CHEMISTRY, BS

Students pursuing a degree in chemistry typically have interests in science and/or the health professions. The chemistry BS degree is suitable for students who are primarily interested in attending a health professional school upon graduation.

Admission into the Major

Students are expected to formally declare a major no later than the fourth semester of full-time enrollment (or at 61 semester hours for transfer students). Students can declare a major by completing the Change of Major/Minor Application online under the Student tab of myBama.

Special Opportunities

Students pursuing this track may participate in Student Affiliates of the American Chemical Society, the National Organization for the Professional Advancement of Black Chemists and Chemical Engineers, and Gamma Sigma Epsilon, as well as the pre-medical organizations.

Pre-health Professional Preparation

Students completing chemistry BS degree will have fulfilled all chemistry, biology, math, and physics requirements for admission to pre-health professional programs (medical, dental, optometry, pharmacy, veterinary, etc., schools).

Undergraduate Research

The Department of Chemistry and Biochemistry offers two undergraduate research courses designed to provide students with a hands-on experience at the forefront of chemistry. These courses include:

<table>
<thead>
<tr>
<th>Code and Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CH 396 or CH 398 or CH 399</td>
<td>2-6</td>
</tr>
<tr>
<td>CH 497 or CH 498 or CH 499</td>
<td>2-6</td>
</tr>
</tbody>
</table>

In each course, students work directly with a faculty member on a research project. Chemistry majors and minors and students with an interest in chemistry are encouraged to become involved in undergraduate research through these courses. Students should get approval from the faculty mentor before registering for a research course. Students may find descriptions of faculty research interests on the Department of Chemistry website. Students may contact potential research mentors directly or seek advice on possible mentors from their academic advisors.

Students earning the bachelor of science (BS) degree with a major in chemistry must complete all University, College and departmental degree requirements. These include the general education requirements, the following major requirements, all requirements for an approved minor and other sufficient credits to total a minimum of 120 applicable semester hours.

Grade Point Average

A 2.0 grade point average in the major is required for completion of the degree. Please see the Grades and Grade Points section of this catalog for an explanation on grade point average calculations.

Upper-level Residency

A minimum of 12 hours of 300- and 400-level courses in the major must be earned on this campus.

Required Minor

The major in chemistry (BS) degree requires a minor.
Prerequisites
Prerequisites for all CH courses at the 300- and 400-level must be passed with a minimum grade of C-.

Additional Major Requirements
Students are responsible for ensuring that they have met all University, College, major and minor requirements. However, each student must meet with an adviser in the major department for academic planning and to be approved for registration each semester. College advisers are also available for additional assistance with minor, College and University requirements.

The BS in chemistry degree prepares students for a wide range of career opportunities in chemistry and biochemistry, as well as related sciences (toxicology, forensics, environmental science) and for admission to health professional programs in fields such as medicine, dentistry, pharmacy, and veterinary science.

Types of Jobs Accepted
Recent graduates have gone on to enroll in health professional programs leading to careers as doctors, pharmacists, dentists, and veterinarians, or in graduate programs in chemistry or related fields. Chemistry graduates also take jobs directly after graduating in the chemical industry as technicians or quality control scientists, as high school teachers, or in related fields where they can use their chemistry background, such as pharmaceutical sales, patent law, or technical writing.

Jobs of Experienced Alumni
Academic careers, Physicians, Dentists, Pharmacists, Industrial researchers, Entrepreneurs.
