and (3) a discourse on the possibility of life on other planets. NOTE: If the student plans to apply AY 204 toward satisfaction of the N requirement of the University Core Curriculum, AY 203 must also be taken.
Prerequisite(s): MATH 113 or MATH 115 or MATH 125 or MATH 145
Natural Science

AY206 Astron Beyond Solar Syst
N
Hours 3
This course: (1) connects the observed properties of stars (including our Sun) to their physical structure and evolution, up to their final endpoints as white dwarfs, neutron stars, or black holes; (2) surveys the properties of galaxies (including our Milky Way), their baryonic and dark matter content, their dynamics and evolution (star formation history, feedback, secular processes, mergers, growth of central supermassive black holes) and galaxy clustering; and (3) presents modern cosmology, including the Big Bang, the Cosmic Microwave Background, the accelerating expansion of the Universe, dark energy, inflation, and the formation of the lightest elements. NOTE: If the student plans to apply AY 206 toward satisfaction of the N requirement of the University Core Curriculum, AY 203 must also be taken.
Prerequisite(s): MATH 113 or MATH 115 or MATH 125 or MATH 145
Natural Science

AY421 Theoretical Astrophysics
Hours 3
This course provides a broad introduction to the theoretical foundations of astrophysical phenomena, demonstrating how fundamental phenomenology arises from physical laws. Several broad domains of astrophysics are covered, including planetary and stellar orbits, radiation, radiative transfer, ionization, star and planet formation, stellar evolution, binary stars, special and general relativity (including black holes), galactic structure and dynamics (including dark matter), active galaxies, spacetime structure, formation of large scale matter structure, and cosmology (including the accelerating expansion of the Universe, dark energy, and Grand Unification of forces in the early Universe).
Prerequisite(s): PH 253

AY433 Techniques of Observational Astronomy
W
Hours 3
Students will learn to perform astronomical observations with eye, telescope, and modern detectors, using techniques of digital imaging, photometry, and spectroscopy. Wavelength ranges from radio to gamma-ray will be addressed. Students will gain familiarity with current software tools for data analysis, model fitting, and error analysis. Students will carry out and report on all components of observational research, from concept and data collection to analysis and presentation of conclusions. Writing proficiency within this discipline is required for a passing grade in this course.
Prerequisite(s): AY 204 or AY 206 PH 253 or permission of instructor Writing
AY450 Stars & Stellar Evolution
Hours 3
This course is intended to facilitate a fairly complete understanding of stars, including their structure, evolution (formation, stages of burning, end states), synthesis of elements, and the physical processes involved in each of these, as well as introduce the modern computational modeling techniques used to apply stellar physics to stars. For astronomy students, this course will provide the background necessary to understand the underlying principles of stellar processes and modelling as they are used both in ongoing research into stellar physics and phenomena and in support of other areas of astronomical research where stellar populations, products and processes are important. In a broader context, relevant for any physics student, this course will discuss how understanding the physical principles in fluid dynamics, high-density materials, heat transfer, plasma physics, nuclear structure, and nuclear processes are assembled into our modern understanding of how stellar objects behave, and how the study of stars pushes the frontier of understanding in these areas of physics.
Prerequisite(s): MATH 238

AY482 Selected Topics in Astronomy
Hours 1-3
This course may deal with any astronomy topic not covered by existing courses. The course title is added at the time the course is taught. Repeat credit is allowed for different course titles.

AY491 Independent Study I
Hours 1-3
No description available

AY492 Independent Study II
Hours 1-3
(refer to AY 491 Independent Study I).

BSC108 Intro Biology Non Maj I
N
Hours 4
Lecture and laboratory. Not open to biology majors or minors, pre-health professions students, or students with credit for BSC 114:115 and BSC 116:117 (or the honors equivalents, BSC 118 and BSC 120). Survey of the basic principles of cellular biology, genetics, plant and animal diversity, and evolution. Usually offered fall, spring, and summer. BSC 108 and BSC 109 may be taken in either order.
Natural Science

BSC109 Intro Biology Non Maj II
N
Hours 4
Lecture and laboratory. Not open to biology majors or minors, or to pre-health professions students. Study of the physiology of living organisms with emphasis on the physiology of humans. Includes an overview of general ecology and animal behavior. Usually offered fall, spring and summer. BSC 108 and BSC 109 may be taken in either order.
Natural Science

BSC114 Principles Of Biology I
N
Hours 3
For biology majors, biology minors and pre-health professions students. Study of general biological principles, including the chemical basis of life; cellular biology, including cell structure and metabolism, genetics evolution; and a survey of simple organisms, including viruses, bacteria, protista and fungi. Offered fall, spring and summer. NOTE: A student must take both BSC 114 and BSC 115 in order to use either one of the courses to satisfy a portion of the natural science (N) requirement of the University Core Curriculum.
Natural Science

BSC115 Laboratory Biology I
N
Hours 1
No description available
Prerequisite(s): BSC 114
Prerequisite(s) with concurrency: BSC 114

BSC116 Principles Biology II
N
Hours 3
For biology majors, biology minors, and pre-health professions students. Study of the structure, function, and ecology of organisms, including bryophytes, vascular plants, invertebrate animals, and vertebrate animals. Offered fall, spring, and summer. NOTE: A student must take both BSC 116 and BSC 117 in order to use either one of the courses to satisfy a portion of the natural science (N) requirement of the University Core Curriculum.
Prerequisite(s): BSC 114 and BSC 115 or BSC 118
Natural Science

BSC117 Biology II Laboratory
N
Hours 1
No description available
Prerequisite(s) with concurrency: BSC 116

BSC118 Honors General Biology I
N, UH
Hours 4
Lecture, discussion period, and laboratory. Thorough study of general biological principles, including the chemical basis of life, cellular biology, genetics, evolution, and a survey of prokaryotic organisms. Prerequisite(s): Honors attribute or ACT score of 28 or above
Natural Science, University Honors
BSC210 Honors Gen Biology II

Hours 4
Lecture, discussion period, and laboratory. Thorough study of the structure, function, physiology, and ecology of organisms, including higher and lower plants and vertebrates and invertebrate animals.
Prerequisite(s): BSC 114 and BSC 115 or BSC 118

Natural Science, University Honors

BSC215 Human Anatomy & Physiology I

Hours 4
Lecture, laboratory, and laboratory lecture. Integrated survey of human anatomy and physiology that includes cellular aspects; tissues and skin; the skeletal, muscular, nervous and endocrine systems; and the special senses of sight, hearing, taste, and smell.
Prerequisite(s): BSC 108 or BSC 109 or BSC 118 or BSC 120 or BSC 114 and BSC 115; or BSC 116 and BSC 117; or CH 102 or CH 105 or CH 118

BSC216 Human Anatomy & Physiology II

Hours 4
Lecture, laboratory, and laboratory lecture. Integrated survey of human anatomy and physiology that includes the respiratory, circulatory, digestive, urinary, and reproductive systems.
Prerequisite(s): BSC 215

BSC220 Biol Evol

Hours 3
An introductory course on the evidence for evolution, mechanisms of evolutionary change, natural and sexual speciation, and common misconceptions about evolution.

BSC224 Microbiology And Man

Hours 4
For students majoring in nursing, education, and human environmental sciences. Lecture and laboratory. Introduction to microbiology with an emphasis on the relationships between man and protozoa, bacteria, viruses, and fungi. NOTE: Credit will not be granted for both BSC 242 and BSC 310.
Prerequisite(s): CH 101 or CH 104 or CH 117; and CH 102 or CH 105 or CH 118; and BSC 108 or BSC 109 or BSC 114 or BSC 118 or BSC 215 or BSC 216

BSC300 Cell Biology

Hours 3
The course is designed to provide an understanding of the molecular basis of cell function. Topics include metabolism, gene control, cell membranes, and cell-to-cell signaling.
Prerequisite(s): BSC 114 or BSC 118; and CH 102 or CH 118

BSC303 Field Zoology

Hours 3
A field-based course with lecture and lab combined. A survey of the taxonomy, ecology, and identification of local biota. Offered irregularly.
Prerequisite(s): BSC 114; and BSC 115 or BSC 118; and BSC 116; and BSC 117 or BSC 120

BSC310 Microbiology

Hours 3
Lecture. Survey course on microorganisms, including protozoa, bacteria, viruses, fungi, and algae. Credit will not be granted for both BSC 310 and BSC 242.
Prerequisite(s): BSC 114; and BSC 115 or BSC 118; and BSC 116; and BSC 117 or BSC 120
Prerequisite(s) with concurrency: CH 231

BSC311 Microbiology II

Hours 3
Fundamental course in bacteriology with emphasis on bacterial morphology, physiology, nutrition, and genetics.
Prerequisite(s): BSC 310 and CH 232

BSC312 Microbiology Lab

Hours 2
General microbiology laboratory to accompany BSC 310.
Prerequisite(s): BSC 310
Prerequisite(s) with concurrency: BSC 310

BSC313 Gen Bacteriology Lab

Hours 3
Lecture and laboratory. Course presents methods for the isolation, microscopic observation, enumeration, and determination of the biochemical characteristics of bacteria. Writing proficiency within this discipline is required for a passing grade in this course.
Prerequisite(s): BSC 312
Prerequisite(s) with concurrency: BSC 311
Writing

BSC314 Dendrology

Hours 3
This class will be a combination of lectures, field trips, and some inside laboratory plant identification exercises. The majority of the class will be conducted in natural areas surrounding Tuscaloosa. Most class time is dedicated to lab- and field-based activities.
Prerequisite(s): BSC 114 and BSC 115 or BSC 118 and BSC 116 and BSC 117 or BSC 120 or permission of the instructor.

BSC315 Genetics

Hours 3
Study of transmission and function of genes, gene organization, regulation of prokaryotic and eukaryotic genes, and applications of genetics.
Prerequisite(s): BSC 114 or BSC 118; and CH 101 or CH 117; and CH 102 or CH 118
BSC320 Freshwater Studies  
W
Hours 4
Lecture and laboratory. Introduction to freshwater natural history and ecology with specific emphasis on the common freshwater habitats of Alabama.
Prerequisite(s): BSC 114; and BSC 115 or BSC 118; and BSC 116; and BSC 117 or BSC 120
Writing

BSC325 Tropical Plant Diversity  
Hours 4
The purpose of this course is to familiarize students with the relevant aspects of tropical ecosystems and tropical plants.
Prerequisite(s): BSC 114 or BSC 118; and BSC 115; and BSC 116 or BSC 120; and BSC 117

BSC340 Principles of Natural Resources Conservation  
Hours 3
Introduces students to basic principles of natural resources conservation, including fundamental concepts in natural resource conservation and management. Examines humanity's past and present impacts on world environments; the influence of culture and the wants, needs, and desires of human beings will be integrated into the material. Discusses conservation of natural resources, including soil, water, air, forests, rangelands, energy, wildlife and fisheries, based on scientific principles.
Prerequisite(s): (BSC 114 and BSC 115 or BSC 118) OR (BSC 116 and BSC 117 or BSC 120)

BSC360 Plant Biology  
W
Hours 4
Lecture and laboratory. This course is designed to provide you with comprehensive exposure to the subject of plant biology. You will learn about the structure, function, systematics, evolution and ecological roles of plants including algae, mosses, liverworts, ferns, gymnosperms and angiosperms. If you are a person who has over-specialized in zoology or human biology, this course will expand your horizons significantly. As a study of producers (plants!), this course will examine these organisms that are essential to life because of their position at the energy pyramid and the food web, the negative effect on the environment and human health, and their commercial importance. At the end of this course students should take away an appreciation for the extensive diversity and roles the lower plants play in our ecosystem as well as our everyday life. The course will consist of lectures, laboratory experiments, group discussions and other activities relating to course material. Registration is required for both lecture and laboratory. WRITING PROFICIENCY WITHIN THIS DISCIPLINE IS REQUIRED FOR A PASSING GRADE IN THIS COURSE.
Prerequisite(s): BSC 114/115 and BSC 116/117, or BSC 118 and BSC 120
Writing

BSC371 Biology of Lower Plants  
W
Hours 4
4 Cr Hours. Lecture and Laboratory. This course is designed to provide you with comprehensive exposure to the subject of biology of lower plants. You will learn about the morphology, systematics, evolution, economic significance and ecological roles of the lower plants including cyanobacteria, algae, mosses, liverworts, ferns and fern allies with emphasis in their diversity in the southeastern USA. If you are a person who has over-specialized in zoology or human biology, this course will expand your horizons significantly. This course will examine these organisms that are essential to life because of their position at the energy pyramid and the food web, the negative effect on the environment and human health, and their commercial importance. At the end of this course students should take away an appreciation for the extensive diversity and roles the lower plants play in our ecosystem as well as our everyday life. The course will consist of lectures, laboratory experiments, group discussions and other activities relating to course material. Registration is required for both lecture and laboratory. WRITING PROFICIENCY WITHIN THIS DISCIPLINE IS REQUIRED FOR A PASSING GRADE IN THIS COURSE.
Prerequisite(s): BSC 114/115 and BSC 116/117, or BSC 118 and BSC 120
Writing

BSC373 Vertebrate Zoology  
Hours 4
Lecture and laboratory. Introductory course in the study of vertebrate zoology. Subjects included are principles of systematics and nomenclature, a survey of vertebrate taxa, the species concept, analysis of taxonomic characters, and an introduction to zoogeography and behavior.
Prerequisite(s): BSC 114; and BSC 115 or BSC 118; and BSC 116; and BSC 117 or BSC 120

BSC376 Invertebrate Zoology  
W
Hours 4
Lecture and laboratory. The classification, morphology, evolution, and ecology of invertebrate animals. Writing proficiency within this discipline is required for a passing grade in this course.
Prerequisite(s): BSC 114; and BSC 115 or BSC 118; and BSC 116; and BSC 117 or BSC 120

BSC380 Introduction to probability and statistics for biologists  
C
Hours 3
This course will provide an introduction to probability and statistical methods that are commonly used in the biological sciences. Practical, real-world examples from biology, ecology, and natural resources management will be used throughout the course. This course is aimed at 300-level students who intend to work with biological data, or anyone interested in statistics. Computing proficiency is required for a passing grade in this course.
Prerequisite(s): MATH 112 or MATH 115 or MATH 125 or MATH 145 and CS 102
Computer Science
BSC385 Ecology and Evolution
Hours 3
This course introduces the student to two fundamental disciplines in biology – ecology and evolution. We introduce the student to the processes common to both disciplines and show how these have shaped the diversity and organization of life on this planet.
Prerequisite(s): MATH 112 or MATH 115 or MATH 121 or MATH 125 or MATH 145; and BSC 114; and BSC 115 or BSC 118; and BSC 116; and BSC 117 or BSC 120

BSC386 General Ecology Lab
Hours 2
Offered irregularly.
Prerequisite(s): BSC 385
Prerequisite(s) with concurrency: BSC 385

BSC390 Honors Thesis Research
UH
Hours 1-8
Individual research conducted under the direction of an advisor and reported in an acceptable thesis. May be repeated over two to four semesters for a maximum 8 hours.
Prerequisite(s): BSC 315 and BSC 300 and BSC 385
University Honors

BSC391 Tutorial In Biol Science
Hours 1-2
Survey of the literature relating to a topic approved by the supervising faculty member; not to include laboratory or field research. A formal paper and/or examination is required. May be taken for one credit hour in each of two consecutive semesters, or for one or two credit hours in any one semester. Offered according to demand.
Prerequisite(s): BSC 114; and BSC 115 or BSC 118; and BSC 116; and BSC 117 or BSC 120

BSC393 Biology Outreach
W
Hours 2
Service learning. Survey of literature, design of active learning projects and teaching science concepts to elementary students to encourage and enrich young children’s interest in science. Writing proficiency within this discipline is required for a passing grade in this course. A maximum of 4 hours credit may be applied to the requirements for the biology or microbiology major.
Prerequisite(s): BSC 114; and BSC 115 or BSC 116 or BSC 118; and BSC 117 or BSC 120
Writing

BSC396 Resident Study
Hours 1-6
Prerequisite: Written approval from the department office prior to registration. Credit awarded is determined by the extent of the student's participation but may not exceed 6 hours.
Prerequisite(s): BSC 114; and BSC 115 or BSC 118; and BSC 116; and BSC 117 or BSC 120

BSC398 Undergraduate Research
Hours 1-4
Independent research or research participation. A maximum of 4 hours credit for BSC 398 may be applied to the requirements of the biology and microbiology majors; an additional 4 hours may be taken as elective credit and applied to the 120-hour requirement.
Prerequisite(s): BSC 114; and BSC 115 or BSC 118; and BSC 116; and BSC 117 or BSC 120

BSC399 Presentation of UG Research
W
Hours 2
Exploration of the process of presenting research results in different written formats including: abstract, poster, and full journal article. How the needs for clear presentation and response to peer review can inform the experimental process will also be covered.
Prerequisite(s): BSC 398
Writing

BSC400 Vertebrate Funct Morphol
Hours 4
Recommended for pre-health professions students. Lecture and laboratory. The comparative anatomy of the vertebrates with emphasis on functional features of several vertebrate species. Laboratory work deals mainly with identifying anatomical features of several vertebrate species.
Prerequisite(s): BSC 114 and BSC 115; or BSC 118; and BSC 116 and BSC 117; or BSC 120; and BSC 300

BSC403 Intro To Bsc Instruction
Hours 2
Prerequisites: BSC 114:115 or BSC 118, BSC 116:117 or BSC 120, and junior or senior standing, formal application, and a satisfactory interview.
Prerequisite(s): BSC 114 and BSC 115; or BSC 118; BSC 116 and BSC 117; or BSC 120

BSC404 Honors Intro To Bsc Instruction
UH
Hours 2
Prerequisites: BSC 114:115 or BSC 118, BSC 116:117 or BSC 120, and junior or senior standing, Honors attribute, formal application, and a satisfactory interview.
Prerequisite(s): BSC 114 and BSC 115; or BSC 118; and BSC 116 and BSC 117; or BSC 120
University Honors

BSC407 Honors Seminar In Bsc
UH
Hours 1
Seminar and discussion. In the first semester, students present seminars based on the current literature. In the second semester, students present seminars derived from their honors theses. A maximum of 2 hours of credit for BSC 407 may be applied to the requirements of the biology or microbiology major. Offered according to demand.
Prerequisite(s): BSC 114 and BSC 115 or BSC 118; and BSC 116 and BSC 117; or BSC 120
University Honors
BSC409 Pre-Health Apprenticeship I  
Hours 2
This course provides a one semester apprenticeship at a local health care facility and is intended for all pre-health professional students. This course also has a service learning component. It does not count as applicable hours for the biology major or minor.

BSC410 Pre-Health Apprenticeship II  
Hours 2
This course provides a one semester apprenticeship at a local health care facility and is intended for all pre-health professional students. This course also has a service learning component. It does not count as applicable hours for the biology major or minor.

BSC412 Limnology  
Hours 3
Study of freshwater environments and the organisms that live in lakes, ponds, and streams. May be taken with BSC 413 or separately.
Prerequisite(s): BSC 114; and BSC 115 or BSC 118; and BSC 116; and BSC 117 or BSC 120

BSC415 Wetland Ecology  
Hours 3
An in-depth analysis of wetland ecology emphasizing the biology and ecology of vascular plants, including plant adaptations to anaerobic soils, reproductive adaptations, habitat and plant zonation, and the role of plants in ecosystem function. Offered in alternate years.
Prerequisite(s): BSC 385

BSC417 Environmental Modeling  
Hours 3
An integrated study of quantitative principles and computer-based solution techniques important for understanding environmental systems and for environmental problem solving.
Prerequisite(s): MATH 125 and CH 101 or CH 117; and CH 102 or CH 118 and BSC 385

BSC420 Principles Of Systematics  
Hours 4
Introduction to the principles, methods, and applications of systematics to analysis of morphological and molecular data. Includes introduction to biological classifications and nomenclature.
Prerequisite(s): BSC 360 or BSC 373 or BSC 376 or BSC 483

BSC422 Biology of Cancer  
Hours 3
This course is an introduction to the biological principals that explain the origins, development, pathology, and treatment of cancer. Students will work in teams assigned to particular types of cancer and will investigate what is known on various topics as related to that type of cancer.
Prerequisite(s): BSC 300 minimum grade of C- and BSC 315 minimum grade of C-

BSC424 Human Physiology  
Hours 3
Topics covered are the digestive, nervous, reproductive, immune, muscular, blood, cardiovascular, respiratory, urinary, and body-fluid systems. May be taken with BSC 425 or separately.
Prerequisite(s): BSC 300

BSC425 Human Physiology Lab  
Hours 2
Hands-on experience for understanding the principles and mechanisms of physiological processes of the human body. Major emphases on organ system performance, whole-body metabolism, and energetics.
Prerequisite(s): BSC 424
Prerequisite(s) with concurrency: BSC 424

BSC428 Biology Of Fishes  
W  
Hours 4
Lecture and laboratory. Survey of the structure, function, ecology, and classification of fishes. Offered in alternate years.
Prerequisite(s): BSC 385
Writing

BSC431 Pathogenic Microbiology  
Hours 3
Study of microorganisms related to health and disease with emphasis on molecular mechanism of pathogenesis. Offered in alternate years.
Prerequisite(s): BSC 310

BSC432 Pathogenic Mibrobiol Lab  
Hours 3
Practical experience in the isolation, characterization, and identification of pathogenic microorganisms. Offered in alternate years.
Prerequisite(s): BSC 312 and BSC 431
Prerequisite(s) with concurrency: BSC 431

BSC434 Plant Systematics  
Hours 4
Lecture and laboratory. Characteristics and distribution of the major families of vascular plants as well as practice in the collection and identification of flowering plants. One weekend field trip required. Offered in alternate years.
Prerequisite(s): BSC 360
BSC435 Immunology
Hours 4
Thorough exploration of various aspects of modern immunology at the molecular and cellular levels.
Prerequisite(s): BSC 310

BSC436 Immunology Laboratory
W
Hours 3
Practical experience in modern immunological techniques. Offered in alternate years.
Prerequisite(s): BSC 435
Prerequisite(s) with concurrency: BSC 435

BSC439 Bch/Molecular Biology Lab
Hours 3
Students participate in the generation of new knowledge, thus the experiments vary. Techniques taught include agarose gel electrophoresis, cycle sequencing, sequence analysis, plasmid purification, restriction endonuclease digestion, gel purification of DNA, ligation, transformation, primer design, PCR, gene knockouts, protein fusions, and enzyme assays.
Prerequisite(s): BSC 450

BSC441 Developmental Biology
Hours 3
The course provides basic information about events in developing animal systems, emphasizing cellular, molecular, and genetic research approaches to the study of development.
Prerequisite(s): BSC 300 and BSC 315

BSC442 Integrated Genomics
Hours 4
An advanced discovery-based laboratory course designed to introduce the process of gene discovery and integrate modern genomics techniques and bioinformatic database usage.
Prerequisite(s): BSC 300 and BSC 315
Prerequisite(s) with concurrency: BSC 315

BSC444 General Virology
Hours 3
A survey of viruses, viral replication, and viral pathogenesis, including bacterial, animal, and plant viruses. The role of viruses in molecular biology is emphasized.
Prerequisite(s): BSC 300 or BSC 310

BSC448 Animal Behavior
W
Hours 3
This course is designed to provide modern perspectives on the study of animal behavior, pulling from fields as diverse as evolutionary biology, ecology, neurobiology and economics. However there will be a historical undercurrent which will illustrate the roots of this truly interdisciplinary field.
Prerequisite(s): BSC 114; and BSC 115 or BSC 116 or BSC 118; and BSC 117 or BSC 120; and BSC 385

BSC449 Endocrinology
W
Hours 3
A detailed examination of the vertebrate endocrine system that uses a comparative approach to explore intricate relationships between the brain, endocrine glands, hormones and target organs.
Prerequisite(s): BSC 114; and BSC 115 or BSC 118; and BSC 116; and BSC 117 or BSC 120; and BSC 300

BSC450 Fundamentals of Biochemistry
Hours 3
Prerequisite(s): BSC 300 minimum grade of C- and CH 232 minimum grade of C-

BSC451 Molecular Biology
Hours 3
A one-semester survey of molecular biology that emphasizes gene structure, function, and regulation of expression. Offered spring semester.
Prerequisite(s): BSC 311 or BSC 315; and BSC 450; and CH 462 or

BSC456 Microbial Ecology
Hours 3
Study of microorganisms in the environment, with emphasis on their roles in energy transformations, biogeochemical cycles, and biotic interactions.
Prerequisite(s): BSC 310 or BSC 385

BSC460 Human Developmental Biology
W
Hours 4
Lecture and laboratory. Development of the human embryo and fetus, including molecular, physiological, and structural aspects of morphogenesis, and functional development. Offered in alternate years.
Prerequisite(s): BSC 114; and BSC 115 or BSC 118; and BSC 116; and BSC 117 or BSC 120; and BSC 300

Writing
BSC464 Biology Of Algae
W
Hours 4
Lecture and laboratory. Freshwater and marine algae: their structure,
development, taxonomy, and distribution.
Prerequisite(s): BSC 360 or BSC 310
Writing

BSC465 Prin Of Toxicology
Hours 3
The study of adverse effects of chemicals on living organisms and
methods for predicting the likelihood of such effects, including
descriptive, mechanistic, and regulatory aspects.
Prerequisite(s): BSC 300 and BSC 315

BSC469 Histology Of Vertebrates
Hours 4
Lecture and laboratory. Identification of tissue types and components,
histogenesis and function of tissues.
Prerequisite(s): BSC 114; and BSC 115 or BSC 118; and BSC 116; and
BSC 117 or BSC 120; and BSC 300

BSC470 Principles of Population Genetics
Hours 3
Population genetics is the study of how evolutionary forces (genetic drift,
natural selection, mutation, and gene flow) affect allele and genotype
frequencies in populations. Population genetics is a field with a rich
theoretical history that has allowed scientists to make predictions about
these evolutionary processes. With the advent of massive amounts of
genetic data in many species, it is now possible to test these predictions,
and a solid foundation in theory, its expectations, and assumptions is
crucial for interpreting results from genetic analyses. Students should
expect to learn how evolutionary forces acting on individuals affect
patterns of inheritance and ultimately drive the changes we see between
species.
Prerequisite(s): BSC 315 minimum grade of C- and BSC 385 minimum
grade of C- or permission of the instructor.

BSC471 Plant Physiology
W
Hours 3
A general survey for upper-level undergraduate students covering all
aspects of plant physiology including plant transport, translocation of
sugars in plants, plant biochemistry, plant metabolism, plant growth
and development, photosynthesis, nitrogen fixation, flowering and plant
hormones. The course will consist of lectures, in-class experiments,
group discussions, presentations and other activities relating to course
material.
Prerequisite(s): BSC 300 and BSC 360
Writing

BSC472 Mycology
W
Hours 4
Lecture and laboratory. Introduction to the fungi and their biology,
including aspects of their structure and function, taxonomy, genetics, and
ecology. Offered in alternate years.
Prerequisite(s): BSC 310
Writing

BSC473 Bioinformatics
W
Hours 3
Bioinformatics BSC 473/573 covers the tools and approaches necessary
to perform computational analysis of large datasets. We will focus on
analyzing high-throughput sequencing data although the tools we will
learn are applicable to a wide range of modern biological questions.
Specific topics include operating in a UNIX/bash shell environment,
scripting, genome assembly, alignment, and algorithms. BSC 473/573 is a
writing course and writing proficiency within this discipline is required for
a passing grade in this course.
Prerequisite(s): Grade of C- or higher in BSC 315 Genetics.
Writing

BSC475 General Entomology
W
Hours 4
Lecture and laboratory. Survey of the structure, function, classification,
and habits of insects.
Prerequisite(s): BSC 385
Writing

BSC476 Aquatic Insects
Hours 4
Lecture and laboratory. Survey of aquatic insects with emphasis on their
identification, life histories, and ecology. Offered in alternate years.
Prerequisite(s): BSC 385

BSC480 Plant Ecology
W
Hours 3
This course will examine the ecology of plants at different levels:individual, population and community.
Prerequisite(s): BSC 385 and BSC 360
Writing

BSC481 Foundations in Advanced Biostatistics with Applications to R
Hours 3
This course provides an overview to common statistical methods used in
biological research, using case studies from biology, ecology, and natural
resources management. The overarching objective of this course is to
give students the ability to use and effectively evaluate biological data.
We will demonstrate and conduct statistical analyses with an emphasis
on utilizing the statistical computing language, R, to apply statistical
concepts to biological and ecological data.
Prerequisite(s): BSC 380
BSC482 Conservation Biology
Hours 3
A thorough examination of the principles of conservation biology.
Prerequisite(s): BSC 385

BSC483 Evolution
W
Hours 3
Thorough investigation of evolution, including population genetics, molecular evolution, adaptation, and speciation. Offered in the spring semester.
Prerequisite(s): BSC 385 and BSC 315

Writing

BSC484 Aquatic Biology Seminar
Hours 1
Review and discussion of current topics in aquatic biology.
Prerequisite(s): BSC 320 and BSC 385; and BSC 412 or BSC 490

BSC485 Foundations in Forest Resources and Conservation
Hours 3
This course provides an introduction to the foundational ideas of forest resources and conservation. The course includes a history of the forestry profession and a variety of perspectives to develop students’ knowledge of forestry field and research methods. This course also helps students develop an understanding and appreciation of the diversity of forest resources both here in Alabama and globally.
Prerequisite(s): (BSC 114 minimum grade of C- or BSC 118 minimum grade of C-) and (BSC 116 minimum grade of C- or BSC 120 minimum grade of C-) and BSC 340 minimum grade of C- or BSC 385 minimum grade of C-

BSC487 Biogeography
Hours 3
Examination of the ecological and historical factors influencing the geographic distribution of plants and animals. Offered alternate years.
Prerequisite(s): BSC 385

BSC488 Research Seminars in Biology
Hours 1
This course is a one-hour weekly seminar where students will be exposed to current research being performed in the UA Department of Biological Sciences and at other institutions. Students will gain exposure and familiarity with research and current methodology being used in the fields of Ecology, Evolution and Systematics, Animal Behavior and Physiology, Microbiology and Cell and Molecular Biology.
Prerequisite(s): 6 hours or more of BSC or MS courses at the 300-400 levels.

BSC490 Stream Ecology
Hours 4
Lecture and laboratory. Thorough study of the structural (physical and biological) and functional attributes (energy flow, nutrient cycling, community structure) characteristic of stream and river ecosystems. Offered in alternate years.
Prerequisite(s): BSC 385

BSC493 Cell Cycle Regulation
W
Hours 3
In-depth review and discussion of recent scientific research literature dealing with mechanisms of eukaryotic cell cycle regulation and their significance in human cancers. Provides a foundation for further studies in the cell cycle field, which impacts many areas of cell, molecular, and developmental biology.
Prerequisite(s): BSC 300 minimum grade of C- and BSC 315 minimum grade of C- and BSC 450 minimum grade of C-

Writing

BSC496 Bioremediation
W
Hours 3
This course will explore how diverse organisms transform contaminants in soils and groundwater and how microbes/plants interact with environmental conditions present at bioremediation sites. There will be an emphasis on modern molecular methods developed to detect impacted sites, to monitor the effectiveness of bioremediation and/or the presence of contaminant degrading organisms, and the development and potential use of genetically modified organisms to remediate contaminants.
Prerequisite(s): BSC 310 minimum grade of C-

Writing

BSC497 Special Topics
Hours 1-4
A biological sciences topic not covered in other courses. The credit hours and format are determined as appropriate to the topic, and a course title is added to the schedule of classes. Offered according to demand.
Prerequisite(s): BSC 114; and BSC 115 or BSC 118; and BSC 116; and BSC 117 or BSC 120

BUI100 Convocation
Hours 1
Experiences to extend and complement the Blount Undergraduate Initiative foundation courses. May be repeated once for credit.

BUI101 Foundation: Origins
HU
Hours 3
A text-centered exploration of major questions that integrate liberal arts education and form the basis of the Blount Undergraduate Initiative. Emphasis is on origins of the natural world, human culture, and human understanding.

Humanities

BUI102 Foundation: Possibilities
SB
Hours 3
A text-centered exploration of major questions that integrate liberal arts education and form the basis of the Blount Undergraduate Initiative. Emphasis is on significant issues in the discourse on human possibilities.

Social and Behavioral Sciences
BU1301 Thematic Seminar  
Hours 3  
A text-centered examination of a more specific problem connected with core concepts of the first-year Foundations sequence and viewed through the methodological lens of one of the disciplines in the liberal arts. May be repeated for a maximum of 12 hours.

BU1401 Blount Capstone Worldviews  
Hours 3  
An examination of the "worldviews" of various epochs and the completion of a senior project. Students learn how individual beliefs about what is actual, what is possible, and what is desirable can be combined into a single unified understanding of the world, and how such a worldview has implications for what we should do and how we should live.

CC201 Introduction to Cyber Criminology  
Hours 3  
This course will introduce students to the traditional and contemporary forms of cyber crime, including hacking, insider threat, Internet child pornography use, cyber bullying, and cyber terrorism. Not only will students learn how computers can be either the target or tool in cyber crimes, this course will examine such crimes from both social and behavioral science perspectives, such as the personality traits associated with computer deviance. Finally, this course will provide a general overview of the digital forensic investigation as well as the analysis of digital evidence. No prior knowledge in any of these areas is required.

CC290 Special Topics in Cyber Crime  
Hours 3  
Examination of selected issues in cyber security in the United States and throughout the world.

CC301 Cyber Law and Policy  
Hours 3  
This course examines cyber criminology from a law and policy perspective, including its impact on Fourth and Fifth Amendment jurisprudence and the changing conceptions of privacy and identity. Topics will focus on the effects of cyber criminology on how criminal laws are conceptualized, enforced, and prosecuted. A central part of the course is a Moot Court component in which students will write a legal brief and argue their side of a cyber-related legal case in front of a panel of lawyers and law students acting as judges.

Prerequisite(s): CC 201

CC395 Internship  
Hours 1-9  
An opportunity for students to conduct career exploration and build a record of experience in the field of cyber criminology and digital forensics. To take this course students must obtain permission from the instructor for a specific number of hours and pass a background check.

Prerequisite(s): CC 201 A maximum of 3 hours can be used toward the minor. Instructor must approve the number of hours and the student cannot deviate from those hours without permission of instructor.

CC401 Law Enforcement in the Digital Age  
Hours 3  
This course examines the role that technology plays in modern-day policing, and provides students with a detailed overview of how the cyber, digital, and technological worlds have impacted policing historically. In the technology component of the course, students will comprehend computer basics, understanding computer and human networks, and identify the broad range of technologies used by police departments (e.g., less-than-lethal weapons, databases).

Prerequisite(s): CC 201

CC402 Digital Forensic Investigation  
Hours 3  
This course is a non-technical overview of the digital crime scene. This course aims to answer the question, “How do law enforcement officers investigate the digital crime scene?” This course will cover how digital forensic investigators identify, preserve, and extract digital evidence using different forensic tools and software. This course will also cover the various legal challenges in digital forensic investigations, including admissibility of evidence in courts, right to privacy, and the right to avoid self-incrimination.

Prerequisite(s): CC 201

CC490 Special Topics in Cyber Criminology  
Hours 3  
Examination of selected issues in cyber security in the United States and throughout the world. A maximum of six hours may be used toward the minor.

Prerequisite(s): CC 201

CD225 Intro Comm Disorders  
Hours 3  
Study of the types of speech, language, and hearing disorders; an introduction to the principles of rehabilitation of communicative disorders; and consideration of employment settings.

CD226 Lang & Speech Develop  
Hours 3  
Theory and practice of normal speech and language processes and sequences.

CD244 Phonetics  
Hours 3  
Study of the principles of phonetics and their application to speech. The International Phonetic Alphabet is used for study and transcription.

CD275 Anat Physio Sech Hear Mechnasm  
Hours 3  
Detailed study of the bases of speech and hearing, including anatomy, physiology, and neurology.

CD277 Preprofess Lab Experienc  
Hours 1  
Structured observational activities for students prior to their enrollment in a practicum course in speech-language pathology. Open to CD majors only.
CD308 Speech Disorders I
Hours 3
An introduction to articulation, phonology, & language disorders in children & adults as well as literacy & aural rehabilitation.
Prerequisite(s): CD 225 CD 226 CD 244 CD 275

CD309 Speech Disorders II
Hours 3
An introduction to aphasia, traumatic brain injury, dementia, dysarthria, and apraxia.
Prerequisite(s): CD 225 CD 226 CD 244 CD 275

CD350 Independent Study
Hours 1-3
Directed readings in an area of communicative disorders. Open to CD majors only.
Prerequisite(s): Minimum of 18 hours in CD courses and permission of the instructor.

CD351 Hearing Science
Hours 3
This course will provide the student with an understanding of the physical aspects of sound and how it is processed physiologically through the human auditory system. In addition, the student will become familiar with the anatomy of the hearing mechanism.
Prerequisite(s): CD 225 CD 226 CD 244 CD 275

CD377 Clin Practicum I Speech
W
Hours 3
Supervised clinical practice in speech therapy with children. Open to CD majors only. Writing proficiency within this discipline is required for a passing grade in this course.
Prerequisite(s): CD 225 CD 226 CD 244 CD 275 CD 308 By application only.

Writing

CD378 Clinic Pract II Speech
Hours 1-3
Supervised clinical practice in speech therapy with children.
Prerequisite(s): CD 225 CD 226 CD 244 CD 275 CD 308 CD 377 By application only.

CD402 Psychology of Language
Hours 3
Language is a system of symbols that we use to communicate. The power of this system enables us to share the contents of our minds with other people who share that language. The evolution of language has profoundly shaped the lives of human beings, enabling our species to transmit knowledge from one generation to the next. This accumulated knowledge over time and space has allowed humans to proliferate as a species. New words are added to a language as new ideas emerge. The psychology of language is the study of the processes by which we as human beings generate grammatical sequences of linguistic symbols for comprehension by the listener.
Prerequisite(s): CD 225 CD 226 CD 244 CD 275
Prerequisite(s) with concurrency: CD 277

CD411 Speech Science
Hours 3
A study of speech physiology, basic electronics, basic acoustics, speech acoustics, auditory perception, and neuroanatomy. Class work and laboratory sessions cover speech spectrographic analysis, basic sound measurement, and selected other instrumentation used in the speech and hearing science laboratory.
Prerequisite(s): CD 225 CD 226 CD 244 CD 275

CD416 Multicultural Issues
Hours 3
A framework for systematically analyzing cultural similarities and differences will be provided and will serve as a model to examine cultural differences in the clinical setting.
Prerequisite(s): CD 225 and CD 226 and CD 244

CD443 Basic Audiology
Hours 3
Introduction to hearing evaluation, conservation, and impairment. Also considers the auditory system: anatomy, physiology, and pathology. Includes three laboratory sessions.
Prerequisite(s): CD 225 CD 226 CD 244 CD 275

CD444 Aural Rehabilitation
Hours 3
The rehabilitation of hearing-impaired people primarily through auditory and visual training is addressed. Other sensory training, language development, speech production, and guidance are also considered. Open to CD majors only.
Prerequisite(s): Minimum overall GPA of 2.5 CD 225 CD 226 CD 244 CD 275

CD445 Audiology Lab Experience
Hours 1-3
Supervised laboratory or clinical experience in hearing evaluation and rehabilitation.
Prerequisite(s): Completion of the 200-and 300-level undergraduate CD classes as well as CD 443. By application only.

CD454 Fluency Disorders
Hours 3
The study of the nature, assessment, and treatment of stuttering. Emphasis on understanding the different onset and developmental theories and different approaches to treatment.
Prerequisite(s): CD 225 CD 226 CD 244 CD 275 CD 308

CD455 Voice Disorders
Hours 3
This course is designed to provide basic knowledge and skills needed for the evaluation and treatment of voiced language disorders.
Prerequisite(s): CD 225 CD 226 CD 244 CD 275 CD 308
CD462 Neuroscience for the Study of Communicative Disorders

Hours 3

An introductory course in neuroscience as it relates to the field of speech-language pathology. Students will be able to explain the anatomy and physiology of the brain, explain functions associated with structures in both the central and peripheral nervous systems, appreciate the nature and scope of neurogenic impairments, and understand brain abnormalities and neurological illnesses.

Prerequisite(s): CD 225, CD 226, CD 244, and CD 275

CH100 General Chemistry I - Plus

N

Hours 5

This course is designed for students with lower level math backgrounds to successfully complete the freshman level entry course in general chemistry, a foundational and core science survey course. This is a proposed 5 credit hr course for students who are taking, or meet the requirements to take, MATH 112 or 113 and who do not have placement into at least MATH 115. Analysis shows such students to be at high risk (~ 50%) for a DFW outcome in the traditional CH101 general chemistry course. Chemistry topic coverage for CH100 is identical to that of CH101 (ch 1-11, Tro textbook), but the course content is expanded to include additional development of basic science, chemistry, math, and problem solving skills. Additional lecture time is included for instruction in these areas, including added supervised problem solving and mentoring of these students to better prepare and train them for successful completion of the first semester of general chemistry. Student who receive credit for CH100 will qualify to subsequently take CH102. Students cannot receive credit for both CH 100 and CH 101.

Prerequisite(s): MATH 100 or MATH 112 or higher

Prerequisite(s) with concurrency: MATH 112 or MATH 113 or higher

Natural Science

CH101 General Chemistry

N

Hours 4

Three lectures and one three-hour laboratory. Degree credit is not awarded for both CH 101 and CH 100 or for both CH 101 and CH 117. A survey of the fundamental facts, principles, and theories of general chemistry. Usually offered in the fall, spring, and summer semesters.

Prerequisite(s): MATH 113 or (MATH 115 or MATH 125 or MATH 145 or MATH 126 or MATH 146 with concurrent enrollment allowed)

Natural Science

CH102 General Chemistry

N

Hours 4

Three lectures and one three-hour laboratory. Degree credit is not awarded for both CH 102 and CH 105 or both CH 102 and CH 118. Continuation of CH 100 or CH 101, with basic inorganic chemistry. Includes a systematic study of the elements and the structures, properties, and reactions of their compounds. Usually offered in the fall, spring, and summer semesters.

Prerequisite(s): CH 100, CH 101, or CH 117 MATH 112 or 115

Prerequisite(s) with concurrency: MATH 113

Natural Science

CH104 Introductory Chemistry

N

Hours 4

Three lectures and one three-hour laboratory. The course is primarily for students in the Capstone College of Nursing and the College of Human Environmental Sciences; it may not be substituted for CH 101 except with departmental permission. Degree credit is not awarded for both CH 104 and CH 107. An introductory survey of the facts, principles, and theories of chemistry. Usually offered in the fall and summer semesters.

Natural Science

CH105 Introductory Org Chem

N

Hours 4

Three lectures and one three-hour laboratory. Not open to chemistry majors or minors or to students who have earned credit for CH 102. Degree credit is not awarded for both CH 105 and CH 102 or both CH 105 and CH 108. The course may not be substituted for CH 101 or CH 102. Brief survey of organic and biochemistry. Usually offered in the spring and summer semesters.

Prerequisite(s): CH 104 or CH 101 or CH 117

Natural Science

CH117 Honors General Chemistry

N, UH

Hours 4

Three lectures and one three-hour laboratory. Not open to students who have earned credit for CH 101. Degree credit is not awarded for both CH 117 and CH 101 or both CH 117 and CH 107. A comprehensive study of the fundamental facts, principles, and theories of general chemistry. Usually offered in the fall semester.

Natural Science, University Honors

CH118 Honors General Chemistry

N, UH

Hours 4

Three lectures and one three-hour laboratory. Not open to students who have earned credit for CH 101. Degree credit is not awarded for both CH 117 and CH 101 or both CH 117 and CH 107. A comprehensive study of the fundamental facts, principles, and theories of general chemistry. Usually offered in the fall semester.

Natural Science, University Honors

CH155 Forensic Science

Hours 3

This course will present an overview of forensic science. The course will focus on processing a crime scene as well as other topics used to connect a suspect to a given crime.
CH223 Quantitative Analysis  
Hours 4  
Three lectures and one three-hour laboratory. Comprehensive course covering classical methods of quantitative analysis as well as an introduction to electrochemical, spectroscopic and chromatographic methods. Usually offered in the fall, spring and summer semesters.  
Prerequisite(s): CH 102 or CH 118

CH231 Elem Organic Chemistry I  
Hours 3  
Three lectures. The course is an introduction to the theory and principles of organic chemistry. Topics include organic structure, syntheses, and analyses. Usually offered in the fall, spring, and summer semesters.  
Prerequisite(s): CH 102 or CH 118

CH232 Elem Organic Chem II  
Hours 3  
Three lectures. This course is a continuation of CH 231. Usually offered in the fall, spring, and summer semesters.  
Prerequisite(s): CH 231

CH237 Elem Organic Chem Lab  
Hours 2  
A one-hour lecture and five-hour laboratory. Designed for chemistry majors and chemistry minors to take concurrently with CH 232. Usually offered in the fall, spring, and summer sessions.  
Prerequisite(s): CH 231  
Prerequisite(s) with concurrency: CH 232

CH331 Honors Organic Chemistry 1  
Hours 3  
Honors Organic Chemistry will combine a modern in-depth insight into our chemical world with an evolutionary understanding of how the science of chemistry came to be what it is now, and how and where it influences our everyday lives. This course may better serve the interests of students majoring in Chemistry, Chemical Biology, Biological Sciences, Pharmacy, and Material and Engineering Sciences by the inclusion of traditional chemistry topics along with careful examination of the impact of chemistry on the world around us.  
Prerequisite(s): CH 102 or 118

University Honors

CH332 Honors Organic Chemistry 2  
Hours 3  
Honors Organic Chemistry will combine a modern in-depth insight into our chemical world with an evolutionary understanding of how the science of chemistry came to be what it is now, and how and where it influences our everyday lives. This course may better serve the interests of students majoring in Chemistry, Chemical Biology, Biological Sciences, Pharmacy, and Material and Engineering Sciences by the inclusion of traditional chemistry topics along with careful examination of the impact of chemistry on the world around us.  
Prerequisite(s): CH 231 or CH 331

University Honors

CH338 Elem Organic Chem Lab II  
W  
Hours 2  
A one-hour lecture and five-hour laboratory. The course is designed for chemistry majors. Usually offered in the fall semester. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): CH 232 and CH 237

Writing

CH340 Elem Physical Chem  
Hours 3  
Three lectures. This course is designed for students in the pre-health professional degree or pursuing the chemistry minor and is a study of the application of physical chemical concepts in biological systems. It is a.  
Prerequisite(s): CH 223 and PH 102 or PH 106 or PH 126

CH341 Physical Chemistry  
Hours 3  
Three lectures. The course is designed for chemistry majors and is a study of the structure and properties of matter with emphasis on theoretical principles and their mathematical interpretation. Usually offered in the fall semester.  
Prerequisite(s): CH 223 and MATH 227 or MATH 247  
Prerequisite(s) with concurrency: PH 106 or PH 126

CH342 Physical Chemistry  
Hours 3  
Three lectures. The course is designed for chemistry majors. Continuation of CH 341. Usually offered in the spring semester.  
Prerequisite(s): CH 341

CH343 Elem Phy Chem Lab  
Hours 1  
One three-hour laboratory. The course is designed to be taken concurrently with CH 340. Usually offered in the fall semester.  
Prerequisite(s) with concurrency: CH 340

CH348 Physical Chemistry Lab  
W  
Hours 2  
6 hours of laboratory. The course is designed to be taken concurrently with CH 342. Usually offered in the spring semester. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): CH 341  
Prerequisite(s) with concurrency: CH 342

Writing

CH396 Undergrad Research  
Hours 1-3  
3 hours laboratory per credit hour. The student works on a research project under the direction of a chemistry faculty member. CH 396 is offered in the fall, CH 398 is offered in the spring, and CH 399 is offered in the summer.
CH398 Undergrad Research
Hours 1-3
3 hours laboratory per credit hour. The student works on a research project under the direction of a chemistry faculty member. CH 396 is offered in the fall, CH 398 is offered in the spring, and CH 399 is offered in the summer.

CH399 Undergrad Research
Hours 1-3
3 hours laboratory per credit hour. The student works on a research project under the direction of a chemistry faculty member. CH 396 is offered in the fall, CH 398 is offered in the spring, and CH 399 is offered in the summer.

CH405 Medicinal Chemistry
Hours 3
Fundamental considerations in drug design. Includes lead discovery, target identification and validation, pharmacodynamics, pharmacokinetics and metabolism, and formulations/drug delivery systems. Chemical modifications to improve efficacy and pharmacokinetics will be emphasized.
Prerequisite(s): CH 232 and either CH 461, BSC 300, or BSC 450

CH409 Organometallic Chemistry
Hours 3
Survey of the typical reactions of organotransition metal complexes with a focus on the fundamental mechanisms of these reactions and the application of organometallic catalysts.
Prerequisite(s): CH 341 or CH 401 or CH 413

CH410 Scientific Glassblowing
Hours 3
The course introduces students to the fundamentals of scientific glassblowing through hands-on training. Usually offered during Interim.

CH413 Inorganic Chemistry
Hours 4
Three lectures and one three-hour laboratory. Survey in areas of coordination, main-group, and organometallic chemistry. Laboratory experiments involve the preparation, purification, and identification of inorganic compounds. Usually offered in the fall semester.
Prerequisite(s): CH 338 and CH 341

CH424 Instrumental Analysis
W
Hours 4
Two lectures and one five-hour laboratory. The course covers the general operating principles of the commonly used analytical instruments with an emphasis on theory. Wherever possible, mathematical interpretations and derivations are given. Usually offered in the spring semester. Writing proficiency within this discipline is required for a passing grade in this course.
Prerequisite(s): CH 223 and CH 341
Prerequisite(s) with concurrency: CH 348

CH432 Advanced Synthetic Organic Chemistry
Hours 3
This course will serve as a co-listed course with CH 532. The main goal of this course is to instruct advanced organic chemistry to undergraduates.
Prerequisite(s): CH 232

CH435 Inter Organic Chem
Hours 3
Three lectures. The course is designed to familiarize the student with mechanistic and synthetic organic chemistry. Usually offered in the fall semester.
Prerequisite(s): CH 232 and CH 342

CH437 Spectroscopic Techniques
Hours 3
This course is an introduction to the theory, application, and interpretation of four major types of structural analysis used by synthetic chemists: absorption, infrared, and nuclear magnetic resonance spectroscopy, as well as mass spectrometry. We will focus heavily on interpretation of spectra and application of these tools to address questions of structure and reactivity. While this is an organic chemistry class, examples of applications to organometallic and inorganic materials will also be presented.
Prerequisite(s): CH 232, 338, 342, and 348

CH461 Biochemistry I
Hours 3
Three lectures. Survey of the physical and chemical properties of the molecular components and methods of isolating and analyzing them. Usually offered in the fall semester.
Prerequisite(s): CH 223 and CH 232 and CH 237

CH462 Biochemistry II
Hours 3
Three lectures. Survey of the principal pathways of carbon, nitrogen, and energy metabolism and clinical and forensic chemistry. Usually offered in the spring semester.
Prerequisite(s): CH 461 or BSC 300

CH463 Biochem-Clin/Foren/Chem
W
Hours 3
One lecture and one six-hour laboratory. Biochemical techniques within the structure of a semester-long research project. Topics include protein purification and chromatography, spectroscopy, electrophoresis, kinetics, and DNA manipulation. Writing proficiency within this discipline is required for a passing grade in this course.
Prerequisite(s): CH 461
Prerequisite(s) with concurrency: CH 462

Writing
CH466 Bioorganic Chemistry
Hours 3
This course will be divided into two main areas. We will begin with methods for studying enzyme reaction mechanisms. This section will include steady-state enzyme kinetics, derivation of rate equations, enzyme inhibition, isotope exchange methods, pH and viscosity effects, kinetic isotope effects, and site-directed mutagenesis. We will then utilize these methods in order to investigate the chemical mechanisms enzymes use to catalyze specific reactions (hydrolysis; group transfer; 1,1 hydrogen shift; 1,2 hydrogen shift; C-C bond formations; and redox chemistry). We will also cover the chemistry associated with several cofactors required by enzymes (flavins, thiamin pyrophosphate, tetrahydrofolate, etc).
Prerequisite(s): CH 461

CH473 The Study of Oenology
Hours 3
The course will focus on the complex chemical substances and chemical transformations responsible for the flavor, aroma, texture, & color variations in wine. Oenology exposes students to the process of making wine from growing grapes used in wine-making to fermentation of fruit sugars through yeast growth and accompanying chemical transformations.
Prerequisite(s): CH 232 and CH 338

CH474 Chemistry of Beer & Brewing
Hours 3
The instruction will comprise approximately 35 45-minute lecture periods and include visits to breweries in the Rheingau along with historical points of interest. Beyond a historical and cultural introduction, the course will focus on the complex chemical substances and chemical transformations responsible for the flavor, aroma, texture, & color variations beer. The Science and Chemistry of Beer & Brewing exposes students to the process of making beer from fermentation and flavoring of sweet mashes through yeast growth and accompanying chemical transformations. Participants will learn about the different types of grains and mashes used to make beer and will learn to evaluate beer, choose beer to compliment the chemistry and taste of foods and differentiate between many locally and internationally produced ales. There is a significant Biochemistry and Organic Chemistry involved in the malting, mashing and fermentation process and understanding the chemistry behind the flavor, aroma, and color of beer. Participants will learn to correlate the scientific underpinnings with the resultant beers and ales.
Prerequisite(s) with concurrency: CH 232 or CH 332, CH 237, and CH 338 with the instructor’s permission

CH475 Chemistry of Cooking
Hours 3
Chemistry as a discipline has its roots very early among the natural sciences. The ability to understand, manipulate and control substances in the environment is the central key to humankind’s flexible adaptation to surroundings otherwise hostile to human life. Cooking is a subset of that science which facilitates utilization of nutrients in foods and allows for preservation for food for longer periods. Additionally, cooking is a fun, and social activity. When you’re cooking, you’re a chemist! Every time you follow or modify a recipe you are experimenting with acids and bases, emulsions and suspensions, gels and foams. In your kitchen you denature proteins, crystallize compounds, react enzymes with substrates, and nurture desired microbial life while suppressing harmful microbes. And unlike in a laboratory, you can eat your experiments to verify your hypotheses.
Prerequisite(s): CH 332 or CH 232 or with the instructor’s consent.

CH491 Honors Research Sem
UH
Hours 1
The course is designed for students in the Chemistry Department Honors Program. CH 491 and CH 493 are offered in the fall semester; CH 492 and CH 494 are offered in the spring semester.
University Honors

CH492 Honors Research Sem
UH
Hours 1
The course is designed for students in the Chemistry Department Honors Program. CH 491 and CH 493 are offered in the fall semester; CH 492 and CH 494 are offered in the spring semester.
University Honors

CH493 Honors Research Sem
UH
Hours 1
The course is designed for students in the Chemistry Department Honors Program. CH 491 and CH 493 are offered in the fall semester; CH 492 and CH 494 are offered in the spring semester.
University Honors

CH494 Honors Research Sem
UH
Hours 1
The course is designed for students in the Chemistry Department Honors Program. CH 491 and CH 493 are offered in the fall semester; CH 492 and CH 494 are offered in the spring semester.
University Honors

CH497 Intro To Research
Hours 1-3
Three hours laboratory per credit hour. The student works on a research project under the direction of a chemistry faculty member. A final research report is required. CH 497 is offered in the fall; CH 498 is offered in the spring; and CH 499 is offered in the summer.
Prerequisite(s): CH 232 and CH 338 and CH 348 and CH 342
CH498 Intro To Research
Hours 1-3
Three hours laboratory per credit hour. The student works on a research project under the direction of a chemistry faculty member. A final research report is required. CH 497 is offered in the fall; CH 498 is offered in the spring; and CH 499 is offered in the summer.
Prerequisite(s): CH 232 and CH 338 and CH 342 and CH 348

CH499 Intro To Research
Hours 1-3
Three hours laboratory per credit hour. The student works on a research project under the direction of a chemistry faculty member. A final research report is required. CH 497 is offered in the fall; CH 498 is offered in the spring; and CH 499 is offered in the summer.
Prerequisite(s): CH 232 and CH 338 and CH 342 and CH 348

CHI101 Elementary Chinese
FL, HU
Hours 4
Contemporary Chinese Language (Mandarin): speaking, listening, reading and writing of simplified Chinese characters. The class meets five hours per week with an instructor. This course is intended for students with NO PRIOR KNOWLEDGE of Chinese. Native speakers or near native speakers of the language are NOT allowed to enroll. Any students with background knowledge of this language must see the program director before enrolling.
Foreign Language, Humanities

CHI102 Elementary Chinese
FL, HU
Hours 4
This is a continuation of Chinese language (Mandarin) on the elementary level. Course goals include stress on authentic reading and writing Chinese and a continuation of speaking with listening comprehension. The class meets five hours per week with an instructor. Native speakers or near native speakers of the language are NOT allowed to enroll.
Prerequisite(s): CHI 101
Foreign Language, Humanities

CHI201 Intermediate Chinese
HU
Hours 3
This is a continuation of Chinese language (Mandarin) on the intermediate level. Course goals include stress on reading and writing Chinese and a continuation of speaking with listening comprehension. Native speakers or near native speakers of the language are NOT allowed to enroll.
Prerequisite(s): CHI 101 and CHI 102
Humanities

CHI202 Intermediate Chinese
HU
Hours 3
This is continuation of CHI 201. Emphasis on authentic Chinese reading and writing as well as culture. Native speakers or near native speakers of the language are NOT allowed to enroll.
Prerequisite(s): CHI 201
Humanities

CHI301 Third-year Chinese
Hours 3
Study of contemporary Chinese language and culture. Emphasis is on the development of reading and writing skills in cultural context. Native speakers or near native speakers of the language are NOT allowed to enroll.
Prerequisite(s): CHI 301

CHI302 Third-year Chinese
Hours 3
Continuation of CHI301. Study of contemporary Chinese language and culture. Native speakers or near native speakers of the language are NOT allowed to enroll.
Prerequisite(s): CHI 301

CHI350 Traditional Chinese Lit Trans
Hours 3
Introduction to Chinese literature from the earliest times to the 20th century. No knowledge of Chinese is required.

CHI351 Modern Chinese Lit Trans
Hours 3
Introduction to 20th-century Chinese literature. No knowledge of Chinese is required.

CHI353 Conversation/Composition
Hours 1-4
This course is intended for students of the intermediate level Chinese. Classes emphasize communicative aspects of socially correct conversational skill as well as reading and writing of authentic contemporary Chinese (Mandarin).
Prerequisite(s): CHI 202

CHI354 Conversation/Composition
Hours 1-4
Continuation of CHI353 with more emphasis on reading and writing of Chinese.
Prerequisite(s): CHI 353

CHI401 Advanced Reading and Writing Chinese I
Hours 3
Advanced level Chinese. Emphasis on reading and writing of modern Chinese (Mandarin). Native speakers or near native speakers of the language are NOT allowed to enroll.
Prerequisite(s): CHI 302
CHI 402 Advanced Reading and Writing Chinese II
Hours 3
Continuation of CHI 401 for advanced students. Offered according to demand.
Prerequisite(s): CHI 401

CIP 101 International Student Success: WIN at UA
Hours 2
This course is designed for new and transfer international students. It will help them WIN at UA – through welcoming, integrating, and navigating a new academic and cultural experience. The course covers topics such as academic resources, honor code, academic misconduct, an overview of the U.S. higher education system and UA in particular, U.S. classroom culture, the cultural adjustment cycle and culture shock, strategies for successful integration into U.S. campus life, and student services resources.
Prerequisite(s): None.

CIP 200 Introduction To Global Studies
HU
Hours 3
Designed as the first course to be taken in the Global Studies Certificate Program (15 hours) to introduce the undergraduate student to the cultural, economic, physical and political aspects of being a world citizen in the 21st century. The emphasis of this course is the contemporary rather than the historical and will set the philosophy for the students’ approach to the entire Global Studies Certificate curriculum, both core and emphasis-area courses.

Humanities

CIP 202 Introduction to Global Studies: Experiential Learning
HU
Hours 3
The increasing interconnectedness among people around the world is indisputable. As a society, we are increasingly aware of the way trends and processes reach beyond the confines of local, regional, and national boundaries. At UA’s Capstone International Center, we know that a 21st century citizen is certain to live a life that includes a variety of encounters with other cultures. It is our hope that you will take advantage of the many opportunities UA offers for intercultural engagement. And, this course has been designed to be one of those opportunities.
Prerequisite(s): None

Humanities

CIP 401 Out-Going Internation Exchange
Hours 12
No description available

CIP 402 Abroad Experience
Hours 0
Non-credit Abroad Experience.

CIP 403 Out-Going Internation Exchange
Hours 12
No description available

CIP 405 Out-Going Internation Exchange
Hours 12
No description available

CIP 413 Cip Out-Going Enrollment
Hours 3-18
CIP out-going independent/direct enrollment, Study abroad student, graduate or undergraduate, in-state or out-of-state student.

CIP 420 UA Semester in London
Hours 12-16
UA semester in London program run through New College and Capstone International Academic Programs. Students live on the University of Roehampton campus and earn 12-16 credit hours.

CJ 100 Intro Criminal Justice
SB
Hours 3
An overview of the criminal justice system with emphasis on the roles and problems of law enforcement, courts, and correctional components. CJ 100 is a prerequisite for all 300- and 400-level criminal justice courses.

Social and Behavioral Sciences

CJ 220 Law Enforcement
Hours 3
Development of law enforcement; organization and jurisdiction of local, state, and federal law enforcement agencies; and functions of police officers.

CJ 221 Private Security
Hours 3
Organization and management of the security function in industry, business, and government. Exploration of methods to protect personnel, facilities, and other major assets: loss prevention, control, and risk management.

CJ 223 Homeland Security
Hours 3
The course will offer an overview of the United States Department of Homeland Security from its initiation to present day, and the wide range of issues that the department influences, both policy and operational. Additionally, how the United States Department of Homeland Security interacts with state, local, and tribal governments, or law enforcement agencies.

CJ 225 Community Based Corrections
Hours 3
A general overview and introduction to the complex world of Community Based Corrections offering a history and development of punishment and implementation of alternative sanctions.
CJ230 Social Inequality in the Criminal Justice System  
Hours 3  
This course examines issues related to the oppression of people on the basis of their class, race, sex, gender, gender expression, ethnicity, sexual orientation, and physical or mental ability within the criminal justice system. It is designed to introduce the student to a range of issues of oppression and social and economic injustice pertinent to the field of criminology and how that affects offenders and others who interact with the criminal justice system.

CJ240 Juvenile Delinquency  
Hours 3  
Extent and patterns of delinquency; its development in individuals and gangs; group therapy with delinquents; and juvenile courts, training schools, probation, and aftercare supervision.

CJ250 Judicial Process  
Hours 3  
A general overview of U.S. judicial systems, including recent innovations and future trends.

CJ270 Corrections  
Hours 3  

CJ280 Research Methods  
Hours 3  
Theoretical and specific instruction in both the conduct and application of research methods in criminal justice settings. Includes problem of research and policy dimensions of both direct and applied approaches.
Prerequisite(s): CJ 100

CJ290 Special Topics in Criminal Justice  
Hours 3  
Examination of selected problems and issues in Criminal Justice. A maximum of six hours may be used toward the major.

CJ300 Survey Criminal Theories  
Hours 3  
Study of traditional and modern explanations of crime and criminality.
Prerequisite(s): CJ 100

CJ303 Race, Ethnicity, and Crime  
W  
Hours 3  
Study of the role played by racial minorities at each stage of the criminal justice system. Special attention is devoted to theories and measurement of minority crimes and race relations and to the treatment of minorities by law enforcement officers, courts, and corrections.
Prerequisite(s): CJ 100
Writing

CJ304 Gender and Crime  
W  
Hours 3  
This course discusses and analyzes the differential experiences of women in the criminal justice system, focusing mostly on women offenders and victims, but also on hegemonic masculinity's effect on crime. Special attention is given to feminist theoretical explanations of women's experiences in the criminal justice system. Writing proficiency within this discipline is required for a passing grade.
Prerequisite(s): CJ 100
Writing

CJ306 History of Crime and Justice  
W  
Hours 3  
Examination in historical sequence of the perspectives on and methods of crime control, from the traditional to the modern. Writing proficiency within this discipline is required for a passing grade in this course.
Prerequisite(s): CJ 100
Writing

CJ330 Organization and Management Concepts in Criminal Justice  
Hours 3  
Formal organization theory and personnel administration, with emphasis on law enforcement agencies.
Prerequisite(s): CJ 100

CJ381 Statistics  
Hours 3  
Statistical methods in criminal justice, including central tendency and dispersion, tests of significance, and measures of association.
Prerequisite(s): CJ 100, and MATH 110 or MATH 112 or MATH 115 or MATH 125

CJ395 Internship  
Hours 1-12  
An opportunity for students to conduct career exploration and build a record of experience in the field.
Prerequisite(s): CJ 100 ***A maximum of 6 hours can be used toward the major.

CJ408 Gendered Justice and the Death Penalty  
Hours 3  
This course is designed to introduce the student to gender and justice issues related to women sentenced to death. Using a series of field trips, guest speakers, videos, and case study analyses will explore the historical, social, political, and legal issues of serving time in female prisons. Special emphasis will be placed on female offenders who have been sentenced to death and those sentenced to life without parole. Also, gendered-related issues comparing the incarceration experiences of female death row inmates to the incarceration experiences of male death row inmates will be examined.
CJ409 Women, Law, and Incarceration
Hours 3
The course examines the various issues that confront women who are incarcerated in state correctional institutions. Additionally, legal issues surrounding women’s pathways to crime and their incarceration experiences will be explored.
Prerequisite(s): CJ 100

CJ420 Seminar In Law Enforcement
Hours 3
Examines the philosophical basis of law enforcement and traces the development of the law enforcement function.
Prerequisite(s): CJ 220

CJ421 Forensic Science
Hours 3
This course provides student with instruction in the fundamentals of criminal investigation from a forensic science perspective.
Prerequisite(s): CJ 100

CJ422 Terrorism
Hours 3
An analysis of selected areas of terrorism and counter-terrorism, with an emphasis on parallels between terrorism and crime.
Prerequisite(s): CJ 100

CJ424 Hate Crimes
Hours 3
Adopting a multidisciplinary perspective, this course is designed to survey and critically evaluate various roots and consequences of, as well as contemporary issues involving, hate crimes. Topics are designed to expose the learner to various domains, facilitating a holistic perspective of hate crimes, as reflected by an integration of social science theory, empirical research, and criminal justice and legal practice.
Prerequisite(s): CJ 100

CJ425 Domestic Violence
Hours 3
The course examines violence in the context of domestic situations. The types and causes of acts of domestic violence are explored in historical and contemporary context. Various intervention strategies and preventive measures are examined.
Prerequisite(s): CJ 100

CJ426 White Collar Crime
Hours 3
This course provides a discussion of white-collar crime for the standpoint of criminological theory as well as criminal justice system policies, laws, and procedures.
Prerequisite(s): CJ 100

CJ430 Drugs, Crime, and Policy
Hours 3
This course examines the current state of drug use, abuse, and trafficking in the United States and throughout the world. It critically examines drug-related topics, such as the history of drug use, patterns associated with drug trafficking organizations and drug-related markets, and both domestic and international drug-related policies.
Prerequisite(s): CJ 100

CJ435 Global Perspectives on Crime and Justice
Hours 3
This course examines the variety of ways that criminal justice systems are organized and implemented around the world. Many times practitioners fail to recognize other approaches or points of focus that could improve the decision making process in particular and benefit the academic field in general. The social, cultural, and political background of different systems of justice will be introduced and discussed for an in-depth understanding.
Prerequisite(s): CJ 100

CJ440 Seminar in Juvenile Delinquency
Hours 3
This course examines the problem of juvenile delinquency, exploring the kinds of criminal and delinquent behavior that young people engage in, the various ways academics and professionals have understood and explained such delinquent behavior, and the key institutional responses to the problem. To do this, we will draw on a variety of sources, including archival materials, historical accounts, case law, quantitative studies, ethnographic accounts, journalistic accounts, sociological, psychological, and criminological theories of delinquent behavior, and more. We will pay particular attention to some of the controversies in the fields concerned with juvenile delinquency, as well as some of the central dilemmas faced by professionals who work with delinquents.
Prerequisite(s): CJ 100 CJ 240

CJ450 Seminar In Judicial Process
Hours 3
Examines the philosophical basis of the American legal system and traces the development of the judicial process.
Prerequisite(s): CJ 250

CJ460 Criminal Law I
Hours 3
Classification and analysis of selected areas of the substantive law of crimes, including basic principles of criminal law and crimes against the person and property.
Prerequisite(s): CJ 100

CJ461 Criminal Law II
Hours 3
General principles and theories of criminal procedure, including concepts of due process, arrest, search and seizure, wiretapping, lineups, and other recent developments.
Prerequisite(s): CJ 100
CL300 History of the Early Church
Hours 3
This course covers the main events, processes, figures and texts in the history of Christianity in Late Antiquity and the Middle Ages. The course begins with the introduction in which we will discuss the historical, social, and intellectual factors that influenced the development of early Christianity, its cultural connections with Judaism and Hellenism, and the appearance of the formative texts of Christianity. The subsequent lectures will be organized chronologically. The course also pays its due attention to the Byzantine Church and Eastern Christian traditions (Syriac, Coptic, Georgian, Armenian, Slavic, Arabic).
Prerequisite(s): None

CL323 Alexander the Great, Then & Now
Hours 3
We will study the journey and conquests of Alexander the Great as a historical and cultural event. His expedition took him from Greece, through the countries of the Middle and Near East, all the way to India. Many Western leaders (including Americans) have tried to repeat Alexander’s achievement with limited success. Our exploration will look at the reasons of subsequent failures, among other issues.

CL333 Greek Civilization: Myth, History, Culture
HU
Hours 3-6
Greece is in a particularly strategic spot, at the crossroads between East and West, North and South, controlling the passages from Europe to Asia and from the Black Sea to the Mediterranean. A variety of cultures have crossed paths in Greece throughout its long history— from Egyptian, Minoan, and Roman to Byzantine, Christian, Muslim, Ottoman, and Jewish, have all left there their cultural marks. On the other hand, a variety of conquerors have attempted to control, subdue or obliterate the Greeks and Greek culture, yet have come and gone, while Greece and the Greeks are still there, having inhabited their land continuously for the past 4.5 millennia. In the course of time, the Greeks have developed a civilization with tremendous inventions, discoveries and advancements that changed the world and gave the West its identity. The Greeks do not claim to have invented the wheel, but to have used it in order to give the world theater, history, medicine, philosophy, the Golden Mean, geometry, levers and pulley systems, the first analog computers and, above all, democracy. This course, therefore, taught in Greece, takes place at the most significant historical sites throughout the country. Instruction includes various three elements: (i) Students learn about the myths and legends associated with each site and study the geographical features of the area that gave rise to them; (ii) visit the archeological site and are introduced to the history of the area from the Archaic Period to the Modern Era, following the trail of material remains both at the site and the museum; and (iii) study the elements of the modern culture that derive from antiquity, uncovering the continuity of Greek civilization. In this way, students get an overview of Greek history and culture from prehistory to modernity, which brings to life not only myths and legends but also historic events that shaped Western civilization.
Prerequisite(s): None

Prerequisite(s) with concurrency: Students must enroll in CL 380-800 for 6 credit hours.

CL222 Greek Roman Mythology
HU
Hours 3
Introduction to classical mythology itself and the principal Greek and Roman myths. Offered each semester.

Humanities

CL234 Medical Terminology
HU
Hours 3
This course studies the Greek and Latin roots of medical terms, though knowing Greek or Latin is not a necessity. Students learn the meaning of a number of roots and, subsequently, become able to break down any medical term into its essential components (prefixes, suffixes and combining forms) and understand its meaning. Students also become able to relate any term to the body systems and understand how the biological nomenclature works. This course does not teach the medical practices described by the medical terms, but focuses on expanding student vocabulary not only in the medical field but also in related areas, as we learn derivatives used in other circumstances as well; an educated person is expected to be able to understand the medical language and communicate with his or her health providers. What makes this course invaluable is that the vocabulary students learn is often encountered on standardized tests such as GRE and MCAT.

Prerequisite(s): None

Humanities
CL350 Roman Religion

W

Hours 3

Survey of the rites and structure of ancient Roman cult with special emphasis on the Roman religious calendar and the clash between paganism and Christianity. Writing proficiency within this discipline is required for a passing grade in this course.

Writing

CL365 Greece & Rome in Film

Hours 3

This course integrates literature, history, and film. Many of the films we watch attempt to reconstruct the ancient world to some degree of accuracy, while others are inspired by themes of ancient literature, but without regard to historic authenticity. Students read several primary sources to help them discern inauthentic elements or appreciate good interpretations in film.

CL380 Special Topics

Hours 3-6

Detailed investigations of specific aspects of Greco-Roman civilization such as ancient drama, women's lives, ancient religion, and technological achievements.

CL384 Ancient Egypt Near East

Hours 3

Introduction to Egypt's ancient history (from the pyramids to the Ptolemies), with emphasis on the civilization's contributions to Western heritage.

CL385 History Of Greece

Hours 3

This course surveys the history of Rome from its founding to its fall, beginning with the first settlements in what would later be the city center of Rome ca. 1000 BC, and ending with the collapse of the Empire in the West in AD 476.

CL386 History Of Rome

Hours 3

Introduction to the ancient history of Rome, with emphasis on the Republic from its Etruscan beginnings to the Second Punic War, and on the golden age of Caesar Augustus at the beginning of the Roman Empire.

CRL101 Elementary Critical Language I

Hours 1-6

This course is for students studying any beginning level of less commonly taught languages offered by the Critical Languages Center or abroad, and repeatable for credit with different languages. Supervised self-study system applied.

CRL102 Elem. Critical Language II

Hours 1-6

This course is equivalent to the second semester level of less commonly taught languages at the Critical Language Center or abroad, and repeatable with different languages. Supervised self-study system applied.

CRL201 Int. Critical Language I

Hours 1-6

This course is equivalent to the third semester level of a less commonly taught language at the Critical Languages Center or abroad, and repeatable for credit with different less commonly taught languages. Supervised self-study system applied.

CRL202 Int. Critical Languages II

Hours 1-6

This course is equivalent to the fourth semester level of less commonly taught languages at the Critical Languages Center or abroad, and repeatable for credit with different less commonly taught languages.

CRL301 3rd Year Critical Lang. I

Hours 1-6

This course is for students who have completed four semesters of a less commonly taught language and wish to pursue a higher level of language proficiency. Language proficiency must be evaluated as adequate for this level by the Critical Languages Center, and the consent of the CLC director is required.

Prerequisite(s): Permission of Instructor Required

CRL302 3rd Year Critical Lang. II

Hours 1-6

This course is a continuation of CRL 301, and for students wish to pursue a higher level of language proficiency. Language proficiency must be evaluated as adequate for this level by the Critical Languages Center before enrolling, and the consent of the CLC director is required.

Prerequisite(s): Permission of Instructor Required

CROA101 Elem Croatian Language

Hours 3

Contemporary Croatian: speaking, reading, and writing. Course involves directed-self-instructional approach in the Critical Languages Center. Students are required to study the textbook and practice with assigned audio visual materials (CDs, DVDs, or computer files). Students have practice sessions three hours per week with a “language trainer” who is a native/near native (or superior level) speaker of the language. Native speakers of this language cannot take this course. Any students with background knowledge of this language must see the CLC director before registering for permission. Not repeatable without permission of the CLC director. Offered each semester.

CROA102 Elem Croatian Language

Hours 3

Contemporary Croatian: speaking, reading, and writing. Course involves directed-self-instructional approach in the Critical Languages Center. Students are required to study the textbook and practice with assigned audio visual materials (CDs, DVDs, or computer files). Students have practice sessions three hours per week with a “language trainer” who is a native/near native speaker of the language. Not repeatable without permission of the CLC director. Offered each semester.
DN105 Freshman Seminar for Dance Majors
Hours 1
This course is open to first-year UA Dance majors and is designed to help students navigate college and introduce them to the field of dance as they progress through the major. The course provides an introduction to the UA dance faculty and their various specialties along with various topics related to the study of dance. It additionally includes information about resources and services at UA.

DN110 Intro To Dance Styles
Hours 2
Introduction to ballet, modern, and jazz dance through theory and practice at the beginning level.

DN121 Ballet Technique I-A
Hours 3
A studio course in classical ballet for first year dance majors or musical theatre majors.

DN122 Ballet Technique I-B
Hours 3
The development of theory and practice of classical ballet for first year dance majors or students with some previous experience in ballet.

DN142 World Dance
Hours 2
An introduction to dance movement as influenced by various cultures.

DN200 Special Topics
Hours 3
Investigation of dance theories and principles.

DN210 Dance Styles II
Hours 3
This course will include study of various dance styles at the intermediate level in order to prepare the musical theatre student for more advanced study. Students will be taught dance combinations from musical theatre repertoire in order to enhance technical skills while preparing for performance. The history and development of musical theatre dance will also be explored. Musical Theatre majors only or permission of the instructor.

DN211 Modern Dance II-A
Hours 3
A studio course in modern dance techniques at the intermediate level. Dance majors only.

DN212 Modern Dance II-B
Hours 3
A studio course in modern dance technique at the advanced intermediate level. Dance majors only.

DN221 Ballet Technique II-A
Hours 3
Development of classical ballet technique, and performance quality at the intermediate level for dance majors. Dance majors only.

DN222 Ballet Technique II-B
Hours 3
Development of the classical theory and practice of ballet, at the advanced intermediate level. Dance majors only.

DN251 Jazz Technique II-A
Hours 3
A studio course in jazz dance technique at the intermediate level. Dance majors only.

DN252 Jazz Technique II-B
Hours 3
A studio course in jazz dance technique at a more advanced intermediate level. Dance majors only.

DN255 Beginning Tap Dance
Hours 3
A course designed to introduce tap dance language and style while immersing the beginning/intermediate student in the execution of proper tap dance technique and performance. Warm-up and across the floor exercises as well as various combinations will be taught.
Prerequisite(s): Entrance into the Musical Theatre program or permission of instructor.

DN290 Dance Practicum
Hours 1
This course provides for participation in departmental dance productions in the form of working on dance shows in a capacity other than performing.

DN300 Special Topics
Hours 1-3
Study of dance theories and principles for performance, choreography or pedagogy. Permission of instructor.

DN301 Special Topics II
Hours 1-3
This course will focus on one area of dance such as technique, repertoire, composition or pedagogy in order to facilitate a more advanced analysis of that specific area.

DN305 Choreography & Performance Workshop 1
Hours 1-3
Choreography and Performance Workshop allows students to apply their knowledge of choreographic and performance practice in a faculty-mentored environment.

DN306 Choreography & Performance Workshop 2
Hours 1-3
Choreography and Performance workshop allows students to apply their knowledge of choreographic and performance practice in a faculty-mentored environment.

DN310 Dance Styles III
Hours 3
Continued exploration of musical theatre dance technique and style at a more advanced level. Students will learn movement covering a wide range of musical theatre eras and styles, with a focus on learning material quickly. For Musical Theatre majors. May be repeated for a maximum of 6 hours.
Prerequisite(s): DN 210
DN311 Modern Dance Technique III-A  
Hours 3  
Development of modern dance technique at the advanced level. Dance Majors or permission of instructor.  
Prerequisite(s): DN 211 or DN 212

DN312 Modern Dance Technique III-B  
Hours 3  
Continued development of advanced modern dance technique. Dance Majors or permission of instructor.  
Prerequisite(s): DN 211 or DN 212

DN321 Ballet Technique III-A  
Hours 3  
Development of ballet technique at the advanced level. Includes ladies' pointe work and men's technique.  
Prerequisite(s): DN221 or DN222

DN322 Ballet Technique III-B  
Hours 3  
Continued development of ballet technique at the advanced level. Includes ladies' pointe work and men's technique.  
Prerequisite(s): DN221 or DN222

DN323 Ballet Pointe Technique  
Hours 1-3  
Ballet pointe technique and preparation for classical and contemporary pointe repertoire.  
Prerequisite(s): DN 221 or DN 222

DN351 Jazz Technique III-A  
Hours 3  
Development of jazz dance technique at the advanced level. Dance Majors or permission of instructor.  
Prerequisite(s): DN 251 or DN 252

DN352 Jazz Technique III-B  
Hours 3  
Continued development of jazz dance technique at the advanced level. Dance Majors or permission of instructor.  
Prerequisite(s): DN 251 or DN 252

DN380 Independent Study In Dance  
Hours 3  
No description available

DN381 Indep Study In Dance  
Hours 3  
No description available

DN400 Special Topics  
Hours 3  
Prepare dancers for a professional career in dance performance through the rehearsal process of learning and performing, ballet, modern and jazz dance repertoire.

DN401 Performance Studies I  
Hours 1-3  
Performance skills and practice for dance.

DN402 Performance Studies II  
Hours 1-3  
Additional performance skills and practice for dance.

DN410 Advanced Tap Technique  
Hours 3  
An advanced course focusing on tap dance language and the execution of advanced tap technique.  
Prerequisite(s): DN 210 and DN 310

DN411 Modern Dance Technique IV-A  
Hours 3  
Development of modern dance technique at the advanced level, preparing the student for professional work.  
Prerequisite(s): DN 311 or DN 312

DN412 Modern Dance Technique IV-B  
Hours 3  
Continued development of advanced modern dance technique, preparing the student for professional work.  
Prerequisite(s): DN 311 or DN 312

DN421 Ballet Technique IV-A  
Hours 3  
Advanced ballet technique including study of ballet repertoire in preparation for professional work. For dance majors.  
Prerequisite(s): DN 321 or DN 322

DN422 Ballet Technique IV-B  
Hours 3  
Continued development of advanced ballet technique and repertoire in preparation for professional work. For dance majors.  
Prerequisite(s): DN 321 or DN 322

DN451 Jazz Technique IV-A  
Hours 3  
Development of jazz dance technique at the advanced/pre-professional level. Will focus on elements of technique and style for concert, commercial, and musical theatre jazz.  
Prerequisite(s): DN 351 or DN 352

DN452 Jazz Technique IV-B  
Hours 3  
Continued development of jazz dance technique at the advanced/pre-professional level. Special attention will be given to developing performance qualities.  
Prerequisite(s): DN 351 or DN 352

DNCA240 Choreography I  
Hours 3  
Basic exploration of the rhythmic and spatial elements in the development of movement phrases and choreographic dance studies. Dance Majors only or permission of instructor.
DNCA265 Introduction to Anatomy and Kinesiology For Dance  
Hours 3  
Lecture/studio course covering the basics of the musculoskeletal system and kinesiology with an emphasis on dance. Dance majors only.  

DNCA302 Special Topics in Dance  
Hours 1-3  
This course will investigate the possibilities for synthesizing elements of dance technique and dance academics to facilitate success in the professional dance industry.  

DNCA320 Composition, Movement, and the Camera  
Hours 3  
This is a composition course for the camera with an emphasis on capturing human movement. The course begins with instruction in basic camera and digital editing skills. In a series of studies for the camera that culminate in a final project, students develop a compositional vocabulary, taking into consideration, choreography, sound, and visual composition. Students’ compositional understanding will be expanded by video-viewing, reading, and discussion. Students with an interest in dance, visual art, theatre, experimental filmmaking, and music are encouraged to enroll.  

DNCA340 Choreography II  
Hours 3  
Exploration in more complex choreographic forms and compositions. Dance majors only.  
Prerequisite(s): DNCA 240 or DN 240  

DNCA350 Creative Processes in Dance  
Hours 1-3  
This course explores creative processes in various dance styles. Students will research their chosen subject matter with a public presentation as the culmination of the class. Dance Majors or permission of the instructor only.  
Prerequisite(s): DNCA240  

DNCA351 Creative Processes in Dance: Performance and Promotions  
Hours 1-3  
This course explores creative processes and performance in various dance styles. Students will research their chosen subject matter with a public presentation as the culmination of the class. The class promotes unique staging and performance opportunities by allowing students to develop work to be presented off campus, with the possibility of presentation internationally. Students learn about creating press releases, an on-line presence, and video/photo promos for concert promotions. Classes will involve heavy faculty feedback throughout the semester as students develop work for production.  
Prerequisite(s): DNCA 350 or permission of the instructor  

DNCA403 Approach Dance Instructn  
Hours 3  
This course is a service-learning course developing techniques for teaching movement concepts. This course includes a practicum component teaching dance to elementary students in the public schools. Dance Majors or permission of the instructor.  
Prerequisite(s): DNCA 265 or DN 265  

DNCA420 Dance and the Camera  
Hours 3  
Dance and the Camera will introduce students to the videographic, choreographic, and editing skills involved in making dances for the screen. Students will work both in front of and behind the camera to create studies and final projects. Through lecture, reading, video-viewing and discussions, the class will also explore the history of screendance and its current trends. Dance majors or permission of instructor.  
Prerequisite(s): DNCA 240 Choreography I  

DNCA440 Choreography III  
Hours 3  
A study and practice of choreographic composition at the advanced level including all aspects of production. Offered on demand.  
Prerequisite(s): DNCA 340 or DN 340; and TH 324  

DNCA470 History Of Dance I  
W  
Hours 3  
The history of dance from pre-classic, romantic, classical and early modern ballet. Dance majors only. Writing proficiency within this discipline is required for a passing grade in this course.  
Writing  

DNCA471 History of Dance II  
W  
Hours 3  
The history of dance with an emphasis on 20th century and contemporary dance styles. Writing proficiency within this discipline is required for a passing grade in this course. Dance Majors only.  
Prerequisite(s): DNCA 470  
Writing  

DUT102 Elementary Dutch  
Hours 3  
Contemporary Dutch: speaking, reading, and writing. Course involves directed-self-instructional approach in the Critical Languages Center. Students are required to study the textbook and practice with assigned audio visual materials (CDs, DVDs, or computer files). Students have practice sessions three hours per week with a “language trainer” who is a native/near native/superior-level speaker of the language. Not repeatable without permission of the CLC director.  
Prerequisite(s): DUT 101  

EN101 English Composition  
FC  
Hours 3  
Introduction to college-level expository writing, critical reading, basic citation, and the rhetorical tools needed to participate successfully in the University of Alabama discourse community. Grades are reported as A, B, C, or NC (No Credit). A grade of C- or higher is required as a prerequisite for advancing to another English course at The University of Alabama. Offered each semester and in summer school. EN 101 does not apply as credit to the English major or minor.  
Freshmen Composition
EN102 English Composition
*FC*

Intermediate college-level writing covering the principles of argumentation, advanced critical thinking and analysis, university-level research techniques, and research-paper writing. Grades are reported as A, B, C, or NC (No Credit). A grade of C- or higher is required as a prerequisite for advancing to another English course at The University of Alabama. Offered each semester and in summer school. EN 102 does not apply as credit to the English major or minor. Prerequisite(s): EN 101.

Prerequisite(s): EN 101
Freshmen Composition

EN103 Advanced English Composition
*FC, UH*

Hours 3

This is an accelerated freshman composition course that is open to students with minimum scores of 28 ACT Composite or 1350 SAT, or minimum ACT English scores of 30 or SAT verbal scores of 730. With the appropriate qualifying scores and the completion of EN 103 with a grade of C- or higher, placement credit is awarded for EN 101 and the general education requirement for freshman composition is completed. Covers argumentation, advanced critical thinking and analysis, university-level research techniques, and research-paper writing. Course themes are determined by each instructor. Grades are reported as A, B, C, or NC (No Credit). A grade of C- is required as a prerequisite for advancing to another English course at The University of Alabama. EN 103 does not apply as credit to the English major or minor.

Prerequisite(s): 28 ACT composite or 1350 SAT OR ACT English score of 30 or SAT verbal score of 730
Freshmen Composition, University Honors

EN104 English Composition BUI
*FC, UH*

Hours 3

For students in Blount Undergraduate Initiative. Covers argumentation, advanced critical thinking and analysis, university-level research techniques, and research-paper writing. Grades are reported as “A,” “B,” “C,” or “NC” (“No Credit”). This course substitutes for either EN 103 Advanced Composition or EN 101 Freshman Composition I. Students who qualify for EN 103 (see EN 103 description above) are awarded an additional 3 hours of composition placement credit with a grade of “pass” upon successful completion of EN 104. Other students receive the same credit if they earn a grade of “A-” or higher. Students who earn a grade lower than “A-” are required to take three additional hours of freshman composition, generally EN 102. Students who have credit for EN 101 and EN 102 either from another institution or through AP or IB placement do not take EN 104. EN 104 does not apply as credit to the English major or minor.

Freshmen Composition, University Honors

EN120 English Comp I Non-Native Spkr
*FC*

Hours 3

The first in a two-course sequence, EN 120 introduces non-native English speakers to college-level expository writing, critical reading, basic citation, and the rhetorical tools needed to participate successfully in the University of Alabama discourse community. Special attention will be paid to the unique linguistic and cultural needs of students whose native language is not English. Offered every semester.

Prerequisite(s): EN 120
Freshmen Composition

EN121 English Comp II Non-Native Spkr
*FC*

Hours 3

The second course in UA's first-year sequence in composition, EN 121 introduces non-native English speakers to the principles of formal argumentation, advanced critical thinking and analysis, university-level research techniques, and research-paper writing. Special attention will be paid to the unique linguistic and cultural needs of students whose native language is not English. Offered each semester.

Prerequisite(s): EN 120
Freshmen Composition

EN155 Freshman Seminar

Hours 3

College-level expository writing, critical reading, basic citation, and the rhetorical tools needed to participate successfully in the University of Alabama discourse community. This course is for students who have credit for EN 101 and are participating in the Women in STEM LLC.

EN200 The Living Writer: Introduction to Creative Writing
*FA*

Hours 3

Introduction to the craft of imaginative writing, the landscape of contemporary literature, and the writer as artist. Students will engage UA's literary arts culture and regularly attend readings and author events.

Prerequisite(s): EN 101 or EN 120
Prerequisite(s) with concurrency: EN 102 or EN 103 or EN 104 or EN 121
Fine Arts

EN201 How English Works
*HU*

Hours 3

This course will introduce students to the wide-ranging discipline of linguistics that incorporates aspects of both the humanities and the social sciences. Students will explore the elements from which languages are composed, examine differences across languages, and see how linguistic data and methods are brought to bear on real-world issues in the realms of psychology, literary studies, sociology, education, and the judicial system. Language will be presented as a constantly changing phenomenon that is embedded in culture and steeped in ideology.

Prerequisite(s): EN 101 and EN 102, or EN 103
Humanities
EN205 English Literature I  
_HU, L_  
Hours 3  
Survey of English literature from the Anglo-Saxon period to 1800, including, Chaucer, Shakespeare, and Milton.  
Prerequisite(s): EN 101 and EN 102; or EN 103; or EN 120 and EN 121  
Humanities, Literature  

EN206 English Literature II  
_HU, L_  
Hours 3  
Survey of English literature from 1800 to the present, including, works from the Romantic, Victorian, and Modern eras.  
Prerequisite(s): EN 101 and EN 102; or EN 103; or EN 120 and EN 121  
Humanities, Literature  

EN207 World Literature I  
_HU, L_  
Hours 3  
Survey of world literature from the Classical period to the Renaissance.  
Prerequisite(s): EN 101 and EN 102; or EN 103; or EN 120 and EN 121  
Humanities, Literature  

EN208 World Literature II  
_HU, L_  
Hours 3  
Survey of world literature from the Enlightenment to the Modern period.  
Prerequisite(s): EN 101 and EN 102; or EN 103; or EN 120 and EN 121  
Humanities, Literature  

EN209 American Literature  
_HU, L_  
Hours 3  
Survey of American literature from its beginnings to 1865, including, work by Poe, Thoreau, Emerson, Melville, and Whitman, among others.  
Prerequisite(s): EN 101 and EN 102; or EN 103; or EN 120 and EN 121  
Humanities, Literature  

EN210 American Literature II  
_HU, L_  
Hours 3  
Survey of American literature from 1865 to the present, including, work by Dickinson, Twain, Hemingway, Faulkner, and Morrison.  
Prerequisite(s): EN 101 and EN 102; or EN 103; or EN 120 and EN 121  
Humanities, Literature  

EN215 Honors English Literature I  
_HU, L, UH_  
Hours 3  
Honors section of EN 205.  
Prerequisite(s): EN 101 and EN 102; or EN 103; or EN 120 and EN 121  
Humanities, Literature, University Honors  

EN216 Honors English Literature II  
_HU, L, UH_  
Hours 3  
Honors section of EN 206.  
Prerequisite(s): EN 101 and EN 102; or EN 103; or EN 120 and EN 121  
Humanities, Literature, University Honors  

EN219 Honors American Literature  
_HU, L, UH_  
Hours 3  
Honors section of EN 209.  
Prerequisite(s): EN 101 and EN 102; or EN 103; or EN 120 and EN 121  
Humanities, Literature, University Honors  

EN220 Honors American Literature II  
_HU, L, UH_  
Hours 3  
Honors section of EN 210.  
Prerequisite(s): EN 101 and EN 102; or EN 103; or EN 120 and EN 121  
Humanities, Literature, University Honors  

EN249 African American Literature I  
_HU, L_  
Hours 3  
Survey of African American literature from its earliest expressions to 1935. The course material includes spirituals, slave narratives, poetry, drama, autobiography, fiction, and nonfiction.  
Prerequisite(s): EN 101 and EN 102; or EN 103; or EN 120 and EN 121  
Humanities, Literature  

EN250 African American Literature II  
_HU, L_  
Hours 3  
Survey of African American literature from 1935 to the present. The course material includes poetry, drama, autobiography, fiction, and nonfiction.  
Prerequisite(s): EN 101 and EN 102; or EN 103; or EN 120 and EN 121  
Humanities, Literature
EN300 Intro To English Studies  
Hours 3  
An introduction for English majors to the methods employed in the discipline of English. Students will be exposed to the fundamental issues of critical reading, interpretation, and writing, especially to the use of critical methods in the study of primary texts. Readings will include a selection of texts in the traditional categories of poetry, drama, and prose, as well as the genre of the critical essay. There may also be investigations into other genres and media.  
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN301 Fiction Tour  
Hours 3  
Study of basic principles of composing creative fiction. Reading and assigned writing experiments in a broad range of forms.  
Prerequisite(s): EN 200

EN303 Poetry Tour  
Hours 3  
Study of basic principles of composing poetry. Reading and assigned writing experiments in a broad range of poetic forms.  
Prerequisite(s): EN 200

EN305 Creative Nonfiction Tour  
Hours 3  
Study of the basic principles of composing creative nonfiction. Reading and assigned writing experiments in a broad range of forms of the genre.  
Prerequisite(s): EN 200

EN307 Special Topics in Applied Creative Writing  
Hours 3  
Study of the basic principles of a variety of practical applications for creative-writing-related skills and techniques, including arts programming and literary publishing.  
Prerequisite(s): EN 200

EN309 Advanced Expository Writing  
W  
Hours 3  
Study and practice in methods of exposition, explanation and explication, logic and persuasion, definition and analogy, analysis and evaluation. Enrollment is limited to 15. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN311 Special Topics In Literature  
Hours 3  
Topics vary from semester to semester and may include courses offered by other departments. May be repeated for a maximum of 9 hours.  
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN313 Writing Across Media  
Hours 3  
Advanced writing course exploring composition with images, sound, video, and other media while considering theoretical perspectives on rhetorical concepts such as authorship, audience, process, revision, and design.  
Prerequisite(s): (EN 101 AND 102) OR EN 103

EN317 Writing Center Practicum  
Hours 3  
An introduction to the history, theory and practice of Writing Centers. Students completing the course can apply for positions on the Writing Center staff.  
Prerequisite(s): None.

EN319 Technical Writing  
W  
Hours 3  
Focuses on principles and practices of technical writing, including audience analysis, organization and planning, information design and style, usability testing, and collaborative writing. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): EN 101 and EN 102; or EN 103; or EN 104; or EN 120 and EN 121

EN320 Intro To Linguistics  
Hours 3  
Introduction to the study of language, including subjects such as language acquisition, variation, and origins. The system of sounds, syntax, and meaning are illustrated in English and other languages.  
Prerequisite for EN 423, EN 424, EN 425, EN 466.  
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN321 Linguis Approach English Gramr  
Hours 3  
A study of English grammar integrating principles from linguistic theory with structural approaches to grammar. The course includes a focus on the expectations of grammatical usage in different contexts and an understanding of how to apply this knowledge in a pedagogical setting. This course is a prerequisite for EN 423, EN 424, EN 425, EN 466.  
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN329 Directed Studies  
Hours 1-3  
Prerequisite: Enrollment only by previous arrangement with a specific instructor and with the permission of the director of undergraduate English studies. A reading list and a draft syllabus are required. Please see the departmental website for more information. EN 329 may be repeated for a maximum of 6 hours.  
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.
EN330 Chaucer And Medieval Literature
Hours 3
Examines works of the Old and Middle English Periods, the formative years of British literature. Works from pre-conquest England may include Beowulf, Bede’s History of the English Church, and poems from the Exeter and Vercelli manuscripts. The major works from the fourteenth and fifteenth centuries may include Sir Gawain and the Green Knight, William Langland’s Piers Plowman, John Gower’s Confessio Amantis, and Chaucer’s Troilus and Criseyde and the Canterbury Tales.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN331 Chaucer
Hours 3
Introduction to the works of Chaucer. This course includes a study of Chaucer’s language as well as the 14th-century milieu.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN332 Sixteenth Century Literature
Hours 3
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN333 Shakespeare
Hours 3
An introduction to Shakespeare’s plays and poems. Elizabethan customs, politics, history, and philosophies are examined in relation to his works.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN334 Seventeenth Century Literature
Hours 3
A cross-genre survey of literature in English from 1603 to 1660. Authors may include John Donne, Ben Jonson, Francis Bacon, John Webster, Lady Mary Wroth, William Bradford, Anne Bradstreet, and Andrew Marvell.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN335 Milton
Hours 3
An introduction to Milton’s English poetry along with the history, politics, aesthetics, philosophy, and theology of seventeenth-century England. Typically devotes approximately half the semester to a close reading of Paradise Lost.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN340 American Literature To 1900
Hours 3
A cross-genre survey of American literature from its beginnings to 1900. Authors may include Mary Rowlandson, Cotton Mather, Phillis Wheatley, Nathaniel Hawthorne, Frederick Douglass, Henry James, and Mark Twain.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN341 American Poetry To 1900
Hours 3
A survey of American poetry from its beginnings to 1900. Authors may include Anne Bradstreet, Edward Taylor, Edgar Allan Poe, Walt Whitman, and Emily Dickinson.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN342 American Fiction To 1900
Hours 3
A survey of the development of American fiction from its beginnings to 1900, with attention to both the novel and the short story. Authors may include James Fenimore Cooper, Nathaniel Hawthorne, Harriet Beecher Stowe, Herman Melville, Mark Twain, and Kate Chopin.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN343 British Fiction To 1900
Hours 3
A survey of developments in British fiction from its beginnings to 1900. Authors may include Aphra Behn, Daniel Defoe, Samuel Richardson, Henry Fielding, Jane Austen, Charles Dickens, and George Eliot.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN344 Major Authors 1660-1900
Hours 3
Limited to a maximum of three authors. Attention to the national literatures of Britain and America, and to different genres of prose, drama, and poetry, will vary from semester to semester. Authors may include John Milton, Alexander Pope, Jane Austen, Ralph Waldo Emerson, Herman Melville, Frederick Douglass, and Emily Dickinson.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN347 English Lit During Enlightenmt
Hours 3
A cross-genre survey of English literature during the period 1660-1800. Authors may include John Locke, John Bunyan, Mary Astell, Jonathan Swift, Lady Mary Wortley Montagu, Samuel Johnson, Hester Thrale, and James Boswell.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN348 Romantic Literature
Hours 3
A cross-genre survey of British Romantic writers such as William Blake, Jane Austen, William Wordsworth, Samuel Taylor Coleridge, Lord Byron, John Keats, Percy Bysshe Shelley, and Mary Shelley.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN349 Victorian Literature
Hours 3
A survey of the genres, authors, and issues in British literature, 1832-1900. Authors may include Thomas Carlyle, Elizabeth Barrett Browning, Robert Browning, Alfred, Lord Tennyson, Matthew Arnold, Dante Gabriel Rossetti, Christina Rossetti, and Oscar Wilde.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.
EN30 Topics in African American Lit
Hours 3
A cross-genre survey of African American literature, historical events, and critical movements. Authors may include Frederick Douglass, Harriet Jacobs, Richard Wright, Zora Neale Hurston, Nella Larson, Langston Hughes, and Toni Morrison.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN360 Topics American Lit 1900-1945
Hours 3
A cross-genre survey of major literary figures, critical movements, historical events, and significant texts within the first half of the twentieth century in America. Authors may include Henry James, Mark Twain, Edith Wharton, W.E.B. Du Bois, Gertrude Stein, Countee Cullen, Eugene O'Neill, and Wallace Stevens.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN361 Top American Lit 1945-Present
Hours 3
A cross-genre survey of major literary figures, critical movements, historical events, and significant texts since the Second World War in America. Authors may include Langston Hughes, Arthur Miller, James Baldwin, Norman Mailer, Toni Morrison, Sam Shepard, Adrienne Rich, and John Ashbery.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN362 Topics British Lit 1900-1945
Hours 3
A cross-genre survey of major literary figures, critical movements, historical events, and significant texts within the first half of the twentieth century in Britain. Authors may include Joseph Conrad, George Bernard Shaw, W. B. Yeats, Virginia Woolf, James Joyce, Katherine Mansfield, and T. S. Eliot.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN363 Top British Lit 1945-Present
Hours 3
A cross-genre survey of major literary figures, critical movements, historical events, and significant texts since the Second World War in England. Authors may include Samuel Beckett, W. H. Auden, Doris Lessing, Seamus Heaney, Harold Pinter, and Jeanette Winterson.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN364 Modern Drama
Hours 3
A survey of the major American, British, European and African plays from the 19th and 20th centuries. Authors may include Eugene O'Neill, Tennessee Williams, Ntozake Shange, Oscar Wilde, Harold Pinter, Tom Stoppard, August Strindberg, Anton Chekhov, Wole Soyinka and Athol Fugard.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN365 Modern American Fiction
Hours 3
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN366 Twentieth Century Poetry
Hours 3
A survey of major authors and trends in modern poetry in America, Britain, and the larger Anglophone world, as poetry in English became an international phenomenon. Attention will be paid to modernist and post-modernist poetry movements, American regionalisms, war poetry, and the poetry of neocolonial experiences.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN367 Postcolonial and Global Anglophone Literature
Hours 3
A cross-genre survey of the literature of Africa, Asia, and the Caribbean. Authors may include Olaudah Equiano, Rabindranath Tagore, Chinua Achebe, Tsitsi Dangarembga, Chimamanda Ngozi Adichie, Ngugi wa Thiong’o, Aminatta Forna, Derek Walcott, V.S. Naipaul, Amitav Ghosh, J.M Coetzee, Bessie Head, Anita Desai, and Arundhati Roy.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN370 Comedy
Hours 3
A cross-genre survey of comic literature that may begin with the classical ideas of comedy and proceed through the present. This course, like comedy itself, will focus on individuals as they come to accept the idea that life can truly be a feast (Greek, Comos). This course considers changing conceptions of comedy whether in fiction, poetry, or drama.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN371 Tragedy
Hours 3
A cross-genre survey of tragic literature that may begin with the classical tragedians and proceed through the present. This course, like tragedy itself, will focus on the individual confronting the larger forces of society, god, or fate. This course considers changing conceptions of the tragic whether in fiction, poetry, or drama.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN373 Women In Literature
Hours 3
A survey of British and American literature written by and/or about women. Authors may include a cross-genre range from Anne Bradstreet and Fanny Burney to Toni Morrison and Louise Erdrich.
Prerequisite(s): 12 hours in English, including 6 hours at the 200-level.

EN399 Honors Seminar in English
UH
Hours 3
Covers selected topics in English that vary from year to year. Topics are most likely to be thematic and to cut across conventional divisions of literary period and literary form. Required for departmental honors.
Prerequisite(s): EN 215 or EN 216 or EN 219 or EN 220
University Honors

EN400 Senior Seminar
Hours 3
Senior Seminar.
Prerequisite(s): 18 hours in English, including 6 hours at the 200-level, and 6 hours at the 300-level.
EN408 Advanced Creative Writing
Hours 3
Special topics in imaginative writing. Focus may be on poetry, fiction, nonfiction or a combination. Students produce imaginative writing and read related texts. May be repeated for a maximum of 12 hours.
Prerequisite(s): EN 200, and two of the following: EN 301, EN 303, EN 305, EN 307, EN 313, EN 317. At least one of the two 300-level prerequisites must be EN 301, EN 303, or EN 305.

EN411 Adv Stdy Comptv Multi-Cutl Lit
W
Hours 3
Designed for advanced English majors, a special topics course that focuses on issues involving comparative literatures and/or cultural studies. Writing proficiency within this discipline is required for a passing grade in this course. EN 411 may be repeated for a maximum of 9 hours.
Prerequisite(s): 18 hours in English, including 6 hours at the 200-level, and 6 hours at the 300-level.
Writing

EN422 Adv Studies Americ Literature
W
Hours 3
Designed for advanced English majors, a special topics course that focuses on issues in American literature. Writing proficiency within this discipline is required for a passing grade in this course. EN 422 may be repeated for a maximum of 9 hours.
Prerequisite(s): 18 hours in English, including 6 hours at the 200-level, and 6 hours at the 300-level.
Writing

EN423 History of the English Language
Hours 3
An introduction to the external history of the English language along with the study of the accompanying internal changes in structure.
Prerequisite(s): EN 320 OR EN 321 OR ANT 210 OR ANT 401 OR ANT 450 OR FR 361 OR IT 361 OR SP 361

EN424 Structure Of English
Hours 3
Advanced study of the structure and usage of the English language, focusing on issues of morphology, syntax, and discourse context. Offered each fall semester.
Prerequisite(s): EN 320 OR EN 321 OR ANT 210 OR ANT 401 OR ANT 450 OR FR 361 OR IT 361 OR SP 361

EN425 Variation in American English
Hours 3
The study of the experience of the English language in America with particular emphasis on its development and dialects.
Prerequisite(s): EN 320 OR EN 321 OR ANT 210 OR ANT 401 OR ANT 450 OR FR 361 OR IT 361 OR SP 361

EN429 Directed Readings
Hours 3
Prerequisite: Enrollment only by previous arrangement with a specific instructor and with the permission of the director of undergraduate English studies. EN 429 may be repeated for a maximum of 6 hours.

EN430 English Internship
Hours 3-6
An on- or off-campus training position in which students use the skills they have gained as English majors and enhance their employment opportunities after graduation. Interns work approximately 10 hours a week, holding responsible positions with, among others, Alabama Heritage, Alabama Alumni Magazine, and the Tuscaloosa Public Defender's Office. Apply to the director of undergraduate studies in the Department of English. Please see the departmental website for the application form and further details. May be repeated for a maximum of 6 hours.
Prerequisite(s): 18 hours in English, including 6 hours at the 200-level, and 6 hours at the 300-level.

EN433 Advanced Studies British Lit
W
Hours 3
Designed for advanced English majors, a special topics course that focuses on issues in British literature. Writing proficiency within this discipline is required for a passing grade in this course. EN 433 can be repeated for a maximum of 9 hours.
Prerequisite(s): 18 hours in English, including 6 hours at the 200-level, and 6 hours at the 300-level.
Writing

EN444 Adv Stdy Literary Crit/Theory
W
Hours 3
Designed for advanced English majors, a special topics course that focuses on issues involving literary criticism and critical theory. Writing proficiency within this discipline is required for a passing grade in this course. This course may be repeated for a maximum of 9 hours.
Prerequisite(s): 18 hours in English, including 6 hours at the 200-level, and 6 hours at the 300-level.
Writing

EN455 Advanced Studies In Writing
W
Hours 3
Designed for advanced English majors, a special topics course that focuses on the process of writing. The forms this writing may take include, but are not limited to, film, creative non-fiction, autobiography, and local color. May be repeated a maximum of 9 hours. Writing proficiency within this discipline is required for a passing grade in this course.
Writing
EN456 Writing Center Theory and Research  
Hours 3  
This course augments the professional practice of Writing Center staff with assigned readings, writing assignments, and discussions. Theory and research intensive.  
Prerequisite(s): None.

EN466 Advanced Studies In Linguistics  
W  
Hours 3  
Designed for English majors, a special topics course that focuses on issues in linguistics. A frequent topic is language and culture. This course may be repeated for a maximum of 9 hours.  
Prerequisite(s): EN 320 OR EN 321 OR ANT 210 OR ANT 401 OR ANT 450 OR FR 361 OR IT 361 OR SP 361  
Writing

EN477 Adv Studies Literary Genres  
W  
Hours 3  
Designed for advanced English majors, a special topics course that focuses on issues in genre criticism. Writing proficiency within this discipline is required for a passing grade in this course. This course may be repeated for a maximum of 9 hours.  
Prerequisite(s): 18 hours in English, including 6 hours at the 200-level, and 6 hours at the 300-level.  
Writing

EN488 Adv Stdy African American Lit  
W  
Hours 3  
Designed for the advanced English major, a special topics course that focuses on issues in African American literature. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): 18 hours in English, including 6 hours at the 200-level, and 6 hours at the 300-level.  
Writing

EN499 Honors Thesis  
UH, W  
Hours 3  
The Honors Thesis in English course is an individualized, directed readings class that culminates in a 30-50 pp. thesis. It is the final required course for the Honors in English program. Each student enrolled will work individually with a faculty mentor.  
Prerequisite(s): EN 399  
University Honors, Writing

FA200 Introductn To Fine Arts  
FA  
Hours 3  
An introduction to the fine arts, drawing especially on campus and community cultural events. This course is usually open to incoming freshmen.  
Fine Arts

FR101 Elementary French I  
FL, HU  
Hours 4  
For students who have never studied French; or with one year of high school French; or with one or more years of elementary or middle school French. This course focuses on fundamental spoken and written communication in French while developing knowledge of cultural topics relating to contemporary French and French-speaking countries. Offered each semester.  
Foreign Language, Humanities

FR102 Elementary French II  
FL, HU  
Hours 4  
Continuation of FR 101. This course focuses on further advancing intercultural communicative abilities through explorations of cultural topics relating to contemporary French and French-speaking countries. Offered each semester.  
Prerequisite(s): Minimum Grade of C- or higher in FR 101 at UA; or equivalent from another institution; or two years of high school French.  
Foreign Language, Humanities

FR201 Intermediate French  
HU  
Hours 3  
This course cultivate global competence by consolidating and expanding linguistic knowledge within a culturally rich context.  
Prerequisite(s): Minimum grade of C- or higher in FR 102; or equivalent from another institution; or 3 years of high school French with a B+ average in French or higher; or 4 years of high school French with a B average in French or lower; or a 3 on the AP French Language exam.  
Humanities

FR202 Intermediate French  
HU  
Hours 3  
Continuation of FR 201. This course reviews and refines linguistics knowledge to prepare students for advanced courses through research projects and creative writing activities.  
Prerequisite(s): Minimum grade of C- or higher in FR 201; or equivalent from another institution; or 4 + years of French with a B+ average in French or higher; or a 4 on the AP French Language exam.  
Humanities
FR205 Living In French House
Hours 1-2
Students live in the French House with a native (or near native) speaker and agree to dedicate two hours per week to full language immersion with a view to increasing oral proficiency.
Prerequisite(s): FR 201, or 202, or 206, or 321, or 322, or 323, or 324, or 328, or 329

FR206 Living In French House
Hours 1-2
Students live in the French House with a native (or near native) speaker and agree to dedicate two hours per week to full language immersion with a view to increasing oral proficiency.
Prerequisite(s): FR 201, or 202, or 205, or 321, or 322, or 323, or 324, or 328, or 329

FR206 Living In French House
Hours 1-2
Students live in the French House with a native (or near native) speaker and agree to dedicate two hours per week to full language immersion with a view to increasing oral proficiency.
Prerequisite(s): FR 201, or 202, or 205, or 321, or 322, or 323, or 324, or 328, or 329

FR321 Voices In French
W
Hours 3
Introduction to literary and cultural analysis through selected works of French cultural expression. Emphasis on expanding vocabulary and improving grammar in order to develop speaking, reading, and writing proficiency beyond the second year. Writing proficiency within this discipline is required for a passing grade in this course. Usually offered in the fall semester. Study abroad equivalent: FR 328.
Prerequisite(s): FR 202
Writing

FR322 Advanced French Grammar
Hours 3
Review of French grammar with emphasis on written exercises. Study abroad equivalent: FR 329. Usually offered in the fall semester.
Prerequisite(s): FR 202

FR323 Text, Image, And Word
W
Hours 3
Contemporary French and Francophone society and culture. Continued work in literary and cultural analysis through selected works of recent cultural media (journalism, literature, music, film). Emphasis on written exposition, oral proficiency, critical thinking, grammar review. Writing proficiency within this discipline is required for a passing grade in this course. Usually offered in the spring semester. Study abroad equivalent: FR 328.
Prerequisite(s): FR 202
Writing

FR324 Commercial French
Hours 3
Introduction to basic business language and vocabulary, business protocol and culture in French-speaking countries.
Prerequisite(s): FR 321 or FR 322 or FR 323 or by permission of the instructor or by placement exam

FR325 Cultures and Conversations
FL
Hours 3
This course is designed to advance students' proficiency in spoken and conversational French while exploring French and Francophone cultures. Improves ability to function in the interpersonal, interpretive, and presentational modes of communication. Topics at the discretion of the instructor teaching the course.
Prerequisite(s): Score of 5 on the AP French Exam
Prerequisite(s) with concurrency: FR 202; or equivalent from another institution
Foreign Language

FR328 French Conversation-Abroad
Hours 3
Contemporary French society and culture. Direct on-site cultural exposure. Analysis of recent cultural media (e.g., journalism, literature, song, film) in context. Emphasis is on written exposition, oral proficiency, grammar review, and critical appraisal in relation to an immersion experience in French culture. Offered in France. For purposes of satisfying the requirements of the French major or minor, this course can be used in lieu of either FR 321 or FR 323.

FR329 Adv Fr Grammar-Abroad
Hours 3
No description available

FR331 French Civilization
Hours 3
The course is also taught abroad as FR 339. Study of French artistic heritage and development of social and political institutions. Offered alternate fall semesters.
Prerequisite(s): FR 321 or FR 322 or FR 323

FR339 French Civilization-Abroad
Hours 3
No description available

FR341 Survey Fr Literature I
L, W
Hours 3
French literature from its origins through the 18th century. Readings from major authors, lectures, and reports. Writing proficiency within this discipline is required for a passing grade in this course. Offered fall semesters.
Prerequisite(s): FR 321 or FR 322 or FR 323
Literature, Writing
FR351 Survey Fr Literature II
W
Hours 3
French literature of the 19th and 20th centuries. Readings from major authors, lectures, and reports. Writing proficiency within this discipline is required for a passing grade in this course. Offered spring semesters.
Prerequisite(s): FR 321 OR FR 322 OR FR 323
Writing
FR361 Intro Romance Linguistic (Same as IT 361 and SP 361)
Hours 3
Introduction to linguistic science and its use in describing language in general and the Romance languages in particular.
FR380 Special Topics
Hours 1-3
Directed reading, research, or French Immersion Retreat. Also offered within the curriculum for the Alabama-in-France summer program. Topic to be determined in consultation with the instructor or program director.
FR421 Pronunciation & Phonetics
Hours 3
Introduction to phonetic theory and corrective phonetics through auditory discrimination exercises and contrastive analysis; emphasis on mastery of oral skills. Offered each semester.
Prerequisite(s): FR 321 or FR 322 or FR 323
FR424 Globalization, Business and Marketing
FL, HU
Hours 3
This course prepares students to manage the intricacies posed by cultural differences when engaging in intercultural communicative marketing practices in French. Refines and expands intercultural communicative competence and cross-cultural problem-solving abilities.
Prerequisite(s): FR 324 or 331
Foreign Language, Humanities
FR431 Contemp French Civiliztn
Hours 3
Exploration of the political, technological, and cultural movements of France from 1871 to the present. Offered alternate fall semesters.
Prerequisite(s): FR 321 OR FR 322 OR FR 323
FR441 Page & Stage
FL, HU, L
Hours 3
Focuses on theater. Analysis and interpretation of theatrical texts with emphasis on student research and presentations, including vocal expression and physical interpretation.
Prerequisite(s): FR 321, 322, or 323
Foreign Language, Humanities, Literature
FR461 French Linguistics
Hours 3
Linguistic theory applied in the analysis and description of French phonological, morphological, syntactic, and semantic structures. Offered alternate years.
Prerequisite(s): FR 321 or FR 322 or FR 323
FR470 Undergrad Sem In French
Hours 3
Intensive examination of a selected topic, with emphasis on student research and presentations. A representative sample of topics would include: Francophone Africa, The 19-Century French Novel, French-English Translation, and Poetry of the French Renaissance. May be repeated for a maximum of 12 hours.
Prerequisite(s): FR 341 OR FR 351 OR FR 331 OR FR 431 OR FR 321 OR FR 322 OR FR 323
FR480 Special Topics
Hours 3
Directed reading or research related to French and Francophone language, literature and culture. May be repeated for a maximum of 12 hours.
Prerequisite(s): FR 341 OR FR 351 OR FR 331 OR FR 431 OR FR 321 OR FR 322 OR FR 323
FR484 Adv Converstn Phonetics
Hours 3
Emphasis is on improvement of oral expression in a variety of contexts. Consideration of phonetics as it serves this goal. For purposes of satisfying the requirements of the French major or minor, this course can be used in lieu of FR 421.
Prerequisite(s): FR 321 or FR 322 or FR 323.
FRS101 Elementary Farsi I
FL
Hours 3
Contemporary Farsi (Persian): speaking, reading, and writing. Course involves supervised-self-instructional approach in the Critical Languages Center. Students are required to study the textbook and practice with assigned audio visual materials (CDs, DVDs, or computer files). Students have practice sessions three hours per week with a “language trainer” who is a native/near native (or superior level) speaker of the language. Native or near native speakers of this language are NOT allowed to take this course. Any students with any background knowledge of this language must see the CLC director BEFORE enrolling. Not repeatable without permission of the CLC director.
Foreign Language
FRS102 Elementary Farsi II
FL
Hours 3
Contemporary Farsi: speaking, reading, and writing. Course involves directed self-instructional approach in the Critical Languages Center. Students are required to study the textbook and practice with assigned audiovisual materials (CDs, DVDs, or computer files). Students have practice sessions three hours per week with a “language trainer” who is a native/near native/superior-level speaker of the language. This is a SUPERVISED-SELF-STUDY class. The language “trainer” will help students develop their communicative ability during class meetings. During the class meetings students will actively participate in practicing spoken language to acquire better pronunciation and conversation skills. English use will be kept to a minimum in class. Language trainers will monitor active participation throughout the semester by use of the STUDENT PERFORMANCE REPORT which will be sent to the director of the CLC. Regular class attendance and participation is required.
Prerequisite(s): FRS 101

Foreign Language
FRS201 Intermediate Farsi I
Hours 3
Continuation of Farsi (Persian) language on the Intermediate level. Emphasis is on the development of reading skills and writing proficiency. Offered according to demand. Not repeatable without permission of the CLC director.
Prerequisite(s): FRS 102

GEO101 The Dynamic Earth
N
Hours 4
Three lectures and one laboratory. Study of the earth including materials, internal and external processes, deformational events, and plate tectonics. Offered in the fall, spring, and summer semesters.
Natural Science

GEO102 The Earth Through Time
N
Hours 4
Three lectures and one laboratory. Survey of earth’s history including origin of the earth, plate tectonics and evolution of the continents and ocean basins, and the development of life. Offered in the fall, spring, and summer semesters.
Natural Science

GEO103 Introduction to Oceanography
N
Hours 4
This course is an introductory study of the Earth Ocean system, including processes shaping the ocean floor and coastlines; basic physical and chemical properties of the seawater; ocean circulation and climate change, and biological productivity and marine life.
Prerequisite(s): None
Prerequisite(s) with concurrency: None
Natural Science

GEO104 Hazardous Earth
N
Hours 4
This natural science course examines geologic and other Earth hazards that impact humans and ways that human activities often increase these hazards. The course consists of lecture and lab, and includes field trips and videos that illustrate various natural hazards.
Natural Science

GEO105 Sustainable Earth
N
Hours 4
Three lectures and one laboratory. Lecture and laboratory provide an understanding of important earth resources (rocks and minerals, soil, water, fossil fuels, alternative energy) and how their utilization by humans impacts the environment. Includes discussion of water pollution, air pollution and waste disposal as primary issues related to resource utilization.
Natural Science

GEO205 Communicating Geology
Hours 3
No description available

GEO210 Mineralogy
Hours 4
Two lectures and two laboratories. Introduction to crystallography, crystal chemistry, rock-forming minerals, physical properties of minerals, hand sample mineral identification, and optical mineralogy. Offered in the fall semester.
Prerequisite(s): CH 101 or CH 117; and GEO 101

GEO306 Hydrogeology
Hours 3
Introduction to the principles of groundwater flow, groundwater exploration, water quality, and groundwater contamination; environmental topics in groundwater. Offered in the fall semester.
Prerequisite(s): GEO 101

GEO314 Ign. & Meta. Petrology
Hours 4
Three lectures and one laboratory. Megascopic and microscopic study of igneous and metamorphic rocks, with emphasis on identification, classification, genesis, and relationships to tectonism. Offered in the spring semester.
Prerequisite(s): GEO 210

GEO355 Invertebrate Paleontology
Hours 3
Two lectures and one laboratory. Study of the taxonomy and morphology of major invertebrate fossil groups. Offered in the spring semester.
Prerequisite(s): GEO 101 and GEO 102
GEO363 Geomorphology
Hours 3
Two lectures and one laboratory. Study of landforms with emphasis on
the basic geomorphic processes that contribute to their origin. Offered in
the fall semester.
Prerequisite(s): GEO 101

GEO365 Structural Geology
Hours 3
Two lectures and one laboratory. An introductory study of the
deformation of rocks, including mechanical principles, description
and identification of folds and faults, map interpretation, and regional
tectonics. Offered in the fall semester.
Prerequisite(s): GEO 101 and PH 101

GEO367 Sedimentology/Stratigraphy
Hours 4
Three lectures and one laboratory. Study of the principles involved in the
description and classification of sedimentary rocks and stratigraphic
units, with emphasis on sedimentary processes and depositional
environments. Offered in the spring semester.
Prerequisite(s): GEO 102 and GEO 210

GEO369 Introduction Geophysics
Hours 3
Introduction to the major fields of exploration geophysics such as
seismology, isostasy, heat flow, gravity and magnetic prospecting, and
electrical methods. The course includes both principles and applications
to petroleum, mining, and environmental problems. Offered in the fall
semester.
Prerequisite(s): MATH 125 and PH 102 and GEO 101

GEO399 Undergraduate Research
Hours 1-6
A maximum of 4 hours can be applied toward the major in geology.
Approval of the department chairperson is required prior to registration.
Offered according to demand.

GEO401 Paleoclimatology
W
Hours 3
Survey of the history of global climate change and the methods used
to measure paleoclimate in the geological record. Offered in the Spring
semester.
Prerequisite(s): GEO 101 or GEO 102

Writing

GEO407 Seismology
Hours 3
This course provides an overview of earthquake seismology for both
upper-level and graduate geo-science students. Topics include elastic
wave propagation, seismic ray theory, travel time interpretations, surface
wave dispersion, and seismic tomography.
Prerequisite(s): MATH 126 or MATH 146

GEO410 Soil & Groundwater Restoration
Hours 3
Methods for restoring contaminated soil groundwater by examining
the factors and processes influencing the efficacy of remediation
systems. Emphasis placed on the scientific principles upon which soil
and groundwater remediation is based.
Prerequisite(s): GEO 101 and CH 101 or CH 117 and CH 102 or 118

GEO411 Contaminant Transport in Porous Media
Hours 3
This course will cover topics related to the transport and fate of
contaminants in subsurface systems. Specifically, this course will
discuss the many factors and processes influencing contaminant
transport such as the effects of dispersion, inter-phase mass transfer,
transformation reactions, and porous-media heterogeneity. In addition,
representative conceptual/mathematical models describing contaminant
transport phenomena will be discussed.
Prerequisite(s): MATH 125 PH 102 CH 102 GEO 306

GEO416 Volcanology
W
Hours 3
Study of the physical properties of magmas, eruptive mechanisms,
volcanic products, and the relationship between volcanism and
tectonism. Writing proficiency within this discipline is required for a
passing grade in this course. Offered in the fall semester.
Prerequisite(s): GEO 101 The Dynamic Earth GEO 314 Ign. & Meta.

Petrology

Writing

GEO420 Petroleum Geology
Hours 3
Introduction to the origin, migration, accumulation, and entrapment of
petroleum. Emphasis is on sedimentary, geochemical, and hydrodynamic
processes. Offered in the spring semester of even-numbered years.
Prerequisite(s): GEO 365 and GEO 367

GEO424 Topics In Geology
Hours 1-4
Special topics in the following areas: economic geology, geochemistry,
geophysics, geomorphology, hydrogeology, mineralogy, paleontology,
petrology, sedimentology, stratigraphy, structural geology, and tectonics.
Offered according to demand.
Prerequisite(s): GEO 101 The Dynamic Earth / Minimum Grade of C-

GEO435 Honors Sem In Geology
Hours 1
Oral presentations on current geological topics. Offered in the fall
semester.

GEO436 Honors Sem In Geology
UH
Hours 1
Oral presentations on current geological topics. Offered in the spring
semester.

University Honors
GEO446 Scientific Computing
Hours 3
This course covers a broad range of computational methods used in the geosciences. Topics include data analysis, manipulation and image processing, using a variety of software packages. Offered according to demand.

GEO470 General Geochemistry
W
Hours 3
Overview of the field of geochemistry (elementary chemical equilibria and thermodynamics, organic geochemistry, isotope geochemistry), with an emphasis on solving geologic problems. Offered in the Spring semester.
Prerequisite(s): GEO 314
Writing

GEO476 Analytical Geochemistry
Hours 3
Theory, techniques, and applications of geochemical methods for the analysis of rocks, soils, and aqueous fluids. Offered according to demand.

GEO490 Seminar Regional Geology
Hours 1-3
Seminar on and field trip to important geologic localities. May be repeated for credit. Offered according to demand.
Prerequisite(s) with concurrency: GEO 314

GEO492 Geologic Field Writg Tech
Hours 2
Introduction to the methods of field geology, geology of the southeastern U.S., geological writing, and presentation techniques. Offered according to demand.
Prerequisite(s): GEO 367

GEO495 Field Geology
Hours 6
Five-week field course involving the application of geologic techniques and principles. Includes geologic mapping, data collection, and report writing. Offered during the first summer term.
Prerequisite(s): GEO 314 and GEO 365 and GEO 367

GEO497 Geological Internships
Hours 3
A maximum of 4 hours can be applied toward the major in Geology. Field and laboratory projects with government and industry. Offered according to demand.
Prerequisite(s): GEO 101 and GEO 102 or GEO 105

GEO499 Research In Geology
Hours 1-4
Offered according to demand.

GN101 Elementary German I
Fl, Hu
Hours 4
GN 101 is the first semester elementary German course. It entails the acquisition of all modes of communication, language structure, and culture.
Foreign Language, Humanities

GN102 Elementary German II
Fl, Hu
Hours 4
GN 102 is the second semester elementary German course. It entails the acquisition of all modes of communication, language structure, and culture.
Prerequisite(s): GN 101 with a grade of “C-” or better, placement exam, or permission of instructor.
Foreign Language, Humanities

GN103 Accelerated Elementary German
Fl, Hu
Hours 4
Accelerated Introductory German meets 5 hours/week and covers all materials from GN 101 and GN 102 in one semester. This class deals with virtually all content in the textbook, the electronic workbook, and discussion topics. This is a fast-paced course, which requires active participation inside and outside the classroom. Successful completion of GN 103 fulfills the foreign language requirement of the core curriculum.
Foreign Language, Humanities

GN201 Intermediate German I
Hu
Hours 3
German 201 is the third course in a four-semester proficiency-based language sequence. This course, intended for intermediate students, stresses the four language skills areas: speaking, writing, listening and reading. Students complete reading, writing and listening assignments at home, which then become the basis for student-to-student interaction, small group work and role-play in class. The textbook covers topics and themes related to German language and literature and also provides texts pertaining to famous philosophers and artists, such as writers, musicians, and dramatists. The course will further cover German politics and history. Students will be reading will be reading texts from various genres, such as poems, excerpts of plays, newspaper articles, and short literary texts. Additional readings/materials will be provided by the instructor.
Prerequisite(s): Undergraduate level GN 102 or GN 103 with a minimum grade of C or UA Foreign Language Placement Exam in German with a minimum score of 417.
Humanities
GN202 Intermediate German II  
**HU**

Hours 3

German 202 is the fourth course in a four-semester, proficiency-based language sequence. German 201 is the prerequisite. This course, intended for intermediate students, stresses all four language skills: speaking, writing, listening, and reading. Students complete reading, writing and listening assignments at home, which then become the basis for student-to-student interaction, small group work and role-play in class. Additional readings will be provided by the instructor. Both the textbook and the readings address a variety of cultural topics dealing with life in German-speaking countries.

Prerequisite(s): GN 201 with a grade of “C” or better, placement exam, or permission of instructor.

Humanities

GN205 Living German House I  
Hours 2

Students living in the German House agree to speak only German, under the supervision of a house director who is a native speaker of German.

GN206 Living German House II  
Hours 2

Students living in the German House agree to speak only German, under the supervision of a house director who is a native speaker of German.

GN240 Introduction to German Linguistics  
Hours 3

Course introduces students to basic linguistic concepts as they apply to German and language generally. What are the different kinds of German spoken by different speakers in varied places? Why are there different kinds of German used? We will also examine the sounds of German (phonology), word parts (morphology), how the parts stream together (syntax), lexicon, semantics, and how German fits in in the broader world. Taught in English.

Prerequisite(s): None

GN250 Germanic Mythology  
Hours 3

Introduction to gods and myths of the early Germanic peoples as represented in writing and art, as well as the impact of Germanic mythology on Western culture and civilization.

GN254 Survey of German Cinema  
Hours 3

An overview of German Cinema from Silent Era in the 20’s through New German Cinema, to post-wall works. Topics: history, socio-cultural frame, directors and cinematography.

GN260 Holocaust In Film & Lit  
**HU**

Hours 3

As the Holocaust recedes in time, written and filmic documents (history, autobiography, art) increasingly shape our perception and understanding of the event. In this course we investigate important and exemplary literary and filmic renderings of the Holocaust.

Humanities

GN264 German Literature Translatn I  
**HU, L**

Hours 3

German 264 is a survey in English of German literary masterpieces from the Middle Ages to the period around 1800. This semester we will read the highly influential epic poem from German medieval literature – Nibelungenlied; a picaresque novel from the Early Modern period – The Life of Courage; an essay on the question “What is Enlightenment?” by the eighteenth-century philosopher Immanuel Kant; Gotthold Empirahim Lessing’s increasingly topical “dramatic poem” urging religious toleration – Nathan the Wise; a tragedy by Friedrich Schiller which banned throughout German-speaking Europe for its seemingly controversial message – The Robbers; and we will finish with what is often regarded as the most canonical text of German literature – Goethe’s Faust I. We will also examine the impact these literary works have had and still have on German culture, including art, music and film.

Humanities, Literature

GN265 Masterpieces of German Literature in English Translation  
**HU, L**

Hours 3

The course introduces students to major works of German literature in different genres from the nineteenth and twentieth centuries. Themes include politics, gender, war and peace, issues of class, race and sexuality. Through the use of film and other media we will attempt to follow the introduction of these literary works into the popular imagination.

Humanities, Literature

GN270 Special Topics  
Hours 3

Topic varies. No knowledge of German is required.

GN361 Interim Convers Comp I  
Hours 3

Emphasis is on increasing speaking and writing skills in German. Includes essay writing and grammar review.

Prerequisite(s): GN 202 with a grade of “C” or better, placement exam, or permission of instructor.

GN362 Interim Convers Comp II  
Hours 3

Emphasis is on increasing speaking and writing skills in German. Includes essay writing and grammar review.

Prerequisite(s): GN 202 with a grade of “C” or better, placement exam, or permission of instructor.

GN365 Business German  
Hours 3

Acquisition of business German used in commercial transactions. Emphasis is on business letters and business conversation.

Prerequisite(s): GN 361 or GN 362 or instructor approval
GN371 German Culture and Civilization Thru 1832
Hours 3
A survey of German cultural history from the Germanic tribes through the Age of Goethe. Emphasis is on developments in philosophy, religious thought, music, art, architecture, and popular culture in the context of political and social history.
Prerequisite(s): GN 361 or GN 362 or instructor approval

GN372 Germn Cult Civ 1832-Present
Hours 3
A survey of German cultural history from the 1830s to the present.
Prerequisite(s): GN 361 or GN 362 or instructor approval

GN381 Directed Readings
Hours 1-4
Students planning to enroll should confer with the instructor before registration.

GN403 Undergraduate Seminar
Hours 3
Intensive study of one or more significant subjects, authors, periods, works, or genres not studied in depth in other courses.
Prerequisite(s): GN 371 or GN 372

GN404 Undergraduate Seminar
Hours 3
Intensive study of one or more significant subjects, authors, periods, works, or genres not studied in depth in other courses.
Prerequisite(s): GN 371 or GN 372

GN450 Intermed Business German
Hours 3
Expands and deepens knowledge of business German and prepares students for such internationally recognized business German examinations as the Zertifikat Deutsch f?r den Beruf and Pr?fung Wirtschaftsdeutsch International.
Prerequisite(s): GN 365

GN461 Adv Gn Convers Comp I
W
Hours 3
This course emphasizes review and further development of communication skills, and includes readings of literary, cultural, and/or historical texts in German. You will continue to practice all four skills (writing, reading, speaking and listening), but the focus will be on improving your conversational and writing skills. We will review important grammar topics and work on expanding your vocabulary to give you the ability to express yourself in a variety of stylistic contexts. Apart from our textbook, we will read various fiction and non-fiction as well as watch various films and film clips. Writing proficiency within the discipline is required for a passing grade in this course.
Prerequisite(s): Completion of either GN 361 or GN 362 with a grade of “C” or better, unless by special permission of the instructor.

GN462 Adv Gn Convers Comp II
W

GR101 Beginning Greek I
FL, HU
Hours 3
Fundamentals of Greek grammar and syntax. Offered in the fall semester.
Foreign Language, Humanities

GR102 Beginning Greek II
FL, HU
Hours 3
Continued study of the fundamentals of Greek grammar and syntax. Offered in the spring semester.
Foreign Language, Humanities

GR201 Intermediate Greek I
Hours 3
Introduction to and practice in reading Greek literature, particularly Homer's Iliad.

GR202 Intermediate Greek II
Hours 3
An introduction to Greek prose with an emphasis on Xenophon's Anabasis.

GR301 Advanced Greek I
Hours 3
Select readings from Greek prose and poetry. An effort is made to accommodate the student's special interests. Offered according to demand.
GR302 Advanced Greek II
Hours 3
More select readings from Greek prose and poetry. An effort is made to accommodate the student's special interests. Offered according to demand.

GR490 Adv Greek Literature
Hours 3
Select readings in Greek literature. An effort is made to accommodate the student's special interests. The course may be repeated for credit. Offered according to demand.

GS111 Academic Skills
Hours 1-4
A one-, two-, or three-part course in academic skills for students eligible for the Student Support Services Program. Enrollment in each of the components is based on a diagnosed need. Offered in the fall and spring semesters.

GS391 Exceptional Studies
Hours 1-6
Independent study and/or research on an approved topic, under the direction of a College of Arts and Sciences faculty member. The subject matter, methodology, goals, and objectives of the study are intended to be unique.

GS491 Academic Internship
Hours 1-3
Students work with a faculty member on a planned and supervised activity related to the instructional, research, or service functions of the College of Arts and Sciences.

GY101 Atmospheric Proc & Patterns
Hours 4
Three hours lecture and one two-hour laboratory period. Earth-space relations, latitude and longitude, seasons, time, weather, climate, and vegetation. Particular attention is given to the causes of weather and climate and why they tend to be different from place to place.

Natural Science

GY102 Earth Surface Processes
Hours 4
Three hours lecture and one two-hour laboratory period. Study of earth-surface processes, with consideration of human interaction with the physical environment. Subjects include landforms, water resources, soils, and mapping the physical environment.

Natural Science

GY105 World Regional Geography
Hours 3
Introduction to geography through a survey of the world's major geographic regions. Examines their physical and cultural features, economies, and populations.

Social and Behavioral Sciences

GY110 People, Places, and Environment
SB
Hours 3
Introduction to geography as a science for learning the fundamentals of human behavior and decision making. Examines how human events, natural resources, economies, development, and urbanization impact the way humankind lives, organizes its space, and makes decisions for the future.

Social and Behavioral Sciences

GY200 Principles Of Planning
Hours 3
Survey of the basic elements of regional and urban planning. Provides a comprehensive overview of the planning profession.

GY202 The Water Planet
Hours 4
This course is about water on earth, and the content will integrate scientific elements from the disciplines of atmospheric science, geography, geology, hydrology, oceanography, and water resources. The course is organized based on the large-scale elements of the hydrologic cycle and the smaller-scale elements of the water balance concept, especially as they affect water resources.

Natural Science

GY204 Map & Air Photo Interpretation
Hours 4
Three hours lecture and one two-hour laboratory period. Fundamentals of map reading and interpretation.

GY207 Field Studies in Water and Climate
Hours 4
Water is one of the most abundant, yet most precious, natural resources on Earth. Its movement and properties are determined by processes occurring within and across many geosystems, including rivers, lakes, glaciers, groundwater, and climate systems. This course explores how different components of Earth’s water system operate and the processes linking the components together. We will also explore how people modify and utilize Earth’s water systems. Our course will be based in Innsbruck, Austria, a geographic location with a variety of water systems, including glaciers, which have very strong ties to Earth’s climate system. We will take fieldtrips to local glaciers and rivers to examine how water systems operate in the “real world” and learn techniques used to measure and understand how these systems change over space and time. We will also take fieldtrips to Prague, Czech Republic and Munich, Germany to better understand how humans modify water systems, through processes such as river regulation. GY 207 is designated a natural science (NS) course.

Natural Science

GY302 Climatology
Hours 3
Introduce the fundamentals of the earth-atmosphere system as they comprise the climate of Earth, drive spatial and temporal climate variability, and impact life.

Prerequisite(s): GY 101
GY317 Natural Hazards  

Hours 3  

Examination of the causes, consequences, and spatial distribution of climatic, geomorphic, and human-induced natural hazards.  
Prerequisite(s): GY 101 or GY 102

GY330 Computer Mapping Graphics  

C  

Hours 4  

Three hours lecture and one two-hour laboratory period. Introduction to computer graphics and their application in both the natural and social sciences, with special emphasis on mapping. Computing proficiency is required for a passing grade in this course.  
Prerequisite(s): GY 204 and CS 102

GY339 Natural Resource Environment Planning  

Hours 3  

Analyzes human interactions with the physical environment and ways of dealing with them. Integrates environmental science, social science, and planning, and includes environmental impact assessment.

GY341 Geography of the United States and Canada  

Hours 3  

Study of the physical and human geography of the United States and Canada.

GY344 Geography of Africa  

Hours 3  

Study of the physical and human geography of Africa.

GY345 Geography of Latin America  

Hours 3  

This course is designed to provide a regional survey of Latin America’s environments and peoples from a geographic perspective. The course presents the physical landscape as well as the changing environment in Latin America. The course then explores the major historical, cultural, and economical aspects of the region. The course will have an emphasis in processes that shape the major contemporary issues, such as development, urbanization, and environmental change.

GY346 Geography of Europe  

Hours 3  

This course is designed to provide a regional survey of Europe in terms of economic activities and the physical environment. Special emphasis is on the historical development of European landscapes.

GY351 Geography of Alabama  

Hours 3  

Study of the varied geographical dimensions of the state of Alabama, both past and present.

GY358 Urban Geography  

Hours 3  

Examines the growth of cities, their spatial distributions, internal dynamics, functional bases, and social and political patterns.  
Prerequisite(s): GY 110

GY363 Geomorphology  

Hours 3  

Study of physical, chemical and biological processes operating at the Earth's surface and landforms, and the landscapes such processes develop.  
Prerequisite(s): GY 102 or GEO 101

GY365 Industrial Development and Location  

W  

Hours 3  

Systematic study of the principles and processes underlying the development, location, and spatial organization of economic activities from both a national and international perspective. Writing proficiency within this discipline is required for a passing grade in this course.  
Prerequisite(s): GY 110

GY370 Special Topics  

Hours 3  

No description available

GY375 Sports Geography  

Hours 3  

Sports are an important part of society and contribute billions of dollars to the global economy. This course examines the geographic dimensions of sports, primarily in North America, with some reflections on Europe for contrast. The geography of sports can be analyzed through the use of concepts found in a variety of human geography subdisciplines, including cultural, historical, economic, population, urban, and political geography. The course covers a variety of topics and helps students develop a holistic view of sports with regards to spatial interactions. Geography courses explain why things are where they are on the surface of the Earth. In other words, students develop a spatial perspective in thinking about their surroundings.

GY377 Cultural Geography  

Hours 3  

Study of the way in which culture influences elements of both physical and human landscapes with emphasis on how cultures are spread over space and how cultures make sense of space.  
Prerequisite(s): GY 105 or GY 110

GY385 Watershed Management Plan Development  

Hours 3  

This course is designed to be primarily an experiential course and will address development and implementation of a Watershed Management Plan. The North River Watershed Management Plan will be used as a working model and students will review theory before carrying out experiential learning in the field.
GY404 Physical Geography Seast Us
Hours 3
A study of the physical landscapes in the southeastern United States. Emphasis is on the geological setting, geomorphic features, climate, soils, and vegetation, and the interrelationships of these conditions that shape the landscape in this region.
Prerequisite(s): GY 101 and GY 102; or GEO 101

GY405 Dir Res Physical Geog
Hours 1-3
Hands-on, problem solving in the field of physical geography.

GY406 Dir Res Human Geography
Hours 1-3
Hands-on, problem solving in the field of human geography.

GY409 Forest History and Restoration
Hours 4
This course covers the theories, tools and techniques used in historical ecology with a focus on the establishment of reference conditions for habitat conservation and restoration efforts.
Prerequisite(s): GY 101 or GY 102

GY410 The Geography of National Parks
Hours 3
This course is devoted to the changing geography of the national park system and protected areas, with an emphasis on their design, planning, and operations.
Prerequisite(s): GY 110

GY412 Hydroclimatologist
Hours 3
To provide a basic understanding of the waters of Earth, especially with relation to the effects of precipitation and evaporation upon the occurrence and character of water in streams, lakes and on or below the land surface.
Prerequisite(s): GY 101 and GY 302

GY413 Applied Climatology
Hours 3
Applied Climatology is a graduate/senior level course designed to expand upon fundamental concepts learned in GY 101. Within this broad field, a specific focus in GY 413 concentrates upon climate and human health/behavior, and human modification of climate. The course contains a mixture of lecture, lab, and field assignments.
Prerequisite(s): GY 101

GY414 Climate Change and Health
Hours 3
This course is an introduction to the effect of global climate change on health. The course will be taught from a geographical perspective and will introduce students to the physical science of climate change and the impact it has on health through discussion of extreme weather events, altered ecological systems, and threats to human security and welfare. Discussion will build on the core concepts of climate change science to provide students with a solid foundation to further examine a variety of topics from acute impacts such as heat waves and other weather extremes to chronic conditions such as shifting disease vector habitats, degraded air quality, and food security. Direct correlations between health impacts and climate change will be emphasized throughout as will discussion of mitigation and adaptation strategies.
Prerequisite(s): GY 101

GY415 The Geography of Extinctions and Endangered Species
Hours 3
This course examines the individuals, institutions, research, controversies, and policies that have developed around wildlife extinction, ecological problems associated with extinction, and endangered species. The course also examines the stories of several lost or vanishing species. This course, which has been developed out of the instructor's current research projects, uses lectures, readings, student-led discussions, writing assignments, and one exam to explore how humans have contributed to, while at the same time grappling with, the issue of wildlife conservation and extinction.

GY416 Introduction to Geostatistics Using R
Hours 3
This course is an introduction to geostatistical data analysis using R. The course will be taught from the perspective of geographical and climate data analysis but serves as a broad introduction to the high-level programming language, R, as well as applied spatial data analysis. Students will load and manipulate data of different types, perform a variety of statistical analyses, generate graphical output, and create productive workflows using R alone. The primary outcome will be to facilitate students’ use of R to analyze data of their own choosing on a final project. Students will present these methods to the class for others to critique, analyze and learn from. Code sharing and re-use is highly emphasized, as is collaboration. The course is designed as a 1-hour lecture plus 2-hour lab each week.

GY417 Extreme Weather and Society
W
Hours 3
EW&S is an integrated physical and social science seminar class consisting of readings, discussion, and lectures on perception, understanding, and communication of severe weather hazards.
Prerequisite(s): GY 101
Writing
GY420 Remote Sensing I
C
Hours 4
Three hours lecture and one two-hour laboratory period. Introduction to
the basic principles of electromagnetic radiation, interaction between
energy and earth features, remote sensing instruments, and information
extraction from remotely sensed data. Computing proficiency is required
for a passing grade in this course.
Prerequisite(s): GY 204 and CS 102
Computer Science

GY424 Cartography Practicum
Hours 3-9
Individual work experience in cartography, supervised by faculty and staff
of The University of Alabama. A maximum of 3 hours of internship or
practicum credit can be applied to the geography major. Credit for GY 424
cannot be applied to the geography minor.

GY425 Cartography Internship
Hours 3-9
Individual work experience on a cartographic project, supervised by the
staff of an off-campus agency. A maximum of 3 hours of internship or
practicum credit can be applied to the geography major. Credit for GY 425
cannot be applied to the geography minor.

GY429 Fundamentals of Geographic Information Systems
Hours 3
This course is a hands-on, practical Geographic Information Systems
(GIS) introduction for non-majors in Geography or GIS Certificate.

GY430 Intro Geographic Info Systems
C
Hours 1,3
Three hours lecture and one hour laboratory period. Introduces the basic
concepts of GIS, including definition and components of GIS, spatial
data structures, data sources, data input, manipulation and analysis,
applications of GIS, and managing GIS. Computing proficiency is required
for a passing grade in this course.
Prerequisite(s): GY 204 and CS 102
Computer Science

GY431 GIS in Emergency Management
Hours 4
Addresses geo-spatial data, methods, and software used in mitigation,
planning, response, and recovery phases of emergency management.
Case studies and scenarios are drawn from meteorological,
environmental, geological, and biological hazards and disasters.
Prerequisite(s): GY 430

GY433 GIS Practicum
Hours 3-9
Individual work experience in GIS, supervised by the faculty and staff
of The University of Alabama. A maximum of 3 hours of internship or
practicum credit can be applied to the geography major. Credit for GY 433
cannot be applied to the geography minor.

GY434 Gis Internship
Hours 3-9
Individual work experience in GIS, supervised by the staff of an off-
campus agency. A maximum of 3 hours of internship or practicum credit
can be applied to the geography major. Credit for GY 434 cannot be
applied to the geography minor.

GY435 Remote Sensing II
C
Hours 4
Three hours lecture and one two-hour laboratory period. Analysis and
extraction of thematic information from nonphotographic remotely
sensed data for geographic information systems. Topics include image
processing, image enhancement, and image classification. Computing
proficiency is required for a passing grade in this course.
Prerequisite(s): GY 420
Computer Science

GY436 Adv Geographic Info Syst
C
Hours 4
Three hours lecture and one two-hour laboratory period. Evaluation
of case studies, spatial model development, and database design for
geographic information systems. Computing proficiency is required for a
passing grade in this course.
Prerequisite(s): GY 430
Computer Science

GY437 GIS for Transportation
Hours 4
The application of Geographic Information Systems to transportation has
resulted in a sub-field known as GIS-T. This course will provide a hands-
on introduction to GIS-T.
Prerequisite(s): GY 204

GY438 Application Issues In Gis
Hours 4
Three hours lecture and one two-hour laboratory period. In-depth study
of various topics in the application and technical issues of geographic
information systems. Computing proficiency is required for a passing
grade in this course.
Prerequisite(s): GY 430

GY439 GIS Programming
Hours 4
This course focuses on the extension of geographic information systems
(GIS) through programming as well as on the development of stand-alone
algorithms for spatial analysis and numerical modeling.
Prerequisite(s): GY 429 or GY 430
GY440 Commun Facil Planning  
W  
Hours 3  
Principles, processes, and analysis of public facility location planning, with emphasis on the spatial search process, impact analysis, and public facility location models.

GY441 Land Use Regulations  
Hours 3  
Theory and use of zoning, eminent domain, taxing and police powers, enabling acts, charters, official maps, codes, nuisance ordinances, and environmental impact statements in community planning.

GY442 GIS in Biogeography  
Hours 4  
Addresses the application of GIS data and methods in analyzing geographic distribution and trends of plants and animals. Labs draw data and methods from a variety of biogeographic contexts including historical, modern, terrestrial, marine, conservation, and climate change.

Prerequisite(s): GY 430

GY444 Field Studies In Africa  
Hours 6  
Three-week intensive field study in Ghana. Explores geographical perspectives on Africa's level of development and the responses of the African peoples to their circumstances.

GY445 Agriculture: Environment and Development  
Hours 3  
This course examines the geographical elements of how people use the biophysical environment to grow domesticated plants (crops). Agriculture is understood in this course as the transformation of biophysical or "natural" environments into "cultural" environments. It is assessed in regard to both the plants cultivated, and the soil, slope, moisture, and temperature conditions that exist and then are modified or created by farmers. Ecological and systematic approaches are taken in order to understand how different agricultural strategies ensure continual long-term productivity and stability. Microeconomics is an important and recurring theme.

Prerequisite(s): GY 105 or GY 110 or instructor permission

GY450 Conservation Field Studies in Belize  
Hours 6  
Study Belize's diverse rainforests, coral reefs, and visit Mayan ruins for a glimpse into a past civilization. Belize is unique in that it still contains relatively undisturbed rainforests and the longest barrier reef in the Western Hemisphere. However, while Belize has emerged as an international leader regarding conservation efforts, threats from climate change, poverty, and development still exist. The purpose of this course is 1) examine current conservation efforts to safeguard this biodiversity; 2) familiarize students with the most important aspects of tropical lowland terrestrial and marine ecosystems; 3) understand the role of local culture in sustainable conservation; 4) gain an understanding of the fundamental importance of biodiversity; and 5) expose students to new and unique cultures and environments. The course is designed for students who are interested in conservation issues, biogeography, marine sciences, ornithology and birding, archaeology, and outdoor adventures.

Prerequisite(s): GY 102

GY452 Environ Decision Making  
Hours 3  
Review of the history of natural resources in the U.S. and current environmental topics, followed by discussion of techniques to facilitate environmental decision making and management.

GY453 Environment & Society  
W  
Hours 3  
Exploration of the linkages between the biophysical environment and human social systems. Public policy implications are viewed from a social science perspective. Writing proficiency within this discipline is required for a passing grade in this course.

Prerequisite(s): GY 110

GY454 Costa Rica Field Studies: Tropical Ecology, Conservation, and Development  
Hours 4  
This program will provide students with a broad interdisciplinary experience encompassing tropical ecology, conservation and development (TECD) in a highly experiential learning context.

GY455 Planning Practicum  
Hours 3-9  
Individual work experience in planning, supervised by faculty and staff of The University of Alabama. A maximum of 3 hours of internship or practicum credit can be applied to the geography major. Credit for GY 455 cannot be applied to the geography minor.

GY456 Planning Internship  
Hours 3-9  
Individual work experience in planning, supervised by the staff of an off-campus agency. A maximum of 3 hours of internship or practicum credit can be applied to the geography major. Credit for GY 456 cannot be applied to the geography minor.

GY458 Urban Planning And Analysis  
W  
Hours 3  
A study of contemporary urban landscapes, political and economic power structures, and resultant conflicts. Includes an in-depth analysis of the role of externalities, the urban planner, urban policymaking, and analytical methods in the planning and administration of urban landscapes.

Writing

GY459 Community Organizing And Activism  
W  
Hours 3  
Study the theoretical and practical aspects of community organizing and activism. Examination of historical, political, and cultural factors in community organizing, the role of activists, and strategies for community-building.

Prerequisite(s): GY 102

GY460 Urban Planning And Analysis  
W  
Hours 3  
A study of contemporary urban landscapes, political and economic power structures, and resultant conflicts. Includes an in-depth analysis of the role of externalities, the urban planner, urban policymaking, and analytical methods in the planning and administration of urban landscapes.

Writing

GY463 Ecosystem Services: Theory and Practice  
Hours 4  
This course will prepare students to function effectively as future researchers and policy-makers on topics related to sustainability and sustainable management of ecosystem-oriented projects and activities. The concept of ecosystem services provides one approach to facilitate trade-off decision making to identify win-win strategies among multiple stakeholders with often conflicting near-term objectives.
GY465 Region Planning Analysis  
Hours 3  
Principles and processes of regional planning and the analytical methods appropriate for solving regional planning problems. Case studies and the role of the planner in the regional planning process are discussed.

GY466 Transport Geography  
Hours 3  
Examines the location and function of the multimodal North American transportation system, the urban transportation planning process and methodologies. Assesses the political and environmental contexts of transport systems, including impacts of continued reliance on the automobile.

Prerequisite(s): GY 105 or GY 110, or instructor permission

GY470 Special Topics  
Hours 3  
No description available

GY472 Soil Science  
Hours 4  
Three hours lecture and required field and lab work. Introduction to the study of soils, including soil formation, classification, and the interpretation of soils to reconstruct environmental histories.

GY473 Public Policy Development in Water Resources  
Hours 3  
This course will evaluate the current approaches to policy theory and examine systematically the broader implications of the substantive aspects of public policy development in the water resources spectrum. In analysis of public policy development in water resources, the student will look at both policy process and policy substance. Attention will be given to the questions of how and why water policy differs across states, and how one might evaluate policy performance cross-nationally.

GY477 Water Resources Management, Law, and Policy  
Hours 3  
The Water Resources Management, Law, and Policy course will provide students with a survey of water resources development, control, law, policy and management with particular emphasis on public policy considerations including: the acquisition and exercise of water rights —appropriative and riparian; groundwater management; water districts and user organizations; environmental considerations; Federal/State relations including interstate allocation; and the Alabama Water Resources Act. The course will also address international water law—the multinational treaties, laws, cases, practices and politics governing Earth’s transboundary freshwater resources (watercourses including rivers, streams, lakes, and groundwater aquifers) shared by two or more countries.

Prerequisite(s): GY 101 and GY 102; or GEO 101

GY483 Environment Science Internship  
Hours 3-9  
Individual work experience in environmental science, supervised by the staff of an off-campus agency. A maximum of 3 hours of internship or practicum credit can be applied to the geography major. Credit for GY 483 cannot be applied to the geography minor.

GY485 River Hydrology  
Hours 3  
Rivers are dynamic natural systems that are of great importance to ecosystems and society. This course examines river hydrology processes from a physical geography perspective. A major theme of the course will be impacts of human actions on river systems.

Prerequisite(s): GY 101 or GY 102

GY486 Watershed Dynamics  
W  
Hours 3  
An examination of the physical operation of watersheds focusing on surface water hydrology, erosion, and sedimentation. Writing proficiency within this discipline is required for a passing grade in this course.

Prerequisite(s): GY 102

Writing

GY489 Forest Ecology Veg Analy  
W  
Hours 4  
Three hours lecture and required field work. Study of the nature of forest communities and the interrelationship of organisms that compose them.

Writing

GY490 Geography Internship  
Hours 3-9  
Work experience in an agency involved in geographical analysis. A maximum of 3 hours of internship or practicum credit can be applied to the geography major. Credit for GY 490 cannot be applied to the geography minor.

GY491 Fluvial Geomorphology  
W  
Hours 3  
This course provides an in-depth investigation of the processes that determine the form and evolution of rivers and streams. Questions addressed by this course include the following. What processes determine the form and evolution of rivers and streams? How can we infer process from form and vice versa? How do river form and process vary spatially and temporally? What principles of fluvial geomorphology are needed for river restoration and management? The course will combine lectures, discussions, field data collection, and modeling activities. This course can be taken for writing credit. Therefore, TWO INDIVIDUAL writing assignments are required. In order to earn a passing grade in this course, you will be required to demonstrate writing proficiency to standards expected for the geosciences. A student who does not write with the skill normally required of an upper division student in the geosciences will not be given a passing grade, no matter how well they perform on other course components.

Prerequisite(s): GY/GEO 363 Geomorphology

Writing
GY492 Eastern Forest Communities and Silvics  
Hours 4  
This field course is focused on the biotic and abiotic elements that create distinct forest communities throughout the eastern US, with a particular emphasis on woody plant assemblages including the silvics of dominant and indicator species in different community types. Applications to forest management are stressed.  
Prerequisite(s): GY 101 or GY 102 or BSC 114

GY494 Forest Measurement & Methods  
Hours 4  
This course is designed to provide students with a theoretical foundation and practical experiences in measuring, inventorying, and describing trees, stands, and forests.  
Prerequisite(s): GY 101 or GY 102 or BSC 114 or BSC 116

GY495 Coastal Geomorphology  
Hours 3  
The coastlines of the world, at the triple interface of land, sea, and air, are dynamic geomorphic environments. They are often subject to abrupt changes, associated with storms for example, as well as slower, long-term changes, such as those associated with sea level change. Coastal environments are home to most of the earth’s human population and they include, at the same time, some of the most hazardous of locations. The purpose of this course is to provide a general introduction to the subject of coastal geomorphology, with emphasis on coastal environments and landforms, and with a survey of coastal processes.

GY496 Forest Ecosystem Management: Silviculture  
Hours 4  
In this course silviculture is treated as applied forest ecology. The goal of this course is to provide students with a knowledge of silviculture and its ecological basis so they can design manipulations in forest ecosystems to achieve a range of management objectives. The course requires field trips to tour different sites and visit with forest scientists and managers. In this course students learn about tree growth and stand development and use this information to develop silvicultural prescriptions to meet a diverse range of management goals. We will explore how silvicultural treatments can influence stand structure and composition and how these changes influence timber quantity and quality, forest health, biodiversity, soil, and wildlife habitat among other features. We will also focus on how silviculture is influenced by broader social, economic, and ecological issues.  
Prerequisite(s): GY489 or GY409 or GY492 or GY494 or instructor permission

HEB101 Elem Hebrew Language  
FL  
Hours 3  
Contemporary Hebrew: speaking, reading, and writing. Course involves directed-self-instructional approach in the Critical Languages Center. Students are required to study the textbook and practice with assigned audio visual materials (CDs, DVDs, or computer files). Students have practice sessions three hours per week with a “language trainer” who is a native/near native (or superior level) speaker of the language. Native speakers of this language cannot take this course. Any students with background knowledge of this language must see the CLC director before registering for permission. Not repeatable without permission of the CLC director. Offered each semester.

Foreign Language

HEB102 Elem Hebrew Language  
FL  
Hours 3  
Contemporary Hebrew: speaking, reading, and writing. Course involves mixed self-instructional approach in the Critical Languages Center. Students are required to study the textbook and practice with assigned audio visual materials (CDs, DVDs, or computer files). Students have practice sessions three hours per week with a language “trainer” who is a native/near native speaker of the language. Not repeatable without permission of CLC director. Offered each semester.  
Prerequisite(s): HEB 101

Foreign Language

HEB201 Intermed Hebrew Language  
Hours 3  
Continuation of Hebrew language on the intermediate level. Emphasis is on the development of reading skills and writing proficiency. Not repeatable without permission of CLC director. Offered according to demand.  
Prerequisite(s): HEB 102

HEB202 Intermed Hebrew Language  
Hours 3  
Continuation of HEB 201. Emphasis is on the development of reading skills and writing proficiency. Not repeatable without consent of CLC director. Offered according to demand.  
Prerequisite(s): HEB 102

HIN101 Elementary Hindi  
FL  
Hours 3  
Contemporary Hindi: speaking, reading, and writing. Course involves directed-self-instructional approach in the Critical Languages Center. Students are required to study the textbook and practice with assigned audio visual materials (CDs, DVDs, or computer files). Students have practice sessions three hours per week with a “language trainer” who is a native/near native (or superior level) speaker of the language. Native speakers of this language cannot take this course. Any students with background knowledge of this language must see the CLC director for permission before registering. Not repeatable without permission of the CLC director.

Foreign Language
HIN102 Elementary Hindi
FL
Hours 3
Contemporary Hindi: speaking, reading, and writing. Course involves directed self-instructional approach in the Critical Languages Center. Students are required to study the textbook and practice with assigned audiovisual materials (CDs, DVDs, or computer files). Students have practice sessions three hours per week with a "language trainer" who is a native/near native/superior-level speaker of the language. This is a SUPERVISED-SELF-STUDY class. The language "trainer" will help students develop their communicative ability during class meetings. During the sessions, students will actively participate in practicing spoken language to acquire better pronunciation and conversation skills. English use will be kept to a minimum in class. Language trainers will monitor active participation throughout the semester by use of the STUDENT.
Prerequisite(s): HIN 101
Foreign Language

HY101 Western Civ To 1648
HI
Hours 3
A history of Western civilization from its origins in Greece and Rome through the Middle Ages, the Renaissance and Reformation, and the age of discovery and expansion during the emergence of modern Europe. Usually offered in the summer session.
History

HY102 Western Civ Since 1648
HI
Hours 3
Covers the development of the Western world from the Thirty Years’ War to the post-World War II era: the age of absolutism, the Enlightenment, the French Revolution, industrialization and the wars of the 20th century. Usually offered in the summer session.
History

HY103 History of American Civilization to 1865
HI
Hours 3
A survey of American history from its beginning to the end of the Civil War, giving special emphasis to the events, people, and ideas that have made America a distinctive civilization. Open to freshmen.
Prerequisite(s): None
History

HY104 America Civilization Since 1865
HI
Hours 3
A survey of American history from the Civil War to the present, giving special emphasis to the events, people, and ideas that have made America a distinctive civilization. Open to freshmen.
Prerequisite(s): None
History

HY105 Honors West Civ To 1648
HI, UH
Hours 3
Honors sections of HY 101.
History, University Honors

HY106 Honors West Civ Sc 1648
HI, UH
Hours 3
Honors sections of HY 102.
History, University Honors

HY107 Honors American Civilization to 1865
HI, UH
Hours 3
An honors-level approach to the American experience; parallel to HY 203.
Prerequisite(s): Invitation of the department or membership in the University Honors Program.
History, University Honors

HY108 Honors American Civilization Since 1865
HI, UH
Hours 3
An honors-level approach to the American experience.
Prerequisite(s): Invitation of the department or membership in the University Honors Program.
History, University Honors

HY111 Colonial Latin America
HI
Hours 3
Formation of the largely Spanish speaking New World, from the shock of conquest to the trials of freedom that spawned the modern nations of Latin America.
Prerequisite(s): None
History

HY112 Modern Latin America Since 1808
HI
Hours 3
Survey of political, economic, and social life in the 19th and 20th centuries with emphasis on the larger countries (Brazil, Mexico, and Argentina).
Prerequisite(s): None
History
HY113 Asian Civilization to 1400
HI
Hours 3
Broad survey of Asian civilization from the earliest times covering India, China, Korea, Japan and Southeast Asian, with large cultural and religious emphases.
Prerequisite(s): None
History

HY114 Modern Asia since 1400
HI
Hours 3
Conditions of various Asian civilizations in the 15th century, followed by the arrival of Europeans, with emphasis on imperialism, colonialism and Asian nationalism.
Prerequisite(s): None
History

HY115 History of Science to 1687
HI
Hours 3
This course will explore the origins and evolution of science and technology and the relationship both had to the societies that produced them. In addition to reading foundational texts in the history of science, like Aristotle and Galileo, we will address larger themes, including the relationship between science and religion and the role of science and scientists in the societies that produced them.
History

HY116 History of Science Since 1687
HI
Hours 3
Science and technology are ever-present in today's world, defining not only how we live our daily lives but also shaping our conceptions and evaluations of modernity, civilization, and progress. How did science and technology become so important and pervasive to the modern world? This course is intended as an introduction to the history of modern science and technology from the Enlightenment to the present. Our focus will be on the development of science and technology in the Western World (Europe and North America). However, we will also make comparisons across cultures to explore how science and technology shaped notions of what counts as "Western" and "modern." In addition to learning about key developments in the history of science and technology, from Ford's Model-T to Einstein's theory of relativity, we will address larger themes, including the relationship between science and religion and the role of technology in war and empire.
History

HY117 World History to 1500
HI
Hours 3
This course examines the political, economic, religious and social history of the world from the first civilizations that emerged around 3000 BC to about the year AD 1500. In this course we will discuss the creation of civilizations, the rise and fall of empires, and the similarities and differences between these various cultures with regard to their development. As this is an introductory course to world history, it is important to note that we will not be able to delve too deeply into any one topic.
History

HY118 World History Since 1500
HI
Hours 3
This course is a continuation of HY 117, Comparative World Civilizations. The course will examine the interactions between major world civilizations in Europe, Africa, and Asia. Course material will examine developments of history, politics, economics, and religion since 1500.
History

HY225 Hy Alabama To 1865
Hours 3
State history under the flags of Spain, France, Great Britain, the U.S., and the Confederate States, with emphasis on cultural heritage.

HY226 Hy Alabama From 1865
Hours 3
Survey of Alabama's history and personalities since 1865: Reconstruction, agrarian revolt, Progressivism, the KKK, Dixiecrats and the Civil Rights movement.

HY235 Christ Church To 1500
Hours 3
Survey of the Christian church from its origins in the Middle East through its victory over the Roman Empire and its ascendancy in the Middle Ages.

HY247 England To 1688
Hours 3
History of Western civilization in one country, from Anglo-Saxon times to the growth of absolutism and resistance.

HY248 England Since 1688
Hours 3
England from the Glorious Revolution to the post-World War II era, with emphasis on social and cultural topics as well as foreign affairs.

HY295 Us Naval History
Hours 3
Traces the development of the U.S. Navy from sailing ships to nuclear vessels, and relates it to political and economic conditions and to wars throughout American history.

HY300 Special Studies in History
Hours 3
Special studies in history. May be repeated for a maximum of 18 hours.
HY301 Independent Study
Hours 1-3
Directed study done by special arrangement with a faculty member of the History Department. Requires sophomore standing and permission of the instructor.

HY305 Topics in European History
Hours 3
This course covers a range of special topics in European History. Typically taught as a combination of lecture and discussion, with emphasis on primary sources, its topics cover major themes in medieval, early-modern, and modern European civilization. These include, among others, the origins of medieval and early modern Europe, national and cultural identity, revolution, gender, sexuality, consumerism, daily life, war, transnational exchange, and the environment.

HY306 Topics in American History
Hours 3
This course covers a range of special topics in American History. Typically taught as a combination of lecture and discussion, with emphasis on primary sources, its topics will include, among others, the indigenous and European encounters, colonial and constitutional history, the development of the American nation, race, slavery, and civil war, the World Wars and the Cold War, American foreign policy, and the civil rights movement.

HY307 Topics in Latin American, Asian, Middle Eastern, or African History
Hours 3
This course covers a range of special topics in Latin American, Asian, Middle Eastern or African History. Typically taught as a combination of lecture and discussion, with emphasis on primary sources, its topics include, among others, national and cultural identity, revolution, gender, sexuality, consumerism, daily life, war, transnational exchange, and environment.

HY308 Colonial America
Hours 3
History of the social, cultural, and political interactions of all the peoples in early North America and the Caribbean from the sixteenth century through the 1760s, with an emphasis on the diversity of experiences across categories of race, gender, socioeconomic status, religion, and age.

HY312 American South Before 1865
Hours 3
The South from colonial times to the Civil War, tracing the growth of the plantation system, extension of the frontier, commerce and industry, cultural influences, and the institution of slavery.

HY313 American South Since 1865
Hours 3
History of the South since 1865, covering Reconstruction, the Bourbon Democracy, the New South Creed, populist revolt, World War I, the 1920s, the Great Depression, the civil rights movement, and Southern politics.

HY314 Coming Of The Civil War
Hours 3
American history from 1815 to 1861, giving special emphasis to the development of a distinctive American culture and the factors within that culture that led to the Civil War.

HY315 The Civil War
Hours 3
The military, political, diplomatic, social, and intellectual aspects of the Civil War years, and the impact of the war on subsequent American history.

HY316 Life & Legend Abraham Lincoln
Hours 3
The life and legend of the man often considered to be the representative American.

HY318 U S Since 1945
Hours 3
Topical survey of the economic, social, political, and cultural developments in the United States since World War II.

HY319 19th Century Black History
Hours 3
Role of black Americans in American life from the 17th century to the beginning of the 20th century, with emphasis on the institutions and events of the 1800s.

HY320 20th Century Black History
Hours 3
The interrelationship of blacks and the industrial-urban environment of the United States.

HY323 Us Constitut Hy to 1877
Hours 3
Deals with the evolution of constitutional law and the nature and process of judicial review, including 18th-century constitutional theory and Supreme Court decisions.

HY324 Us Constitut Hy sc 1877
Hours 3
Continuation of HY 323, tracing developments up to the current Supreme Court.

HY325 Us-World Power to 1898
Hours 3
Emphasizes idealism and realism in foreign policy, the change from isolationism to international involvement, "New Manifest Destiny," and the rise of America to world power.

HY326 Us-World Power sc 1898
Hours 3
Emphasizes American international involvement through the Panama Canal, the Roosevelt Corollary, World War I and the League of Nations, Pearl Harbor and World War II, the Cold War, Vietnam War, and after.

HY327 Women in Early America
Hours 3
Examines the history of women in early North America from 1660 to 1877.

HY330 Civil Rights Movement
Hours 3
History of the leaders, organizations, and events of the Civil Rights Movement during the years 1945 to 1968.
HY331 Religion and Civil Rights
Hours 3
Course Description: This course in History and African American Studies surveys the interaction of religion and civil rights during mid-twentieth century America. While national in scope, it will pay special attention to the place of Alabama and particularly Tuscaloosa. The guiding question for the course will be what difference religion make – or did not make – in the development of the civil rights movement.

HY332 Native American History
Hours 3
This course examines the histories of hundreds of indigenous peoples in North America from early human habitation to the present day, with a focus on those residing in what is now the United States and Canada. We will study their experiences; their encounters with one another, Europeans, and Africans; and the different histories that people have told about those experiences and encounters. Class materials, which include art, film, and fiction as well as history and anthropology, stress the diversity of Native lifeways as well as the ways in which the history of American Indians has often been ignored, changed, appropriated, and distorted, as well as reclaimed and re-evaluated over time. Some of the questions we will consider throughout the semester include: How much can we know about Indigenous peoples before they had an alphabetic written history? What can European sources teach us about the Native peoples they encountered? How did the Natives of North America live before 1492? Does it make any sense to generalize about "Indians," given that they include a large number of diverse peoples? How did contact with Europeans and Africans (and their diseases and technologies) change Native societies? How did Natives affect Europeans and Africans? Why did Native peoples lose ground (literally and figuratively) in the nineteenth century? How have Natives experienced and reacted to the changes of the twentieth century? What does it mean to be a Native person in the United States today?

HY333 America in the Progressive Era: A Nation Comes of Age
Hours 3
There have only been a handful of times in our nation’s history that can rightly be described as transformative. These have been eras in which, as Doris Kearns Goodwin cheerfully says, “a molt seems to take place, and an altered country begins to emerge.” In this context, we readily recall the American Revolution and the Civil War, but we may easily overlook the Progressive Era. To do so is a mistake that this course seeks to correct. For this was when the United States came of age as a world power, and also when Americans nationwide acquired a dynamic sense of their national identity. In vigorous and distinctive ways, Presidents Theodore Roosevelt and Woodrow Wilson reshaped America and left their distinctive imprints on our national character. Their joint legacy, rightly or wrongly, was to use the power of the national government to enlarge the scope of American democracy. The Progressive Era itself ended dismally in race riots, a frenzied Red Scare, and the inept presidency of Warren Harding, but the progressive spirit would continue to smolder and occasionally spark fires of idealism and renewed efforts to conquer new frontiers to the present day.

HY334 The Nineteenth Century City
Hours 3
Consider our ability to walk into a store and buy something already made off the rack. Or baseball, the All American sport. Or living in an apartment house beside people who are very different from us. What do these three things have in common? The answer is this: they can get us on our way to talking about the beginnings of city life in the United States during the nineteenth century. This course will explore the emergence of urban life in this country by exploring several issues, among them race, class, gender, culture, labor and geography.

HY335 Handmade Nation: Knitting and History
Hours 3
Knitting has enjoyed a huge comeback in the U.S. in the last decade, largely thanks to interest in DIY and environmentally sustainable consumption. This class explores the history, art, and politics of knitting. Students will learn to knit (or develop their skills as knitters) and also analyze knitting as a fascinating window onto the rest of the world. Topics explored include the craft’s history, women’s and men’s work, the politics of art vs. craft, consumerism, globalization, and the craft’s role in activism. Half of class time will be studio-based and half will focus on discussion of the readings. There are no prerequisites. You will also develop the ability to think historically through critical analysis of primary and secondary sources; place events, people, and documents in their historical contexts; and create your own historical interpretations and narratives about the past. In this course, you should expect to do much more than memorize facts or dates – you will be busy actively learning by knitting and doing history, not passively sitting back and being told what to think.

HY336 U.S. Disability History
Hours 3
This course places the experiences of people with disabilities at the center of the American story, from long before Europeans arrived in North America through today. We will explore the changing lives of people with disabilities—from railroad workers and rights activists to wheelchair athletes and participants in freak shows to college students and more—as well as the history of disability policy and conceptions of disability. We will focus on the social and cultural history of disability rather than its strictly physical or medical aspects. U.S. Disability History takes a new approach to familiar topics in U.S. history, including colonization, slavery, immigration, racial and gender stereotypes, education, civil rights, and citizenship, among others.

HY337 Hy US - Vietnam War
Hours 3
Survey of the historical background of the conflict in Indochina leading to U.S. involvement and its consequences.

HY345 Race and Science
Hours 3
Race and Science examines the diverse interactions between science and race from the 18th century to the present era of human genomics. The class looks both at the scientific study of race and the impact of racial concepts on science. These interactions have given us: Nazi medicine, American eugenics, the Tuskegee experiments, and “race specific” contemporary pharmaceuticals. By the end of this course, students will have the opportunity to write (with consultation) a publishable-quality essay on one aspect of this important issue in history and bioscience ethics.
HY346 Epidemics! A History of Medicine
Hours 3
The history of medicine is the history of disease. Plague, bloody flux, yellow fever, the flu, cholera, ebola, smallpox, AIDS — at one time or another, each of these terms inspired terror. They’ve entered our otherwise flourishing civilizations and, like a wildfire, cut down men, women, children, rich, poor, religious, non-believers, even the healers themselves. Like phantoms, they disappeared as fast as they came; but once introduced to these mysterious visitors, no society remained unchanged. In this history of medicine, we examine six major epidemics over the last three thousand years. We’ll then turn to three epidemics of the present: cancer, healthcare-associated infections, and bioterrorism. How have humans responded to these threats? How has medicine adapted, if it has? What are our triumphs and when have we been unable to stop our invisible adversaries?

HY349 History of France 1760-present
Hours 3
This course examines major trends in the social, cultural, economic and political history of modern France. Major themes include: republicanism and citizenship, nationalism, daily life, war, class conflict, consumerism, imperialism, the arts and gender.

HY355 German History Sc 1740
Hours 3
No description available

HY357 World War I
Hours 3
The war to end all wars,” from the European crises culminating at Sarajevo in 1914 to peacemaking at Versailles in 1919, with emphasis on the western and eastern fronts and on the war at sea.

HY358 World War II
Hours 3
The global conflict, or series of conflicts, from Manchukuo in 1931 to Tokyo Bay in 1945, with emphasis on battles on land and sea and in the air, life on the home fronts and in enemy-occupied areas, and the legacy of the war to future generations. Writing proficiency within this discipline is required for a passing grade in this course.

HY361 Russia to 1894
Hours 3
Political history of Russia from the ninth to the 19th centuries, followed by social and cultural history of the Russian revolutionary movement.

HY362 Russia-Soviet Union since 1894
Hours 3
Crisis in Russian society and the coming of the Revolution; the emergence of Stalinism; and political developments since World War II, including the disintegration of the Soviet system.

HY365 European Consumer Society
Hours 3
This course explores the evolution of modern Europe’s consumer society from the 18th century to the present to understand how changing patterns of consumption fostered new relationships between individuals and the material world.

HY368 From Columbus to Castro: Caribbean History Since 1492
Hours 3
Conquistadors! Planters! Pirates! Indians! Enslaved Africans! Religious Reformers! Independence Leaders! Radical Revolutionaries! Together these people built a new world — a world forged at the intersection of imperial ambitions and international contact, where the peoples and cultures of the Americas, Africa, and Europe collided. This class examines how colonialism, plantation slavery, the age of abolition, and the emergence of national independence movements made the modern Caribbean.

HY370 A History of the Atlantic World, 1400-1800
Hours 3
In what ways did the Atlantic Ocean resemble an early-modern super-highway, moving people, ideas, and products across its waters? How did the individuals who shaped this world — rebellious slaves, elite planters, Aztec emperors, wayward sailors, Kongolesse kings, infamous pirates and radical revolutionaries — contribute to the creation of this vibrant and dynamic world? A History of the Atlantic World answers these questions by tracing four centuries of interactions among Europeans, Africans and Native Americans, from the first European forays down the west coast of Africa in the fifteenth century, to the turbulent Age of Revolutions at the close of the eighteenth century.

HY371 History of Brazil
Hours 3
Why study Brazil? This South American nation is the fifth largest in the world in both geography and population. It is now home to the sixth largest economy in the world (surpassing the United Kingdom in 2013). Brazil is also a nation rich in racial, cultural, and linguistic diversity. In many ways, Brazil’s history of slavery, plantation agriculture, immigration, and industrialization offer a compelling distant mirror for understanding the trajectory of U.S. history and the rest of the Americas. In this class we will explore themes of gender, immigration, racial identity, industrialization, modernization, state formation, and dictatorship and democracy.

HY377 Mexico since 1810
Hours 3
Mexican Independence, the Constitution of 1824, Santa Anna, revolutions in the 19th and 20th centuries, and contemporary Mexico.

HY378 Drugs, Booze, and Mexican Society
Hours 3
This course is a hybrid survey of Mexican history since conquest, the history of the US-Mexican border, and a view of that history through the lens of drug production, consumption, and influence on Mexican society and US-Mexican relations. In short, the goal of this course is to impart an understanding of drugs as embedded in Mexican social, political, economic, and cultural contexts, providing students with a view from the Mexican side of the border. Alcohol and marijuana will be the focus of the course, but other substances will enter into certain readings throughout the semester. An important theme in this course is to answer the question “What are the origins of today’s War on Drugs?” In addition, the course will endeavour to provide a broader, international context for the development and use of intoxicants and the drug trade, both legal and illegal.
From the time of its incorporation into the Spanish Empire, the land now known as Argentina has held out the promise of fabulous wealth and opportunity. This potential made Argentina the foremost destination of European immigrants to Latin America in the nineteenth and twentieth centuries, during which time it became one of the wealthiest nations in the world. Many Argentines have anxiously awaited the day when their nation would be included among the ranks of “first world” or “civilized” nations, and they take great pride in their adoption and adaptation of European culture. However, Argentina’s history has not always been so rosy. Political violence, economic catastrophe, and social unrest define the modern Argentine experience as much as economic prosperity, industrialization, and the development of a rich and dynamic culture. From the gauchos (Argentine cowboys) of the vast Pampas to the smoke-filled tango parlors, immigrant tenements, and factories of Buenos Aires, Argentina offers a fascinating case for examining the creation and sustainment of identity and nationality in Latin America.

HY384 Ancient Egypt Near East
Hours 3
No description available

HY385 History Of Greece
Hours 3
No description available

HY386 History Of Rome
Hours 3
No description available

HY388 The Crusades
Hours 3
This course explores, from multiple perspectives, the troubled medieval marriage of religion and violence known as “the crusades.” It offers not only an overview of the traditional, largely military narrative of “numbered” crusades. It also explores the broader view – the general context of “holy war” down to c. 1100; tensions between the ideal and reality of crusading; the social and cultural impact of the crusades, for good and ill; the Muslim perception of the “Franj” as both invaders and neighbors, and the long aftermath of the crusades down through the early modern period. Later sessions of the course then turn to the range of contested historiographical issues that have characterized the study of the crusades in recent years. There are no pre-requisites for the course, though completion of our introductory Western Civilization course (HY 101/105) would be helpful.

HY395 History Colloquium
Hours 3
Intensive reading, writing, and discussion on special topics in history.
HY407 Topics in Latin American, Asian, Middle Eastern, and African History
W
Hours 3
This course covers a range of special topics in Latin American, Asian, Middle Eastern, and African history at the advanced undergraduate level. Normally taught as a relatively small course (enrollment of c. 25), it will emphasize close reading of primary sources, class discussion, and research and writing, including an series of extensive formal writing projects (usually a research paper of c. 10-15 pages). Topics will vary by instructor but will include major themes in the world civilizations. Also note that writing proficiency for this discipline is required for a passing grade in this course. Even if all other requirements are met, failure to meet the History Department’s writing standards will result in a failing grade.

Writing

HY408 Colonial Us to 1763
Hours 3
Topical survey of major themes in U.S. colonial history, with particular emphasis on Anglo-American developments.

HY409 Amer Rev/New Nation
W
Hours 3
The development of revolutionary sentiment in the North American colonies, the resulting revolution, and the subsequent efforts to establish the new nation. Writing proficiency within this discipline is required for a passing grade in this course.

Writing

HY411 Comp. Slavery & Emancipation
Hours 3
Explores the development of slavery and the struggles for emancipation in the Americas 1400-1900. Focusing on how race, gender and region shaped experiences.

HY412 Slavery America Popular Cult
Hours 3
An examination of slavery in American popular culture from the 1840s to the present. Topics and media include fiction, autobiography, film and television, advertising, and confederate celebrations.
Prerequisite(s): HY 203

HY413 Mexican War Thru Civil War
W
Hours 3
Examines how Americans thought about and used armed force from 1845 to 1865. Writing proficiency within this discipline is required for a passing grade in this course.

Writing

HY416 Us Fr Recons To Wwar I
Hours 3
Selected topics relating to the development of the U.S., especially domestic affairs and the growth of important institutions.

HY417 US from WWI to WWII
W
Hours 3

HY423 North American Borderlands: A Comparative History
Hours 3
This course begins with the Age of European Exploration, but the major focus will be on U.S.-Canadian, U.S.-Mexican, and Native American borderlands beginning with the 16th Century. Even though borderlands are frequently located at the peripheries of empires and nations, they play a major—and often overlooked—role in shaping how centers of national power—major cities, state governments, and national capitols—have defined their relation to issues such as territorial expansions, sovereignty, immigration, labor, community formation, and race and ethnicity. As a comparative course, we will address multiple themes, including legal regimes in the borderlands, inter-American power relations, immigration, citizenship, human rights, and sovereignty; intercultural and racial mixture and conflict; nationalism, transnationalism, and internationalism; openings and closing of borders; and the multiple meanings and locations of borderlands, making this course appropriate not only for students of history, but also of anthropology, sociology, and political science.

HY424 American Thought Before 1860
W
Hours 3
American intellectual/cultural history to 1860. Includes changing ideas about society, politics, morality, science, nature, religion, gender and race. Writing proficiency within this discipline is required for a passing grade in this course.

Writing

HY428 Women In America
Hours 3
Examines the experiences of women from mid-nineteenth century to present with special attention to ideologies about women's roles and effects of region, race, class and ethnicity.

HY429 Spanish Frontier in N. America
Hours 3
History of the Spanish advance into the present-day borders of the U.S., explaining how Spain fought and finally succumbed to the more dynamic and aggressive French and English.

HY430 UG Research Seminar
W
Hours 3
This course offers students extensive training in research methods and writing. It will normally culminate in a 15 page research paper based on primary source materials, as well as an oral presentation. Instructors may also choose to offer a range of equivalent alternatives at their discretion. In all events the course will offer students a rewarding opportunity to practice the craft of historical research. A grade of C or higher is required for credit in the major, and writing proficiency within this discipline is required for a passing grade in this course.

Writing
HY432 Gender and Native Americans: Beyond Pocahontas
W
Hours 3
Explores contact between Native Americans and Europeans in the early Americas through attention to gender, stressing the diversity of Native life ways.

Writing

HY442 The Middle Ages
Hours 3
Foundations of the modern world in barbarian Europe: retreat into the countryside and private government, recovery of public institutions, money economy, and cultural vitality.

HY443 Renaissance
W
Hours 3
Study of intellectual movements associated with the Renaissance, including readings in Machiavelli’s Prince, More’s Utopia, and other humanist writings; social life, economy, religion, politics, and statecraft. Writing proficiency within this discipline is required for a passing grade in this course.

Writing

HY444 Reform & Counter-Reformation
W
Hours 3
History of the separation of the Catholic and Protestant churches from the ideal of the universal Christian church and late medieval religious practice. Writing proficiency within this discipline is required for a passing grade in this course.

Writing

HY446 Age of Reason 1715-89
Hours 3
The Enlightenment of Voltaire, Diderot, Rousseau, Franklin, Hume, Goethe, and Kant, whose writings exalted individual reason, tolerance, liberalism, science, and public service and set the stage for the French Revolution.

HY448 Women in Europe since 1750
Hours 3
This course surveys women’s lives in Europe from 1750 to the present. Themes explored include: identity construction, power relationships, domesticity, class, war, consumerism and sexuality.

HY451 Early Modern Germany
W
Hours 3
This course examines the political, religious, intellectual, military, cultural and social history of German speaking central Europe from the Eve of the Protestant Reformation to the eve of the French Revolution. Writing proficiency within this discipline is required for a passing grade in this course.

Writing

HY455 The Darwinian Revolution
W
Hours 3
Though it is often believed to begin with Charles Darwin, Evolutionary Theory has a history dating back to the seventeenth century. In this course we will focus on this history from those early beginnings through modern genetics and epigenetics. Along with Charles Darwin himself, we will explore the contributions of other well-known scientists, such as Lamarck, Charles Lyell, T. H. Huxley, Gregor Mendel, and T. H. Morgan. Additionally, we will familiarize ourselves with the ideas of less well known but important individuals whose theories are crucial for understanding the development of evolutionary theory and the shaping of Darwin’s legacy. Throughout the course, we will also examine their contributions in specific historical contexts, pausing to pay particular attention to social responses to the developing theory of Darwinism. Ultimately, we will leave with a fuller understanding of and a greater appreciation for what we now term “evolutionary theory.” As a “W” course, writing proficiency within this discipline is required for a passing grade. In other words, no matter how well you do in other aspects of the course, you must write with the skill normally required of upper level students in History to pass. Written assignments will require coherent, logical, and carefully edited prose. Students will be required to demonstrate higher-level critical thinking skills.

Writing

HY471 Age Exploration & Conquest
Hours 3
A history of exploration during the 15th and 16th centuries, when European nations expanded by sea voyages and conquest, settling in the Americas, Africa, and Asia.

HY474 Relation US Latin Amer
W
Hours 3
Chronological survey of diplomatic, economic, and cultural relations, with emphasis on the 20th century. Writing proficiency within this discipline is required for a passing grade in this course.

Writing

HY475 Caribbean Basin 1492 - Present
Hours 3
Traces the evolution of Caribbean and Central American nations from the first European settlements to the present.

HY480 Survey of Military History
Hours 3
Introduction to the ways in which human beings have organized and used armed force over the course of recorded history.

HY481 War/Dipl. in Med & Mod. Europe
W
Hours 3
This course examines developments in European warfare and diplomatic practice in the late medieval and early modern periods. Writing proficiency within this discipline is required for a passing grade in this course.

Writing
HY482 War & Religion in the West

W

Hours 3

This course examines the complex interrelationships between religion and armed conflict in the Western tradition from the ancient world into modern times. Writing proficiency within this discipline is required for a passing grade in this course.

Writing

HY483 Thirty Years' War

Hours 3

This course explores the background, events, and consequences of the Thirty Years' War that raged in the center of Europe from 1618 to 1648. We will examine not only the history of the war itself, but also the multiple controversies that continue to divide scholars over the causes, nature, and significance of the conflict. Readings will include both primary and secondary sources.

HY490 England under Tudors

W

Hours 3

Development of an early modern state: establishment of a strong central monarchy, religious crises from the Reformation to the Puritan movement, and exuberance and excess of an expanding society. Writing proficiency within this discipline is required for a passing grade in this course.

Writing

HY491 England under Stuarts

W

Hours 3

How Englishmen of the 17th century worked out the great questions of their day: Was liberty compatible with strong government? Could English elites share power without destroying it? What did God want for England? Writing proficiency within this discipline is required for a passing grade in this course.

Writing

HY493 Britain in the 18th Century

W

Hours 3

From the Hanoverian Succession in 1714 to victory at Waterloo in 1815: political development, the Agrarian and Industrial Revolutions, John Wesley, Samuel Johnson, and an apparently endless succession of wars. Writing proficiency within this discipline is required for a passing grade in this course.

Writing

HY494 Britain in the Victorian Age

W

Hours 3

Britain at her apogee: possessor of the empire on which the sun never set, world economic leader, nation of Peel and Palmerston, Gladstone and Disraeli, Dickens and Trollope, Tennyson and Browning, Turner and Constable.

Writing

HY498 Honors Thesis I

UH

Hours 3

Independent research and writing to produce a senior honors thesis in history.

University Honors

HY499 Honors Thesis II

UH, W

Hours 3

History 499 is the writing portion of the History honors thesis course sequence. Students taking HY 499 will have completed HY 498, Honors Thesis I, in which they will have selected and researched a topic in conjunction with their advising professor. Individual requirements may vary, but all honors theses will be based on original primary source research, and typically are about fifty pages/fourteen thousand words in length. The thesis will demonstrate advanced writing and research ability for the undergraduate level. Per the University designation for Writing courses, "Writing proficiency for this discipline is required for a passing grade in this course." Even if all other requirements are met, failure to meet the History Department's writing standards will result in a failing grade. In order to complete the course, two professors other than the professor of record must read and approve the final thesis.

Prerequisite(s): HY 399 and HY 498

University Honors, Writing

INDO101 Elem Indonesian Language

Hours 3

Contemporary Indonesian: speaking, reading, and writing. Course involves directed-self-instructional approach in the Critical Languages Center. Students are required to study the textbook and practice with assigned audio visual materials (CDs, DVDs, or computer files). Students have practice sessions three hours per week with a “language trainer” who is a native/near native (or superior level) speaker of the language. Native speakers of this language cannot take this course. Any students with background knowledge of this language must see the CLC director for permission before registering. Not repeatable without permission of the CLC director.

INDO102 Elem Indonesian Language

Hours 3

Contemporary Indonesian: speaking, reading, and writing. Course involves directed self-instructional approach in the Critical Languages Center. Students are required to study the textbook and practice with assigned audio visual materials (CDs, DVDs, or computer files). Students have practice sessions three hours per week with a “language trainer” who is a native/near native/superior-level speaker of the language. Not repeatable without permission of the CLC director.

Prerequisite(s): INDO 101

INDO102 Elem Indonesian Language

Hours 3

Contemporary Indonesian: speaking, reading, and writing. Course involves directed self-instructional approach in the Critical Languages Center. Students are required to study the textbook and practice with assigned audio visual materials (CDs, DVDs, or computer files). Students have practice sessions three hours per week with a “language trainer” who is a native/near native/superior-level speaker of the language. Not repeatable without permission of the CLC director.

Prerequisite(s): INDO 101

INDO101 Elem Indonesian Language

Hours 3

Contemporary Indonesian: speaking, reading, and writing. Course involves directed self-instructional approach in the Critical Languages Center. Students are required to study the textbook and practice with assigned audio visual materials (CDs, DVDs, or computer files). Students have practice sessions three hours per week with a “language trainer” who is a native/near native/superior-level speaker of the language. Not repeatable without permission of the CLC director.

Prerequisite(s): INDO 102
IT101 Introductory Italian I  
Hours 4  
Five hours of instruction per week. The course is the first semester of college-level language study. Offered each semester.  
Foreign Language, Humanities  

IT102 Introductory Italian II  
Hours 4  
Five hours of instruction per week. The course is the second semester of college-level language study. Offered each semester.  
Prerequisite(s): IT 101 with a grade of C- or instructor permission  
Foreign Language, Humanities  

IT201 Intermediate Italian I  
Hours 3  
Basic grammar review, development of writing skills, and introduction to literature.  
Prerequisite(s): IT 102 with a grade of C- or instructor permission  
Humanities  

IT202 Intermediate Italian  
Hours 3  
Basic grammar review, development of writing skills, and introduction to literature.  
Prerequisite(s): IT 201 with a grade of C- or instructor permission  
Humanities  

IT233 Introduction to Italian Cinema  
Hours 3  
Chronological overview of the history of Italian cinema from its early days to the present. The course is in English and the films shown are in Italian with English subtitles. Writing proficiency within the discipline is required for a passing grade in this course.  
Writing  

IT352 Italian Conversation - Study Abroad  
Hours 3  
This course focuses on the development of conversational skills through group discussion, oral presentations, vocabulary building, and other related activities. It is taught at the Leonardo Da Vinci School in Florence, Italy. The Leonardo Da Vinci School is licensed by the Italian Ministry of Education and recognized by the Region of Tuscany as a Professional Training Center.  
Prerequisite(s): IT 102 and/or permission of the instructor.  

IT353 Italian Conversation  
Hours 3  
Development of conversational skills through role-playing, oral presentations, and vocabulary building. May be taken once in Italy (IT 352) and once on campus (IT 353).  
Prerequisite(s): IT 202 with a grade of C- or instructor permission  

IT354 ADVANCED GRAMMAR AND COMPOSITION – STUDY ABROAD  
Hours 3  
This is a combined writing theory and writing skills course focusing upon more advanced notions of Italian grammar and on the development of techniques for written expression. It is taught at the Leonardo Da Vinci School in Florence, Italy.  
Prerequisite(s): IT 102 and/or permission of the instructor.  

IT356 Adv Grammar Composition  
Hours 3  
A combined writing theory and writing skills course focusing upon more advanced notions of Italian grammar and on the development of techniques for written expression. May be taken once in Italy (IT 354) and once on campus (IT 356).  
Prerequisite(s): IT 202 with a grade of C- or instructor permission  

IT361 Intro Romance Linguistic  
Hours 3  
Introduction to linguistic science and its use in describing language in general and the Romance languages in particular.  
Prerequisite(s): No prerequisite because this course is taught in English.  

IT364 Masterpieces of Italian Literature in Translation: From the Middle Ages to Early Modernity  
Hours 3  
Study of major works in Italian literature and though from Dante to the early modern period. Who are we and what is our place in the universe? What do we know? What can we know? The men and women of Italy grappled with these questions—from Dante’s vision of hell to Galileo’s discoveries in the heavens, from Michelangelo’s exploration of the human form to Cesare Beccaria’s evaluation of the ethics of bodily torture. This course traces Italian literature and thought in the Middle Ages, Renaissance, Baroque, and Age of Enlightenment (13th-18th centuries). Through a broad spectrum of genres (poetry, epic, short stories, letters, comedy, treatises, dialogue, librettos), it examines questions of love, sin, beauty, power, appearance, truth, deception, and civility. By analyzing major moments in intellectual history, from the birth of humanism to the scientific revolution, this class also considers the role and importance of the liberal arts and suggests that in these centuries literature, art, music, theater, philosophy, history, and science were interwoven disciplines proper to man’s understanding of self and society.  
Literature  

IT380 Special Topics  
Hours 3  
May be repeated for credit if subject matter varies.  
Prerequisite(s): IT 353 or IT 356 with a grade of C- or instructor permission.
IT480 Undergraduate Seminar
Hours 3
The subject matter varies. Intensive study of one or more significant subjects, authors, periods, works, or genres not studied in depth in other courses. May be repeated for credit. Offered according to demand.
Prerequisite(s): IT 380, or instructor permission.

JA101 Elementary Japanese I
FL, HU
Hours 4
Five hours of instruction per week. Acquisition of elementary Japanese language skills in listening, speaking, reading, and writing.
Foreign Language, Humanities

JA102 Elementary Japanese II
FL, HU
Hours 4
Japanese 102 is the successor of Japanese 101, and it is designed for beginning learners. Students will learn vocabulary and sentence structures for use in essential daily situations through various forms of communicative practice. While continuing to develop students’ communicative competence in Japanese, six cultural topics will be introduced and explored from each chapter of the textbook through short readings, lectures, and videos.
Prerequisite(s): JA 101
Foreign Language, Humanities

JA201 Intermediate Japanese I
HU
Hours 3
Japanese 201 is the successor of Japanese 102, and it is designed for intermediate learners. Students will learn vocabulary and sentence structures for use in essential daily situations through various forms of communicative practice. While continuing to develop students’ communicative competence in Japanese, five cultural topics will be introduced and explored from each chapter of the textbook through short readings about planning trip in Japan, Japanese and marriage and Japanese host family, lectures, and videos about Japanese famous sightseeing places. A continuation of JA 102.
Prerequisite(s): JA 102
Humanities

JA202 Intermediate Japanese II
HU
Hours 3
A continuation of JA 201.
Prerequisite(s): JA 201
Humanities

JA301 Third Year Japanese I
Hours 3
A continuation of JA 202. The course is for students who have a comprehensive grammatical knowledge and are already able to communicate in Japanese. Students will work in this class to improve the accuracy and authenticity of socially correct communication of Japanese. The instructor conducts the class extensively in Japanese whenever possible, and English explanations of the expressions will be minimal. Students are required to communicate entirely in Japanese in class.
Prerequisite(s): Complete/earn a grade of C or higher in JA202

JA302 Third Year Japanese II
Hours 3
A continuation of JA 301.
Prerequisite(s): Complete a grade of C or higher in JA 301 or consent of instructor

JA356 Traditional Japanese Lit Trans
W
Hours 3
Introduction to Japanese literature from the earliest times through the Tokugawa period. No knowledge of Japanese is required.
Writing

JA357 Japanese Literature & Film
Hours 3
Introduction to modern Japanese literature and movie from the Meiji period to the present. No knowledge of Japanese is required. Students will learn historical/technical aspects, and will develop critical thinking skills based on the reading of Japanese stories and viewing of Japanese films and understand the value of Japanese literature, artistic concept in cultural context.

JA371 Japanese Culture I
Hours 3
This course is for students who need fundamental knowledge of current Japanese culture. The topics include modern history, characteristics of Japanese business, social problems, traditional religious and philosophy of the Japanese people.
Prerequisite(s): JA 102

JA372 Japanese Culture II
Hours 3
This course is for students who need fundamental knowledge of current Japanese culture. The topics include traditional art forms, Buddhism sculptures, movies, traditional music and theater, subculture and marital arts.
Prerequisite(s): JA 102

JA390 Topics Japanese Studies
Hours 3
Discussion and research of various topics related to Japanese language/culture. Topics may change each semester, such as KANJI, or traditional and modern Japanese culture including theatrical arts, music, and religious thoughts of Japan. With permission of the program director, this course may be applied toward the Japanese minor.
JA410 4 Yr Read/Write Japanese
Hours 3
A continuation of JA 302 with emphasis on development of reading and writing skills.
Prerequisite(s): Earn a grade of C or higher in JA 302 or consent of instructor.

JA411 4th Year Spoken Japanese
Hours 3
A continuation of JA 410 with emphasis on development of reading and writing skills.
Prerequisite(s): Earn a grade of C or higher in JA 410 or consent of instructor.

JA481 Directed Readings
Hours 1-4
The purpose of the course is for students who have an advanced level of proficiency in Japanese to obtain a higher level of Japanese reading and writing ability (equivalent to ####### 1#). The instructor will conduct the class in Japanese except for the study of translation / interpretation. Students are required to read short novels, newspaper articles, journals, and stories for specified topics, and discuss in Japanese during the class meetings. Also students write papers in Japanese.
Prerequisite(s): Complete/earn a grade of B- or higher in JA 411.

JA482 Directed Readings
Hours 1-4
The purpose of the course is for students who have an advanced level of proficiency in Japanese to obtain a higher level of Japanese reading and writing ability (equivalent to ####### 1#). The instructor will conduct the class in Japanese except for the study of translation / interpretation. Students are required to read short novels, newspaper articles, journals, and stories for specified topics, and discuss in Japanese during the class meetings. Also required is the writing of papers in Japanese.
Prerequisite(s): JA481 or consent of instructor.

KOR102 Elementary Korean
FL
Hours 3
Contemporary Korean: speaking, reading, and writing. Course involves directed self-instructional approach in the Critical Languages Center. Students are required to study the textbook and practice with assigned audio visual materials (CDs, DVDs, or computer files). Students have practice sessions three hours per week with a “language trainer” who is a native/near native/superior-level speaker of the language. Not repeatable without permission of the CLC director. Offered each semester. This is a SUPERVISED-SELF-STUDY class. The language “trainer” will help students develop their communicative ability during class meetings. During the sessions students will actively participate in practicing spoken language to acquire better pronunciation and conversation skills. English use will be kept to a minimum in class. Language trainers will monitor active participation throughout the semester by use of the STUDENT PERFORMANCE SHEET reports which will be sent to the director of the CLC. Regular class attendance and participation is required.
Prerequisite(s): KOR 101
Foreign Language

KOR201 Intermediate Korean
Hours 3
Continuation of Korean language on the intermediate level. Emphasis is on the development of reading skills and writing proficiency. Offered according to demand. Not repeatable without permission of the CLC director.
Prerequisite(s): KOR 102

KOR202 Intermediate Korean
Hours 3
Continuation of KOR 201. Emphasis is on the development of reading skills and writing proficiency. Offered according to demand. Not repeatable without permission of the CLC director.
Prerequisite(s): KOR 201

LA101 Elementary Latin I
FL, HU
Hours 3
Beginning fundamentals of Latin grammar and syntax. Offered in the fall semester.
Foreign Language, Humanities

LA102 Elementary Latin II
FL, HU
Hours 3
Continued study of the fundamentals of Latin grammar and syntax. Offered in the spring semester.
Prerequisite(s): LA 101
Foreign Language, Humanities
LA201 Intermed Latin Read I

HU

Hours 3

Introduction to and practice at reading Latin literature. Offered in the fall semester.

Prerequisite(s): LA 102

Humanities

LA202 Intermed Latin Read II

HU

Hours 3

Selected readings from Latin literature. Offered in the spring semester.

Prerequisite(s): LA 201

Humanities

LA301 Survey Lit Roman Republ

Hours 3

Readings in Latin literature to the time of Julius Caesar. Offered in the fall semester.

LA302 Survey Lit Of Empire

Hours 3

Selected readings in later Roman literature. Offered in the spring semester.

LA490 Readings In Latin Literature

Hours 3

The subject matter varies. May be repeated for credit. Offered according to demand.

Prerequisite(s): LA 301 or LA 302

MATH100 Introductory Algebra

Hours 3

Brief review of arithmetic operations and basic algebraic concepts: factoring, operations with polynomials and rational expressions, linear equations and word problems, graphing linear equations, simplification of expressions involving radicals or negative exponents, and elementary work with quadratic equations. Grades are reported as pass/fail.

MATH100 Intermediate Algebra

Hours 3

Prerequisites: Placement and two units of college-preparatory mathematics; if a student has previously been placed in MATH 005, a grade of "C-" or higher in MATH 005 is required. Intermediate-level course including work on functions, graphs, linear equations and inequalities, quadratic equations, systems of equations, and operations with exponents and radicals. The solution of word problems is stressed. NOT APPLICABLE to UA Core Curriculum mathematics requirement. Grades are reported as A, B, C or NC (No Credit).

MATH110 Finite Mathematics

MA

Hours 3

This course is intended to give an overview of topics in finite mathematics with applications. This course covers mathematics of finance, logic, set theory, elementary probability and statistics. This course does not provide sufficient background for students who will need to take Precalculus Algebra or Calculus.

Prerequisite(s): UA Math Placement Test Score of 190-600 or ACT Math Subscore of 18 or old SAT Math Subscore of 440 or new SAT Math Subscore of 480 or a C- or higher in MATH 100

Mathematics

MATH112 Precalculus Algebra

MA

Hours 3

A higher-level course emphasizing functions including polynomial functions, rational functions, and the exponential and logarithmic functions. Graphs of these functions are stressed. The course also includes work on equations, inequalities, systems of equations, the binomial theorem, and the complex and rational roots of polynomials. Applications are stressed. Grades are reported as A, B, C or NC (No Credit). Degree credit will not be granted for both MATH 115 and (MATH 112 or MATH 113).

Prerequisite(s): UA Math Placement Test Score of 310-439 or ACT Math Subscore of 24 or old SAT Math Subscore of 560 or new SAT Math Subscore of 580 or C- or higher in MATH 100

Mathematics

MATH113 Precalculus Trigonometry

MA

Hours 3

Continuation of MATH 112. The course includes study of trigonometric functions, inverse trigonometric functions, trigonometric identities and trigonometric equations. Complex numbers, De Moivre's Theorem, polar coordinates, vectors and other topics in algebra are also addressed, including conic sections, sequences and series. Grades are reported as A, B, C or NC (No Credit). Degree credit will not be granted for both MATH 115 and (MATH 112 or MATH 113).

Prerequisite(s): C- or higher in MATH 112

Mathematics

MATH115 Precalc Algebra & Trig

MA

Hours 3

Properties and graphs of exponential, logarithmic, and trigonometric functions are emphasized. Also includes trigonometric identities, polynomial and rational functions, inequalities, systems of equations, vectors, and polar coordinates. Grades are reported as A, B, C, or NC (No credit). Degree credit will not be granted for both MATH 115 and (MATH 112 or MATH 113).

Prerequisite(s): UA Math Placement Test Score of 370-439 or ACT Math Subscore of 28 or old SAT Math Subscore of 630 or new SAT Math Subscore of 650

Mathematics
MATH121 Calculus & Applications
MA
Hours 3
A brief overview of calculus primarily for students in the Culverhouse College of Commerce and Business Administration. This course does not provide sufficient background for students who will need higher levels of Calculus. Note: This course does not satisfy the requirement for MATH 125 or 126. Degree credit will not be granted for both MATH 121 and MATH 125 or MATH 145.
Prerequisite(s): UA Math Placement Test Score of 440-600 or ACT Math Subscore of 30 or old SAT Math Subscore of 680 or new SAT Math Subscore of 710 or a C- or higher in MATH 112 or MATH 115.
Mathematics

MATH125 Calculus I
MA
Hours 4
This is the first of three courses in the basic calculus sequence. Topics include the limit of a function; the derivative of algebraic, trigonometric, exponential, and logarithmic functions; and the definite integral. Applications of the derivative are covered in detail, including approximations of error using differentials, maxima and minima problems, and curve sketching using calculus. There is also a brief review of selected precalculus topics at the beginning of the course. Degree credit will not be granted for both MATH 121 and MATH 125 or MATH 145.
Prerequisite(s): MATH 113 and MATH 112; or MATH 115
Mathematics

MATH126 Calculus II
MA
Hours 4
This is the second of three courses in the basic calculus sequence. Topics include vectors and the geometry of space, applications of integration, integration techniques, L'Hopital's Rule, improper integrals, infinite series, conic sections, plane curves, parametric equations, and polar coordinates.
Prerequisite(s): A grade of B- or higher in MATH 125 or MATH 145 or a score of 4 or 5 on AP Calculus AB or a score of 4 or 5 on AP Calculus BC: AB Subscore.
Mathematics, University Honors

MATH145 Honors Calculus I
MA, UH
Hours 4
This course covers the same material as MATH 125 but in a depth appropriate for honors students. It is the first course in the three part honors calculus sequence for students majoring in mathematics, science or engineering. Topics include limits, continuity, differentiation, applications of differentiation, and integration. Applications of the derivative are covered in detail, including approximation of errors using differentials, maxima and minima problems, curve sketching, optimization problems, and Newton's method. Topics on integration include Riemann sums, properties of definite integrals, integration by substitution and integrals involving logarithmic exponential and trigonometric functions.
Prerequisite(s): ACT Math Subscore of 32 or old SAT Math Subscore of 730 or new SAT Math Subscore of 760 or a B- or higher in (MATH 112 and MATH 113) or MATH 115
Mathematics, University Honors

MATH146 Honors Calculus II
MA, UH
Hours 4
This course covers the same material as MATH 126 but in a depth appropriate for honors students. It is the second course in the three part honors calculus sequence for students majoring in mathematics, science or engineering. Topics include vectors and the geometry of space, L'Hospital's Rule, applications of integration, integration techniques, improper integrals, infinite series, conic sections, plane curves, parametric equations, and polar coordinates.
Prerequisite(s): A grade of B- or higher in MATH 125 or MATH 145 or a score of 4 or 5 on AP Calculus AB or a score of 4 or 5 on AP Calculus BC: AB Subscore.
Mathematics, University Honors

MATH208 Number And Operations
Hours 3
Arithmetic of whole numbers and integers, fractions, proportion and ratio, and place value. Class activities initiate investigations underlying mathematical structure in arithmetic processes and include hands-on manipulatives for modeling solutions. Emphasis is on the explanation of the mathematical thought process. Students are required to verbalize explanations and thought processes and to write reflections on assigned readings on the teaching and learning of mathematics.
Prerequisite(s): MATH 100 or MATH 110 or MATH 112 or MATH 113 or MATH 125
Mathematics

MATH209 Geometry & Measurement
Hours 3
Properties of two- and three-dimensional shapes, rigid motion transformations, similarity, spatial reasoning, and the process and techniques of measurement. Class activities initiate investigations of underlying mathematical structure in the exploration of shape and space. Emphasis is on the explanation of the mathematical thought process. Technology specifically designed to facilitate geometric explorations is integrated throughout the course.
Prerequisite(s): MATH 208
MATH210 Data Analysis Probabil Stats
Hours 3
Data analysis, statistics, and probability, including collecting, displaying/representing, exploring, and interpreting data, probability models, and applications. Focus is on statistics for problem solving and decision making, rather than calculation. Class activities deepen the understanding of fundamental issues in learning to work with data. Technology specifically designed for data-driven investigations and statistical analysis is integrated throughout the course.
Prerequisite(s): MATH 208

MATH227 Calculus III
MA
Hours 4
This is the third of three courses in the basic calculus sequence. Topics include: vector functions and motion in space; functions of two or more variables and their partial derivatives; and applications of partial derivatives (including Lagrange multipliers), quadric surfaces, multiple integration (including Jacobian), line integrals, Green's Theorem, vector analysis, surface integrals and Stokes' Theorem.
Prerequisite(s): A grade of B- or higher in MATH 126 or MATH 146 or a score of 4 or 5 on AP Calculus BC exam.

MATH237 Introduction to Linear Algebra
C, MA
Hours 3
Fundamentals of linear algebra and matrix theory are covered. Topics include vectors in Euclidean spaces, solving systems of linear equations, matrix algebra, inverses, determinants, eigenvalues, and eigenvectors. Also vector spaces and the basic notions of span, subspace, linear independence, basis, dimension, linear transformation, kernel and range are considered. Computing proficiency is required for a passing grade in this course.
Prerequisite(s): (MATH 126 or MATH 146) and CS 102

MATH238 Appld Diff Equations I
C, MA
Hours 3
Introduction to analytic and numerical methods for solving differential equations. Topics include numerical methods and qualitative behavior of first order equations, analytic techniques for separable and linear equations, applications to population models and motion problems; techniques for solving higher order linear differential equations with constant coefficients (including undetermined coefficients, reduction of order, and variation of parameters), applications to physical models; the Laplace transform (including initial value problems with discontinuous forcing functions). Use of mathematics software is an integral part of the course. Computing proficiency is required for a passing grade in this course.
Prerequisite(s): (MATH 126 or MATH 146) and CS 102

MATH247 Honors Calculus III
MA, UH
Hours 4
This course covers the same material as MATH 227 but in a depth appropriate for honors students. It is the third course in the three part honors calculus sequence for students majoring in mathematics, science or engineering. Topics include analytic geometry in space, vector-valued functions and motion in space, functions of two or more variables and their partial derivatives, applications of partial differentiation (including Lagrangian multipliers), quadric and cylindrical surfaces, and multiple integration (including Jacobian) and applications, line integrals, Green's Theorem, curl and divergence, surface integrals, and Stokes' Theorem.
Prerequisite(s): (MATH 227 or MATH 247) and (CS 100 or AEM 249 or ECE 285 or RRS 101)

MATH300 Intro Numerical Analysis
Hours 3
Credit will not be granted for both MATH 300 and MATH 411. A beginning course in numerical analysis. Topics include number representation in various bases, error analysis, location of roots of equations, numerical integration, interpolation and numerical differentiation, systems of linear equations, approximations by spline functions, and approximation methods for first-order ordinary differential equations and for systems of such equations.
Prerequisite(s): (MATH 227 or MATH 247) and (CS 100 or AEM 249 or ECE 285 or RRS 101)

MATH301 Discrete Mathematics
W
Hours 3
An introduction to mathematical logic and proof within the context of discrete structures. Topics include basic mathematical logic, elementary number theory, basic set theory, functions, and relations. Writing proficiency within this discipline is required for a passing grade in this course.
Prerequisite(s): MATH 125 or MATH 145

MATH302 Topics in Discrete Mathematics
W
Hours 1
A supplemental course in discrete mathematics covering select topics of interest in computer science. Topics include graphs and trees, finite state automata and regular expressions, efficiency of algorithms.
Prerequisite(s): MATH 301

MATH343 Appl Diff Equations II
C, MA
Hours 3
Continuation of Appl Diff Equations I (Math 238) and is designed to equip students with further methods of solving differential equations. Topics include initial value problems with variable coefficients, methods of infinite series, two-point boundary value problems, wave and heat equations, Fourier series, Sturm-Liouville theory, phase plane analysis, and Liapunov's second method.
Prerequisite(s): MATH 238
MATH355 Theory Of Probability
Hours 3
The foundations of the theory of probability, laws governing random phenomena and their practical applications in other fields. Topics include: probability spaces; properties of probability set functions; conditional probability; and an introduction to combinatorics, discrete random variables, expectation of discrete random variables, Chebyshev's Inequality, continuous variables and their distribution functions, and special densities.
Prerequisite(s): MATH 227 or MATH 247

MATH371 Advanced Linear Algebra
Hours 3
Topics include inner product spaces, norms, self adjoint and normal operators, orthogonal and unitary operators, orthogonal projections and the spectral theorem, bilinear and quadratic forms, generalized eigenvectors, and Jordan canonical form.
Prerequisite(s): MATH 237

MATH382 Advanced Calculus
Hours 3
Further study of calculus with emphasis on theory. Topics include limits and continuity of functions of several variables; partial derivatives; transformations and mappings; vector functions and fields; vector differential operators; the derivative of a function of several variables as a linear transformation; Jacobians; change of variables in multiple integrals; line and surface integrals; and Green's, Stokes', and Divergence Theorems.
Prerequisite(s): MATH 227 or MATH 247; and MATH 237.

MATH402 History Of Mathematics
Hours 3
Survey of the development of some of the central ideas of modern mathematics, with emphasis on the cultural context. Writing proficiency within this discipline is required for a passing grade in this course.

MATH403 Adv Math Connections & Devlpmn
Hours 3
Explore the interconnections between the algebraic, analytic, and geometric areas of mathematics with a focus on properties of various number systems, importance of functions, and the relationship of algebraic structures to solving analytic equations. This exploration will also include the development and sequential nature of each of these branches of mathematics and how it relates to the various levels within the algebra mathematics curriculum.
Prerequisite(s): MATH 237 and MATH 301

MATH404 Topics Math Secondary Teachers
Hours 1
This is a seminar style course focusing on various mathematical topics related to the high school curriculum. Topics will vary depending upon instructor.
Prerequisite(s): MATH 301

MATH405 Geometry For Teachers
Hours 3
This course will give an overview of geometry from a modern point of view. Axiomatic, analytic, and transformation approaches to geometry will be used. The relationship between Euclidean geometry, the geometry of complex numbers, and trigonometry will be emphasized.
Prerequisite(s): MATH 403

MATH409 Advanced Data Analysis
Hours 3
Concepts and techniques of posing questions and collecting, analyzing, and interpreting data. Topics include: univariate and bivariate statistics, probability, simulation, confidence intervals and hypothesis testing.
Prerequisite(s): MATH 125 and ST 260

MATH410 Numerical Linear Algebra
Hours 3
Further study of matrix theory, emphasizing computational aspects. Topics include direct solution of linear systems, analysis of errors in numerical methods for solving linear systems, least-squares problems, orthogonal and unitary transformations, eigenvalues and eigenvectors, and singular value decomposition.
Prerequisite(s): MATH 237 and (CS 100 or AEM 249 or ECE 285 or RRS 101)

MATH411 Numerical Analysis I
Hours 3
Credit will not be granted for both MATH 411 and MATH 300. A rigorous introduction to numerical methods. Topics include numerical methods for solving nonlinear equations; iterative methods for solving systems of equations; approximations and interpolations; numerical differentiation and integration; and numerical methods for solving initial value problems for ordinary differential equations.
Prerequisite(s): MATH 237 and MATH 238 and (CS 100 or AEM 249 or ECE 285 or RRS 101)

MATH412 Numerical Analysis II
Hours 3
This is the second course in the numerical analysis sequence for senior students in mathematics, science, or engineering. Topics include numerical methods for solving boundary value problems, ordinary differential equations, and partial differential equations, multistep methods for initial value problems, and approximation theory (least-squares problems, fast Fourier Transforms).
Prerequisite(s): MATH 343 and MATH 411

MATH420 Linear Optimization Theory
Hours 3
In-depth theoretical development and analysis of linear programming. Topics include formulation of linear programs, various simplex methods, duality, sensitivity analysis, transportation and networks and various geometric concepts.
Prerequisite(s): (MATH 227 OR MATH 247) AND MATH 237 AND (CS 100 OR AEM 249 OR ECE 285 OR RRS 101)
MATH421 Non-Linear Optimization Theory  
Hours 3  
This course is an introduction to nonlinear programming. Topics will include necessary and sufficient conditions for optimality, as well as basic theory and numerical algorithms for several traditional optimization methods, e.g., basic descent methods, conjugate direction methods, quasi-Newton methods, penalty and barrier methods, Lagrange multiplier methods. A brief introduction to selected modern topics may be added if time permits.  
Prerequisite(s): MATH 237 and (MATH 227 or MATH 247) and (CS 100 or AEM 249 or ECE 285 or RRS 101)  

MATH422 Mathematics For Finance I  
Hours 3  
Topics include the basic no-arbitrage principle, binomial model, time value of money, money market, risky assets such as stocks, portfolio management, forward and future contracts, and interest rates.  
Prerequisite(s): (MATH 227 or MATH 247) and MATH 355  

MATH432 Graph Theory & Applications  
Hours 3  
Survey of several of the main ideas of general theory with applications to network theory. Topics include oriented and nonoriented linear graphs, spanning trees, branching and connectivity, accessibility, planar graphs, networks and flows, matching, and applications.  
Prerequisite(s): MATH 237 or MATH 257  

MATH441 Boundary Value Problems  
Hours 3  
Methods of solving the classical second-order linear partial differential equations: Laplace's equation, the heat equation, and the wave equation, together with appropriate boundary or initial conditions. Usually offered in the fall semester. Prerequisite: Math 343, or consent of the department.  
Prerequisite(s): MATH 343  

MATH442 Integral Transf & Asympt  
Hours 3  
Complex variable methods, integral transforms, asymptotic expansions, WKB method, Airy's equation, matched asymptotics, and boundary layers.  
Prerequisite(s): C- or higher in MATH 441  

MATH451 Math Stats W/Applictn I  
Hours 3  
Introduction to mathematical statistics. Topics include bivariate and multivariate probability distributions, functions of random variables, sampling distributions and the central limit theorem, concepts and properties of point estimators, various methods of point estimation, interval estimation, tests of hypotheses and Neyman-Pearson lemma with some applications.  
Prerequisite(s): MATH 237 and MATH 355  

MATH452 Math Stats W/Applictn II  
Hours 3  
Further applications of the Neyman-Pearson Lemma, Likelihood Ratio tests, Chi-square test for goodness of fit, estimation and test of hypotheses for linear statistical models, analysis of variance, analysis of enumerative data, and some topics in nonparametric statistics.  
Prerequisite(s): MATH 451  

MATH457 Stochastic Processes I  
Hours 3  
Introduction to the basic concepts and applications of stochastic processes. Markov chains, continuous-time Markov processes, Poisson and renewal processes, and Brownian motion. Applications of stochastic processes including queueing theory and probabilistic analysis of computational algorithms.  
Prerequisite(s): MATH 355  

MATH460 Intro Differential Geom  
Hours 3  
Introduction to basic classical notions in differential geometry: curvature, torsion, geodesic curves, geodesic parallelism, differential manifold, tangent space, vector field, Lie derivative, Lie algebra, Lie group, exponential map, and representation of a Lie group. Usually offered in the spring semester.  
Prerequisite(s): MATH 486  

MATH465 Intro General Topology  
Hours 3  
Basic notions in topology that can be used in other disciplines in mathematics. Topics include topological spaces, open sets, basis for a topology, continuous functions, separation axioms, compactness, connectedness, product spaces, quotient spaces.  
Prerequisite(s): MATH 486  

MATH466 Intro Algebraic Topology  
Hours 3  
Homotopy, fundamental groups, covering spaces, covering maps, and basic homology theory, including the Eilenberg Steenrod axioms.  
Prerequisite(s): MATH 465  

MATH470 Prin Modern Algebra I  
Hours 3  
A first course in abstract algebra. Topics include groups, cyclic groups, non-abelian groups, Lagrange's theorem, subgroups, cosets, homomorphisms, isomorphisms, rings.  
Prerequisite(s): MATH 301  

MATH471 Prin Modern Algebra II  
Hours 3  
An introduction to ring theory. Topics include rings, polynomial rings, matrix rings, modules, fields and semi-simple rings. Usually offered in the fall semester.  
Prerequisite(s): MATH 470
MATH474 Cryptography
Hours 3
Introduction to rapidly growing area of cryptography, an application of algebra, especially number theory. Usually offered in the Fall semester.
Prerequisite(s): MATH 470

MATH485 Intro Complex Variables
Hours 3
Some basic notions in complex analysis. Topics include analytic functions, complex integration, infinite series, contour integration, and conformal mappings.
Prerequisite(s): MATH 227

MATH486 Introduction to Real Analysis I
Hours 3
Rigorous development of the calculus of real variables. Topics include the topology of the real line, sequences and series, limits, limit suprema and infima, continuity, and differentiation.
Prerequisite(s): MATH 301

MATH487 Introduction to Real Analysis II
Hours 3
A continuation of Math 486. Topics include Riemann integration, sequences and series of functions, uniform convergence, power series, Taylor series. Optional topics may include the Reimann-Stieltjes integration, Weierstrass Approximation Theorem and the Arzela-Ascoli Theorem, metric spaces, multi-variable calculus.
Prerequisite(s): MATH 486

MATH495 Seminar Directed Reading
Hours 1-3
Offered as needed.

MATH499 Undergraduate Research Experience
Hours 1-3
Independent or collaborative research experience in mathematics.

MDGR101 Elementary Modern Greek
FL
Hours 3
Contemporary modern Greek speaking, reading and writing. Course involves mixed self-instructional approach in the Critical Languages Center. Students are required to study the textbook and practice with assigned audio visual materials (CDs, DVDs or computer files). Students have practice sessions three hours per week with a language trainer who is a native/near-native (or superior) speaker of the language. Not repeatable without permission of the CLC director. Offered each semester.
Foreign Language

MDGR201 Intermed Modern Gr
Hours 3
Continuation of modern Greek on the intermediate level. Emphasis is on the development of reading skills and writing proficiency. Not repeatable without permission of the CLC director. Offered according to demand.
Prerequisite(s): MDGR 102

MDGR202 Intermed Modern Greek
Hours 3
Continuation of MDGR 201. Emphasis is on the development of reading skills and writing proficiency. Not repeatable without permission of the CLC director. Offered according to demand.
Prerequisite(s): MDGR 102

MLC155 Freshman Seminar
Hours 3
No description available

MS304 Marine Geology
Hours 4
Credit earned in this course may not be applied to the requirements of the biological sciences major or minor. Field sampling techniques, laboratory analysis of sediments, topography, sediments, and history of the world oceans.

MS306 Marine Biology
Hours 4
Survey of the invertebrates, vertebrates, and marine plants as communities, with emphasis on local examples.

MS308 Marine Invertebrate Zoology
Hours 4
Comparative study of the major marine invertebrate phyla, protozoa through protochordates. The focus is on their morphology, physiology, ecology, and phylogenetic relationships.

MS419 Marine Ecology
Hours 4
Bioenergetics, community structure, population dynamics, predation, competition, and specialization in marine ecosystems.

MS433 Coastal Zone Management
Hours 2
Review of ecological features, physical management policies for coastal communities, and a description of relevant federal and state programs.
MS448 Intro Oceanography
Hours 4
A general introduction to the oceans, with emphasis on chemical, physical, and geological processes and their relation to biological systems.

MS452 Marine Vertebrate Zoology
Hours 4
Systematics, zoogeography, and ecology of marine vertebrates.

MS453 Marine Botany
Hours 4
Reproduction, taxonomy, systematics, distribution, and ecology of the major marine plant groups.

MS497 Special Topics
Hours 1-4
A marine science topic not covered in other courses. The credit hours and format are determined as appropriate to the topic. Offered according to demand and instructor availability.

MUA010 Music Convocation
Hours 0
Music Convocation.

MUA100 Class Voice Beginning
Hours 1
No description available

MUA150 Symphony Orchestra
Hours 0-1
Applied Ensemble at the undergraduate level.

MUA151 Alabama Brass Choir
Hours 0-1
Applied ensemble for brass musicians. Permission of instructor is required.

MUA152 Wind Ensemble
Hours 0-1
Applied Ensemble at the undergraduate level.

MUA153 Marching Band
Hours 1
Applied Ensemble at the undergraduate level.

MUA154 Symphonic Band
Hours 0-1
Applied Ensemble at the undergraduate level.

MUA155 Trombone Choir
Hours 0-1
Applied ensemble for trombone students at the freshmen level.

MUA156 Percussion Ensemble
Hours 0-1
Applied Ensemble at the undergraduate level.

MUA157 Campus Band
Hours 0-1
Applied ensemble at the freshmen level.

MUA158 Contemp Music Ensemble
Hours 0-1
Applied Ensemble at the undergraduate level.

MUA159 Jazz Ensembles
Hours 0-1
Applied Ensemble at the undergraduate level.

MUA160 Opera Workshop
Hours 0-1
Applied Ensemble at the undergraduate level.

MUA161 Opera Production
Hours 0-1
Applied Ensemble at the undergraduate level.

MUA162 University Chorus
Hours 0-1
Applied Ensemble at the undergraduate level.

MUA163 University Singers
Hours 0-1
Applied Ensemble at the undergraduate level.

MUA164 Chamber Choir
Hours 1
The Alabama Chamber Choir is a mixed choral ensemble primarily conducted by advanced University of Alabama undergraduate choral music education students. Chamber Choir will afford all choristers the opportunity to peruse a broad spectrum of choral ensemble music, most of which will be suitable for programming in a traditional public school choral music setting. While experiencing breadth of repertoire will be a key philosophical component of Chamber Choir, high quality choral performance will drive the methodology. In that regard, student directors, through collaboration with the instructor, will prepare and conduct one selection in an authentic performance setting.

MUA166 Piano Ensemble I
Hours 0-1
Applied Ensemble at the undergraduate level.

MUA167 Jazz Combo
Hours 0-1
Applied Ensemble at the undergraduate level.
MUA168 Women's Chorus
Hours 1
Applied Ensemble at the undergraduate level.

MUA169 Chamber Music
Hours 0-1
Applied Ensemble at the undergraduate level.

MUA191 Practicum Applied Music
Hours 0-3
This course is an extension of Marching Band activities in the Fall semesters for the Spring semesters.

MUA192 Men's Chorus
Hours 1
Applied Ensemble at the undergraduate level.
MUA199 Sophomore Qualifying
Hours 0
No description available

MUA220 Class Guitar
Hours 1
Basics guitar techniques, especially accompanying self and ensembles with a variety of strumming and picking patterns relevant to music therapy clinical practice.
Prerequisite(s) with concurrency: MUS 015 or MUS 115

MUA228 Tuba and Euphonium Ensemble
Hours 1
Applied ensemble for tuba and euphonium students at the undergraduate level.

MUA231 Piano (Secondary)
Hours 0.5-1
Applied lessons for music students majoring in another discipline.

MUA232 Organ (Secondary)
Hours 0.5-1
Applied lessons for music students majoring in another discipline.

MUA233 Harpsichord (Secondary)
Hours 0.5-1
Applied lessons for music students majoring in another discipline.

MUA234 Voice (Secondary)
Hours 0.5-1
Applied lessons for music students majoring in another discipline.

MUA235 Violin (Secondary)
Hours 0.5-1
Applied Lessons for music majors of another discipline.

MUA236 Viola (Secondary)
Hours 0.5-1
Applied Lessons for music majors of another discipline.

MUA237 Cello (Secondary)
Hours 0.5-1
Applied Lessons for music majors of another discipline.

MUA238 String Bass (Secondary)
Hours 0.5-1
Applied Lessons for music majors of another discipline.

MUA239 Flute (Secondary)
Hours 0.5-1
Applied Lessons for music majors of another discipline.

MUA240 Oboe (Secondary)
Hours 0.5-1
Applied Lessons for music majors of another discipline.

MUA241 Bassoon (Secondary)
Hours 0.5-1
Applied Lessons for music majors of another discipline.

MUA242 Clarinet (Secondary)
Hours 0.5-1
Applied Lessons for music majors of another discipline.

MUA243 Saxophone (Secondary)
Hours 0.5-1
Applied Lessons for music majors of another discipline.

MUA244 Trumpet (Secondary)
Hours 0.5-1
Applied Lessons for music majors of another discipline.

MUA245 French Horn (Secondary)
Hours 0.5-1
Applied Lessons for music majors of another discipline.

MUA246 Trombone (Secondary)
Hours 0.5-1
Applied Lessons for music majors of another discipline.

MUA247 Euphonium (Secondary)
Hours 0.5-1
Applied Lessons for music majors of another discipline.

MUA248 Tuba (Secondary)
Hours 0.5-1
Applied Lessons for music majors of another discipline.

MUA249 Percussion (Secondary)
Hours 0.5-1
Applied Lessons for music majors of another discipline.

MUA250 Symphony Orchestra
Hours 0-1
Sophomore level ensemble.

MUA251 Alabama Brass Choir
Hours 0-1
Applied ensemble for brass musicians. Permission of instructor is required.

MUA252 Wind Ensemble
Hours 0-1
Sophomore level ensemble.

MUA253 Marching Band
Hours 1
Sophomore level ensemble.

MUA254 Symphonic Band
Hours 0-1
Sophomore level ensemble.

MUA255 Trombone Choir
Hours 0-1
Applied ensemble for trombone students at the sophomore level.

MUA256 Percussion Ensemble
Hours 0-1
Sophomore level ensemble.
MUA257 Campus Band
Hours 0-1
Applied Ensemble at the sophomore level.

MUA258 Contemporary Ensemble
Hours 0-1
Applied ensemble focusing on music of the 20 and 21st centuries.

MUA259 Jazz Ensemble
Hours 0-1
Sophomore level ensemble.

MUA260 Opera Workshop
Hours 0-1
Sophomore level ensemble.

MUA261 Opera Production
Hours 0-1
Sophomore level ensemble.

MUA262 University Chorus
Hours 0-1
Sophomore level ensemble.

MUA263 University Singers
Hours 1
Sophomore level ensemble.

MUA264 Chamber Choir
Hours 1
The Alabama Chamber Choir is a mixed choral ensemble primarily conducted by advanced University of Alabama undergraduate choral music education students. Chamber Choir will afford all choristers the opportunity to peruse a broad spectrum of choral ensemble music, most of which will be suitable for programming in a traditional public school choral music setting. While experiencing breadth of repertoire will be a key philosophical component of Chamber Choir, high quality choral performance will drive the methodology. In that regard, student directors, through collaboration with the instructor, will prepare and conduct one selection in an authentic performance setting.

MUA266 Piano Ensemble

Hours 1-4
Applied lessons for music majors at the sophomore level.

MUA288 Tuba (Majors)
Hours 1-4
Applied lessons for music majors at the sophomore level.

MUA289 Percussion (Majors)
Hours 1-4
Applied lessons for music majors at the sophomore level.

MUA290 Guitar (Majors)
Hours 1-4
Applied study at the sophomore level for music majors.

MUA292 Men's Chorus
Hours 1
Applied Ensemble at the undergraduate level.

MUA299 Piano Proficiency
Hours 0
No description available.

MUA328 Tuba and Euphonium Ensemble
Hours 1
Applied ensemble for tuba and euphonium students at the undergraduate level.

MUA331 Piano II (Secondary)
Hours 0.5-1
Secondary applied piano study for music education students in the third and fourth semester of piano.
Prerequisite(s): MUA 231

MUA334 Voice II (Secondary)
Hours 0.5-1
Secondary applied voice for music majors in the third and fourth semesters of taking the course.
Prerequisite(s): MUA 234

MUA350 Symphony Orchestra
Hours 0-1
Applied ensemble at the junior level.

MUA351 Alabama Brass Choir
Hours 0-1
Applied ensemble for brass musicians. Permission of instructor is required.

MUA352 Wind Ensemble
Hours 0-1
Applied Ensemble at the junior level.

MUA353 Marching Band
Hours 1
Marching Band at the junior level.
Prerequisite(s): We are simply changing this from variable hours to 1. Thank you.

MUA354 Symphonic Band
Hours 0-1
Applied Ensemble at the junior level.

MUA355 Trombone Choir
Hours 0-1
Applied ensemble for trombone students at the junior level.

MUA356 Percussion Ensemble
Hours 0-1
Applied Ensemble at the junior level.

MUS015 Music Fundamentals
Hours 3
Music Fundamentals (MUS 015) is a remedial course designed for incoming music majors and minors who require additional instruction in the rudiments of tonal music. Topics include clefs, pitches, rhythm, meter, scales, keys, intervals, and triads. Additionally, students will strengthen their musicianship skills applying the lessons to singing, listening, and playing the keyboard. Due to the elementary nature of the material, the lectures will include a fair amount of drill. Ultimately it offers a thorough preparation for the music theory sequence, which begins with Theory I (MUS 115). The class is open to non-majors if space permits.

MUS115 Theory I
Hours 4
Study of the foundations of musical materials through analysis, writing, sight-singing, dictation, and keyboard skills. Offered in the fall semester.

MUS117 Theory II
Hours 4
Study of the melodic and harmonic materials of the 18th and early 19th centuries through analysis, writing, sight-singing, dictation, and keyboard skills. Offered in the spring semester.
Prerequisite(s): MUS 115 with the grade of C- or better.
MUS121 Intro To Listening
FA
Hours 3
Credit earned in this course may not be applied to a major program in the School of Music. The course presupposes no musical training on the student’s part. Emphasis is on what to listen for in music.

Fine Arts
MUS150 Songwriting Techniques and Analyses
Hours 3
Musical components of songs will be analyzed and compared with songwriting literature; students will sing and perform songs and song concepts on musical instruments.
Prerequisite(s): 1) Ability to demonstrate basic performance skill on at least one musical instrument (preferably chordal such as keyboard, guitar, banjo, mandolin, ukulele, etc.). 2) Ability to locate and identify letter names of pitches on chosen instrument.

MUS155 Discover Your Inspiration
Hours 3
Imagine if you could turn on creativity like a car: rev the engine, cruise in the fast lane and park it until you need it again. Creativity really means perspiration x inspiration. You are not born with it, you have to cultivate it. This course will give you the tools to see all the possibilities around you as you begin your studies at the University of Alabama.

MUS161 Oboe Reedmaking
Hours 1
Independent laboratory instruction in oboe reedmaking. Up to four semesters of MUS 161 may be counted toward the degree.

MUS180 Intro Music Therapy
Hours 2
The purpose of this course is to study music as a human behavior and gain an overview of the use of music with various age groups and populations.
Prerequisite(s) with concurrency: MUS 015 or MUS 115

MUS181 Music Therapy Practicum
Hours 1
Supervised music therapy clinical work with older adults and observation of music therapy sessions in the community.
Prerequisite(s): MUS 180 and MUA 220 with a grade of C- or better.
Prerequisite(s) with concurrency: MUS 280.

MUS182 Obsrv Orient Mu Therapy
Hours 2
The purpose of this course is to apply principles of human behavior to clinical settings, with an emphasis on measuring client outcomes.
Prerequisite(s): MUS 180 with a grade of C- or better.

MUS215 Theory III
Hours 4
Study of musical materials and forms from the early to mid-19th century. Analysis, writing, sight-singing, dictation, and keyboard skills appropriate to the musical materials studied. Offered in the fall semester.
Prerequisite(s): MUS 117 with grade of C- or better.

MUS217 Theory IV
Hours 4
Study of musical materials and forms from the mid- to late 19th century. Analysis, writing, sight-singing, dictation, and keyboard skills appropriate to the musical materials studied. Offered in the spring semester.
Prerequisite(s): MUS 215 with grade of C- or better.

MUS219 Composition I
Hours 2
Basic techniques of musical composition.

MUS220 Composition II
Hours 2
A continuation of Composition I. Basic techniques of musical composition.

MUS228 Jazz Piano Jazz Theory I
Hours 1
Introduction to theoretic principles of jazz and application on the piano, including definition and applications of chords and scales, progressions, chord substitution principles. Offered in the fall semesters of even-numbered years.

MUS229 Jazz Piano And Theory II
Hours 1
Continuation of MUS 228. Focus on modes, synthetic scales, altered extensions, and other extended techniques of the jazz idiom. Offered in the spring semesters of odd-numbered years.

MUS230 Improvisation I
Hours 1
Theoretical and applied study of the tonal and rhythmic elements used in developing improvisational skills in jazz, rock, and pop media. Offered in the fall semesters of odd-numbered years.

MUS231 Improvisation II
Hours 1
Continuation of MUS 230. Designed to develop advanced improvisational skills in the jazz idiom. Offered in the spring semesters of even-numbered years.

MUS240 Piano Pedagogy
Hours 2
Study of teaching principles, methods, and materials; includes microteaching and observation. Offered in alternate spring semesters.

MUS241 Organ Pedagogy
Hours 2
This course investigates materials, methods and techniques for teaching the beginning organ student.

MUS244 String Pedagogy
Hours 2
Materials and methods for teaching string players in the early grades (both studio and class instruction). Offered according to demand.
MUS250 Music In World Cultures  
FA  
Hours 3  
Study of music in non-Western traditions (Africa, India, Japan, Indonesia, etc.).  

Fine Arts  

MUS251 Music History I  
Hours 3  
History of music from the ancient Greeks through the end of the 17th century, with emphasis on critical analysis of musical, historical, and cultural contexts. Offered in the fall semester.  
Prerequisite(s): MUS 250 (passing with a D- or better) MUS 117 (passing with a C- or better)  

MUS252 Music History II  
Hours 3  
History of music in the 18th and early 19th centuries, with emphasis on critical analysis of musical, historical, and cultural contexts. Offered in the spring semester.  
Prerequisite(s): MUS 251  

MUS254 Diction For Singers I  
Hours 3  
Introduction to the International Phonetic Alphabet; study and practice of Italian and English diction. Offered in alternate years.  

MUS255 Diction For Singers II  
Hours 3  
Study and practice of German and French diction. Offered in alternate years.  

MUS280 Music Therapy Repertoire and Skill Proficiency  
Hours 2  
The purpose of this course is to learn the wealth of folk, popular, and recreational music of the main segments of American culture, as well as develop polished singing and accompanying skills needed for competent performance as a music therapist. Students will also be introduced to other music therapy interventions.  
Prerequisite(s): MUS 182 with a grade of C- or better and MUA 220 with a grade of C- or better.  
Prerequisite(s) with concurrency: MUS 282  

MUS281 Music Therapy Techniques  
Hours 2  
Learn to develop specific therapeutic experiences (singing, movement, rhythm, relaxation, lyric analysis, lyric rewrite, etc.) for each age group (infancy through older adults) as well as for specific populations. By the end of the semester students will have acquired the skills necessary for MUS 382.  
Prerequisite(s): MUS 280 with a grade of C- or better.  
Prerequisite(s) with concurrency: MUS 282  

MUS282 Music Therapy Practicum  
Hours 1  
The purpose of this course is to offer the music therapy student experience in facilitating music therapy sessions at a local agency which serves a specific population and to observe other populations in music therapy sessions. Across the two semesters students will develop group leadership skills in singing and accompanying with guitar, build a repertoire of appropriate songs for this population, and practice appropriate interaction skills with those served, their families, the staff, classmates, and the professor.  
Prerequisite(s): MUA 220 with a grade of C- or better and MUS 182 with a grade of C- or better.  

MUS283 Observation and Orientation to Music Therapy  
Hours 2  
The purpose of this course is to apply principles of human behavior to clinical settings, with an emphasis on measuring client outcomes.  
Prerequisite(s): MUS 281 with C- or better.  
Prerequisite(s) with concurrency: MUS 282  

MUS300 Intro Music Theory Research  
Hours 2  
An introduction to scholarly research for students who plan academic careers as musical theorists.  
Prerequisite(s): Permission of the Instructor of record.  

MUS301 Concepts, Techniques, and Philosophy of Improvisation Through Music  
Hours 2  
A course in the practicality/functionality of music improvisation, including philosophical aspects of improvisation in all the arts and the relationship to other non-arts related disciplines.  

MUS303 16th Cent Counterpoint  
Hours 3  
Practical study, through analysis and composition, of vocal polyphony as developed in the 16th century. Offered in the spring semester of odd numbered years.  
Prerequisite(s): MUS 117  

MUS304 18th Cent Counterpoint  
Hours 3  
The 18th-century style of counterpoint as developed by Bach. Offered in the fall semester.  
Prerequisite(s): MUS 215  

MUS307 Form And Analysis  
W  
Hours 3  
Complete survey of the forms of composition, beginning with phrase and period and covering large forms such as rondo, sonata, concerto, and fugue. Writing proficiency within this discipline is required for a passing grade in this course. Offered in the spring semester.  
Prerequisite(s): MUS 217  
Writing
MUS310 Arranging
Hours 3
Basic jazz arranging techniques for small ensembles. Offered in the fall semester.

MUS312 Intermediate Arranging
Hours 3
Continuation of MUS 310 (Arranging). Emphasis on writing for the big band and mixed media instrumentation, focusing on extended arranging techniques. Offered in the spring semester.

MUS315 Mus Management Activity
Hours 2
Practical consideration of all aspects of concert production and administration for musicians and music business people.

MUS316 Careers In Music
Hours 2
Exploration of careers in concert and commercial music for musicians and others. Offered spring semester.

MUS319 Composition III
Hours 3
Projects in musical composition.

MUS320 Composition IV
Hours 3
Projects in musical composition.

MUS323 Music History III
W
Hours 3
History of music in the 19th and 20th centuries, with emphasis on critical analysis of musical, historical, and cultural contexts. Writing proficiency within this discipline is required for a passing grade in this course. Offered in the fall semester.

Prerequisite(s): MUS 252

Writing

MUS324 Practical Skills and Concepts for the 21st Century Musician
Hours 2
The course will provide information designed to challenge (student's) concepts of change, leadership and creativity. Concepts which are 21st century necessities. Practical steps of implementation in these 3 areas will be offered through mini-internships in the SOM. In particular through activities involving the SOM Concert Hall, Recital Hall, Music Services, The TSO, the modern applied studio, Arts Council and the Alys Stephens Center. Students will learn how to work with others; focus on the underbelly of performance; value the necessary stream of activity needed for a successful production. Such "productions" may include developing an idea, running a meeting, producing an event or a concert, write/speak about music and the arts.

MUS325 Orchestration I
Hours 3
Basic instrumentation and writing for ensembles and orchestra. Offered in the fall semester of even-numbered years.

Prerequisite(s): MUS 215

MUS326 Arts Venues Management
Hours 2
Through course readings, lectures, guest presentations, and hands-on experience students will learn the roles and operations of arts and music venues. This class is a combination of practical work and classroom lectures. The class will be held at several local venues, the primary one being the Tuscaloosa Amphitheater. Other venues include Tuscaloosa River Market, Mildred Westervelt Warner Transportation Museum, Bama Theatre and UA venues.

Prerequisite(s): Junior status or permission of instructor

MUS327 Studies Special Literature
Hours 3
Thorough study of topics not included in the curriculum. Offered according to demand.

MUS331 Jazz Symposium
Hours 3
No description available

MUS332 Experimental Music
W
Hours 3
This course will introduce you to a variety of theories and practices of musical experimentalism in a global context. We will begin defining what experimental music is - what is the impulse that drives some artists to push outside the realms of their traditions, or even outside what is normally called music? Rather than limiting our view to experimentalism in Western art music, as has largely been the case in surveys of this subject, we will also listen to and study experiments in jazz, rock, hip hop, reggae and other global musics to put the experimentalist aesthetic in a broad historical and cultural context. In addition to critical reading, discussion and listening we will perform experimental music compositions to encourage a "hands-on" engagement with the subject. Writing proficiency is required for a passing grade in this course.

Writing

MUS333 Service Playing
Hours 3
No description available

MUS334 Service Playing
Hours 3
No description available

MUS335 Accompanying Class
Hours 2
Survey of accompanying techniques and of the standard repertoire in the vocal, string, and wind areas. Experience is gained through assigned projects and/or assigned studio accompanying. Offered in the spring semester of even-numbered years.
MUS340 Intro Recording Technique
Hours 3
Exploration of the basics of the art of sound recording. Emphasis on the mixing console, microphone placement, effects, recording basic tracks, and mixdown.

MUS344 String Pedagogy
Hours 2
No description available

MUS351 Fund Of Conducting
Hours 2
Introduction to the basic techniques of conducting with emphasis on the understanding and control of music materials. Offered in the fall semester.

MUS365 Legal Issues in the Arts
Hours 3
This course will explore a broad range of legal topics pertinent to the arts, including: copyright, trademark, contracts, management of employees, union issues, advertising and 501 (c)(3) non-profit status.
Prerequisite(s): MUS 115 and MUS 117

MUS380 Intro Psychology Music
Hours 3
Basic study of acoustics, the ear and hearing, and the psychosociophysiological processes involved in musical behavior.
Prerequisite(s): MUS 281 and MUA 199

MUS382 Music Therapy Practicum
Hours 1
Supervised music therapy experience in local facilities.

MUS401 Film Scoring I
Hours 3
A study of the art of scoring music for films. Emphasis will be placed on the short jingle and the technical aspects of film scoring. Offered in the fall semester.

MUS402 Film Scoring II
Hours 3
Continuation of MUS 401. Emphasis will be placed on writing the extended film score by analysis of psychological impact, orchestration techniques, etc. Offered in the spring semester.

MUS403 Advanced Counterpoint
Hours 3
The writing of fugue, variation, ground-bass, and canon. Offered in the SPRING semesters of EVEN-numbered years.
Prerequisite(s): MUS 304 or permission of the instructor.

MUS405 Studio Tech Arrang Orchs
Hours 3
Continued development of arranging and orchestrating techniques in both jazz and commercial settings, with an emphasis on the studio orchestra, MIDI instrumentation, and vocal groups.

MUS406 Keyboard Techniques
Hours 2
Applied survey of figured bass, choral open-score reading, transposition, and harmonization. Offered in the fall semesters of odd-numbered years.

MUS407 Marketing the Arts
Hours 2
Marketing the Arts will provide students with a general overview of communications including public relations, advertising, marketing and new media. Through readings, discussions, quizzes, an examination and a final group presentation students will develop an understanding of marketing practices involved in promoting an arts organization. Emphasis will be on not-for-profit organizations, community theatres and symphony orchestras.

MUS412 Digtl Syn Of Elec Mus
Hours 3
Instruction in the design and utilization of sound-generating computer programs. Offered in the fall semester of even-numbered years.

MUS414 Tech Electronic Music II
Hours 3
Utilization of digital synthesizers and advanced studio techniques. Offered in the spring semesters of even-numbered years.

MUS418 Schenkerian Analysis
Hours 3
Study of pitch structure in tonal compositions as revealed by Heinrich Schenker and his followers. Offered in the fall semesters of odd-numbered years.
Prerequisite(s): MUS 307 with a grade of C- or better

MUS419 Composition V
Hours 3
Projects in composition.
Prerequisite(s): MUS 320 with a grade of C- or better

MUS420 Composition VI
Hours 3
Projects in composition.
Prerequisite(s): MUS 419 with a grade of C- or better

MUS426 Analysis 20th Cent Music
Hours 3
Survey of a variety of technical approaches to composition in the 20th century and such organizing techniques as harmony, voice leading, textural design, form, and orchestration. Offered in the fall semesters.
Prerequisite(s): MUS 307 with a grade of C- or better

MUS427 Studies In Special Lit
Hours 3
Thorough study of topics not included in the curriculum. Offered according to demand.

MUS431 Organ Design
Hours 2
This course is a study of the basic components of pipe organ design and construction, with a consideration of some of the aesthetic, tonal, and physical aspects of organ installations in a church, home, or concert hall.
MUS444 Vocal Pedagogy
Hours 2
Introduction to the concepts, methods, and materials essential to effective teaching of the singing voice. Offered in alternate years.

MUS447 Teaching Choral Music Publ Sch
Hours 3
The scope, organization, and administration of choral programs in public schools. Includes analysis of teaching techniques and materials appropriate to specific levels of development. Offered in the fall semester.

MUS448 Tchng Instrumental Music Pub S
Hours 3
Problems encountered in the development of instrumental programs in public schools; analysis of beginning method books for heterogeneous and homogeneous groups; and development of a course of study to guide the new teacher. Offered in the fall semester.

MUS461 History/Literature Jazz
Hours 3
History of the development of jazz to the present, from its African roots to its American florescence. Particular attention is paid to early styles and forms.

MUS471 Lit Of The Piano
Hours 2
Survey of the important solo repertoire from Bach through Schubert. Examination of the development of keyboard technique from the time of the harpsichord through the time of the early piano. Offered in the fall semesters of even-numbered years.

MUS472 Lit Of The Piano
Hours 2
Survey of the important solo repertoire from the early Romantic era through the present. Examination of the development of piano technique from Chopin and Liszt through Cage and Crumb. Offered in the spring semesters of odd-numbered years.

MUS473 String Literature
Hours 2
Study of the standard repertoire for bowed instruments, from the Baroque period to the present.

MUS474 Song Literature
Hours 3
Survey of the performance criteria and historical significance of the solo song literature of the United States, the British Isles, Germany, Austria, France, and Italy. Performance and class participation are required. Offered in alternate years.

MUS475 Song Literature
Hours 3
Survey of a variety of technical approaches to composition in the 20th century and such organizing techniques as harmony, voice leading, textural design, form, and orchestration. Offered in the fall semesters.

MUS477 Organ Literature
Hours 2
Survey of Organ Literature and Advanced Survey of Organ Literature is a course available to upper class organ majors and graduate students, as well as others with the permission of the instructor. MUS477/577 is a survey of organ literature from the 14th century into the 18th century.

MUS478 Organ Literature
Hours 2
Continuation of MUS 477. Offered in spring of odd numbered years.

MUS480 Music in Therapy I
W
Hours 3
Study of mental health diagnoses as well as various therapeutic techniques and systems in music therapy using a hypothetical mode of inquiry. Writing proficiency within this discipline is required for a passing grade in this course.
Prerequisite(s): MUS 380 with a grade of C- or better.
Prerequisite(s) with concurrency: MUS 382 Writing

MUS481 Music Therapy II
Hours 3
The purpose of this course is to study the needs of the aging population as well as medical diagnoses of all age groups, including evidence-based practice in music therapy.
Prerequisite(s): MUS 480 with a grade of C- or better.
Prerequisite(s) with concurrency: MUS 382

MUS482 Music Therapy III
Hours 3
Music therapy for children, adolescents, and adults with disabilities in self-contained and inclusive settings.
Prerequisite(s): MUS 481 with a grade of C- or better.
Prerequisite(s) with concurrency: MUS 382

MUS487 Sem Prof Pract Mu Therp
Hours 2
Study of clinical administration, supervision, ethics, and professional behavior.

MUS488 Comprehensive Exam in Music Therapy
Hours 0
The purpose of this exam is to prepare students for success in the music therapy workforce via the CBMT Self-Assessment Examination and a comprehensive written exam covering material from all music therapy coursework.
Prerequisite(s): Completion of all courses with C- or higher for MUS 180, MUS 182, MUS 280, MUS 281, MUS 282, MUS 380, MUS 480, and MUS 481.
Prerequisite(s) with concurrency: MUS 382 and MUS 482 with a C- or higher.
MUS489 Music Therapy Internship  
**Hours 6**

Music therapy internship through a university affiliation or national roster site. Student must accumulate 1200 clinical training hours, in which 900 hours or more take place during the internship.

Prerequisite(s): Completion of all music therapy courses with a grade of C- or better higher for MUS 180, MUS 182, MUS 280, MUS 281, MUS 282, MUS 380, MUS 382, MUS 480, MUS 481, and MUS 482. Passing MUS 488.

MUS490 Raising Money Dev Arts  
**Hours 2**

Theories and techniques of securing funds for nonprofit organizations, including donor cultivation and grant preparation. Offered in the fall semester.

MUS492 Choral Conducting  
**Hours 2**

Continuation of MUS 351 with emphasis on the problem of the choral ensemble. A study of rehearsal technique, vocal problems, diction, score analysis, style, and choral literature. Offered in the spring semester.

MUS494 Band Conducting  
**Hours 2**

Continuation of MUS 351 with emphasis on the problem of the wind ensemble. A study of baton technique, score reading, rehearsal procedure, and band literature. Offered in the spring semester.

MUS496 Music Administration Internship  
**Hours 3-6**

A minimum of one semester of internship with the following recommended host organizations: (1) a performing arts organization, (2) a community, state, or regional arts council, (3) a performing arts venue, (4) a musical festival or (5) a reputable recording studio. The internship must have the approval of and will be under the supervision of the Music Administration Coordinator.

MUS497 Senior Project  
**Hours 1**

Required of all BA students in music (music and music administration): A substantial paper on a topic approved by the faculty advisor and completed in consultation with the advisor and examined by a faculty committee. In administration: a supervised practicum arranged through the advisor.

MUS498 Indep Research In Mus  
**Hours 1-6**

*No description available*

NEW100 Intro Interdisc Integrativ Stdy  
**FCMP**  
**Hours 1-2**

Designed to help New College students become more informed about the University and about New College so that they may maximize their opportunities in their undergraduate programs through New College. Enrollment is limited to New College students.

NEW120 Inclusive Leadership Through Sustained Dialogue  
**Hours 1**

In an increasingly globalized world, leaders need the skills to resolve conflict across difference. Sustained Dialogue is a five-stage dialogue-to-action model that requires participants to take the time to focus first on transforming change-blocking relationships, and then on solving problems. This course will explore the theory behind this innovative model and ultimately consider how Sustained Dialogue applies to visions for positive change at the University of Alabama. Participants will receive an introduction to the Sustained Dialogue model and then meet in dialogue groups weekly to work through the 5 stages to address specific issues on campus.

Prerequisite(s): NONE

NEW122 Academic Potential  
**Hours 2**

This course will help students develop practical and efficient strategies for learning in order to succeed in college. Students will learn skills to improve note taking, listening, textbook reading, and time management; as well as methods to reduce test anxiety and improve concentration. Discussion of campus resources and learning styles will also be included in this course.

Prerequisite(s): none

NEW140 Sexuality and Society  
**SB**  
**Hours 3**

American society today features more cultural acceptance and legal protection than ever before for sexual and gender diversity, but we don’t always know how to live out these changing norms and how to talk about controversial sexual material in the public sphere. This course engages debates around sexuality as central to human behavior and to social structures, in both America and the world. It provides an overview of the “new sexual revolution” and the growing interdisciplinary field of sexuality studies. The course adopts a consent-based model of sexual wellbeing. Its approach is sex-positive—aiming toward sexual justice, responsibility, and pleasure—within a classroom that functions as an open and affirming space for discussion and learning. Students gain the knowledge, critical thinking skills, and cultural competence to evaluate for themselves issues of sexuality in society.

Social and Behavioral Sciences

NEW201 Recreation For Life  
**Hours 1**

In this course (designed by the student and his or her advisor using the out-of-class learning contract), the student agrees to participate in some form of physical activity that might result in a lifelong interest. These include jogging, swimming, cycling, etc. This course will frequently include a reading requirement relating to the activity.

NEW211 Perspectives in the Humanities  
**HU**  
**Hours 4**

Introductory course in the humanities (art, literature, music, etc.) with a focus on problem solving, risk taking and communication. Human behavior and writing skills are stressed.
NEW212 Creativity  
FA, HU  
Hours 4  
This interdisciplinary seminar uses creativity as an organizing principle. Human culture and consciousness are explored through reading, writing, the arts, projects, studios, and discussion.  
Fine Arts, Humanities  

NEW213 Honors Creativity  
FA, HU, UH  
Hours 4  
This honors interdisciplinary seminar uses creativity as an organizing principle. Human culture and consciousness are explored through reading, writing, the arts, projects, studios, and discussion.  
Fine Arts, Humanities, University Honors  

NEW215 Perspec. on Env. Literature  
HU  
Hours 4  
Considers perspectives on environmental studies within the humanities by examining key texts of environmental literature.  
Humanities  

NEW223 McNair Scholar'S Seminar  
Hours 1  
To provide knowledge and skills in a variety of areas to strengthen personal, academic, and research competencies vital to success in graduate programs.  

NEW226 Organic Farming  
Hours 4  
An intensive, hands-on course in organic farming taught at a local working farm. Covers the basics of organic farming while also addressing questions about organic versus industrial agriculture models in relation to current environmental problems and solutions.  

NEW230 Environmental Studies  
Hours 4  
This course engages students in the study of environmental problems and solutions. It includes an examination of fundamental assumptions about the ethical human-nature relation and of how to value nature. The approach is interdisciplinary, drawing on the humanities, social sciences, and natural sciences.  

NEW237 Cooperation & Conflict  
SB  
Hours 4  
This seminar explores cooperation and conflict in human societies; all that we do or fail to do in living together effectively. Students investigate and seek solutions for contemporary social problems.  
Social and Behavioral Sciences  

NEW238 Honors: Coop. & Conflict  
SB, UH  
Hours 4  
This honors seminar explores cooperation and conflict in human societies -- all that we do or fail to do in living together effectively. Students investigate and seek solutions for contemporary social problems. This course has a service learning component that involves 12 service learning hours outside of class time.  
Social and Behavioral Sciences, University Honors  

NEW243 Interdisciplinary Sciences  
N  
Hours 4  
This seminar demonstrates how the nature of the laboratory experience plays an essential role in the understanding and advancement of science. Several multidisciplinary experiments are performed in geology, chemistry, physics, and biology.  
Natural Science  

NEW270 Leader Soc Justice Activism  
Hours 3  
No description available  

NEW273 Social Issues & Ethics  
SB  
Hours 4  
This seminar is designed to develop an awareness of the methodologies and concerns of the social sciences as they relate to ethical inquiry. The primary focus is on the nature of inquiry and models for the analysis of ethical issues confronting the modern world. Students will explore the complexity of moral dilemmas and effective societal responses to competing moral obligations in the areas of health care, socio-economic disparities, affirmative action, immigration, and racism.  
Social and Behavioral Sciences  

NEW300 Outdoor Leadership  
Hours 3  
The goal of this course is to prepare students to successfully and safely plan and lead small group excursions into wilderness, backcountry, and front-country outdoor areas using various outdoor recreational activities as a medium. There will also be an emphasis placed on teaching technique and presentation skills as students will be required to present information to the class.  
Prerequisite(s): none
**NEW310 Independent Study**  
*Hours 1-12*

A student desiring to pursue an academic interest for which no University class is available may plan his or her own "course" through Out-of-Class Learning. A contract, or agreement, with New College is prepared by the student, in which the student identifies a variety of features of the proposed study: its goals and objectives, the methodology and resources to be employed in the attempt to meet the goals and objectives, and the procedure by which the study will be evaluated upon its completion. The process of preparing the contract should be in cooperation with the New College office, from which contract forms may be procured, and with a faculty member or other authority qualified to assist and assess the study. Credit hours awarded for Out-of-Class Learning are available, relative to the breadth or depth of the study, and subject to approval of the advisor to the study and director of the New College.

**NEW311 Independent Study**  
*Hours 1-12*

**NEW314 Independent Study**  
*Hours 1-12*

A student desiring to pursue an academic interest for which no University class is available may plan his or her own "course" through Out-of-Class Learning. A contract, or agreement, with New College is prepared by the student, in which the student identifies a variety of features of the proposed study: its goals and objectives, the methodology and resources to be employed in the attempt to meet the goals and objectives, and the procedure by which the study will be evaluated upon its completion. The process of preparing the contract should be in cooperation with the New College office, from which contract forms may be procured, and with a faculty member or other authority qualified to assist and assess the study. Credit hours awarded for Out-of-Class Learning are available, relative to the breadth or depth of the study, and subject to approval of the advisor to the study and director of the New College.

**NEW315 Independent Study**  
*Hours 1-12*

Credit hours awarded for Out-of-Class Learning are available, relative to the breadth or depth of the study, and subject to approval of the advisor to the study and director of the New College.

NEW332 Experimental Music  
W  
Hours 3

This course will introduce you to a variety of theories and practices of musical experimentalism in a global context. We’ll begin by defining what experimental music is – what is the impulse that drives some artists to push outside the realms of their traditions, or even outside what is normally called music? Rather than limiting our view to experimentalism in Western art music, as has largely been the case in surveys of this subject, we will also listen to and study experiments in jazz, rock, hip hop, reggae and other global musics to put the experimentalist aesthetic in a broad historical and cultural context. In addition to critical reading, discussion and listening we will perform experimental music compositions to encourage a “hands-on” engagement with the subject. Writing proficiency is required for a passing grade in this course.

Prerequisite(s): N/A

Writing

NEW333 CIEL Internship  
Hours 9-15

This course serves as the course students register for as part of the exchange program with the Consortium for Innovative Environment in Learning. Students pay tuition to UA but actually study as a full-time student at one of the 12 CIEL sister institutions.
NEW334 Everyday Forestry in Alabama  
Hours 3

This course will prepare students to understand natural resource practices to better manage one’s woodlands in a rural or urban situation. This course is for any student interested in basic forestry management techniques and should serve future home and land owners, individuals interested in conservation issues, and as an introduction to a broader field for students with professional interest in forestry or environmental studies. This course will discuss basic forest management concepts in order to improve the woodland’s habitat according to the objectives of a landowner. Students will learn how to identify all major tree species in Alabama as well as all major forest insects and diseases. Other topics that will be discussed will include compass and pacing, forest site evaluation, timber estimation, topographic map interpretation, and invasive woodland species. This course does not presuppose any previous knowledge and no prerequisite is required. Much of this course will include “hands-on” outdoor field trips.

Prerequisite(s): None

NEW335 Everyday Wildlife In Alabama  
Hours 3

The goal for this course is to prepare students to understand creative uses of managing wildlife species according to management objectives. This course is intended for any student interested in basic wildlife management techniques and should serve future home and land owners, individuals interested in conservation issues, and as an introduction to a broader field for students with professional interest in environmental studies or natural resources. This course does not presuppose any previous knowledge and no prerequisite is required.

Prerequisite(s): none

NEW336 Everyday Wildlife In Alabama  
Hours 3

The purpose of this course is to prepare and encourage students to incorporate the principles of sustainability and the ethics of permaculture into their home or apartment landscape. This course is intended for any student interested in learning the basics of sustainable gardening, water management, pest management, and the use of native plants to provide a backyard habitat for birds and wildlife. No prerequisite is required.

Prerequisite(s): none

NEW337 Designing and Maintaining a Sustainable Home Landscape  
Hours 3

This workshop provides students with practical experience in writing and publishing a special interest publication, the New College Review. Students gain experience in thematic approaches to a publication, concept formation for an audience, socially responsible publishing, and writing and editing persuasive essays. Students are strongly encouraged to take both.

NEW338 New College Review I  
Hours 2

This workshop provides students with practical experience in writing and publishing a special interest publication, the New College Review. Students edit, design, and distribute the New College Review. Students are strongly encouraged to take both NEW 338 and NEW 339 in sequence.

NEW339 New College Review II  
Hours 2

This workshop provides students with practical experience in writing and publishing a special interest publication, the New College Review. Students edit, design, and distribute the New College Review. Students are strongly encouraged to take both NEW 338 and NEW 339 in sequence.

NEW342 Social Action and Performance  
Hours 3

Social Action and Performance is open to all students. The course uses an interdisciplinary approach to the world of theatrical performance and explores the work of Augusto Boal and Theatre of the Oppressed model as a mechanism for social change. The course will train students to educate their peers through performance about interpersonal violence and contemporary issues of multiculturalism on campus. Students will use improvisation, participatory activities, readings, and assessments to engage in social action. Students are encouraged to participate in self-exploration with respect to the issues mentioned above as part of their trainings with these techniques. Students who participate in this course will become official members of the theatre troupe called Unscripted.

Prerequisite(s): (EN 101 and EN 102) or EN 103

NEW360 Sound Studies  
W  
Hours 3

How do we experience, define, use and abuse sound? What elements of a sound determine their meaning to us, and why? What can we learn about the world by focusing on its sounds? An emerging interdisciplinary field of research, sound studies asks these questions and more, in an attempt to uncover the important role of sound in our lives. Why do shopping malls sound like they do? What do cellphone ringtones tell you about a person? How has the changing soundscape of the ocean affected natural processes and wildlife? Why do clocktower bells ring? How is music used to both soothe, entertain, and torture or control people? This interdisciplinary course explores sound in a variety of current and historical global contexts — of which music is only one small part — examining the many ways sound signifies and defines our cultures and histories.

Prerequisite(s): N/A

NEW361 Handmade Sounds: A Hands-on History of Electronic Music  
Writing  
Hours 4

Did you know you can make electronic music with credit cards? Old toys? 30-cent circuit boards? This course will teach you to build your own electronic orchestra from scratch while also exploring the history of electronic music, with a special focus on tinkering experimenters that created electronic music using self-made instruments. Through a combination of theory and practice, you will learn about electronic music’s pioneers, recreating some of their early experiments to experience this history with your own hands and ears. We will explore the construction of a variety of simple electronic instruments, learn to play them, and perform a concert at the end of the term. No previous musical or technical experience is required, but there will be a significant amount of hands-on work with tools and wires in addition to the usual course load of reading, writing and discussion, so an interest in working with technology is a must. Each day of the course we will discuss the work of historical figures in electronic music followed by a laboratory period of hands-on exploration and creation. You are required to write 10 500-word essays articulating your response to the course materials. Writing proficiency within this discipline is required for a passing grade in this course.

Prerequisite(s): N/A
NEW365 Introduction to Environmental Policy
Hours 3
