

# ENERGY, MINOR

---

The Department of Mechanical Engineering has a strong Thermofluids Systems (TFS) group that is research active with wide expertise in thermal and energy systems including clean, renewable and sustainable energy as well as energy management. This Energy minor will educate students in the TFS domain of Energy and will be accessible to non-ME students, e.g., Electrical Engineering, Computer Science, Chemical Engineering, Aerospace Engineering, Mathematics and Physics to just name a few. Students going through this minor will be prepared to enter a diverse and globally competitive workforce with interdisciplinary knowledge that can meet next-generation challenges relating to energy.

Energy production and utilization, and their effect on our environment, are the pressing issues of our age. Satisfaction of growing energy demand, in the face of declining conventional (petroleum and coal, for example) resources represents a challenge for the coming generations. This minor in Energy will prepare engineers-of-tomorrow to meet this challenge. The University of Alabama possesses significant strength in these areas, and there is a significant demand for students.

This program is technical in nature and is designed to provide engineers, technicians, and policymakers with the depth of knowledge required to analyze a variety of challenging energy problems. This minor is open to all students interested in energy production and utilization but is most accessible to students in the College of Engineering. Students from other engineering disciplines, or from other colleges, can complete the minor, but may require additional coursework.

The minor in Energy required a minimum of 18 hours of coursework.

<b>Code and Title</b>	<b>Hours</b>
<b>Required Coursework:</b>	<b>9-10</b>
ECE 225 or Electric Circuits	
ECE 320 Fundmtl Electrical Engr	
ME 215 Thermodynamics I	
ME 309 Heat Transfer	
<b>Approved Electives:</b>	<b>9</b>
Additional courses may be added to the list of approved electives as appropriate with advisor and faculty approvals.	
ECE 350 Electric Power & Machines	
ME 406 Thermal Power Systems	
ME 407 Heatg Ventilat Air-Condg	
ME 411 Cmp Heat Transfer & Fluid Flow	
ME 414 Principles of Combustion I	
ME 416 Energy Conservtn & Manag	
ME 417 Sustainable Energy	
ME 426 Internal Combustion Engines	
ECE 453 Power Systems & ECE 454 and Power Systems Laboratory	
ECE 455 Electromechanical Systems	
<b>Total Hours</b>	<b>18-19</b>
